**RE: COMPARISON OF PROTECTED TREE DISPOSITIONS BASED ON THE REVISED 2013 PLAN HARVARD-WESTLAKE PARKING STRUCTURE PROJECT, 3701 NORTH COLDWATER CANYON AVENUE, NORTH HOLLYWOOD, CALIFORNIA**

Dear Ms. Lockwood:

This letter has been prepared at your request to compare the revised Harvard-Westlake parking structure project design with the site plan previously analyzed in the June 2011 Protected Tree Report. The project footprint has changed. Therefore, the potential number of protected trees that will be preserved, encroached-upon, or removed has also changed.

The "2013 Plan" information presented in the following tables was gleaned from the "Tree Map with Design Changes" dated May 23, 2013 and prepared by Innovative Design Group (IDG). A reduced copy (not to scale) of that plan is included at the end of this letter report. I used a full-sized, 30-scale, copy of the revised plan to update the proposed dispositions of protected trees. Trees with trunks and canopies that occur completely outside of the proposed limits of work/grading and the buffer zones are designated as "Preserved". Trees with trunks or canopies (or portion thereof) that fall within the buffer zones are designated as "Encroachment" trees. Trees whose trunks occur within or close to the limits of work/grading are designated as "Removal" trees. Southern California black walnut trees are highly sensitive to root disturbance. Therefore, some walnut trees located in the buffer zones were designated as "Removals" as opposed to "Encroachments" based on my judgment.

Table 1 lists all the trees, their diameters, their overall grade, and their dispositions from both the 2011 plan and the 2013 plan. The individual tree diameters and grades have not been updated from the June 2011 Protected Tree Report. For the purposes of this report, the 2011 information was sufficient.

Tables 2 and 3 summarize the percentages of removal trees by species type and overall grade for the 2011 and 2013 plans, respectively. Overall, the revised plan will result in 26 tree encroachments, 129 tree removals, and 160 trees preserved. Compared to the 2011 plan, the encroachments remain the same, but there are 25 additional removals. Of the 129 removals proposed under the revised plan, 9 are graded as "B", 35 are graded as "C", and 85 are rated as "D". Please refer to the tables for additional information on the comparisons by species, grades, and percentages.

Please feel welcome to contact me at if you have any questions. Thank you.

Very truly yours,

*Christy Cuba*
