ORIGINAL PROJECT:

On October 18, 2007, the Community Redevelopment Agency of the City of Los Angeles certified the Environmental Impact Report (“Certified EIR”) and adopted findings and a statement of overriding considerations for the Sunset and Gordon Mixed-Use Project (“CRA Approved Project”). The Certified EIR analyzed the demolition of existing uses on

the project site and the development of an approximately 324,432 square-foot mixed-use project including: 311 multi-family residences; approximately 53,500 square feet of commercial space consisting of 40,000 square feet of creative office space and 13,500 square feet of retail floor area (including 8,500 square feet of restaurant uses); approximately 508 parking spaces; a 21,177 square-foot public park on the north side of the project site along Gordon Street; and two supergraphic signs. The CRA Approved Project included a 23-story structure (260 feet high above grade) with an 18-floor residential tower above a five-level above grade podium structure with three to four levels of subterranean parking.

MODIFIED PROJECT:

5929 Sunset (Hollywood), LLC (the “Applicant”) proposes to modify the CRA Approved Project to allow for the development of 299 residential apartment units, including 284 market rate units and 15 affordable housing units at the “very low” income level (five percent of total units); approximately 46,110 square feet of commercial space comprised of 38,440 square feet of office space; approximately 3,700 square feet of ground floor restaurant space; and approximately 3,970 square feet of ground floor community serving retail space (including up to a 1,475 square foot coffee shop); an approximately 18,962 square-foot public park on the north side of the Project Site along Gordon Street (the “Modified Project”). In total, the Modified Project will contain approximately 324,693 square feet of floor area. The Modified Project will include a 22-story structure consisting of an 18-floor residential tower above a four-level above-grade podium structure. The Modified Project’s podium structure is proposed to have three levels below grade and three levels above-grade parking and a new automated steel parking structure that is proposed to be located above the parking area on Level L3 (within the approximate height of Level L4 of the rest of the podium structure), which would include two floors of automated parking. The Modified Project will provide at least 353 residential parking spaces and 75 commercial parking spaces (for a total of 428 parking spaces). It should be noted that the Modified Project analyzed in the Supplemental EIR included a proposal for one supergraphic sign, which the Applicant has since withdrawn.
