200 N. Spring St Rm 750

Los Angeles Ca 90012

Re: Crossroads Hollywood Project

Case No: ENV – 2015-2026 - EIR

Draft Environmental Impact Report Comme

My name is Kevin Wilen . I live a few blocks from the proposed Crossroads redevelopment on Yucca Street which means that I will be directly affected by this development.

I STRONGLY support this project as a way of increasing Hollywood's housing supply during an extreme shortage and its restoration of the historic Crossroads building.

I currently must walk by the development site every day and am disgusted by the current conditions. This development will clean up an area filled with drug addicts, homeless camps, and rundown buildings. It is an embarrassment to our community. The proposed development will have a great impact on overall quality of life by adding more amenities, boost local tourism (a big employer in the area) and make the area safer for pedestrians. It is also a few blocks from the Redline train so new residents will have access to a plethora of transit options besides the automobile.

Again, I STRONGLY support this project.

Thank You
