Hi Heather,

Since the Commission directed staff to amend the Environmental Findings to address any testimony presented at the hearing, I'm assuming that you have done this and we do not have to show that as an action on the LOD (however it is reflected in the minutes as a directive to staff). Were the findings amended? This action should have occurred with the VTT since that is where the CPC certified the Project EIR.

Need clarification/confirmation since it's difficult for me to figure out if the environmental findings were amended. Let me know.

Thank you Heather!

Hi Rocky,

The CPC findings were shortened per allowable ceqa provisions. The VTT findings were not changed given that there was no new information presented that wasn't already accounted for in the findings. Thank you for checking in with us.

Let me know if you need anything else.
