Hi Sarah,

It was great seeing you and Emily this morning.

In doing a preliminary assessment of this project's MOU, I noticed that the description of the project indicates 185,000 sf of commercial/retail uses **(including existing uses to be retained)**. However, the trip generation estimates table shows a total of 185,000 sf of new proposed commercial/retail uses. Could you please provide adequate documentation to verify the total square footage size of the existing commercial/retail use to be retained as well as the number of apartment units to be removed in order to determine the total existing use credit? Thanks.

Regards,
