Subject: Hollywood Center Project Draft EIR (ENV-2018-2116-EIR)

Hi Mindy,

Does this document address the increase in population density and therefor the increased need for traffic related improvements? If not where is that being addressed by the city? It may well be there. I have never read one these documents before and it is quite long.

The streets in Hollywood have never been improved for the current traffic conditions much less for the future additional needs. In addition this area is already a traffic nightmare due to the choke points of the onramps to the Hollywood freeway thru the Cahuenga pass in the evening rush hour traffic.

Yes the project is being built near the Metro station but anyone who believes that the people who can afford to rent those apartments will be "taking the metro" is either misinformed or incompetent.

Please advise.

Thanks and Stay Safe!
