PUBLIC HEARING REQUIRED

PROJECT SITE: 12001 Chalon Road

ORIGINAL PROJECT:

Demolition of two tennis courts, the outdoor pool area, two Facilities Management Buildings and the Fitness Center Building, and several surface parking lots on a 3.8-acre portion of the 45-acre Mount Saint Mary's (MSMU) Chalon Campus, and the development of a 38,000 square-foot two-story Wellness Pavilion, a new outdoor pool area, landscaped open space, and a two-story parking deck totaling 281 vehicle spaces (a net increase of 55 spaces). The Wellness Pavilion would provide students, faculty, and staff with a gym, multi-purpose rooms, a physical therapy lab, dance and cycling studios, lockers, showers, restrooms, and an equipment storage area.

The Original Project does not include a request to increase student enrollment, but would require the addition of one new staff person and would introduce three new types of events which could be attended by outside guests, students, faculty, and/or staff. The Original Project's new events would include:

- a. Summer Sports Camps (which would operate over a 12-week period during the summer);
- b. Health and Wellness Speaker Series (a maximum of eight annual events); and
- c. Other Wellness/Sports Events/Activities (a maximum of four events per month).

Additionally, Athenian Day and Homecoming, two existing events currently held on the Campus, would be moved to the Wellness Pavilion to allow for potential increases in attendance. Under the Original Project, a maximum of 400 daily outside guests would be permitted to attend the three new event types stated above. The Original Project would include a maximum building height of 42 feet, require a total of 20,524 cubic yards of grading (cut and fill), and 30 retaining walls ranging in height from two feet to a maximum height of up to 36 feet.

ALTERNATIVE 5:

The Department of City Planning recommends that Alternative 5, which was analyzed in the Final EIR (ENV-2016-2319-EIR; SCH No. 2016081015) Chapter III, Revisions, Clarifications, and Corrections at Page III-1, be considered for approval in place of the Original Project. Overall, Alternative 5 is similar to the Original Project, but would result in:

- a. A reduction of 11,181 cubic yards of grading and a two-month shorter construction period;
- b. A reduction of 18 retaining walls of which the maximum height would be reduced to 17 feet;
- c. A reduction of 2,500 square feet of the Wellness Pavilion floor area;
- d. A net reduction of 46 vehicle spaces;
- e. 36 fewer annual Other Wellness/Sport Events activities; and
- f. Club Sports practices and events would be permitted.

Additionally, Alternative 5 would implement and enforce a maximum daily vehicle trip cap for all vehicles attending a Summer Sports Camps, Health and Wellness Speaker Series, other Wellness/Sports Events/Activities, or Club Sport Event, as compared to the Original Project, which would permit a maximum of 400 daily outside guests to attend the three new event types.

Telecommunication Relay Services

Telephone communication is one of the most important forms of communication in society today. Due to advancements in technology, telephone devices have evolved with new services and capabilities. Individuals who are deaf and hard of hearing, and individuals with a speech disability are following these trends and are rapidly

migrating to more advanced telecommunications methods, both for peer-to-peer and third-party telecommunications relay service (TRS) communications.

Telecommunications Relay Service is a telephone service that allows persons with hearing or speech disabilities to place and receive telephone calls. TRS is available in all 50 states, the District of Columbia, Puerto Rico and the U.S. territories for local and/or long distance calls. TRS providers - generally telephone companies - are compensated for the costs of providing TRS from either a state or a federal fund. There is no cost to the TRS user.

What forms of TRS are available? There are several forms of TRS, depending on the particular needs of the user and the equipment available: TRS includes: Text to Voice TTY-Based TRS; Speech-to-Speech Relay Service; Shared Non-English Language Relay Service; Captioned Telephone Relay Service; Internet Protocol Relay Service; and Video Relay Service. Please visit this site for detail descriptions, <https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs>.

Don't hang up! Some people hang up on TRS calls because they think the CA is a telemarketer. If you hear, "Hello. This is the relay service..." when you pick up the phone, please don't hang up! You are about to talk, through a TRS provider, to a person who is deaf, hard-of-hearing, or has a speech disability.

For more information about FCC programs to promote access to telecommunications services for people with disabilities, visit the FCC's Disability Rights Office website.
