Los Angeles Department of City Planning RECOMMENDATION REPORT

CULTURAL HERITAGE COMMISSION		CASE NO.: CHC-2015-237-HCM ENV-2015-328-CE
HEARING DATE: TIME: PLACE:	February 5, 2015 10:00 AM City Hall, Room 1010 200 N. Spring Street Los Angeles, CA 90012	Location: 2242 S. Hobart Boulevard Council District: 8 Community Plan Area: South Los Angeles Area Planning Commission: South Los Angeles Neighborhood Council: Empowerment Congress North Area Legal Description: Lot 6, Block 3 of the West Adams Heights Tract
PROJECT:	Historic-Cultural Mo CHARLES I.D. MOC	nument Application for the DRE RESIDENCE
REQUEST:	Declare the property	a Historic-Cultural Monument
OWNER(S):	Ian Sinnott 2242 S. Hobart Bou Los Angeles, CA 90	
APPLICANT:	Laura Meyers 1818 S. Gramercy P Los Angeles, CA 90	

RECOMMENDATION That the Cultural Heritage Commission:

- 1. Declare the subject property a Historic-Cultural Monument per Los Angeles Administrative Code Chapter 9, Division 22, Article 1, Section 22.171.7.
- 2. Adopt the staff report and findings.

MICHAEL J. LOGRANDE **Director of Planning**

Ken Bernstein, AICP, Manager Office of Historic Resources

Lambert M. Giessinger, Preservation Architect Office of Historic Resources

Nels Youngborg, Preservation Planner Office of Historic Resources

Attachments: Historic-Cultural Monument Application $\hat{\boldsymbol{\varepsilon}}$

FINDINGS

- The property embodies "the distinguishing characteristics of an architectural type specimen, inherently valuable for a study of a period style or method of construction" as an example of Shingle Style with Craftsman influences.
- The property is "a notable work of a master builder, designer or architect whose individual genius influenced his age," due to its design by the architectural firm Hudson & Munsell.

CRITERIA

The criterion is the Cultural Heritage Ordinance which defines a historical or cultural monument as any site (including significant trees or other plant life located thereon) building or structure of particular historic or cultural significance to the City of Los Angeles, such as historic structures or sites in which the broad cultural, economic, or social history of the nation, State or community is reflected or exemplified, or which are identified with historic personages or with important events in the main currents of national, State or local history or which embody the distinguishing characteristics of an architectural type specimen, inherently valuable for a study of a period style or method of construction, or a notable work of a master builder, designer or architect whose individual genius influenced his age.

SUMMARY

Built in 1907, the Charles I.D. Moore Residence is a large, single family residence with a Craftsman and Shingle style exterior and Craftsman style interior. It is a three-story house with pitched roofs and an expansive front porch. The interior features Douglas Fir woodwork, including ceiling beams, flooring and built-in cabinetry. The living room contains an oversized fireplace with a green-tiled face and wood mantle.

The building exhibits many character-defining features of Shingle style architecture with Craftsman influence, including:

- · Gabled, low-pitched, shingled roofs
- Exposed rafters
- Grouped casements and double hung windows
- · Large porch with square columns
- Wood clapboard shingle exterior
- Asymmetrical massing
- Interior ceiling beams
- · Built in cabinetry
- Beamed ceilings
- · Grand fireplaces made of decorative tiles
- A sleeping porch

The subject property was designed by prominent Los Angeles architectural firm Hudson & Munsell, which consisted of Dale F. Hudson and William A.O. Munsell. This firm is renowned for their large scale civic, institutional and religious buildings, as well as their residences found throughout the West Adams District. The firm established itself in Los Angeles in the late 1890s with an office in the Stimson Building, at the southeast corner of 3rd and Spring Streets. By

1905, the architects had gained notoriety as architectural designers and were lauded in local newspapers as "architects of the highest order." Their partnership lasted until the early 1930's.

Munsell had worked as a draftsman and architect in Portland, OR and Wichita, KS before moving to Los Angeles in the late 1890s. In 1902, he was president of the Los Angeles chapter of the American Institute of Architects (AIA).

Hudson studied architecture in San Francisco under William Curlett and moved to Los Angeles in 1895. From 1899 to 1901, he was the City Building Inspector for the City of Los Angeles. In 1910, he became the president of the AIA Southern California chapter.

Select designs by this firm include:

- Los Angeles County Hall of Records (1907-demolished 1973), Los Angeles, CA.
- Secondo Guasti House (1910), Los Angeles, CA. HCM #478
- Station #1, Engine Company #29, Los Angeles Fire Department (1910), Los Angeles, CA. HCM #37
- Dr. Grandville MacGowan Home (1912), Los Angeles, CA. HCM# 479
- Briggs Residence (1912), Los Angeles, CA. HCM #477
- Natural History Museum (1913), Los Angeles, CA. NHRP #75000434

The subject property was surveyed in 1986 and formally determined eligible for the National Register of Historic Places; therefore it is currently listed on the California Register of Historic Resources (CRHR #025527).

DISCUSSION

The Charles I.D. Moore Residence successfully meets two of the specified Historic-Cultural Monument criteria: 1) embodies "the distinguishing characteristics of an architectural type specimen, inherently valuable for a study of a period, style or method of construction," and 2) is "a notable work of a master builder, designer or architect whose individual genius influenced his age." The subject property is a good example of an architectural specimen of the Shingle style, with Craftsman influences due the many character defining features of the property that are integral to the style and period of significance. The architectural firm of Hudson & Munsell has made significant and lasting contributions to Los Angeles through many architectural designs that merits their acknowledgement as master architects.

CALIFORNIA ENVIRONMENTAL QUALITY ACT ("CEQA") FINDINGS

State of California CEQA Guidelines, Article 19, Section 15308, Class 8 "consists of actions taken by regulatory agencies, as authorized by state or local ordinance, to assure the maintenance, restoration, enhancement, or protection of the environment where the regulatory process involves procedures for protection of the environment."

State of California CEQA Guidelines Article 19, Section 15331, Class 31 "consists of projects limited to maintenance, repair, stabilization, rehabilitation, restoration, preservation, conservation or reconstruction of historical resources in a manner consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic buildings."

The designation of the Charles I.D. Moore Residence as a Historic-Cultural Monument in accordance with Chapter 9, Article 1, of The City of Los Angeles Administrative Code ("LAAC") will ensure that future construction activities involving the subject property are regulated in accordance with Section 22.171.14 of the LAAC. The purpose of the designation is to prevent significant impacts to a Historic-Cultural Monument through the application of the standards set forth in the LAAC. Without the regulation imposed by way of the pending designation, the historic significance and integrity of the subject property could be lost through incompatible alterations and new construction and the demolition of irreplaceable historic structures. The Secretary of the Interior's Standards of Rehabilitation are expressly incorporated into the LAAC and provide standards concerning the historically appropriate construction activities which will ensure the continued preservation of the subject property.

The use of Categorical Exemption Class 8 in connection with the proposed designation is consistent with the goals of maintaining, restoring, enhancing, and protecting the environment through the imposition of regulations designed to prevent the degradation of Historic-Cultural Monuments.

The use of Categorical Exemption Class 31 in connection with the proposed designation is consistent with the goals relating to the preservation, rehabilitation, restoration and reconstruction of Historic buildings in a manner consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving Rehabilitating, Restoring, and Reconstructing Historic Buildings.

BACKGROUND

On January 29th, 2015 the Cultural Heritage Commission took the property under consideration with a Commission-Initiated Motion. On February 19th, a subcommittee of the Commission consisting of Commissioners Barron and Irvine toured the property accompanied by a staff person from the Office of Historic Resources.

7. WRITTEN STATEMENTS

This section allows you to discuss at length the significance of the proposed monument and why it should be designated an Historic-Cultural Monument. Type your response on separate documents and attech them to this form.

A. Proposed Monument Description - Describe the proposed monument's physical characteristics and relationship to its surrounding environment. Expand on sections 2 and 3 with a more detailed description of the site. Expand on section 4 and discuss the construction/alteration history in detail if that is necessary to explain the proposed monument's current form. Identify and describe any character-defining elements, structures, interior spaces, or landscape features.

B. Statement of Significance - Address the proposed monument's historic, cultural, and/or architectural significance by discussing how it satisfies the HCM criteria you selected in Section 6. You must support your argument with substantial evidence and analysis. The Statement of Significance is your main argument for designation so it is important to substantiate any claims you make with supporting documentation and research.

Charles I.D. Moore Residence 2242 South Hobart Boulevard, West Adams Heights

ARCHITECTURAL DESCRIPTION

This picturesque three-story house shows the influence of both the Shingle and the Craftsman styles, according to Roger Hatheway, who surveyed it for the Community Redevelopment Agency and identified it as a historic resource in 1981. This description of the Charles I.D. Moore Residence's exterior architectural elements draws heavily on Hatheway's DPR sheet.

The house is currently undergoing a major restoration, inside and out, and therefore some interior spaces are not fully described (and this description will be amended when the restoration is complete.)

The Moore Residence is gabled with two linked, oversized dormers facing the street at the center of the façade. Shaped bargeboards in the form of an upside-down "W" are supported by braces and outline the dormers. A row of corbels separates the dormers from the projecting central portion of the house. A two-sided slant bay is offset on the second story of the center section. The porch, shaded by a hipped roof on posts, occupies the lower level of the center. An ample wood entry door welcomes visitors.

Additional decorative exterior features include a planter box on an upper story window, and a porte cochere over the driveway (a feature added by original owners Charles I.D. and Emily Maude Moore, in 1925; the upper level houses a sleeping porch and bathroom addition) along with a projecting pergola over the driveway.

Shingling sheathes the house. A low, rusticated stone retaining wall ties this house to the neighboring house at 2248 S. Hobart Blvd. and is a character-defining feature in the West Adams Heights neighborhood.

The interior features extensive decorative Douglas fir woodwork and wood trim, including beamed ceilings, built-in bookcases, a substantial butler's pantry with two sets of cabinets, wide crown moldings, and columns in a heavy Arts & Crafts idiom. The dining room china cabinet is a replacement built in the 1980s to emulate the original. There are oak floors throughout.

French-style doors separate the living room from a indoor terrace room/conservatory room - an early alteration.

The living room features a very tall and imposing fireplace with Craftsman mantle and over-mantle which rises to the height of the top of the window trim, and it has matte green Grueby art tile – a signature feature found in several local Hudson and Munsell-designed homes. Upstairs on the landing is a second, smaller, fireplace with brown Arts & Crafts tile, possibly also Grueby (in the same dimensions as the tiles in the fireplace downstairs.)

The wide staircase with Craftsman style square newel posts and heavy ballusters/ballustrade rises from a landing that separates the public rooms (entry, living room, dining room) from the family's private spaces (kitchen, pantry, service rooms). Indeed, the landing is a focal point of the entry. The family bedroom suites on the second floor are large and, with banks of windows, are for the most part bathed in light. The main bathroom opens onto a porch (some would say its original purpose was for the ladies to dry their hair.)

The Moore Residence also has a complete third floor, also undergoing restoration.

Charles I.D. Moore Residence 2242 South Hobart Boulevard, West Adams Heights

SIGNIFICANCE STATEMENT

The **Charles Irwin Douglas (C.I.D.) Moore Residence,** located at 2242 South Hobart Blvd., Los Angeles CA 90018, is a significant historic resource in its neighborhood, West Adams Heights.

It was designed by Master Architects, Hudson & Munsell (Dale F. Hudson and William A.O. Munsell), who during the 30 years of their partnership also designed the Museum of Natural History, the Secundo Guasti Estate, the Dr. Grandville MacGowan Mansion, and numerous other important institutional buildings and fine residences. The residence is one of the architects' notable works, and is representative of the work they were doing in the period of construction (1908).

The Charles Irwin Douglas (C.I.D.) Moore Residence <u>embodies the distinguishing</u> <u>characteristics of an architectural-type specimen</u> (Craftsman and Shingle style exterior, Craftsman interior), and is inherently valuable for study of the period and style.

The Charles Irwin Douglas (C.I.D.) Moore Residence is associated with events and personages of its era. Mr. Moore was a well-known business figure who served as an officer of the Pacific Mutual Life Insurance Company, as well as on the Board of Trustees for the University of Southern California, the West Adams Methodist Church, and other institutions. Pacific Mutual is itself an important pioneer company in California and Los Angeles. Prior to his entrance into the insurance industry in 1901, C.I.D. Moore was an educator and the supervising principal for the Santa Monica city schools system.

(The Moore Residence is part of a complex of three grand homes that were built by members of the Cochran family. Pacific Mutual chief executive George Ira Cochran's Mansion sits behind the subject property, facing Harvard Boulevard; Cochran's mother and one sister lived in the residence at 2248 S. Hobart Blvd., next door to the subject property. C.I.D. Moore was married to George Cochran's other sister, Emily Maud.)

In addition, the Charles Irwin Douglas (C.I.D.) Moore Residence also <u>contributes to the</u> <u>community as an important reminder of the heyday of West Adams Heights</u>, which was an exclusive gated tract developed by the partners in Pacific Mutual Life Insurance in the early years of the 20th century, an effort to which C.I.D. Moore contributed by erecting three of the early residences, including the subject property.

THE ARCHITECTS: FRANK D. HUDSON AND WILLIAM A.O. MUNSELL

Architects Frank Dale Hudson (1865-1941) and William A.O. (Alexander Oliver) Munsell (1866-1963) practiced together in Los Angeles for over three decades. Today they are remembered for such important monumental buildings in Los Angeles as the County Hall of Records on Broadway (1907, demolished), the Los Angeles County Museum at Exposition Park (now the Natural History Museum, 1913), and the Los Angeles County Hospital administration building (commissioned in 1909).

They also designed many fine residences in the West Adams District and elsewhere for noted members of "society," in a broad variety of styles ranging from Arts & Crafts to Colonial Revival and Beaux Arts. These homes include important mansions, such as the Frederick Wilson Flint Residence at 20 Chester Place, the Secundo Guasti Estate at 3500 West Adams Boulevard, a pair of homes for Nathaniel Wilshire and Susan Wilshire (brother and stepmother respectively of Gaylord Wilshire, who laid out Wilshire Boulevard), and the 18,000-square-foot Dr. Grandville MacGowan Mansion and the next-door Mary Briggs Residence (the "mother in law" house), also on Adams Boulevard.

Hudson and Munsell established themselves in the late 1890s with an office in the Stimson Building. By 1905, they had garnered a reputation as "architects of the highest order" and "also being artists of no small pretensions [who] keep in touch with all the new ideas in building," according to the *Los Angeles Sunday Herald* (September 3, 1905). They had by then designed homes for, among others, real estate developer Wesley Clark (who with his partner E.B. Bryan owned substantial acreage in downtown and elsewhere); railroad magnate W.S. Hook; businessman and staunch Los Angeles booster William M. Garland, who eventually brought the Olympics to Los Angeles; and Frank S. Hicks, a "pioneer insurance man" and attorney with interests in real estate and mining. The architects had already by then also designed the Los Angeles County jail. Their partnership flourished until the 1930s.

Before they joined forces, Frank D. Hudson was the City Building Inspector for the City of Los Angeles, from 1899 to 1901. He was also a pioneer in the use of the fireproof and soundproof artificial building stone, used at the Fairmont Hotel in San Francisco. Hudson studied architecture in San Francisco in the offices of William Curlett, and moved to Los Angeles in 1895 to set up his own office. He became president of the American Institute of Architects (AIA) Southern California chapter in 1910.

Munsell had worked as a draftsman in Portland, Oregon, and as an architect in Wichita, Kansas, before moving to Los Angeles in the late 1890s, settling in Garvanza by 1900. By 1902 he was president of the Los Angeles chapter of the American Institute of Architects (AIA).

There are not as many specific character details associated with Hudson and Munsell (versus, for example, Heineman & Heineman, who employed distinctive patterns of wood-crafting, unique exotic woods and reverse board-and-batten details; or Sumner P. Hunt who evoked Japanese designs and used distinctive moldings above doors and windows). However, a number of homes they designed (including the Charles I. D. Moore Residence) include large – even mammoth – fireplaces with art tiles, often Gruby tiles; expansive upstairs landings which serve almost as a family room/gathering place (the Moore Residence features a fireplace on its landing); dressing rooms/areas with built-in cabinetry; and extensive woodwork with wide crown moldings.

Some of Hudson and Munsell's commissions included:

Benevolent and Protective Order of Elks, Lodge, San Pedro, Los Angeles - 1910 Briggs, Mary L., House, Los Angeles - 1912 Chatsworth Methodist Church, Women's Club Building, Chatsworth, Los Angeles - 1912 City of Los Angeles, Los Angeles Fire Department, Engine Company #23, Station #1, Los Angeles - 1910 Cohn Residence, Alvarado Terrace County of Los Angeles, Detention Home, Los Angeles - 1910 County of Los Angeles, General Hospital, Administration Building, Lincoln Heights, Los Angeles - 1909 County of Los Angeles, Hall of Records Building #1, Los Angeles - 1908 Gartz, A.F., House, Altadena, CA - 1908 Guasti, Secondo, House, West Adams, Los Angeles - 1910 Hammel Building, in the Plaza, Los Angeles - 1909 Los Angeles Unified School District (LAUSD), 79th Street School, Los Angeles - 1924 Los Angeles Unified School District (LAUSD), 95th Street School, Los Angeles - 1924 Los Angeles Unified School District (LAUSD), Murchison Street School, Los Angeles - 1924-1925 MacGowan, Dr. Grandville Residence, West Adams Boulevard, Los Angeles --Masonic Building, Blue Lodge, Los Angeles - 1907 Natural History Museum, Exposition Park, Los Angeles - 1913 Roman Catholic Archdiocese of Los Angeles, Saint Anthony's Church #1, Long Beach - 1902-1904 Stewart, Will H., House, Alhambra, CA - 1908 Terminal School District, School, Los Angeles - 1904 Thom, Cameron Erskine, House Project, West Adams, Los Angeles - 1905 Wilshire, Susan Residence, West Adams, Los Angeles -- 1912

BIOGRAPHY: CHARLES IRWIN DOUGLAS (C.I.D.) MOORE (1865-1944)

Charles I. D. Moore was a prominent businessman, educator, civic leader, and director of social welfare and religious organizations in Los Angeles for more than four decades. He was described as "hardworking and earnest" – and he also married well.

Moore's father-in-law was Dr. George Cochran, a prominent Methodist pastor (he was the first pastor of the Metropolitan Church in Toronto), a missionary to Japan, the first to translate the bible into Japanese, and a dean at the University of Southern California. Moore's brother-in-law was George Ira Cochran, chief executive at the Conservative Life Insurance Company (and the man for whom the street Cochran Avenue is named), and his mother-in-law, Catherine Lynch Cochran, was a direct descendant of Susannah Wesley, the mother of the founder of Methodism.

Moore was born in Islington, near Toronto, Canada, in 1865, the son of a farmer. His early years were spent on that farm, where he learned to work energetically, and for long hours. But Moore strived to better his status in life, and attended the Victoria University at Toronto, graduating with honors. He won the Prince of Wales Gold Medal, the university's highest honor.

After college graduation, Moore traveled to Tokyo, Japan, becoming a teacher in Toyo Eiwa Gakko at a Methodist mission college for boys. It was in Japan that he met Emily Maud Cochran, and they were married in December, 1893.

On returning to America in 1891 Moore settled in California and for ten years was connected with the schools of Santa Monica, at first as teacher at the high school, then its principal, and later serving as supervising principal of all the schools in the beach city.

Santa Monica had always been a "wide-open" town but in 1900, when Charles I.D. Moore was a member of its Board of Trustees, city leaders made a determined effort to "secure a better order of things," according to *Ingersoll's Century History, Santa Monica Bay Cities* (1908). An ordinance was passed making the city a no-saloon town, the result of an effort led by Frederick Rindge, Moore, J.S. Slauson, among others, along with temperance leaders and local church pastors. "A vigorous, well organized, educational anti-saloon crusade followed."

About Christmas, 1901, according to the October 25, 1918 edition of *The Eastern Underwriter*, "it was suggested to Mr. Moore that he should give up school work, as he had gotten about as high as he could in that line, and go into business. Life insurance was mentioned as offering an attractive field. Within two months from that time he had given up his school position and was in possession of a rate book, selling life insurance for the Conservative Life, of Los Angeles." Of course, Conservative Life was helmed by George Ira Cochran.

Moore had immediate success in business, and more than doubled his income as an educator from the very beginning of his insurance career. He remained a salesman for about four years. But after the consolidation of Conservative Life with Pacific Mutual Life Insurance in 1905 (the latter company then moving to Los Angeles in the wake of the San Francisco earthquake), Moore was appointed assistant secretary of the combined company. The next year he became its corporate secretary, and eventually, in 1920, Pacific Mutual's vice president, a position he held until his retirement in 1935.

It was the executives of Conservative Life who had filed the tract map and laid out the West Adams Heights tract in 1901-1902. They incorporated the West Adams Heights Association. By 1903, Conservative Life's officers George Ira Cochran, Frederick Rindge and several others were building their own grand mansions at the top of the rise. They even extended the Los Angeles Railway Company's streetcar line beyond the Rosedale Cemetery into the West Adams Heights tract (the streets at that point were still privately owned and not yet dedicated to the City) so they could run a private railroad car on the extension to their downtown offices.

Moore was not yet in a position to build an imposing mansion of his own. The subject property at 2242 S. Hobart was actually the third house in West Adams Heights that Moore eventually commissioned.

In 1903 he built an American Foursquare house at 1957 Oxford (subsequently renumbered to 2057 S. Oxford Ave), and lived there for three years. In 1906, he built a larger home at 2071 S. Hobart (attributed to the architecture firm of Hudson and Munsell), and lived there for two years. Historians have speculated that these first two homes were built in order to help generate interest in the West Adams Heights development.

Moore's final residence at 2242 S Hobart, which he occupied beginning in 1908, was positioned as part of a large compound that included the mansion belonging to George Ira Cochran (facing Harvard Boulevard) and a more modest Dutch Colonial Revival next door at 2248 S. Hobart housing his wife's mother and sister, that residence having been built for them by Mr. Cochran.

The Moore residence, designed by the Hudson and Munsell firm, is a Shingle/Craftsman style home. It is currently undergoing an extensive restoration.

Moore was successful in his business career, and was listed in *Who's Who of Los Angeles County 1927-1928.* He edited the *Pacific Mutual News* for almost a quarter of a century, and during his tenure that publication became recognized as one of the outstanding life insurance house organs in the U.S. By this time he had also became published writer. In 1927, he published *CID Says*, a book of proverbs. In 1928 he authored a history of the company, titled *The Pacific Mutual Life Insurance Company of California; a History of the Company and the Development of its Organization, the Sixtieth Anniversary 1868-1928* and in 1930 he wrote *In the Footsteps of the Padres.*

Moore became a trustee of the University of Southern California, and was also involved with the University Religious Conference at the University of California, Los Angeles, along with the California Historical Association. He was also a longtime director of the Community Chest (today's United Way), and the Los Angeles YMCA, also serving on the YMCA's national council for three years. For 40 years, Moore was also a member of the board of trustees for the West Adams Methodist Church.

Near the end of his life, Moore received the following tribute: "He loves his profession, loves flowers, writes poetry, and is an unfailing contributor to the morale and efficiency of the great organization which he serves as an official, and a splendid example of the balanced adjustment which a few rare men can make between devotion to their business and to the human and personal interests of life."

Moore lived out nearly all of his days at the residence on the Hill. His great-grandson observed, "CID loved 2242 very much and wrote a poem about having to leave it. The upkeep became too much for him and he moved to a duplex with his daughter and son-in law Richard and Catherine Hill. He died 30 days later, some conjectured from a broken heart of having left the property."

HISTORY OF THE PACIFIC MUTUAL LIFE INSURANCE COMPANY

In its heyday, Pacific Mutual Life Insurance was one of the nation's major life insurance companies. It was a pioneering California company that merged with Los Angeles-based Conservative Life in 1905, and then, after the devastating San Francisco earthquake of 1906, moved to Los Angeles. Charles I.D. Moore, the owner of the subject property located at 2242 S. Hobart Blvd., was one of Pacific Mutual's top executives from 1906 until his retirement in the 1930s.

History

On May 9, 1868, Pacific Mutual Life's first policy was ceremonially issued to Leland Stanford, the company's first president from 1868-1876. Its board was dominated by California business and political leaders, including three of the "Big Four" who created the Central Pacific Railroad (Charles Crocker, Mark Hopkins, and Leland Stanford) and three former governors (Stanford, Newton Booth, and Henry Huntley Haight).

Initially the company offered life and endowment policies and began investing in community improvements, and by the end of its first year Pacific Mutual had five hundred life insurance policy owners and had paid its first death benefit.

By 1870 Pacific Mutual Life was selling life insurance throughout most of the western US. Expansion continued in the early 1870s into Colorado, Kentucky, Nebraska, New York, Ohio, and Texas. The company ventured into Mexico in 1873 but sold few policies. It had better luck in China, accepting its first risk there in 1875, and in Hawaii, where it started business two years later. In 1881 Pacific Mutual Life moved to San Francisco.

Later, while serving his second term as a United States Senator from California, Stanford founded Leland Stanford, Jr. University (known today as Stanford University) as a memorial to his only son. Three weeks after the 1893 commencement, on June 21, Leland Stanford died. His business affairs were left in a tangled state -- a circumstance aggravated by the panic of 1893.

Since the University derived its support at that time exclusively from Stanford's fortune, the financial situation became grave. The *San Francisco Examiner* headlined, "No Pay For The Professors!" Intent on preserving the University, Mrs. Stanford used her husband's Pacific Mutual life insurance policy to soothe the momentary financial distress and ease the plight of the strapped university professors. The benefit from Stanford's policy kept the university open until the estate was settled.

In response to the needs of the company's policyholders, Pacific Mutual had begun offering accident insurance in 1885. This was a drastic departure for a life insurance company at the time, but the firm recognized that all hazards to human life and health are equally important to plan for. The new accident coverage was popular, and quickly demonstrated its value. The second claim filed (for \$50), resulted from an injury sustained while the insured was setting a wagon brake -- only fifteen minutes after becoming one of the initial policyholders.

On March 12, 1906, Pacific Mutual Life consolidated with Conservative Life, a young life insurance company from Los Angeles. With almost eerie foresight, additional fire insurance was placed on the Pacific Mutual home office in San Francisco, additional vaults were constructed, and older vaults were reinforced. These actions were completed by early April.

Days later, on April 18, a 48-second earthquake rocked San Francisco, leveling hundreds of city blocks. Although Pacific Mutual's seven-story home office building survived the initial earthquake, the home office was sacrificed as a firebreak to prevent further damage to the city. At the time of the earthquake, a Pacific Mutual employee named Richard Mier realized that valuable bonds were in a safe that was not fireproof. Quick thinking Mier courageously removed the bonds, along with several stock ledgers and ran down five flights of shaking stairs. He wrapped the bonds to protect them and climbed to the top of Sacramento Street where he then buried the important documents in the basement of his home where they would be safe until needed -- a couple days later.

On May 18, 1906, the Board of Directors met for the first time since the catastrophe. There amongst the rubble, they formally voted to establish a new home office in Los Angeles. The staff was sent ahead, and a new chapter in the company's history would begin. Their new home office, located near Pershing Square in downtown Los Angeles, opened in 1908 and remained the company's headquarters until they moved south to their current location in Newport Beach, California, in 1972.

Pacific Mutual Life's non-cancellable disability policies proved to be both popular and disastrous during The Great Depression. With unemployment surging, the product became a financial drain, threatening the security of the company. Insurance Commissioner Samuel L. Carpenter proposed a bold blueprint for reorganization of the company. He endorsed a principle that already guided Pacific Mutual Life: primary concern for the interest of policyholders. Carpenter and the Pacific Mutual board provided that the company's life insurance policyholders were to be given the opportunity, through mutualization, to become the owners of the company.

The company squeaked through the Depression, and after WWII, Pacific Mutual Life entered the group insurance and pension markets.

After 83 years as a stock company and an eight-year stock purchasing program, Pacific Mutual Life became a true mutual in 1959.

WEST ADAMS HEIGHTS: CONTEXT

"Nowadays we scarcely notice the high stone gates which mark the entrances on Hobart, Harvard, and Oxford streets, south of Washington Boulevard. For one thing, the traffic is too heavy, too swift; and then, again, the gates have been obscured by intrusions of shops and stores. At the base of the stone pillars appears the inscription "West Adams Heights." There was a time when these entranceways were formidable and haughty, for they marked the ways to one of the first elite residential areas in Los Angeles. . . In the unplanned early-day chaos of Los Angeles, West Adams Heights was obviously something very special, an island in an ocean of bungalows—approachable, but withdrawn and reclusive—one of the few surviving examples of planned urban elegance of the turn of the century."

-- Carey McWilliams, "The Evolution of Sugar Hill," Script magazine, March, 1949: 30.

Today West Adams Heights is still obviously something special. The past seventy years, however, have not been kind. In 1963 the Santa Monica Freeway cut through the heart of West Adams Heights, dividing the neighborhood, eliminating its continuity. In the 1970s the city paved over the red brick streets and removed the ornate street lighting. After the neighborhood's zoning was changed to a higher density, overzealous developers claimed several mansions for apartment buildings, before the area was down-zoned again. Despite these challenges, however, "The Heights," as the area was once known (or "The Hill," as it is often referred to today) has managed to retain and regain some of its former elegance.

History of "The Heights"

The West Adams Heights tract (or "Adams Street Homestead Tract No. 2," as it was first known) was homesteaded in 1868 by Mary Hall. Mary's brother, Charles Victor Hall, was a student who had worked on survey efforts in the area. Charles was a claim-layer as well, opportunistically snapping up a 1/4 section (160 acres) to the south.

After the Civil War had ended, many Confederate veterans abandoned their ruined farms and Union veterans left their eastern mill towns to make new lives for themselves in California. "Surveyors were in the field by 1868," wrote Patricia Adler in her history of the Normandie Program Area prepared for the Los Angeles Community Redevelopment Agency. They laid out section lines "so that the U.S. Land Office could begin to accept claims from the newcomers."

Located smack in the middle of the public lands nestled between the pueblo lands surrounding the Plaza and owned by the City of L.A. (which sold off its holdings after statehood in 1850) and the Avila family's Rancho Las Cienegas, Mary Hall's land had most recently been used for cattle grazing. The city though was slowly developing an appetite for residential land (population doubled after 1890, reaching 100,000 in 1900); and, by 1893, school-teacher Hall (by then married to Civil War veteran and surveyor William Moore, one of the leading engineers of Southern California), subdivided her land for "exclusive home sites."

An economic depression rivaling the Great Depression of the 1930s seized the nation in 1893, hampering development in West Adams Heights for its first few years as a residential enclave. But recovery arrived in Southern California Country (to borrow a Carey McWilliams phrase) and imposing houses for the rich and socially prominent started springing up in West Adams Heights just after turn of the century. By then, the business owners of the enterprise that became Pacific Mutual Life Insurance had created an investment syndicate that acquired the portion of West Adams Heights that sat on the mesa and had commanding views.

The West Adams Heights Tract was laid out in 1902, in the former fields on the western edge of town. Although the freeway now creates a physical barrier, the original neighborhood boundaries were Adams Boulevard, La Salle Avenue, Washington Boulevard, and Western Avenue. Costly improvements were part of the development, such as 75-food wide boulevards (which were some of the first contoured streets not to follow the city grid), lots elevated from the sidewalk, ornate street lighting, and large granite monuments with red-brass electroliers at the entrance to every street. These upgrades increased the property values, which helped ensure the tract would be an enclave for the elite.

One early real estate ad characterized the neighborhood stating: "West Adams Heights needs no introduction to the public: it is already recognized as being far superior to any other tract. Its high and sightly location, its beautiful view of the city and mountains make it a property unequaled by any other in the city."

West Adams Heights quickly became an elite and fashionable enclave. The first major residence was the Frederick Rindge Mansion, a Chateauesque "town house" completed in 1903, followed soon by the Shingle style George Ira Cochran Mansion. (Cochran was C.I.D. Moore's brotherin-law.) New residents soon included many other officers of the Pacific Mutual Life Insurance Company, ranchers, bank presidents and mining engineers – along with George Cochran's mother (and Moore's mother-in-law), for whom a Dutch Colonial Revival residence was erected. They hired notable architects and architectural firms, including Train & Williams, Fredric Roehrig, and Hudson & Munsell.

Geographically speaking, West Adams Heights commands a particularly nice spot, on the northern end of a flat mesa that dips south offering views across an undulating plain to the hills now named for Lucky Baldwin. Land baron and Malibu developer Rindge built his manse just below the crest of the ridge. The house itself still stands and is listed on the National Register of Historic Places. Hall and Moore built their own house in the southwest corner of the tract, at the intersection of Adams and Western. (It was demolished to provide surface parking for the 1948 Golden State Mutual Life Insurance building, designed by architect Paul Williams and now Los Angeles' Historic Cultural Monument No. 1000.)

In 1912, the West Adams Heights Association hired architects John C. Austin and W.C. Pennell to design a 600-seat brick veneered church at Adams and La Salle. (*Southwest Contractor*, 5/25/1912, p.15). The West Adams Heights Methodist Church, now the Greater Page Temple Church of God in Christ, also features stained glass windows created by Judson Studios.

Sugar Hill Historic District

SurveyLA, the Los Angeles Historic Resources Survey, identified the southern portion of West Adams Heights as the "Sugar Hill Historic District," meeting California and National Register criteria. The Charles I.D. Moore Residence is identified as a Contributor to the District. (It had previously been identified as a Contributor to a district with nearly identical boundaries, in the *Determination of Eligibility Report for Adams-Normandie 4321 Redevelopment Project Area*, an evaluation undertaken in 1981 by Roger G. Hatheway and Associates for the Los Angeles Community Redevelopment Agency.)

According to SurveyLA, the Sugar Hill District – which comprises only the two blocks of Hobart and Harvard, and just 26 buildings lying south of the 10 Freeway to Adams – is significant both "as an enclave of grand residences constructed in the styles of the Arts and Crafts mode, many of which were designed by noted architects of the era"; and "for its association with the African-American community and the movement to abolish deed restrictions that promoted racial segregation in neighborhoods across the United States."

Harvard Heights

In this same time period, a variety of nearby tracts (now north of the freeway's dividing line) were established which are now jointly designated as the Harvard Heights Historic Preservation Overlay Zone (HPOZ).

The Harvard Heights HPOZ is predominantly characterized by two-story Craftsman-style residences built from 1902 to 1908. The large and somewhat grand scale of architecture is due to land covenants that stipulated that houses built within many of the tracts that now comprise the HPOZ cost more than \$2,500, a substantial sum at the turn of the century. The Westmoreland Heights Tract, comprising Hobart and Westmoreland Boulevard between Washington and Venice, required the houses cost at least \$5,000.

The community became home to many wealthy owners. The naming of streets after universities such as Harvard, Cambridge, Oxford, and Hobart added to the neighborhood's prestige. To the west lay the Harvard Military Academy, and to the northwest was the new home of the Los Angeles Country Club, known as the Pico and Western Links.

The city's best architects flocked to the area to build elegant homes for upscale residents. The HPOZ includes the only still-existing Greene and Greene-designed house in the city of Los Angeles (while one other, a much-larger Greene and Greene, *demolished*, once stood on Hobart Blvd.) The neighborhood also features the work of the famous Heineman brothers as well as numerous examples of notable West Adams architect Frank M. Tyler, Jr., who built his own imposing house (no longer extant) within this neighborhood. The HPOZ boundaries include modest commercial buildings located along the edges of the neighborhood.

In addition, the Harvard Heights HPOZ contains the northern-most section of the West Adams Heights Tract, which once spanned several blocks (Oxford, Hobart, Harvard and La Salle) running north-south between Adams Boulevard and Washington Boulevard. The granite corner markers on Washington Boulevard and Harvard Boulevard are extant, restored by the neighborhood association. West Adams Heights was cut asunder by the development of the Santa Monica/I-10 Freeway in the 1960s. A substantial number of its residences were lost at that time, with about 17 still extant south of the freeway. The north side, which falls within the Harvard Heights HPOZ boundaries, is more intact, with approximately 60 residences of the era still standing. West Adams Heights was and is characterized by impressive, master architectdesigned mansions. The subject property is one of the remaining mansions.

Between its attractive topography and its architectural riches, it's not hard to see how the area acquired the nickname "Sugar Hill' in the late 1940s and 1950s when the neighborhood housed numbers of prominent African Americans. (The aforementioned Golden State Mutual Life building remains of a symbol of the economic stature and prominence of Sugar Hill's midcentury denizens.) But before Sugar Hill could be born, those same pioneering African Americans had a battle to win.

Like many Los Angeles tracts, land deeds in the West Adams Heights tract came equipped with a slate of restrictions designed to ensure and perpetuate the "desirability" of the area. The early residents' were required to sign a detailed restrictive covenant. This hand-written document required property owners to build a "first-class residence," of at least two stories, costing no less than \$2,000 (at a time when a respectable home could be built for a quarter of that amount, including the land), and built no less than 35 feet from the property's primary boundary. Common in early twentieth century, another clause excluded residents from selling or leasing their properties to non-Caucasians.

By the mid 1930s, however, most of the restrictions had expired. While some absentee landowners welcomed the opportunity to profit from an expanded market, others feared the prospect of living in a racially integrated neighborhood and lobbied for the covenants' extension. A small group of white property owners signed agreements in 1937 and 1938 in which they said they would not permit occupancy in West Adams Heights by non-Caucasians.

Nonetheless, between 1938 and 1945 many prominent African-Americans began to make "The Heights" their home. According to Carey McWilliams, West Adams Heights became known "Far and wide as the famous Sugar Hill section of Los Angeles," and enjoyed a clear preeminence over Washington's smart Le Droit Park, St. Louis's Enright Street, West Philadelphia, Chicago's Westchester, and Harlem's fabulous Sugar Hill.

Eventually, a number of prominent African American property owners challenged the constitutionality of the racially-based deed restrictions, in West Adams Heights and in other restricted tracts in Los Angeles. These cases were ultimately consolidated and heard at the U.S. Supreme Court. Its 1948 Shelley v. Kraemer decision parses the issue somewhat: declaring not so much that the restrictions themselves violate constitutional provisions but, rather, prohibiting courts from enforcing them. Regardless, in the absence of enforceability, the racially restrictive covenants were rendered impotent.

Indeed, West Adams Heights, soon also known as L.A.'s Sugar Hill, played a major role in this aspect of the civil rights movement in Los Angeles. In 1938, Norman Houston, president of the Golden State Mutual Life Insurance Company and an African-American, purchased a home at 2211 South Hobart Boulevard. During that period, other prominent African-Americans began to make Sugar Hill their home – including actress Hattie McDaniel, dentists John and Vada Sommerville, actress Louise Beavers, band leader Johnny Otis, performers Pearl Bailey and Ethel Waters, and many more.

Legal action from eight Caucasian homeowners ensued. McDaniel, Beavers, Waters, and musicians Noble Sissle, Juan Tizol and Russell Smith were among the named defendants. They argued in court documents that, by then, African Americans owned more than half of the lots in the tract, and that it was improper to try to enforce race restrictions.

On December 6, 1945, the "Sugar Hill Cases" were heard before Judge Thurmond Clark, in Los Angeles Superior Court. He made history by becoming the first judge in America to use the 14th Amendment to disallow the enforcement of covenant race restrictions. The *Los Angeles Sentinel* quoted Judge Clark: "This court is of the opinion that it is time that [African-Americans] are accorded, without reservations and evasions, the full rights guaranteed them under the 14th Amendment."

From Time magazine, December 17, 1945:

Spacious, well-kept West Adams Heights still had the complacent look of the days when most of Los Angeles' aristocracy lived there. In the Los Angeles courtroom of Superior Judge Thurmond Clarke last week some 250 of West Adams' residents stood at swords' points.

Their story was as old as it was ugly. In 1938, Negroes, willing and able to pay \$15,000 and up for Heights property, had begun moving into the old eclectic mansions. Many were movie folk—Actresses Louise Beavers, Hattie McDaniel, Ethel Waters, etc. They improved their holdings, kept their well-defined ways, quickly won more than tolerance from most of their white neighbors.

But some whites, refusing to be comforted, had referred to the original racial restriction covenant that came with the development of West Adams Heights back in 1902 which restricted "Non-caucasians" from owning property. For seven years they had tried to enforce it, but failed. Then they went to court ...

Superior Judge Thurmond Clarke decided to visit the disputed ground—popularly known as "Sugar Hill." ... Next morning, ... Judge Clarke threw the case out of court. His reason: "It is time that members of the Negro race are accorded, without reservations or evasions, the full rights guaranteed them under the 14th Amendment to the Federal Constitution."

Judge Thurman concluded, "Judges have been avoiding the real issue for too long. Certainly there was no discrimination against the Negro race when it came to calling upon its members to die on the battlefields in defense of this country in the war just ended."

This triumph of equity, however, was short lived. In 1955, the government targeted the neighborhood in its bid to connect downtown and the Westside with a freeway. Constructed between 1961 and 1966, Interstate 10 (known locally as the Santa Monica freeway) now plows right through the heart of the West Adams Heights tract.

The freeway succeeded in fragmenting the neighborhood: the two halves are not even connected by an overpass. In the aftermath, the trend of absentee landholding continued with some owners concerned more with profits than neighborhood cohesion. Moreover, the area was "up-zoned," effectively incentivizing the demolition of historic single family residences.

Undeterred by the consequences of these setbacks, residents have remained committed to preserving their quality of life and preserving a unique collection of early 20th century housing styles. The northern part of the West Adams Heights neighborhood boasts a particularly effective neighborhood association which meets regularly, actively engaging residents and cementing neighborly links among its ethnically diverse denizens. One of its most commendable beautification projects has been the restoration of the street markers that punctuate the corners of Washington & Oxford, Hobart, and Harvard, and they recently received a preservation award for these efforts.

C. I. D. Moore, Pioneer Civic Leader, Dies Los Angeles Times (1923-Current File): Apr 25, 1944; ProQuest Historical Newspapers: Los Angeles Times (1881-1989) - pg. 11

Pioneer Civic t. C đ eader, Dies 3. it Prominent in business, social. ٢,

church and welfare circles in Los Angeles for more than 40 years, C. I. D. Moore, 79, died at his home, 2242 S. Hobart n Blvd., yesterday. Funeral servd ices will be conducted at Rosey dale Chapel at 11 a.m. tomor-۱. e row.

i, Mr. Moore was born Feb. 16,). 1865, on a farm near Islington, 3, Ont., and was an honor graduate of the University of Victoria, ۰. now the University of Toronto. In his youth he was a teacher 1 in a Methodist mission in Japan, where he married Emily ł. Maud Cochran. ſ

0 Upon his return to the United States Mr. Moore continued his educational work, being princi-pal of Santa Monica High School from 1892 until 1902.

1

4 1

> 1 Thereafter he became intera ested in insurance and for some time was field representative for the Conservative Insurance Co. B Later he was associated with Pacific Mutual Life Insurance Co., serving as a director, assistant secretary, secretary and a vice-president. He retired in 1935, 3

He was a trustee of the University of Southern California, was interested in the University

Religious Conference at the Los Angeles campus of the Univer-

sity of California, served as a Ł director of the Community Chest, was a director of the Los Angeles Y.M.C.A., and member of the board of trustees, West Adams Methodist Church, for 40 years.

Mr. Moore leaves his widow and three children, Douglas E. C. Moore, Rutherford D. Moore and Mrs. Catherine I. Hill.

A MONG REAL ESTATE OWNERS AND DEALERS.

FEW BUSINESS PROPERTIES NOW OFFERED FOR SALE.

Practice of Leasing Unimproved Lots on Business Streets Beginning to Be Favored—Purchases for Improvement Numerous, Especially in New Tracts.

The trend of investment is in the direction of prospective business properties, rather than toward business blocks. Rates on the latter class of properties are stiff, as compared with former prices, with very little of this kind of property offered for sale. The practice of renting and offering for rent, desirable unimproved lots on business streets, instead of offering them for sale, is gaining in popularity with owners. Some purchases of desirable residence properties are noted, and an increasing number of sales of lots in new tracts that are soon be improved is found in the reports.

Ninth and Flower

A. W. Rhodes has purchased of J. A. Graves, through the agency of Hon.

A Handsome Home.

J. A. Brown has purchased of George W. Stimson, through Althouse Bros., a handsome ten-room two-story frame dwelling, with lot, 50x150 feet, on the north side of Ninth street, 100 feet east of Park View avenue; consideration named, \$\$500. This is desirable residence property, and will be occupied by the purchaser as a home.

West Adams Heights.

In the latter part of the week the map of the West Adams Heights tract was recorded, and that exceptionally well located addition to the city was placed upon the market. The work of laying out and improving the streets of the tract has been in progress some time, and several magnificent dwell-ings, for members of the association by which the tract is owned, are now in course of construction. The dweilings being erected for Frederick H. Rindge, George I. Cochran, and A. J. Wallace are palatial mansions, each of which will cost thousands of dollars. The tract lies between Washington and Adams streets, on the north and south, with Normandie and Western avenues as its east and west boundaries. It comprises about 400 lots, averaging 60x 160 feet each, and with the excellent location and expensive improvements that are being made the tract must necessarily become one of the choicest suburbs of the city. Numerous lots, the aggregate price of which runs well up in the thousands, have already been spoken for in this new addition. . . .

Two Fine Residences.

on the west side of St. Andrews Place, one lot north of Sixteenth street; consideration named, \$2200. The former lot will be improved with a handsome home; the latter held as an investment.

Mrs. Margaretha Dockweller has purchased of J. N. Schaefer a nineroom two-story frame dwelling, with lot 50x150 feet, on the southwest corner of Hope and Eighteenth streets; consideration named, \$5900, and will occupy the place as a home.

John Goode buys of R. W. Folndexter, through Charles E. and Roy W. Day, a lot 40x125 feet, on the west side of Magnolia avenue, 278 feet south of Adams street, with a nine-room twostory frame dwelling now being erected; consideration named, \$4000. Bought for a home.

John R. Vogel buys of Oliver Morosco, through Lee A. McConnell & Co., 50x 150 feet, on the cast side of Okey street between Ninth and Tenth streets, unimproved; consideration named, \$2500. He also buys of same parties 55x140 feet, on the south side of Tenth between Bennett and Figueroa streets, unimproved; consideration named, \$2000, and will erect modern flats on each lot.

Robert Mitchell, George N. Black, George W. Stitzel and Julius H. Black, four active agents, have formed a partnership in the real estate business under the firm name of Mitchell, Black & Co.

John D. Foster, one of the energetic and successful real estate agents of the city, returned last week from a vacation spent at Idyllwild. C. S. Holman of the real estate firm

C. S. Holman of the real estate firm of W. I. Hollingsworth & Co., buys of W. F. Marshall a lot 53x119 feet, on the south side of Orange street between Lucas and Wilmer streets, unimproved; consideration named. \$2500. and will

DESCRIPTION

7a. Architectural style: Shingle Style/Craftsman

7b. Briefly describe the present physical description of the site or structure and describe any major alterations from its original condition:

This picturesque 2-1/2 story house shows the influence of the shingle and Craftsman styles. It is gabled with two, linked, oversized dormers facing the street at the center of the facade. Shaped bargeboards in the form of an upside-down "W", are supported by braces and outline the dormers. A row of corbels separates the dormers from the projecting central portion of the house. A two-sided, slant bay, sheltered by a shed roof on rafters and braces, and adorned with a planter box, is offset on the second story of the center section. The porch, shaded by a hipped roof on posts, occupies the lower level of the center. Additional decorative features include a planter box on an upper story window and a pergola over the driveway. Shingling sheathes the house, which is landscaped with shrubs and a lawn. A low, rusticated stone retaining wall, as well as its setback, era, and scale, tie this house to its neighbor (2248). No alterations were noted.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The structure located at 2242 South Hobart Boulevard was originally built as a single family residence. The property lies in the West Adams Heights Tract which was surveyed by June 18, 1902 at the request of Mrs. Mary Moore, George Ira Cochran, A. J. Wallace, and The Associated Trust & Investment Co. This development was instrumental in the settlement of the West Adams Heights area. Los Angeles County Assessment Records indicate a substantial increase in property improvement values during the years 1907 and 1968. Improvements rose from no value to a value of \$3,500 during that time period. A Los Angeles City Building Permit issued August 23, 1907 describes the intention to erect the structure in question. C.I.D.Moore, the owner, commissioned the prominent architectural firm of Hudson & Munsell to design the residence. Moore contracted E. E. Harriman to construct the residence at an estimated cost of \$6,500.

Los Angeles City Directories mark the beginning of the occupancy of 2242 S. Hobart Blvd. by Mr. Moore before the publication date of the 1908 edition. This suggests that construction was advanced at least far enough to accommodate residence by

	the end of the year 1907. (See Continuation Sheet #1)	Locational sketch map (draw and label site and surrounding streets, roads, and prominent landmarks):

19. Significance (contd):

Charles I. D. Moore had earlier established his reputation as a school teacher and supervisor of Santa Monica schools. In 1902 he began selling insurance for the Conservative Life Co. Conservative Life was consolidated with the Pacific Mutual Life Insurance Co. in 1906, and Moore became the assistant secretary of the companies. The next year he became secretary. Pacific Mutual served a number of Adams Heights residents as a place of business. George Ira Cochran of 2249 Harvard Blvd. was president of the company. The executive and medical director of Pacific Mutual, Dr. Wesley W. Beckett, resided at 2218 South Harvard Blvd. Pacific Mutual was the largest life insurance company in the west.

The architectural firm which designed the residence of Charles I. D. Moore was headed by Frank D. Hudson and William A. Munsell. They also designed the County Museum at Exposition Park, the old Hall of Records (no longer extant), and a number of fine residences throughout the Los Angeles area. In the Adams-Normandie area Hudson & Munsell designed the Frederick Wilson Flint Residence located at 20 Chester Place.
