Re: Record Search Results for the Our Lady of Mt. Lebanon Project

The South Central Coastal Information Center received your records search request for the project area referenced above, located on the Beverly Hills and Hollywood, CA USGS 7.5' quadrangles. The following summary reflects the results of the records search for the project area and a ½-mile radius. The search includes a review of all recorded archaeological and built-environment resources as well as a review of cultural resource reports on file. In addition, the California Points of Historical Interest (SPHI), the California Historical Landmarks (SHL), the California Register of Historical Resources (CAL REG), the National Register of Historic Places (NRHP), the California State Historic Properties Directory (HPD), and the City of Los Angeles Historic-Cultural Monuments (LAHCM) listings were reviewed for the above referenced project site and a ¼-mile radius. Due to the sensitive nature of cultural resources, archaeological site locations are not released.

RECORDS SEARCH RESULTS SUMMARY

Archaeological Resources* (*see note below)	Within project area: 0 Within project radius: 0
Built-Environment Resources	Within project area: 1 Within project radius: 48
Reports and Studies	Within project area: 0 Within project radius: 18
OHP Historic Properties Directory (HPD)	Within project area: 0 Within ¼-mile radius: 0
California Points of Historical Interest (SPHI)	Within project area: 0 Within ¼-mile radius: 0
California Historical Landmarks (SHL)	Within project area: 0 Within ¼-mile radius: 0
California Register of Historical Resources (CAL REG)	Within project area: 0 Within ¼-mile radius: 0
National Register of Historic Places (NRHP)	Within project area: 0 Within ¼-mile radius: 0

Archaeological Determinations of Eligibility (ADOE):	Within project area: 0 Within project radius: 0
City of Los Angeles Historic-Cultural Monuments (LAHCM)	Within project area: 0 Within ¼-mile radius: 0

HISTORIC MAP REVIEW - Santa Monica, CA (1902, 1921) 15' USGS historic map indicates that in 1902 there was no visible development within the project area. There were three roads, two streams, and three buildings within the project search radius which was located within the historic place names of La Brea and Rodeo de Las Aguas. Also of note was marshland located in the northwestern portion of the search radius. In 1921, there was no visible change within the project area. The Pacific Electric Line was located directly north and south of the project area. There were two roads, one intermittent stream, six buildings, and several oil wells within the project search radius. The historic place names of La Brea and Rodeo de Las Aguas remain with the addition of Sherman located nearby.

RECOMMENDATIONS

The subject property built-environment was recorded in 2010 and found (by the recorder) to be eligible for the National and California registers. This property does not appear to have gone through the evaluation process at the state or federal level and is not currently found in the Historic Properties Directory. Because the built-environment resources on the property are 45 years or older, a qualified cultural resources consultant should be retained to study the property and make recommendations regarding those structures. Based upon the funding or permitting process for this property, it may be necessary to put the property through a local, state, and federal evaluation process if required by the lead agency.

There are currently no archaeological resources recorded in the project area. However, when we report that no archaeological resources are recorded in your project area or within a specified radius around the project area; that does not necessarily mean that nothing is there. It may simply mean that the area has not yet been studied and that no information regarding the archaeological sensitivity of the property is available. The reported records search result does not preclude the possibility that surface or buried artifacts may be found during a survey of the property or ground-disturbing activities. Because the property may be sensitive for archaeological resources, it is recommended that a qualified cultural resources consultant be retained to monitor all ground-disturbing activities. Excavation of potential cultural resources should not be attempted by construction personnel. In the event that cultural resources are observed, all work within the vicinity of the find should be diverted until the archaeologist can assess and record the find and make recommendations.

It is also recommended that the Native American Heritage Commission be consulted to identify if any additional traditional cultural properties or other sacred sites are known to be in the area. The NAHC may also refer you to local tribes with particular knowledge of potential sensitivity. The NAHC and local tribes may offer additional recommendations to what is provided here and may also request an archaeological monitor.

For your convenience, you may find a professional consultant** at www.chrisinfo.org. Any resulting reports by the qualified consultant should be submitted to the South Central Coastal Information Center as soon as possible.

**The SCCIC does not endorse any particular consultant and makes no claims about the qualifications of any person listed. Each consultant on this list self-reports that they meet current professional standards.

If you have any questions regarding the results presented herein, please contact the office at 657.278.5395 Monday through Thursday 9:00 am to 3:30 pm. Should you require any additional information for the above referenced project, reference the SCCIC number listed above when making inquiries. Requests made after initial invoicing will result in the preparation of a separate invoice.

Thank you for using the California Historical Resources Information System,

Stacy St. James

*=When we report that no archaeological resources are recorded in your project area or within a specified radius around the project area; that does not necessarily mean that nothing is there. It may simply mean that the area has not yet been studied and that no information regarding the archaeological sensitivity of the property is available. The reported records search result does not preclude the possibility that surface or buried artifacts may be found during a survey of the property or ground-disturbing activities.

Due to processing delays and other factors, not all of the historical resource reports and resource records that have been submitted to the Office of Historic Preservation are available via this records search. Additional information may be available through the federal, state, and local agencies that produced or paid for historical resource management work in the search area. Additionally, Native American tribes have historical resource information not in the California Historical Resources Information System (CHRIS) Inventory, and you should contact the California Native American Heritage Commission for information on local/regional tribal contacts.

The California Office of Historic Preservation (OHP) contracts with the California Historical Resources Information System's (CHRIS) regional Information Centers (ICs) to maintain information in the CHRIS inventory and make it available to local, state, and federal agencies, cultural resource professionals, Native American tribes, researchers, and the public. Recommendations made by IC coordinators or their staff regarding the interpretation and application of this information are advisory only. Such recommendations do not necessarily represent the evaluation or opinion of the State Historic Preservation Officer in carrying out the OHP's regulatory authority under federal and state law.
