Residence of John Wayne (b.1907-d.1979). Wayne became a star in 1939 with the film Stagecoach and continued to play the "tough-but-tender" man during his career in which he received an Academy Award for Best Actor in the film She Wore a Yellow Ribbon. Five years after his first screen appearance, John Wayne moved to this Hollywood apartment building. John Wayne later moved to the San Fernando Valley in the 1950s. (Judy Artunian and Mike Oldham, "Movie Star Homes", (Santa Monica: Santa Monica Press, 2004), 276)

DPR 523A (1/95)
In 1919, permits were issued to owner John R. King (1878-1952) of 703 Story Building for erection of a 2-story, 20-room, 4-family flat and 4-room garage located at 1812-18 Wilcox Ave. The architect was H.J. Knauer. Total valuation of proposed work was $9,500. (LA Building Permit No. 4251, 4110).

The 1930 Census lists owner John King as residing on Berendo Street with his wife Mary King, their 6 children and a servant while working as a building contractor (1930 U.S. Census: California, Los Angeles, Assembly District 55, District 19-64, Sheet 32A). Based out of his office located in the Story Building, John King developed property at South Bronson Avenue and Ingraham Street (*West... (continued on next page)

**Period of Significance:** 1919  
**Property Type:** Multi-family Residential  
**Applicable Criteria:** C/3

In 1919, permits were issued to owner John R. King (1878-1952) of 703 Story Building for erection of a 2-story, 20-room, 4-family flat and 4-room garage located at 1812-18 Wilcox Ave. The architect was H.J. Knauer. Total valuation of proposed work was $9,500. (LA Building Permit No. 4251, 4110).

The 1930 Census lists owner John King as residing on Berendo Street with his wife Mary King, their 6 children and a servant while working as a building contractor (1930 U.S. Census: California, Los Angeles, Assembly District 55, District 19-64, Sheet 32A). Based out of his office located in the Story Building, John King developed property at South Bronson Avenue and Ingraham Street (*West... (continued on next page)

**Context:** Architecture, Engineering and Designed Landscapes, 1913-1945  
**Theme:** Revival of Colonial Styles: The Search for Identity 1913-1945

**Year constructed:** 1919
B10. Statement of Significance (continued): End Sales," Los Angeles Times, 14 Dec 1919, VI; "Display Ad," Los Angeles Times, 11 April 1920, V3; "Residence Sales," Los Angeles Times, 25 July 1920, V4. Similar to these other buildings, John King sold the subject property shortly after it was constructed in April 1920 to Alfred Easter, who was then retired (County of Los Angeles Deeds Book 7204, 28 April 1920, 111). The property sold several more times before Alice J. Kramer, a widow, sold the property to Frank J. Sardam (1880-1954) and his wife Hazel L. Sardam (1888-1970) in April 1943. Hazel Sardam owned the property until her death in 1970 (County of Los Angeles Deeds Book 19953, 16 April 1943, 131; County of Los Angeles Deeds Book 3021, 12 Aug 1970).

The subject property appears eligible for listing the California Register as a fine example of Mediterranean Revival style. With a long west façade, the architect created a wide canvas on which to exhibit many decorative details, such as the glass entry canopy, window surrounds at the first floor, and balcony railing. Scrolled brackets become a leitmotif. Architectural features are well-integrated with the overall design. The glass entry canopy spans all four entry doors, integrating the projecting wings and central recess into a unified whole. This use of decorative details and attention to form is highly unusual in apartment buildings of this period and type.

Theme: Multifamily Development in Hollywood, 1911-1945
Context: Architecture, Engineering and Designed Landscapes, 1913-1945
Theme: The Architecture of Fantasy--Period Revival Styles, 1910-1940

**Period of Significance:** 1925

**Property Type:** Apartment  
**Applicable Criteria:** A/1, C/3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

In 1925, a 99-year lease for the property located at 1825 N. Cahuenga Ave (Marcell Arms Apartments) was granted to Hollywood broker, Henri P. Guertin, and planned for improvement with a high-class structure in April of 1925 ("Syndicate Signs Long Lease for Cahuenga Lot," LA Times, 26 April 1925, F11). The building opened for occupancy in September of 1925. Henri P. Guertin represented all parties in real estate negotiations ("New Construction Indicates Building Trend," LA Times, 7 Jun 1925, G1). It is one of four similarly styled Beaux Arts buildings in Hollywood, erected by the Hollywood Income Properties, Inc, of which George Marcell was president in 1927. The other three properties...(continued on next page)

DPR 523B (1/95)  
*Required Information
B10. Statement of Significance (continued): are the Shelton at 1735 Wilcox Ave (a 160-room apartment building completed in May of 1926),
the Mayfair located at 1764 Wilcox Ave, and the Weston, or "Gilbert Hotel," a hotel located at 1550 N Wilcox. All four buildings were
designed by architect William Allen and constructed by Arthur Bard & Co.

William Allen designed numerous other buildings throughout Los Angeles, including: Hollywood Sixty Club at the intersection of Hollywood
Blvd and McCadden Place (not extant), an American Legion Post #123 building at Santa Monica, a fire department in Manhattan Beach, a
hospital in Duarte, various single family residences, and South Gate City Hall. Arthur Bard constructed numerous buildings throughout Los
Angeles, doing much of his work with architect William Allen and also completing projects based on the designs of prolific Los Angeles
architect L.A. Smith. Bard constructed the Smith-designed Beaux Arts apartment building located at 1241 Vine St and the Smith-designed
L.A. Concordia Athletic Club located at 360 Westlake Avenue. Bard is also responsible for constructing a two-story reinforced concrete
theater located at the northwest corner of Crenshaw Blvd and Adams St.

This apartment building appears significant both as an excellent example of a property type that represents an important pattern of dense,
urban development to accommodate a rapid increase in population as well as for its association with important local architect William Allen.
Despite the pervasive American ideal of single family ownership evidenced at the turn of the twentieth century, there was, nonetheless, a
growing trend in large cities across the nation towards people living together in collective dwelling arrangements. Initial, the communal living
arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood
was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and
apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers. Typical of
the property type, this property is four stories tall, constructed of brick and designed to fill as much of the lot as feasibly possible with
configurations in the shape of an U.

The Lido anchors the western end of a cluster of three and four story apartment buildings on or near this portion of Yucca Street. Designed in classical revival styles, the buildings impart a sense of formality and urbanism that relates to several of the hotels and office buildings built on Hollywood Blvd in the 1920s. A particularly notable feature is the way in which the architect, F.A. Brown, adapted the plan to the site, incorporating curved and angled bays" (Historic Resources Inventory Department of Parks and Recreation form, L. Heumann, C. McAvoy, April 1984). A 1939 LA Times advertisement describes the Lido as a 5-story Class B Building containing 129 furnished units ("Will...(continued on next page)

DPR 523A (1/95)  
*Required Information
In 1939, permits were issued to owner/contractor Aetna Construction Company of 361 S. Witmer for erection of two 2-story, 14-family, 50-room apartment buildings and 4 garage buildings located at 5405-5411 and 5413-5419 Fernwood Ave. No architect is listed on the permit. The engineer was J.J. Rees. Total valuation of proposed work was $35,000 for each apartment building and $675 for each garage. The same owner/contractor and engineer are responsible for design and construction of the adjacent apartment building and two garages, located at 1351-65 N. Serrano Ave, all of which were constructed during the same year at the same cost (LA Building Permit No. 36678-91).

This courtyard...(continued on next page)
B10. Statement of Significance (continued): apartment appears especially significant as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Well into the 1920s, apartment buildings of any kind were typically viewed as an intrusion within areas previously established as neighborhoods comprised of single family residences. The construction of courtyard housing allowed speculative landowners to develop their parcels at higher densities than that afforded by the construction of a single family home. Courtyard apartments, arranged around a central landscaped area, allowed tenants exterior space that provided additional privacy.

DPR 523A (1/95)  *Required Information
P3a. Description (continued): association, design, feeling.  

H) Setting (immediate): mature landscaping.
The property located at 1394 Serrano Ave is contained within a bungalow court consisting of 9 dwelling units and two additional buildings. Each of the 11 buildings located within the bungalow court is contained on a separate parcel. In 1920, permits were issued to owner/architect/contractor R.W. Schmoldt of 832 1/2 W. 41 St. for construction of six 4-room, 1-story, single family dwellings at 1390, 1392, 1394, 1396, 1398, and 1400 N Serrano Ave. Each residence was constructed at a cost of $2,000. Permits for construction of the remaining two dwelling units and the three buildings located to the rear were not found. However, the permits for the six dwellings note that a garage was...(continued on next page)

This property appears significant as one parcel in a bungalow court appears, an increasingly rare example of a formerly ubiquitous property type in Hollywood that represents an important pattern of dense, urban development to accommodate a rapid increase in population. That each building is located on its own parcel is also unique. Designed in a Craftsman style, the property exemplifies character-defining features of a bungalow court including multiple, semi-dethatched buildings arranged around a landscaped courtyard.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The property located at 1398 Serrano Ave is contained within a bungalow court consisting of 9 dwelling units and two additional buildings. Each of the 11 buildings located within the bungalow court is contained on a separate parcel. In 1920, permits were issued to owner/architect/contractor R.W. Schmoldt of 832 1/2 W. 41 St. for construction of six 4-room, 1-story, single family dwellings at 1390, 1392, 1394, 1396, 1398, and 1400 N Serrano Ave. Each residence was constructed at a cost of $2,000. Permits for construction of the remaining two dwelling units and the three buildings located to the rear were not found. However, the permits for the six dwellings note that a garage was...(continued on next page)

DPR 523B (1/95)

This property appears significant as one parcel in a bungalow court, an increasingly rare example of a formerly ubiquitous property type in Hollywood that represents an important pattern of dense, urban development to accommodate a rapid increase in population. That each building is located on its own parcel is also unique. Designed in a Craftsman style, the property exemplifies character-defining features of a bungalow court including multiple, semi-dethatched buildings arranged around a landscaped courtyard.

**B10. Statement of Significance (continued):** already located on the property in 1920. (LA Building Permit No. 6016-6021).

This property appears significant as one parcel in a bungalow court appears, an increasingly rare example of a formerly ubiquitous property type in Hollywood that represents an important pattern of dense, urban development to accommodate a rapid increase in population. That each building is located on its own parcel is also unique. Designed in a Craftsman style, the property exemplifies character-defining features of a bungalow court including multiple, semi-dethatched buildings arranged around a landscaped courtyard.

In 1920, a permit to alter the existing dwelling located at 1747 Hudson Avenue to turn it into a "twin apartment" by adding a small addition and toilet to the existing building, described as a single-story, 7-room bungalow. The owner/contractor listed on the permit is J. Charbanneau of 1753 Hudson. A permit was issued in the same year for erection of the 1-room private garage for the same owner. No architect is listed (LA Building Permit No. 2770). The original new construction date of the existing bungalow is unknown.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

While originally contained on a single parcel, the buildings associated with the Church of Blessed Sacrament are currently located on 3 adjacent parcels fronting Sunset Blvd and Selma Avenue, situated between N. Las Palmas Ave and Cassil Place, contained on the following 3 APNs: 5547019028, 5547019031, 5547019035. The property located at 6636 Selma Ave currently contains only the Convent building, although it original also contained a single-family dwelling. The assessor indicates that the Convent was constructed in 1937, but the only new building permit to be found with this address is for a single-family residence constructed in 1937. Neither the 1936 nor the 1938 Los Angeles City...(continued on next page)

**B13. Remarks:**

**B14. Evaluator:** Jenna Snow  
**Date of Evaluation:** 01/21/2009

(This space reserved for official comments.)
B10. Statement of Significance (continued): Directories contain listings for the Blessed Sacrament Convent. The 1939 Los Angeles City Directory does, however, contain a listing for the Convent, indicating it was constructed c. 1938-1939.

In 1937, the Roman Catholic Arch Diocese of L.A. was granted a permit for construction of a 2-story, single family, residence, to be located at 6636 Selma Ave and constructed at a cost of $31,995. The architect listed on the permit was Thomas Franklin Power. The contractor's name is unreadable. The permit notes that existing buildings on the property included a school, church, rectory, hall, and garage.

Blessed Sacrament Convent appears significant as a particularly fine example of Mediterranean Revival style architecture. European architecture also influenced Period Revival residential styles in Los Angeles, as some Angelenos looked abroad for acquisition of status and sophistication. The style that predominated during the 1920s was the Mediterranean Revival, an eclectic hodgepodge of influences perfectly attuned to Angeleno fantasies of the Italian Riviera. Character-defining features include a low, hipped red-tile roof, simple rectangular forms, balanced composition, and a main, centrally located entry surrounded by what appears to be dressed stone.

B10. Statement of Significance (continued): Sacrament," LA Times, 6 Dec 1925, E2). Ground was not officially broken for construction until March of 1927. The church was originally designed in the Spanish style and was planned for construction at an estimated cost of $450,000 ("Ground Broken for Hollywood Church," LA Times, 20 Mar 1927, E3).

The Blessed Sacrament School building is located on the adjacent parcel immediately east of the church and was also designed by Thomas Franklin Power. In 1923, a permit was issued for construction of the 24-room school located at 6657 Sunset Blvd (LA Building Permit No. 4580). The third property associated with the church contains the former Blessed Sacrament Convent, situated north of the church and school, fronting Selma Ave, constructed c. 1937-1939 and now in use as a social services building. In 1936, a permit was issued for construction of a 3-room recreation building on the same site, also with the address 6657 Sunset Blvdi(LA Building Permit No. 17877). This building appears to have been demolished.

The adjacent property located to the west at 6657 W. Sunset Blvd contains 2 buildings, the main Blessed Sacrament Church building associated with the school and a rectory building, situated behind the church. A 1925 LA Times article features a drawing of the proposed church building, also designed by architect Thomas F. Power ("New Church for Parish of Blessed Sacrament," LA Times, 6 Dec 1925, E2). Ground was not officially broken for construction until March of 1927 ("Ground Broken for Hollywood Church," LA Times, 20 Mar 1927, E3) The church was originally designed in the Spanish style and was planned for construction at an estimated cost of $450,000. The third property originally located on the same parcel with the church, rectory and school contains the former Blessed Sacrament Convent, constructed c. 1937-1939 and now in use as a social services building. In 1936, a permit was issued for construction of a 3-room recreation building on the same site, also with the address 6657 Sunset Blvd. This building appears to have been demolished.

DPR 523A (1/95)

**Required Information**
Permits were issued for construction of the three apartment buildings located on this property in 1939. "Unit A" is located at 1535 N. Las Palmas Ave and "Unit B" is located at 1545 N. Las Palmas Ave. Units A & B are twins, each designed in 2-story square doughnut arrangements fronting Las Palmas Avenue. Both were designed with stucco exterior walls, built to contain 130 rooms and 32 families, and each were built at a cost of $80,000.

The third apartment building on the lot (not given a name) is located at 1555 N. Las Palmas Ave. It has a C-shape layout with the building arranged around green space and facing Selma Avenue. It was originally constructed as a 2-story, 16-family, 40-room...(continued on next page)
B10. Statement of Significance (continued): building, constructed at a cost of $40,000. The original owner and contractor for all three buildings was Aetna Construction Company of 631 S. Witmer. There was no architect listed on the original building permit. The licensed engineer for all three buildings was J.J. Rees.

  **Area:** Los Angeles  

  **Theme:** Nexus: Residential Development and Suburbanization, 1850-1912  

  **Context:** Residential Development and Suburbanization, 1850-1912  

  **Theme:** Annexation and Consolidation, 1895-1910

  **Period of Significance:** 1905

  **Property Type:** Single Family Residence

  **Applicable Criteria:** A/1

  (Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property appears significant as an excellent example of an increasingly rare property type. Single family residences from the pre-annexation period of Hollywood appear particularly significant as an important pattern of development, illustrative of Hollywood’s early development as an independent city. Although residential development began a few years earlier, Hollywood became an independent city in 1903. By 1909, Hollywood experienced growth on an exponential scale, with a population increase of 700 in 1903 to 4,000 in 1909 and accompanying difficulties supplying services to residents. As a result of its growing pains, Hollywood became a district of Los Angeles in February 1910.

DPR 523A (1/95)  *Required Information
Located adjacent to the Hollywood Chamber of Commerce building, the structure located at 6536 W. Sunset Blvd was originally opened as a Spanish style shopping court fronting Sunset Blvd for 200 feet by owner Fred Thompson. Total cost of construction was estimated at $100,000. It was designed with a large central Spanish courtyard surrounded by shops and studios. A full grown olive tree was planted in the center, after which the court was named, "The Court of the Olive Tree." The architect was Gogerty & Weyl and the contractor was Henry Boller. The decorator was Stefan Hobercheck ("Studio Building Under Way, Shopping Court to Open in October," LA Times, 3 Jul 1927, E8). According to...(continued on next page)
B10. Statement of Significance (continued): original Los Angeles Building Permits, in 1927, a permit was issued to owner Fred C. Thomson of F.B.O. Studio for erection of a 1 and 2 story, 43-room "shop and studios" building located at 6528-540 Sunset Blvd. The architect was Gogerty & Weyl and the contractor was H.I. Beller Construction Co. Total valuation of proposed work was $85,000 (LA Building Permit No. 19912).

DPR 523A (1/95)
Located adjacent to the Spanish style Cat & Fiddle restaurant (originally a building designed for shops and studios), the building located at 6520 Sunset Blvd was constructed in 1925 to house the Hollywood Chamber of Commerce. As early as 1929, it also housed the Hollywood Credit Association, the Kiwanis Club of Hollywood, the Lions Club of Hollywood, and the Merchants Bureau of Hollywood (1929 LA City Directory). The original building permit, issued in November of 1925, indicates that the building located at 6522 Sunset Blvd was originally designed as a 2-story office building for the Chamber of Commerce, previously of 1124 Van Nuys Building. The architect was Morgan, Walls, & Clements...
B10. Statement of Significance (continued): and the contractor was Wm. Simpson Construction Company. Total valuation of proposed work was $42,000 (LA Building Permit No. 37867).

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property appears individually significant for its high quality of architectural design in a Spanish Colonial Revival style. While many residential buildings were constructed in the Spanish Colonial Revival style during this time period, this property is a particularly excellent example of the style serving as a paradigm of characteristic features of the style. What we now call Spanish Colonial Revival style is really the second phase of a larger, more encompassing style which began in the 1890s and 1900s. Developing alongside a national trend of high style, academic architects employing historic eclectic styles, Spanish Colonial Revival style, in the broadest sense of the term, was...(continued on next page)

DPR 523B (1/95)  

*Required Information*
B10. Statement of Significance (continued): an attempt to create and define a prototypical Californian expression of architecture. The 1890s -1930s was a period in which historic eclecticism was the dominant mode of architectural expression. The academic, high style expression of Spanish Colonial Revival style was popularized by the Panama-California Exposition of 1915 in San Diego. The L-plan layout of the subject building provides more streetfront elevations to showcase stylistic elements, including the balconies, and stairways with decorative elements, a corbelled arched overhanging second floor, and the arched opening to the courtyard.

Period of Significance: 1941 Property Type: Apartment Applicable Criteria: A/1, C/3

This property currently contains 5 buildings. In 1941, permits were issued to owner California Realty Corporation of 739 Highland Ave for erection of a 2-story, 284-room apartment building and two 1-room garages, located at the NW corner of Gower St and Lexington Ave. The architect was Max Maltzman, the engineer was J.E. Mackel and the contractor was Halper Construction Corporation. Total valuation of proposed work was $192,000. (LA Building Permit No. 10848-10850).

This courtyard apartment appears significant as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population as well as for its...(continued on next page)

(This space reserved for official comments.)
B10. Statement of Significance (continued): association with important Los Angeles architect Max Maltzman. Well into the 1920s, apartment buildings of any kind were typically viewed as an intrusion within areas previously established as neighborhoods comprised of single family residences. The construction of courtyard housing allowed speculative landowners to develop their parcels at higher densities than that afforded by the construction of a single family home. Courtyard apartments, arranged around a central landscaped area, allowed tenants exterior space that provided additional privacy. This property is two stories in height and constructed in a popular period revival style.

Max Maltzman was a prolific local architect who is best known for his luxury, multifamily apartment buildings, including the Ravenswood at 570 N. Rossmore Avenue, 410 N. Rossmore Avenue and the Charmont Apartments in Santa Monica (listed in the National Register). Later in his career in the 1950s, Max Maltzman designed tract homes, such as Orangewood Estates in Fullerton and Hollypark Knolls in Inglewood.

*Required Information
The property was built by Gus Schumacher around 1924. Original building permits were not available. According to the 1920 Federal Census, Gus Schumacher was of German descent and worked as a clerk in a studio.

This bungalow court is significant as an increasingly rare example of a formerly ubiquitous property type in Hollywood that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Designed in a Mediterranean Revival style, the property exemplifies character-defining features of a bungalow court including multiple, semi-dethatched buildings on a single residential lot arranged around a landscaped courtyard.

Period of Significance: 1924 Property Type: Multi-family Property Applicable Criteria: A/1

5 buildings are extant on the property located at 1141 Gordon. The earliest building, located at the rear of the lot, was constructed circa 1916. A permit for erection of the 1-story, 8-room duplex was issued to owner Laura Smith of 804 Union Oil Building on September 5, 1918. Total valuation of proposed work was $1,800 (LA Building Permit No. 5095). This dwelling, originally situated at the front of the lot, was moved to the rear of the lot by owner W. Lindsay of 710 Wright Callendev Building in 1928 to make way for four new residential buildings (LA Building Permit No. 1077-1080, January 12, 1928). In the same year, Lindsay was issued permits for erection of the four residential buildings, each a 1-story,...(continued on next page)

This property appears significant as an excellent example of an increasingly rare property type. Single family residences from the pre-annexation period of Hollywood appear particularly significant as an important pattern of development, illustrative of Hollywood’s early development as an independent city. Although residential development began a few years earlier, Hollywood became an independent city in 1903. By 1909, Hollywood experienced growth on an exponential scale, with a population increase of 700 in 1903 to 4,000 in 1909 and accompanying difficulties supplying services to residents. As a result of its growing pains, Hollywood became a district of Los Angeles in February of...(continued on next page)

DPR 523A (1/95)  *Required Information
The property located at 1122 N. Gower is part of a courtyard apartment that includes a mirror building located on the adjacent parcel, which has the address 1132 N. Gower. In 1937, permits were issued for construction of the adjacent 2-story, 6-family, 26-room apartment building and garage located at 1128-1132 N. Gower to owner Lewis Strass of 1409 N. Gower. Total valuation of proposed work was $20,000. No architect is listed on the original building permit. The engineer was J.J. Rees. The contractor was Harry Horowitz of 128 N. Ridgwood Place (LA Building Permit No. 21171-72). In 1938, permits were issued to the same owner for construction of the second garage and this apartment...(continued on next page)
B10. Statement of Significance (continued): building for 6-families with 24-rooms. Total valuation of proposed work for erection of this apartment building was $1,800. The engineer and contractor are the same as above (LA Building Permit No. 30010).  

This courtyard apartment is significant as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Well into the 1920s, apartment buildings of any kind were typically viewed as an intrusion within areas previously established as neighborhoods comprised of single family residences. The construction of courtyard housing allowed speculative landowners to develop their parcels at higher densities than that afforded by the construction of a single family home. Courtyard apartments, arranged around a central landscaped area, allowed tenants exterior space that provided additional privacy. This property is two stories in height and constructed in a popular period revival style.

The property located at 1132 N. Gower is part of a courtyard apartment that includes a mirror building located on the adjacent parcel, which has the address 1122 N. Gower. In 1937, permits were issued for construction of this property, a 2-story, 6-family, 26-room apartment building and garage located at 1128-1132 N. Gower to owner Lewis Strass of 1409 N. Gower. Total valuation of proposed work was $20,000. No architect is listed on the original building permit. The engineer was J.J. Rees. The contractor was Harry Horowitz of 128 N. Ridgwood Place (LA Building Permit No. 21171-72). In 1938, permits were issued to the same owner for construction of the second garage and adjacent...(continued on next page)

Period of Significance: 1937

Property Type: Multi-family Resident

Applicable Criteria: A/1

Year constructed: 1937-1938

The property located at 1132 N. Gower is part of a courtyard apartment that includes a mirror building located on the adjacent parcel, which has the address 1122 N. Gower. In 1937, permits were issued for construction of this property, a 2-story, 6-family, 26-room apartment building and garage located at 1128-1132 N. Gower to owner Lewis Strass of 1409 N. Gower. Total valuation of proposed work was $20,000. No architect is listed on the original building permit. The engineer was J.J. Rees. The contractor was Harry Horowitz of 128 N. Ridgwood Place (LA Building Permit No. 21171-72). In 1938, permits were issued to the same owner for construction of the second garage and adjacent...(continued on next page)
B10. Statement of Significance (continued): building for 6-families with 24-rooms. Total valuation of proposed work for erection of that apartment building was $1,800. The engineer and contractor are the same as above (LA Building Permit No. 30010-11).

This courtyard apartment is significant as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Well into the 1920s, apartment buildings of any kind were typically viewed as an intrusion within areas previously established as neighborhoods comprised of single family residences. The construction of courtyard housing allowed speculative landowners to develop their parcels at higher densities than that afforded by the construction of a single family home. Courtyard apartments, arranged around a central landscaped area, allowed tenants exterior space that provided additional privacy. This property is two stories in height and constructed in a popular period revival style.

B10. Significance:

Area: Los Angeles  Theme: Motion Picture Industry--Major Studio Era, 1919-1945

Context: Entertainment Industry, 1913-1945

Period of Significance: 1922 - 1964  Property Type: Commercial  Applicable Criteria: A/1

This property appears significant as one of the last remaining major motion picture and sound-track studio support building. Established in 1919, the Cinema Mercantile Exchange primarily rented props to Keystone Studio. The 1942 City Directory lists 29 "Motion Picture Apparatus and Supplies." Of those, only three were located in the project area. Constructed in 1922, the Cinema Mercantile Company continues to supply props for studios, although under different ownership. Construction history is unknown. Although the property appears to have been altered around 1956, the property appears to retain sufficient integrity to convey its significance. The company also uses a building...(continued on next page)

DPR 523A (1/95)  *Required Information
This property appears significant as an excellent example of an increasingly rare property type. Single family residences from the pre-annexation period of Hollywood appear particularly significant as an important pattern of development, illustrative of Hollywood’s early development as an independent city. Although residential development began a few years earlier, Hollywood became an independent city in 1903. By 1909, Hollywood experienced growth on an exponential scale, with a population increase of 700 in 1903 to 4,000 in 1909 and accompanying difficulties supplying services to residents. As a result of its growing pains, Hollywood became a district of Los Angeles in February of...(continued on next page)
This property, constructed a year before Hollywood was annexed to Los Angeles, is designed in a Craftsman style, the most popular style of this period, and exhibits most character-defining features including a low pitched roof with exposed rafters and decorative fascia, broad front porch, decorative art glass, wood shingle siding and wood casement windows. Building permits were not available for the property.

DPR 523A (1/85)  

*Required Information*
P3a. Description (continued): integrity: high, setting, location, materials, workmanship, association, design, feeling
The apartment building located at 5827 Lexington Avenue was originally designed in 1962 to house 10 dwelling units for owner John Montallano and Jonas Zigaing & Catalano of 2340 Outpost Drive. The building was constructed at a cost of $80,000. (LA Permit No. 16809; LA 16810).

This postwar multifamily apartment building appears significant for its highest quality of architectural design and exemplifies its property type. Two stories in height over partially submerged parking, the property features applied arches across half the façade, while a sculptural internal stair is visible though a glass curtain wall.

Department of Building and Safety, LA Permit No. 16809; LA 16810, August 10, 1962.

B10. Statement of Significance (continued): comprised of single family residences. Perhaps because of the resistance towards multifamily residential buildings during this period, a couple of different strategies were employed to make their primary façade appear more like a single family residence. This property, designed in a Spanish Colonial Revival style, articulates decorative elements of the primary façade with a visual cohesiveness suggestive of a single family residence. Specifically a central tower element unites the façade.

Period of Significance: 1918 Property Type: Multi-family Resident Applicable Criteria: A/1
(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.) 
This property consists of four identical buildings constructed on a single lot and appear as a modified bungalow court. The property appears significant as an increasingly rare example of a formerly ubiquitous property type in Hollywood that represents an important pattern of dense, urban development to accommodate a rapid increase in population. The buildings on this property are designed in a Craftsman style, the most popular style of this period, and exhibit most character-defining features including low pitched roofs with venting under the gable peak, wood clapboard siding and wood double-hung windows. Building permits were not available for the property. Although the 1986...(continued on next page)

(This space reserved for official comments.)
B10. Statement of Significance (continued): survey states that properties on this street were originally constructed for Japanese Americans who lived in Hollywood and served as gardners, this information is not supported by census data for this property. A number of Japanese immigrants resided on the 1300 block of Tamarind Avenue. These immigrants were among those who worked as gardners for private families.

B10. Significance:

Context: Residential Development and Suburbanization, 1913-1945
Theme: Multifamily Development in Hollywood, 1911-1945

Context: Architecture, Engineering and Designed Landscapes, 1913-1945
Theme: The Architecture of Fantasy--Period Revival Styles, 1910-1940

Period of Significance: 1925
Property Type: Multi-family Resident
Applicable Criteria: A1, C3

The Egyptian Revival Karnak Apartments were constructed in 1925 for owner A.S. Tyler of 241 N. Western Avenue at a cost of $50,000. The architect and contractor were J.M. Close of the same address. J.M. Close also designed several of the Karnak's "twins", including the Ahmed Apartments, located within the Hollywood Redevelopment Area at 5616 Lexington Avenue, the Sahara Apartments, located at 1020 S. Kingsley Drive, and a 2-story mini-version of the same building located immediately across the street from the Sahara Apartments. John M. Close was an architect, contractor, and realty broker. He is listed in the 1920 Census as 38 years old, from New York, residing at 1807 Vernon Avenue...

"Spanish Artist on Visit Here", LA Times 28 Feb 1931, A5.
1920 United States Federal Census.

B13. Remarks:

B14. Evaluator: Jenna Snow
Date of Evaluation: 02/02/2009
B10. Statement of Significance (continued): married to Edna R. of California, with one son and one daughter.

According to the 1930 Census, approximately 12 of the residents of the Karnak worked in the motion picture industry, employed as actors, musicians, and art directors. In addition, among the early residents of the Karnak was Jose Samaniego, Spanish artist and editor of the Prensa de Madrid, a leading illustrated weekly publication in Spain, who lived at the Karnak while visiting the Hollywood area for one year to study American filmmaking as a representative of the Spanish government ("Spanish Artist on Visit Here", LA Times 28 Feb 1931, A5).

The Karnak Apartments appear significant both as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population as well as for its relatively rare and distinctive architectural style. Despite the pervasive American ideal of single family ownership evidenced at the turn of the twentieth century, there was, nonetheless, a growing trend in large cities across the nation towards people living together in collective dwelling arrangements. Initial, the communal living arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers. Typically four or five stories tall, they were usually constructed of brick or of reinforced concrete and were generally designed to fill as much of the lot as feasibly possible with configurations in the shape of an U, L, T or barbell.

Designed in an Egyptian Revival style, the property exhibits character-defining features of the style, including a monolithic structure with lotus-topped pilasters and Egyptian iconography. The style represents an exuberant period of expansion during the 1920s fueled by the explosive popularity of motion picture industry. Not only was the property inhabited by residents connected to the motion picture industry, the building itself provided entertainment for passers-by that invited their participation and reproduction of the city's self-image as a playful, fantastical paradise.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

In 1927, a permit was issued to owner Sam Polakof of 1123 Guaranty Building, Hollywood for erection of a 4-story, 40-family, 72-room apartment building located at 5607 La Mirada. Total valuation of proposed work was $60,000. The architect was Arthur Le Brun and the contractor was Victor Polakow of 1123 Guaranty Building in Hollywood (LA Permit No. 13910). According to the 1929 LA City Directory and articles in the Historic Los Angeles Times, the historic name for the building was the "Rosemar Apartments."

Arthur Le Brun is an important local architect, designing a number of apartment buildings throughout Los Angeles, including: a 5-story apartment building on the corner of 20th and...(continued on next page)

This property appears significant as an excellent example of an increasingly rare property type. Single family residences from the pre-annexation period of Hollywood appear particularly significant as an important pattern of development, illustrative of Hollywood’s early development as an independent city. Although residential development began a few years earlier, Hollywood became an independent city in 1903. By 1909, Hollywood experienced growth on an exponential scale, with a population increase of 700 in 1903 to 4,000 in 1909 and accompanying difficulties supplying services to residents. As a result of its growing pains, Hollywood became a district of Los Angeles in February of...(continued on next page)

Context: Residential Development and Suburbanization, 1913-1945

Period of Significance: 1922  
Property Type: Multi-family Residential
Applicable Criteria: A/1

This single-story, 6-room, 2-family dwelling (duplex) was constructed in 1922 for owner Connie H. Rissman of 5542 La Mirada at a cost of $4,000 (LA Permit No. 12463). There is no architect listed on the original building permit but the contractor is listed as Olin J. Cope of 5502 Santa Monica Blvd. The Olin J. Cope Company was also the general contractor for a seven-room Spanish Revival dwelling in Hollywood on Primrose Avenue, designed by Scott Quintin and Tom Kerr of Alhambra Architects.

This duplex appears significant as an increasingly rare example of a formerly ubiquitous property type in Hollywood that represents an important pattern of dense, urban development to accommodate a...(continued on next page)

(This space reserved for official comments.)
B10. Statement of Significance (continued): rapid increase in population. Well into the 1920s, apartment buildings of any kind were typically viewed as an intrusion within areas previously established as neighborhoods comprised of single family residences. Perhaps because of the resistance towards multifamily residential buildings during this period, a couple of different strategies were employed to make their primary façade appear more like a single family residence. Designed in a Craftsman style, the primary façade is broken down by placing entry porches on opposites sides of the elevation so that individual units recall the imagery of an individual single-family residence.

B9a. Architect: Robert Ferrington (1924 residence); Eldo Chrysler (192

B10. Significance: Area: Los Angeles

Theme: Multifamily Development in Hollywood, 1911-1945

Context: Residential Development and Suburbanization, 1913-1945

Period of Significance: 1924, 1927

Property Type: Multi-family Property

Applicable Criteria: A/1

This lot currently contains 3 buildings: a larger apartment building fronting Lexington and a 3-room garage and smaller multi-family building fronting St. Andrews Place. Original building permits for the two residential buildings indicate that both dwellings originally had addresses on St. Andrews Place. Two permits were issued in 1924 to erect an 8-room, single family residence and a 2-room garage at 1208-1210 St. Andrews Place for owner contractor Weston W. Shay of 1636 Crescent Place. The architect listed on the permit is Robert Ferrington. The total cost of construction of the residence was estimated at $9,000 and cost of construction of the garage was estimated at $200 (LA...(continued on next page)

(This space reserved for official comments.)
B10. Statement of Significance (continued): Building Permit No. 38161). Two permits were issued in March of 1927 to erect a 10-room, 2-family dwelling on the lot located at 1208-1210 N St Andrews Place for owner K.M. Lange of 5552 Santa Monica Blvd. The architect was Eldo Chrysler and the contractor was GG. Lange of 1118 Orange Grove Ave (Lange's first initials are difficult to read on the original permit and may not be "G.G."). The total cost of construction was estimated at $6,000. A permit was issued in the same year for construction of a $200, 3-room garage on the same lot but with the address 5541-47 Lexington Avenue (LA Building Permit No. 08452, 2453). According to Sanborn maps, the larger building was converted to flats, while the smaller one was used as a duplex.

This property appears significant as an increasingly rare example of a formerly ubiquitous property type in Hollywood that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Well into the 1920s, apartment buildings of any kind were typically viewed as an intrusion within areas previously established as neighborhoods comprised of single family residences. Perhaps because of the resistance towards multifamily residential buildings during this period, a couple of different strategies were employed to make their primary façade appear more like a single family residence. Designed in a Mediterranean Revival style, decorative elements of the primary façade of the flats - the centrally located entries balanced on either side by porches- creates a visually cohesive composition to suggest a single family residence.

The property is also one of only a small handful of Craftsman buildings in Hollywood which makes use of the style for the much less common two-story variant. Popular from the early 1900s through the 1920s, the Craftsman style utilizes design elements of the Arts and Crafts style and represents a conscious search for the supposed simplicity of pre-Industrial times. The bungalow's simplicity of form, informal character, direct response to site, and extensive use of natural materials, was a regional interpretation of the socio-economic and aesthetic reforms espoused by the Arts and Crafts Movement's founder, William Morris. Although modest in size, this property demonstrates most character-defining features, including a low-pitched roof with wide eaves, exposed rafter tails, and venting under gable peaks. The property also displays character-defining features of wood shingle siding and a full-width front porch. Building permits were not available for this property.

( Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
The permit to erect this 20-unit apartment building was issued in 1956 for owners Edward Puskin and Harry Kalin of 5309 Knowlton Street at a cost of $67,000 (LA Permit No. 58459). No architect is listed on the permit. Edward Puskin & Son of 5309 Knowlton Avenue is listed as the contractor.

This postwar multifamily apartment building appears significant for its highest quality of architectural design and epitomizes its property type. Two stories in height, an exterior stair gives access to an exterior corridor covered by an extension of the gable roof, and a distinctive, multicolored dingb character and metal screen decorates the facade.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The original building permit for construction of the dwelling located at 5700 La Mirada is not available. The assessor date for construction of the building is 1909. Permits were issued in 1924 to turn the existing single family residence into a duplex for owner J.J. Stockebrand of the same address. Alterations cost a total of $800 and included addition of one partition and three doors and changing of one window (LA Building Permit No. 8528). Stockebrand was also issued a permit to construct a $375 new private garage on the property in the same year (LA Building Permit No. 33296).

Despite the 1924 alterations, this property continues to appears significant as an excellent example of...(continued on next page)

B10. Statement of Significance (continued): an increasingly rare property type. Properties from the pre-annexation period of Hollywood appear particularly significant as an important pattern of development, illustrative of Hollywood’s early development as an independent city. Although residential development began a few years earlier, Hollywood became an independent city in 1903. By 1909, Hollywood experienced growth on an exponential scale, with a population increase of 700 in 1903 to 4,000 in 1909 and accompanying difficulties supplying services to residents. As a result of its growing pains, Hollywood became a district of Los Angeles in February of 1910. This building is designed in a Craftsman style, the most popular style of this period, and exhibits most character-defining features including low pitched gable roof with exposed rafter tails, wood clapboard siding and wood double-hung windows, and a wide front porch with a stone base.

**Period of Significance:** 1925

**Property Type:** Multi-family Residential

**Applicable Criteria:** A/1, C/3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

Originally constructed as a 60-room, 20-family apartment and hotel building at a cost of $55,000 for owner R.B. Stevenson, a realtor broker, of 5616 Lexington Avenue. The architect was N.V. Whitfield and the contractor was J.M. Close (a designer and builder) of 241 Western Avenue (LA Perm No. 37235). While the Sanborn Map shows a 20-apartment, 20-room building, the original permit for erection of the building indicates that it is a 20-family, 60-room building and a Los Angeles Times article "Valuation Shows Big Price Rise," notes that the building is planned to be 40-units.

J.M. Close also designed several of the Ahmed's "twins," including the Karnak Apartments, located within the...(continued on next page)

B10. Statement of Significance (continued): Hollywood Redevelopment Area at 5617 La Mirada, the Sahara Apartments, located at 1020 S. Kingsley Drive, and a 2-story mini-version of the same building located immediately across the street from the Sahara Apartments. A builder/contractor named John M. Close is listed in the 1920 Census as 38 years old, from New York, residing at 1807 Vernon Avenue, married to Edna R. of California, with one son and one daughter.

According to the 1929 LA City Directory, early tenants of the Ahmed include: Edward L. and Eugene C. Ferrell, both occupied as film cutters, Louise M. Greenan, a nurse, and Edward Greenbaum (occupation unknown). According to the 1930 Census, residents included Clark B. Morris, a real estate salesman and Charles J. Webberston, a janitor.

The Ahmed Apartments appear significant both as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population as well as for its relatively rare and distinctive architectural style. Despite the pervasive American ideal of single family ownership evidenced at the turn of the twentieth century, there was, nonetheless, a growing trend in large cities across the nation towards people living together in collective dwelling arrangements. Initial, the communal living arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers. Typically four or five stories tall, they were usually constructed of brick or of reinforced concrete and were generally designed to fill as much of the lot as feasibly possible with configurations in the shape of an U, L, T or barbell.

Designed in an Egyptian Revival style, the property exhibits character-defining features of the style, including a monolithic structure with lotus-topped pilasters and Egyptian iconography. The style represents an exuberant period of expansion during the 1920s fueled by the explosive popularity of motion picture industry. Not only was the property inhabited by residents connected to the motion picture industry, the building itself provided entertainment for passers-by that invited their participation and reproduction of the city's self-image as a playful, fantastical paradise.

DPR 523B (1/95)
B10. Statement of Significance (continued): American ideal of single family ownership evidenced at the turn of the twentieth century, there
was, nonetheless, a growing trend in large cities across the nation towards people living together in collective dwelling arrangements. Initial,
the communal living arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern
from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in
population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land
developers. Typically four or five stories tall, they were usually constructed of brick or of reinforced concrete and were generally designed to
fill as much of the lot as feasibly possible with configurations in the shape of an U, L, T or barbell.

Designed in the relative rare Zigzag Moderne style, the property exhibits character-defining features of the style, including smooth stucco wall
surfaces decorated with zigzags and other stylized geometric motifs, and pilasters emphasizing verticality. Though comparatively rare, and in
vogue for not much more than a decade, this style was highly influential because it embodied the integration of four unlikely features unique
to Los Angeles: changing patterns of land use; a popular response to early 20th Century progress and technology; the birth of new industries;
and a sense of fantasy fueled by Hollywood and the movie industry that propelled the City's myths and legends.

(Comment on importance in terms of historical or architectural context, and also the integrity.)

This flat appears significant as an increasingly rare example of a formerly ubiquitous property type in Hollywood that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Well into the 1920s, apartment buildings of any kind were typically viewed as an intrusion within areas previously established as neighborhoods comprised of single family residences. Perhaps because of the resistance towards multifamily residential buildings during this period, a couple of different strategies were employed to make their primary façade appear more like a single family residence. A modest example of American Foursquare style, decorative elements of...(continued on next page)

B10. Statement of Significance (continued): pattern of dense, urban development to accommodate a rapid increase in population. Well into the 1920s, apartment buildings of any kind were typically viewed as an intrusion within areas previously established as neighborhoods comprised of single family residences. Perhaps because of the resistance towards multifamily residential buildings during this period, a couple of different strategies were employed to make their primary façade appear more like a single family residence. A modest example of Italianate style, decorative elements of the primary façade create a visually cohesive composition to suggest a single family residence.

*B10. Significance: Area: Los Angeles  Theme: Multifamily Development in Hollywood, 1911-1945

Context: Residential Development and Suburbanization, 1913-1945

Property Type: Multi-family Resident  Applicable Criteria: A/1

Period of Significance: 1927

This apartment building appears significant as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Despite the pervasive American ideal of single family ownership evidenced at the turn of the twentieth century, there was, nonetheless, a growing trend in large cities across the nation towards people living together in collective dwelling arrangements. Initial, the communal living arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization...(continued on next page)

B10. Statement of Significance (continued): parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers. Typically four or five stories tall, they were usually constructed of brick or of reinforced concrete and were generally designed to fill as much of the lot as feasibly possible with configurations in the shape of an U, L, T or barbell. Designed in a modest Italianate style, this property exhibits most character-defining features including triangular and segmental pedimented windows, rusticated base, and hipped roof.

B10. Statement of Significance (continued): a rapid increase in population as well as for its distinctive use of the Spanish Colonial Revival style. Despite the pervasive American ideal of single family ownership evidenced at the turn of the twentieth century, there was, nonetheless, a growing trend in large cities across the nation towards people living together in collective dwelling arrangements. Initial, the communal living arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers.

While many residential buildings were constructed in the Spanish Colonial Revival style during this time period, this property is a particularly excellent example of the style, serving as a paradigm of characteristic features of the style. What we now call Spanish Colonial Revival style is really the second phase of a larger, more encompassing style which began in the 1890s and 1900s. Developing alongside a national trend of high style, academic architects employing historic eclectic styles, Spanish Colonial Revival style, in the broadest sense of the term, was an attempt to create and define a prototypical Californian expression of architecture. The 1890s -1930s was a period in which historic eclecticism was the dominant mode of architectural expression. The academic, high style expression of Spanish Colonial Revival style was popularized by the Panama-California Exposition of 1915 in San Diego. The L-plan layout of the subject building provides more streetfront elevations to showcase stylistic elements, including the tower, balconies, and stairways with decorative elements, the archway over the driveway, and the courtyard and fountain.

Applicable Criteria: A/1, C/3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

According to the original building permit (LA Permit No. 36160), the Edgmont was built in 1927 as a 96-room, 40-family brick apartment building. While the original permit for erection of the building states that the owner was M. A. Frug of 3423 Glendale Boulevard, a 1929 Los Angeles Times article indicates that The Edgmont was owned by the Interstate Mortgage and Investment Company by 1929. The company also owned at least 7 similarly scaled and styled buildings throughout the Los Angeles area ("A Notable Achievement for 1928", LA Times, 2 Jan 1929, E21). The architect, A.B. Rosenthal is a significant California architect. He designed the Carthay Circle, California, and Hollywood...

B13. Remarks:

*B14. Evaluator: Jenna Snow

*Date of Evaluation: 09/18/2008
**B10. Statement of Significance (continued):** theaters in Los Angeles and the Granada Theater in Santa Barbara. The contractor was S. Clark of 6001 Santa Monica Blvd.

According to the 1930 Census, early Edgmont tenants included residents with a variety of occupations. In addition, in 1930, approximately eight Edgmont residents worked in the motion picture industry, including Ruth Adams, an actress, Ronald Barrows, an agent, Eddie Hoffman, a motion picture actor, Marice McDermot a motion picture writer, Frank H. Hicks, a stories writer, Ben Bodner, a motion picture cameraman, Henry Zuckrman, a motion picture clerk, and Doris Rich, a theatre actress.

This apartment building appears significant as both an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population as well as for its fine architectural design in a Tudor Revival style. Despite the pervasive American ideal of single family ownership evidenced at the turn of the twentieth century, there was, nonetheless, a growing trend in large cities across the nation towards people living together in collective dwelling arrangements. Initial, the communal living arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers. Typically four or five stories tall, they were usually constructed of brick or of reinforced concrete and were generally designed to fill as much of the lot as feasibly possible with configurations in the shape of an U, L, T or barbell.

Designed in an Tudor Revival style, the property exhibits character-defining features of the style, including a steeply pitched, hipped roof, tall, narrow windows grouped in trios, and modified turrets at either side of the facade. The style represents an exuberant period of expansion during the 1920s fueled by the explosive popularity of motion picture industry. Not only was the property inhabited by residents connected to the motion picture industry, the building itself provided entertainment for passers-by that invited their participation and reproduction of the city's self-image as a playful, fantastical paradise.

**Period of Significance:** 1905  
**Property Type:** Single Family Residential  
**Applicable Criteria:** A/1

(Describe importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property appears significant as an excellent example of an increasingly rare property type. Single family residences from the pre-annexation period of Hollywood appear particularly significant as an important pattern of development, illustrative of Hollywood’s early development as an independent city. Although residential development began a few years earlier, Hollywood became an independent city in 1903. By 1909, Hollywood experienced growth on an exponential scale, with a population increase of 700 in 1903 to 4,000 in 1909 and accompanying difficulties supplying services to residents. As a result of its growing pains, Hollywood became a district of Los Angeles in February of...(continued on next page)

De Mille Production Co. pulled a building permit for "offices and stores" in 1929 for a cost of $25,000. This property appears significant as a single store within a commercial row. The rise in private car ownership allowed people to live more easily in areas previously considered remote, and Hollywood became an important hub between Los Angeles and the burgeoning development in the San Fernando Valley. The area had been affluent since before the advent of the movie industry; now both wealth and a growing culture of celebrity combined to create a very high rate of private automobile ownership. This, increased mobility, in turn, shaped the built environment of Hollywood. It allowed...(continued on next page)

(This space reserved for official comments.)
B10. Statement of Significance (continued): building activity to become more diffuse throughout the district in contrast to the tightly-clustered development of the previous decades centered on the streetcar lines.

Single stores in Hollywood conform to the compositional arrangements evidenced in typical commercial buildings such as the one-part commercial block, the two-part commercial block, and the two-part vertical block. In stores more than one story in height, the building façade is articulated in such a way as to convey use; retail was located on the ground level while office or living space was provided on the floors above. The relationship of retail space to the street is typically articulated with a broad expanse of inset display windows on the front façade oriented to pedestrians. It is this street façade that is the most articulated with other elements such as decorative building components, canopies, and signage.

**Applicable Criteria:** A/1, C/3

In 1956, a permit was issued for construction of a $125,000, 31-unit, 2-story motel and apartment building for owner Anthony Collazo of 328 E. Broadway. The motel was originally built to contain 8 dwelling units, 22 guest rooms, and 17 parking spaces (LA Permit No. 52762). The motel-apartment was designed as two buildings and a carport forming a semi-enclosed courtyard with a pool contained within the court. In the same year, a permit was issued for construction of a semi-public swimming pool by owner Miller Slade Construction Co. of 8354 W. 3rd St. The pool contractor was Anthony Bros. of 5871 Firestone Blvd and the engineer was Mackintoch & Mackintoch. Total valuation of proposed...(continued on next page)

DPR 523B (1/95)
B10. Statement of Significance (continued): work was $4,200 (LA Building Permit No. 58347). The 1973 and 1987 LA City Directories call the building the "Hollywood Downtowner Motel". In the 1973 Directory, Karl Hecht is listed as the office contact.

This property appears significant as an important example of roadside commercial development directly related to the automobile and freeway system. Exhibiting the highest quality of design with its prominent and exuberant neon sign and rock wall along the primary facade, the building appeals to the passing motorist.

This property also appears significant as the work of important Los Angeles architect Jacob (Jack) Chernoff. A prolific architect, Jack Chernoff was influential in defining post World War II architecture. Architect Jack Chernoff designed many buildings throughout the Los Angeles area from the 1950s through the 1980s. His projects include the Tarzana Medical Center, a 16-story apartment building located at 10590 Wilshire Blvd in Westwood, a residential care facility in Chula Vista, the Skyline Terrace luxury townhouse community in Baldwin Hills, and a variety of single family homes and apartment buildings.

P3a. Description (continued): association, design, feeling 1) Related: elaborate neon sign
In 1926, a permit was issued to owner Hollywood Income Properties of Pacific National Bank for erection of a 5-story, 205-room, 62 family hotel at apartment building located at 5527-41 Hollywood Blvd. The architect was L.A. Smith and the contractor was Arthur Bard and Company of Pacific National Bank. Total valuation of proposed work was $300,000 (LA Building Permit No. 20565).

This apartment building appears significant as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Despite the pervasive American ideal of single family ownership evidenced at the turn of the twentieth century,...(continued on next page)
B10. Statement of Significance (continued): there was, nonetheless, a growing trend in large cities across the nation towards people living together in collective dwelling arrangements. Initial, the communal living arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers. Typically four or five stories tall, they were usually constructed of brick or of reinforced concrete and were generally designed to fill as much of the lot as feasibly possible with configurations in the shape of an U, L, T or barbell. Designed in a modest Beaux Arts style, this property exhibits a U-shaped plan.

DPR 523A (1/95)  *Required Information
The Hollywood Premiere Motel was completed in July of 1960. It was originally constructed as a 2-story motel containing 42 guest rooms, a coffee shop, and central courtyard with pool, built at a cost of $400,000 ("Photo Standalone 23 - No Title," Los Angeles Times, 10 Jul 1960, I9). In the same year, a permit was issued to owner L.B. Brown & Associates of 5333 Hollywood Blvd for construction of a semi-private swimming pool on the property. Total valuation of proposed work was $4,100. The contractor was Century Swim Pools of 948 No. Fairfax. The pool engineer was Georg Thomson. Drawings included with this permit show that the building was originally designed in a C-shape containing the...(continued on next page)

In the same year, a permit was issued to owner "Hollywood Premiere Motel" to install an irregularly shaped neon roof sign. The contractor was Bay Neon of 2003 Sepulveda Blvd. and the engineer was Chas G. Grosh. Total valuation of proposed work was $2,000. (LA Building Permit No 54347). Motel architect Joyce Miller also designed a $650,000, 27-unit apartment structure built at 12404-16 Weddington St in North Hollywood for owner/builder Jacob Karasik.

This property appears significant as an important example of roadside commercial development directly related to the automobile and freeway system. Exhibiting the highest quality of design with its prominent and exuberant neon sign and central parking.

B9a. Architect: Edith Northman

Builder: Anthony Connelly (owner/contractor)

B10. Significance: Area: Los Angeles

Theme: Multifamily Development in Hollywood, 1911-1945; Context: Revival of Colonial Styles: The Search for Identity 1913-1945

Period of Significance: 1941

Property Type: Multi-family Residential

Applicable Criteria: A/1, C/3

In 1942, a permit was issued to owner/contractor Anthony Connelly of 361 N. Mansfield for erection of a 2-story, 34-family, 36-room, frame-and-stucco hotel building at 5400 Carlton Way. Total valuation of proposed work was $44,000. The architect was Edith Northman.

This courtyard apartment appears significant as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population as well as for its association with important local architect Edith Northman. Well into the 1920s, apartment buildings of any kind were typically viewed as an intrusion within areas previously established as neighborhoods...(continued on next page)

B12. References:

“Going Forward with Southern California,” Los Angeles Times, 9 May 1937.

B13. Remarks:

B14. Evaluator: Veronica Gallardo

Date of Evaluation: 10/17/2008

(This space reserved for official comments.)
B10. Statement of Significance (continued): comprised of single family residences. The construction of courtyard housing allowed speculative landowners to develop their parcels at higher densities than that afforded by the construction of a single family home. Courtyard apartments, arranged around a central landscaped area, allowed tenants exterior space that provided additional privacy.

Architect Edith Mortensen Northman was Los Angeles’ only woman architect when she was working in the 1930s. She worked for Los Angeles architect Henry J. Knauer and later for Clarence J. Smale, under whom she served as chief draftsman. She was formally educated in architecture at the University of Southern California during the years 1927-1930. In addition to this property, she is responsible for the design of many other buildings throughout the Los Angeles area, including a synagogue located at 5500 South Hoover Street, a residence for film star Jean Hersholt located at 602 North Rodeo Drive, Beverly Hills, and a $100,000 studio apartment building located on Harper Ave between Sunset and Santa Monica boulevards for owner Elwood G. Houseman. Throughout the course of her career, she designed a wide variety of building types, including Union Oil Company service stations. During World War II, she designed buildings for the U.S. Army Corps of Engineers and after the war she specialized in design of large apartment buildings and hotels in Los Angeles and Palm Springs.

DPR 523B (1/95) **Required Information**
B10. Statement of Significance (continued): pervasive American ideal of single family ownership evidenced at the turn of the twentieth century, there was, nonetheless, a growing trend in large cities across the nation towards people living together in collective dwelling arrangements. Initially, the communal living arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers. The Tudor Revival style of the building recalls imagery of a single family residence, a strategy employed to make apartment dwelling more socially acceptable.

**B10. Significance:**

**Area:** Los Angeles  
**Theme:** Residential Development and Suburbanization, 1850-1912  
**Context:** Residential Development and Suburbanization, 1850-1912  
**Theme:** Annexation and Consolidation, 1895-1910  

**Period of Significance:** 1908  
**Property Type:** Single Family Residential  
**Applicable Criteria:** A/1  

This property appears significant as an excellent example of an increasingly rare property type. Single family residences from the pre-annexation period of Hollywood appear particularly significant as an important pattern of development, illustrative of Hollywood’s early development as an independent city. Although residential development began a few years earlier, Hollywood became an independent city in 1903. By 1909, Hollywood experienced growth on an exponential scale, with a population increase of 700 in 1903 to 4,000 in 1909 and accompanying difficulties supplying services to residents. As a result of its growing pains, Hollywood became a district of Los Angeles in February of... (continued on next page)

DPR 523B (1/95)  
*Required Information*

This property, constructed the year Hollywood was annexed to Los Angeles, is designed in a Craftsman style, the most popular style of this period, and exhibits most character-defining features including a low pitched roof with exposed rafters and decorative fascia, broad front porch, wood clapboard siding and wood double-hung windows. Building permits were not available for the property.

Update Status: Retains Integrity

The historic district to which it would contribute cannot be discerned
In 1958, a permit was issued to owner Al Gindling of 2960 Wilshire Blvd to erect a 2-story, 11-unit apartment house at 5618 Harold Way. Total valuation of proposed work was $70,000. The architect was R.L. Wilson and the engineer was D. Kendall.

This postwar multifamily apartment building appears significant for its highest quality of architectural design and epitomizes its property type. One of a mirrored pair with a landscaped driveway running between, the property is two stories in height and has a L-shaped plan. The stucco siding is augmented by grouped fenestration on the primary facade and a decoratively applied building name.

Although there are 5 buildings currently extant on the lot, this property appears significant for Congregation Beth El, which was constructed in 1923. Hollywood’s population growth in the 1920s paralleled an influx of immigrant groups. Jewish immigrants, mostly from Eastern Europe and Russia, established Congregation Beth El in 1921 at 1508 Wilton Place, the first synagogue in Hollywood.

DPR 523B (1/95)
This apartment building appears significant as both an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population as well as for its fine architectural design in an Art Deco style. Despite the pervasive American ideal of single family ownership evidenced at the turn of the twentieth century, there was, nonetheless, a growing trend in large cities across the nation towards people living together in collective dwelling arrangements. Initial, the communal living arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers.

Designed in the relative rare Zigzag Moderne style, the property exhibits character-defining features of the style, including smooth stucco wall surfaces decorated with zigzags and other stylized geometric motifs, and pilasters emphasizing verticality. Though comparatively rare, and in vogue for not much more than a decade, this style was highly influential because it embodied the integration of four unlikely features unique to Los Angeles: changing patterns of land use; a popular response to early 20th Century progress and technology; the birth of new industries; and a sense of fantasy fueled by Hollywood and the movie industry that propelled the City's myths and legends.

B10. Statement of Significance (continued): cities across the nation towards people living together in collective dwelling arrangements. Initial, the communal living arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers. Typically four or five stories tall, they were usually constructed of brick or of reinforced concrete and were generally designed to fill as much of the lot as feasibly possible with configurations in the shape of an U, L, T or barbell.

Architect Edith Mortensen Northman, Los Angeles’ only woman architect when she was working in the 1930s. She was formally educated in architecture at the University of Southern California during the years 1927-1930. She is described in the 1937 Los Angeles Times as Los Angeles’ only woman architect. She is responsible for the design of many buildings throughout the Los Angeles area, including a synagogue located at 5500 South Hoover Street, a residence for film star Jean Hersholt located at 602 North Rodeo Drive, Beverly Hills, and a $100,000 studio apartment building located on Harper Ave between Sunset and Santa Monica boulevards for owner Elwood G. Houseman. She also designed the Normandie Mar Apartment Hotel in the Tower District of Fresno, CA. Throughout the course of her career, she designed a wide variety of building types, including Union Oil Company service stations (she designed at least 50, including a Mediterranean style “super-service station” in Westwood Village in 1933), churches, commercial buildings, factories, residences, and apartments. During World War II, she designed buildings for the U.S. Army Corps of Engineers and after the War she specialized in design of large apartment buildings and hotels in Los Angeles and Palm Springs.

This property appears significant as an excellent example of an increasingly rare property type. Single family residences from the pre-annexation period of Hollywood appear particularly significant as an important pattern of development, illustrative of Hollywood’s early development as an independent city. Although residential development began a few years earlier, Hollywood became an independent city in 1903. By 1909, Hollywood experienced growth on an exponential scale, with a population increase of 700 in 1903 to 4,000 in 1909 and accompanying difficulties supplying services to residents. As a result of its growing pains, Hollywood became a district of Los Angeles in February of... (continued on next page)
B10. Statement of Significance (continued): 1910. Designed in a Craftsman style, the property exhibits many character-defining features, including a low-pitched roof with wide eaves, exposed rafter tails, and venting under gable peaks, as well as wood clapboard siding and wood windows. Building permits were not available.

There is an additional non-contributing building on the property. In 1946, a permit was issued to owner Margaret Buxton Cavaniah of 1612 N. Harvard Blvd to erect a single-story studio workshop at 5438 Fernwood at a cost of $2,000. (LA Building Permit No. 7664).

In 1923, a permit was issued to owner Mabel D. Cameron of 1717 N. Bronson for erection of a 2-story 12-room, 4-family dwelling at 1725 - 1/4 - 3/4 N Bronson Ave. Total valuation of proposed work was $11,000. No architect or contractor are listed on the permit. (LA Building Permit No. 21859). The Sanborn Fire Insurance Map, updated to 1950, shows this building as 8 separate dwelling units located on the same parcel as the adjacent, single family property that was constructed in 1904. A few years prior to construction of this property, a group of shops and a brick garage were constructed along Hollywood Boulevard and orientation of the single family house located at 1717 North...(continued on next page)

DPR 523B (1/95)  
*Required Information*
B10. Statement of Significance (continued): Bronson was realigned to face Bronson. (Robert W. Nudelman, Director of Preservation Issues, Hollywood Heritage, letter to W. Uno Ujor, Community Redevelopment Agency of the City of Los Angeles, January 11, 2006.) Based on this construction history, it appears these modifications, including retail facing Hollywood Boulevard and subdivision of the lot to allow for construction of a multi-family residential building, permitted the older house to remain, despite apparent economic difficulties. Building permits were not available for conversion of this building from four to eight units.

This apartment building appears significant as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Despite the pervasive American ideal of single family ownership evidenced at the turn of the twentieth century, there was, nonetheless, a growing trend in large cities across the nation towards people living together in collective dwelling arrangements. Initial, the communal living arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers.

Hollywood Regency style is particularly representative of Los Angeles. Though comparatively rare, and in vogue for not much more than a decade, these Hollywood Regency style was highly influential because it embodied the integration of four unlikely features unique to Los Angeles: changing patterns of land use, a popular response to early 20th Century progress and technology; the birth of new industries; and a sense of fantasy fueled by Hollywood and the movie industry that propelled the city’s myths and legends. Hollywood Regency style is associated with the city’s sustained prominence in automobile and early aerospace industry and culture; with the special horizontal quality of growth that characterizes Los Angeles as a 20th Century “suburban metropolis” city. This property exhibits character-defining features including a flat roof, symmetrical design, arched windows, and use of decorative Neoclassical ornament such as urns with swags over ground floor openings.

DPR 523B (1/95)
B10. Statement of Significance (continued): Despite the pervasive American ideal of single family ownership evidenced at the turn of the twentieth century, there was, nonetheless, a growing trend in large cities across the nation towards people living together in collective dwelling arrangements. Initial, the communal living arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers.

While many residential buildings were constructed in the Spanish Colonial Revival style during this time period, this property is a particularly excellent example of the style, serving as a paradigm of characteristic features of the style. What we now call Spanish Colonial Revival style is really the second phase of a larger, more encompassing style which began in the 1890s and 1900s. Developing alongside a national trend of high style, academic architects employing historic eclectic styles, Spanish Colonial Revival style, in the broadest sense of the term, was an attempt to create and define a prototypical Californian expression of architecture. The 1890s-1930s was a period in which historic eclecticism was the dominant mode of architectural expression. The academic, high style expression of Spanish Colonial Revival style was popularized by the Panama-California Exposition of 1915 in San Diego. The L-plan layout of the subject building provides more streetfront elevations to showcase stylistic elements, including the tower, balconies, and stairways with decorative elements, as well as the archway over the driveway.

B10. Statement of Significance (continued): broadcasting have played roles just as significant in the shaping of the district. By the time the movie industry began to leave the Hollywood district in the 1930s, it was the diversification to the production of other types of entertainment that allowed the area to remain the center of the entertainment industry. Moreover, the radio industry in Hollywood had a somewhat symbiotic relationship with the movie industry in that it relied on the large pool of movie-industry talent in the area for the success of its programming. In 1938, ninety percent of the personality programming on the air originated from Hollywood. Movie stars were as adaptable to the industry changes in Hollywood as the industries themselves, and their talents as actors lent themselves to the personality programming on radio that was increasingly popular nationally.

Likewise, when the recording industry came to Hollywood it was another logical extension of the radio industry. Music played a role in radio in the 1930s as stations often retained full orchestras to accompany their programming. In this early programming, music was often a peripheral component as it was intended as a background to the shows produced. However, between the 1930s and the 1940s, radio programming began to change to place a new emphasis on music itself. By 1942, seventy-five percent of airtime was devoted solely to music. Following this growing demand for music broadcasts, record companies, similar to the radio stations that had preceded them in their migration from New York to Hollywood, soon began to establish themselves in the area. This property is located almost adjacent to National Register-eligible Columbia Broadcasting System, Inc., which was constructed in 1937.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
In 1958, a permit was issued to owners Mr. and Mrs. Archie Sarten of 6564 Hollywood Blvd to construct a new motel and apartments building with 5-car garage at 6055 Sunset Blvd. The building was originally designed as a 2-story building containing 28 guest rooms, 5 dwelling units and 16 parking spaces. The building was designed in a C-shape surrounding a surface parking lot. The total valuation of proposed work was $100,000. In the same year, a permit was issued for the addition of a double faced neon projection roof sign. The sign engineer was G.H. Willson and the contractor was Electrical Advertising of 2211 N. San Fernando Road, Burbank. Total valuation of proposed work was...(continued on next page)

B10. Statement of Significance (continued): $1,600 (LA Building Permit No. 00505).

This property appears significant as an important example of roadside commercial development directly related to the automobile and freeway system. Exhibiting the highest quality of design with its U-shaped plan arranged around a central parking lot, a prominent neon sign, and rock wall along the primary facade, the building appeals to the passing motorist.

Period of Significance:  
Property Type: Single Family Residence  Applicable Criteria:  

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)  
It is unclear based on permits and other information whether the original permit cited below is for 1558 Gordon or the neighboring property to the North. Sanborn maps and Zimas parcel information indicate that 1562, 1564, and 1566 Gordon are all on the same parcel and that 1558 Gordon is its own parcel. However, permit research for the 1558 Gordon APN includes permits for 1558-1564 Gordon. In addition, the building permit states that the building located at 1562-1564 Gordon is a single-story single family dwelling. The building located at 1566 Gordon is a single-family dwelling while the building located at 1558 Gordon is a 2-story dwelling.  

Although this record states the building...(continued on next page)

(This space reserved for official comments.)
B10. Statement of Significance (continued): on this property is from 1903, the building fronting 1558 Gordon appears to have been built in 1946. Based on available building permit records and their attached drawings of the property, the pre-annexation 1903 building was extant at the rear of the property in 1946 (LA Permit No. 20381). The existing 1946 building was constructed in front of (fronting Gordon) the 1903 building. A building demolition permit was issued for the property in 1994 and current aerial photographs do not show the 1903 building to be extant on the property.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

In 1924, permits were issued to owner A.T. Morrison of 5935 Chula Vista Way for erection of 8 dwellings and 3 garages at 1527-1533 3/4 N. The dwellings were originally designed as 10-room duplexes, each constructed at a cost of $5,000. 2 of the garages were originally designed as 5-room garages, each constructed at a cost of $300 and the 3rd garage was originally designed as a 7-room garage constructed at a cost of $420. No architect is listed on any of the permits. The contractor listed on all the permits is J.H. White and Bob W. of 338 N. Alexandria. (LA Building Permit No. 47253-47264). A 9th residence existed on the lot prior to erection of the 1924 buildings. In 1924, a permit...(continued on next page)

DPR 523B (1/95) *Required Information
B10. Statement of Significance (continued): was issued to Morrison to move the existing single family residence to the rear of the lot to make room for the courtyard housing (LA Building Permit No. 47262).

This courtyard apartment appears significant as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Well into the 1920s, apartment buildings of any kind were typically viewed as an intrusion within areas previously established as neighborhoods comprised of single family residences. The construction of courtyard housing allowed speculative landowners to develop their parcels at higher densities than that afforded by the construction of a single family home. Courtyard apartments, arranged around a central landscaped area, allowed tenants exterior space that provided additional privacy.

B10. Statement of Significance (continued): important pattern of dense, urban development to accommodate a rapid increase in population. Despite the pervasive American ideal of single family ownership evidenced at the turn of the twentieth century, there was, nonetheless, a growing trend in large cities across the nation towards people living together in collective dwelling arrangements. Initial, the communal living arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers. Typical of this property type, this building is three stories tall, constructed of reinforced concrete and generally designed to fill as much of the lot as feasibly.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property appears significant as an excellent example of an increasingly rare property type from the pre-annexation period of Hollywood as well as an important example of Craftsman style. Single family residences from the pre-annexation period of Hollywood appear particularly significant as an important pattern of development, illustrative of Hollywood’s early development as an independent city. Although residential development began a few years earlier, Hollywood became an independent city in 1903. By 1909, Hollywood experienced growth on an exponential scale, with a population increase of 700 in 1903 to 4,000 in 1909 and accompanying difficulties supplying services to residents. ...(continued on next page)

(This space reserved for official comments.)
B10. Statement of Significance (continued): As a result of its growing pains, Hollywood became a district of Los Angeles in February of 1910.

Popular from the early 1900s through the 1920s, the Craftsman style utilizes design elements of the Arts and Crafts style and represented a conscious search for the supposed simplicity of pre-Industrial times. The bungalow's simplicity of form, informal character, direct response to site, and extensive use of natural materials, was a regional interpretation of the socio-economic and aesthetic reforms espoused by the Arts and Crafts Movement's founder, William Morris. Although modest in size, this property demonstrates most character-defining features, including most significantly, a low-pitched roof with wide eaves, exposed rafter tails, and venting under gable peaks. The property also displays character-defining features of wood shingle siding and a front porch that runs almost across the facade.

| Area: | Los Angeles |
| Theme: | Multifamily Development in Hollywood, 1911-1945 |

**Context:** Residential Development and Suburbanization, 1913-1945

**Period of Significance:** 1924-1926

**Property Type:** Multi-family Property

**Applicable Criteria:** A/1

In 1924, permits were issued to owner Roland Lloyd of 5832 Harold Way for erection of two single-story, 6-room duplexes with garages located at 5834-34 1/2 and 5834 1/2-34 3/4 Harold Way. The architect/contractor was J.E. Shave of 1025 Wilton Ave. Total valuation of proposed work was $3,750 per duplex (LA Building Permit No. 20155-56). In 1926, permits were issued to the same owner, Roland Lloyd, of 1025 N. Wilton, for erection of two 5-room, single family dwellings on the property, located at 5832 1/2 and 5834 1/2 Harold Way. Total valuation of proposed work was $2,750 for each residence. The 1926 building permits note that existing buildings were on the lot and in use as a court in...(continued on next page)

(This space reserved for official comments.)

This bungalow court appears significant as an increasingly rare example of a formerly ubiquitous property type in Hollywood that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Designed in a Mediterranean Revival style, the property exemplifies character-defining features of a bungalow court including multiple, semi-dethatched buildings on a single residential lot arranged around a landscaped courtyard.

B15. Date of Evaluation: 12/18/2008
B10. Statement of Significance (continued): previously surveyed as appearing eligible for listing the in the National Register for its association with the major motion picture studios. Although now located on a separate lot, this property continues to be used as a support building for a motion picture studio. Columbia Pictures established itself at a location on Gower a block south of Sunset in 1924.

Most studios utilized an architectural expression based on the factory model. The studio system was well suited to the utilization of this building type. The production of movies entailed multiple processes, many of them technical. Therefore, as studio bosses sought to streamline production, the motion picture studio increasingly utilized the architecture of the factory with its emphasis on the production of films as a rational and machine-like process. The layout was heavily influenced by the early twentieth century idea of the factory in which production processes were broken down into discrete sets of units that employed different divisions of specialized labor. Designed as compounds, these complexes often presented a wall or continuous building mass to the street facing facades so that access to the studio facilities could be controlled. Large amounts of space were encompassed within these industrial complexes for functions such as daylight film stages, support buildings, exterior film sets, structures to house sets and props, darkrooms, screening and projection rooms, walk-in safes for storing films, costume and set design shops, and vast editing and processing rooms. The movie studio was designed to house as many of these processes as possible within a complex of utilitarian buildings that could accommodate multiple functions.

DPR 523A (1/95)  *Required Information
In 1919, a permit was issued to owner Wm Horsley of 6121 Selma St for erection of a single-story, 12 room building to house dressing rooms and a stage at 6050 Sunset Blvd. The estimated cost of construction was $4,000. The architect/contractor was R.T. Taylor of 6060 Sunset Blvd. No other new building permits were issued to this APN.

Although used by Sunset-Gower Studios, also known as Columbia Pictures Corporation, when they moved to the site in 1924, this property appears significant as the original location of United Western Recorders, who purchased the property in 1957. In 1961, owner Bill Putnam purchased the building two lots away at 6000 Sunset Boulevard, which also...(continued on next page)
B10. Statement of Significance (continued): functioned as a recording studio. Among those who recorded at this location were Nat King Cole, Bing Crosby, Dean Martin, Sammy Davis, and Ricky Nelson.

Recording studios were designed as private, functional spaces to accommodate artists as they worked in recording sounds, whether for incorporation into films or as music for record production. With the new technological innovation of magnetic tape and its introduction into the recording industry in the 1950s, the spatial requirements for a recording studio became much more flexible than they had been previously. The technological development of magnetic tape for sound recording allowed records to be recorded almost anywhere. Because of the flexibility inherent in the recording process, many of the recording studios were located in buildings not originally built to accommodate them but previously used for some other commercial enterprise. Another factor that affected the flexibility with which recording studios could be located was that the physical production of records was separate from the production of the music placed upon them; while music was recorded in these buildings, it was not the location where records were physically made. Instead, the recording would be made on the premises and then sent elsewhere to press.

Despite the stature of some of personalities that recorded their significant work within the recording studio building type, many of these buildings are characteristically rather unremarkable architecturally. In fact, the consistently non-descript architectural expression of recording studios, as buildings not otherwise distinguishable from the common everyday landscape, suggests that the location of recording studios in small, architecturally unarticulated commercial buildings might have been an intentional strategy to create a working environment conducive to the musicians working there.

Period of Significance: 1928  Property Type: Multi-family Resident  Applicable Criteria: A/1
(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

In 1928, a permit was issued to owner Ida C. Miller of 4201 W. 2nd St for construction of a 2-story, 40-room, 16-family apartment building at 1412 N. Gordon. The estimated cost of construction was $25,000. The architect was Max R. Shastale (exact spelling of last name unknown) of 4201 We: 2nd St. The contractor was Shastale Bros. of 4201 West 2nd St. (LA Building Permit No 1632).

This apartment building appears significant as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Despite the pervasive American ideal of single family ownership evidenced at the turn of the twentieth...(continued on next page)

(This space reserved for official comments.)
B10. Statement of Significance (continued): century, there was, nonetheless, a growing trend in large cities across the nation towards people living together in collective dwelling arrangements. Initial, the communal living arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers. Typically four or five stories tall, they were usually constructed of brick or of reinforced concrete and were generally designed to fill as much of the lot as feasibly possible with configurations in the shape of an U, L, T or barbell.

*B10. Significance: Area: Los Angeles Theme: Residential Development and Suburbanization, 1850-1912
Context: Annexation and Consolidation, 1895-1910

Property Type: Single Family Residence
Applicable Criteria: A/1

Period of Significance: 1909

This property appears significant as an excellent example of an increasingly rare property type. Single family residences from the pre-annexation period of Hollywood appear particularly significant as an important pattern of development, illustrative of Hollywood’s early development as an independent city. Although residential development began a few years earlier, Hollywood became an independent city in 1903. By 1909, Hollywood experienced growth on an exponential scale, with a population increase of 700 in 1903 to 4,000 in 1909 and accompanying difficulties supplying services to residents. As a result of its growing pains, Hollywood became a district of Los Angeles in February of...(continued on next page)

(This space reserved for official comments.)
B10. Statement of Significance (continued): 1910. This property is designed in a Craftsman style, the most popular style of this period, and exhibits most character-defining features including a low pitched roof with exposed rafters and decorative venting under gable peaks, diamond paned windows, wide front porch, wood clapboard siding and wood double-hung windows. Building permits were not available for the property.

Period of Significance: 1926  Property Type: Multi-family Resident Applicable Criteria: A/1

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

In 1926, a permit was issued to owner Minnie Stokes of 509 S. Western Ave for erection of a 2-story, 16-room, 16-family apartment building located at 1317 N. Bronson Ave. The architect was C.J. Smale and the contractor was N.F. Stokes of 509 S. Western Ave. Total valuation of proposed work was $22,000 (LA Building Permit No. 14957).

This apartment building appears significant as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Despite the pervasive American ideal of single family ownership evidenced at the turn of the twentieth century, there was, nonetheless, a growing trend in... (continued on next page)

(This space reserved for official comments.)
B10. Statement of Significance (continued): large cities across the nation towards people living together in collective dwelling arrangements. Initial, the communal living arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers. Typically four or five stories tall, they were usually constructed of brick or of reinforced concrete and were generally designed to fill as much of the lot as feasibly possible with configurations in the shape of an U, L, T or barbell.

The Tudor Revival style of the building recalls imagery of a single family residence, a strategy employed to make apartment dwelling more socially acceptable.

Clarence J. Smale was born in California in 1886 and was in charge of the drafting rooms of the Preston Wright Co from approximately 1919-1923 and opened his own office at 509 South Western Avenue in 1923. In Hollywood, C.J. Smale designed the 2-story commercial building located at 1109 North Western Avenue (1928) and the 2-story apartment building located at 1317 N. Bronson Ave (1926). He designed countless other buildings throughout the Los Angeles, including a concentration of buildings in Hancock Park HPOZ. He designed the Monsignor O’Brien House (1925) and his Loyola Theater in Westchester (1948), both Los Angeles Historic-Cultural Monuments.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

In 1925, a 99-year lease for the property located at 1825 N. Cahuenga Ave (Marcell Arms Apartments) was granted to Hollywood broker, Henri P. Guertin, and planned for improvement with a high-class structure in April of 1925 ("Syndicate Signs Long Lease for Cahuenga Lot," LA Times, 26 April 1925, F11). The building opened for occupancy in September of 1925. Henri P. Guertin represented all parties in real estate negotiations ("New Construction Indicates Building Trend," LA Times, 7 Jun 1925, G1). It is one of four similarly styled Beaux Arts buildings in Hollywood, erected by the Hollywood Income Properties, Inc, of which George Marcell was president in 1927. The other three properties...(continued on next page)

B10. Statement of Significance (continued): are the Shelton at 1735 Wilcox Ave (a 160-room apartment building completed in May of 1926), the Mayfair located at 1764 Wilcox Ave, and the Weston, or "Gilbert Hotel," a hotel located at 1550 N Wilcox. All four buildings were designed by architect William Allen and constructed by Arthur Bard & Co.

William Allen designed numerous other buildings throughout Los Angeles, including: Hollywood Sixty Club at the intersection of Hollywood Blvd and McCadden Place (not extant), an American Legion Post #123 building at Santa Monica, a fire department in Manhattan Beach, a hospital in Duarte, various single family residences, and South Gate City Hall. Arthur Bard constructed numerous buildings throughout Los Angeles, doing much of his work with architect William Allen and also completing projects based on the designs of prolific Los Angeles architect L.A. Smith. Bard constructed the Smith-designed Beaux Arts apartment building located at 1241 Vine St and the Smith-designed L.A. Concordia Athletic Club located at 360 Westlake Avenue. Bard is also responsible for constructing a two-story reinforced concrete theater located at the northwest corner of Crenshaw Blvd and Adams St.

This apartment building appears significant both as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population as well as for its association with important local architect William Allen. Despite the pervasive American ideal of single family ownership evidenced at the turn of the twentieth century, there was, nonetheless, a growing trend in large cities across the nation towards people living together in collective dwelling arrangements. Initial, the communal living arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers. Typical of the property type, this property is four stories tall, constructed of brick and designed to fill as much of the lot as feasibly possible with configurations in the shape of an U.

This property appears to be a very significant an early example of Modern architecture. Modernism became the pre-eminent design solution from about 1932 to about 1984 for commercial buildings. While they were largely unsuccessful in convincing developers to adopt the modern style for residential buildings, Modern architects found commercial clients who were willing to adopt a modern style to distinguish their buildings. Modern architecture is characterized by a simplification of form and elimination of ornament. Most examples have flat roofs, deep roof overhangs, and a mix of masonry and glass exterior cladding.

Construction began on the building located at 1737-41 Ivar Avenue, opposite the Hollywood Knickerbocker Hotel, was built as a three-story, $600,000 "modern office structure" in 1953 by Hollywood Ivar Building, Inc. The building originally contained 300 square feet with a frontage on Ivar St of 165 feet and on-site parking. The design included two elevators and a third-story penthouse. Hollywood Ivar Building, Inc. principles were the Gore Brothers, Inc., Mrs. Ruth Gore, and Jules J. Covey. Gore Brothers was founded by the late Michael and A.L. Gore, pioneers in the motion picture industry in Hollywood and principal owners of the West Coast Theaters.

According to a 1949 LA Times article, Heitschmidt "designed many housing projects for Federal housing authorities and for the U.S. Navy throughout Southern California," ("Local Architect Wins Honor," LA Times, 27 March 1949, E2). Heitschmidt was chosen by the City Housing Authority to prepare plans for a low-rent housing project in the Sawtelle district in 1939. Chosen in the same selection process were architects Richard Neutra, Welton Beckett, Gordon B. Kaufmann, Paul R. Williams, Adrian Wilson, Walter Wurdeman, and more ("Housing Project Architects Picked," LA Times, 26 Jul 1939, A3).

According to the Los Angeles City Directory, tenants of the building in 1956 included: attorneys, accountants and CPAs, and offices for various companies, including: Thatcher Glass Manufacturing Company, Powers-Stanley Agency, Flamingo Films, Harris Group, Wolper Dave Flamingo Films, insurance consultants, advertising agencies, Texas Instruments Inc., Sims Herman Co real estate, Proctor & Gamble Productions, General Electric Credit Corporation, and Goodin & Company. Tenants in 1965 were also professional in nature, including attorneys, accountants and talent agencies. By 1973, tenants were more heavily oriented toward the entertainment industry than in 1956 and 1965, with about half of tenants being talent agencies, production companies, film companies, casting companies, etc.

DPR 523A (1/95)  *Required Information
**Resource Name or #:** 1728 WILCOX AVE

B1. Historic Name: 

B2. Common Name: 1728 WILCOX AVE

B3. Original Use: multi-family

B4. Present Use: multi-family

**Architectural Style:** Mediterranean Revival

**Construction History:**

Year constructed: 1917

**Moved?** No

**Unknown Date**

**Original Location**

**Related Features:**

None

B9a. Architect: unknown

b. Builder: M.S. Williams

**Significance:**

**Area:** Los Angeles

**Theme:** Multifamily Development in Hollywood, 1911-1945

**Context:** Residential Development and Suburbanization, 1913-1945

**Period of Significance:** 1917

**Property Type:** Multi-family Property

**Applicable Criteria:** A/1

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

A total of five two-story buildings are extant on the lot located at 1728 Wilcox Avenue. In 1917, permits were issued for construction of five 12-room, 2-family residential buildings located at 1722, 1724, 1726, 1728, and 1730 Wilcox Avenue to owner Eloise A. Williams of Route Box 3, Santa Monica. The architect listed on the permit is crossed out. The contractor listed on the permit is M.S. Williams of 1726 Wilcox Ave (LA Building Permit No. 3175-3187).

Interestingly, the adjacent property to the north was also developed as a bungalow court by the same owner and contractor in 1916. Permits were issued for construction of four 12-room, 2-family residences (1732, 1734, 1738, and... (continued on next page)

**Additional Resource Attributes:** HP03

**References:**

Department of Building and Safety, Permit No. 3175-3187, June 2, 1917.

Department of Building and Safety, Permit No. 1977-81, April 1, 1916.

Sanborn Fire Insurance Maps, corrected through 1951.

**Remarks:**

**Evaluator:** Jenna Snow

**Date of Evaluation:** 01/28/2009

(This space reserved for official comments.)
B10. Statement of Significance (continued): 1740 Wilcox Ave) and one 16-room 4-family residence (located at 1736 Wilcox Ave). This bungalow court is no longer extant (LA Building Permit No 1977-81; Sanborn Fire Insurance Maps, corrected through 1951).

This bungalow court appears significant as an increasingly rare example of a formerly ubiquitous property type in Hollywood that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Designed in a Mediterranean Revival style, the property exemplifies character-defining features of a bungalow court including multiple, semi-dethatched buildings on a single residential lot arranged around a landscaped courtyard.

DPR 523A (1/95) *Required Information
In 1925, a permit was issued to owner E.T. Heyden of 1096 N. Western Ave for erection of a 2-story, 6-room stores and offices building located at 6361-6369 Selma Ave. The architect/contractor was H.D. Frankfurt of 1096 N. Western Ave. Total valuation of proposed work was $11,000. In 1929, the building housed an automobile parts store.

This property appears significant for its association with Moonglow Records and Recording. Moonglow Records was started by Ray Maxwell, originally from Belgium. The first single in 1961 was Penny Richards' "I'll Be Yours"/"The Only Way." Moonglow Records was best known for releasing albums by the Righteous Brothers, before they were signed by Phil...(continued on next page)

Recording studios were designed as private, functional spaces to accommodate artists as they worked in recording sounds, whether for incorporation into films or as music for record production. With the new technological innovation of magnetic tape and its introduction into the recording industry in the 1950s, the spatial requirements for a recording studio became much more flexible than they had been previously. The technological development of magnetic tape for sound recording allowed records to be recorded almost anywhere. Because of the flexibility inherent in the recording process, many of the recording studios were located in buildings not originally built to accommodate them but previously used for some other commercial enterprise. Another factor that affected the flexibility with which recording studios could be located was that the physical production of records was separate from the production of the music placed upon them; while music was recorded in these buildings, it was not the location where records were physically made. Instead, the recording would be made on the premises and then sent elsewhere to press.

Despite the stature of some of personalities that recorded their significant work within the recording studio building type, many of these buildings are characteristically rather unremarkable architecturally. In fact, the consistently non-descript architectural expression of recording studios, as buildings not otherwise distinguishable from the common everyday landscape, suggests that the location of recording studios in small, architecturally unarticulated commercial buildings might have been an intentional strategy to create a working environment conducive to the musicians working there.

Designed by Edward Cray Taylor and Ellis Wing Taylor, the Los Angeles Gas and Electric Corporation building at 1641 Ivar Street opened in February of 1937 and was built at a cost of $100,000. Built to act as the Hollywood district office, it was the sixth such structure for the company, which had 12 branch offices in use. It was built to service approximately $50,000 customers and to house about seventy employees. Architects Edward Cray Taylor (1887-1946) and Ellis Wing Taylor were brothers, associated in a partnership sometimes referred to as Taylor & Taylor. Taylor & Taylor other work included designing the original buildings of Santa Monica's Aircraft Factory and also planned later...(continued on next page)

Period of Significance: 1963-1986 Property Type: Office Building Applicable Criteria: A/1
(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property appears eligible for listing in the California Register for its association with the recording industry. With the expansion of the record industry across the nation after World War II, Hollywood increasingly became a center for music production. By the mid-1950s and into the 1960s, record companies began to erect large corporate towers in Hollywood. These record company headquarter buildings often utilized a modern style similar to that employed across the nation during this period for corporate headquarter buildings of companies marketing everything from tractors to life insurance.

The Radio Corporation of America (RCA) West Coast Headquarters Building, erected in...(continued on next page)

B11. Additional Resource Attributes: (List attributes and codes) HP07

*B12. References:
"West Coast Headquarters Building for RCA in Hollywood Started," Los Angeles Times, 13 Jan 1963, 12

B13. Remarks:

*B14. Evaluator: Jenna Snow
*B15. Date of Evaluation: 01/21/2009
B10. Statement of Significance (continued): 1963 at 6363 Sunset, was designed to have a “floating tower effect” with a six-story tower clad in precast concrete panels set upon a wide one story pedestal or “plinth.” In this case, only half of the 82,000 square foot building was actually allocated for the company’s own use; the rest of the building was leased out to tenants. This allowed the company to have a large, signature building that would publically convey an image of success while it also created some financial security for maintaining the building through the extra revenues generated by leasing half of the space within it to others.

Record headquarters buildings were much larger than the small scale recording studios that abounded in Hollywood due to their nature as a corporation; in an effort to control and to capitalize upon every aspect of the music production process, they combined the multiple functions associated with producing and distributing a record under a single roof. The headquarters building constructed for RCA in 1963 housed not only two large two-story recording studios, a smaller studio, two recording rooms, three control rooms, two editing rooms, two cutting rooms, a listening room and a master test room but also corporate offices, an electronic data processing division, a sales personnel division, and an area for equipment.

Builder: J.A. McNeil Company

Period of Significance: 1966 Property Type: Bank Applicable Criteria: A/1
(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
A permit was issued for construction of the Bank of America building located at 6300 Sunset Blvd in September of 1965 for owner Pick and Callaha of 1313 N. Vine St. The building was designed by Welton Beckett & Associates and constructed as a 2-story structure containing offices, a bank, and a parking garage for Bank of America. Total valuation of construction was $1,170,000. The engineer was Stacy & Meadville and the contractor was J.A. McNeil Co.

This property appears significant as a fine example of Late Modern architecture as well as for its association with architect Welton Beckett. The building combines aspects of Brutalism and International Style architecture. The...(continued on next page)

B10. Statement of Significance (continued): International Style, characterized by an absence of ornament, uniform wall surfaces, cantilevering, horizontality, and bands of windows, minimizes mass and weight for the sake of the effect of pure volume. Whereas the International Style placed a premium on horizontality and expressing volume, Brutalism is characterized by weight and massiveness with an emphasis on expressing structure and raw materials. In Brutalist architecture, the structure, often with exposed concrete frame, is frankly exhibited, broad, quiet wall surfaces are interrupted by deep-shadowed penetrations of the building mass, vertical slots may contrast with broad oblong openings or tall openings with horizontal slots, and ‘egg-crate’ effects are also much employed.” The style was popularized by English architects, Peter and Allison Smithson, whose Hunstanton School (1954, Norfolk, England) was the first building identified as Brutalist. Brutalism, as both an ethic and aesthetic, is heavily influenced by the concrete-work of Le Corbusier’s ‘Unite d’Habitation’ (1948-1954, Marseilles, France). This building evinces an agglomeration of elements from both the International Style and Brutalism in its architectural expression. The horizontal glazing at the facade and column supports of a flat, expressive roofline are typical elements of the International Style. The geometric massing, overall sense of weight and massiveness, and rubble concrete are expressive of Brutalism.

Welton Becket (1902-1969) was an important and prolific Los Angeles architect whose firm, Welton Becket & Associates was responsible for the design of many iconic buildings from the 1930s-1960. Initially in partnership with Walter Wurdeman, his firm was responsible for the design of Capitol Tower (1956), Cinerama Dome (1963), Pan-Pacific Auditorium (1935), Los Angeles Music Center (1964-1967), as well as the master plan and many buildings on University of California Los Angeles campus (1948-1965).

The building located at the northeast corner of Vine St and Afton Ave was owned by John J. Davidian and housed the Radio Center Market prior to 1955, when it was remodeled into a modern TV, commercial and theatrical film studio for Jerry Fairbanks Productions. The remodel cost was approximated at $500,000. A. Godfrey Bailey was the architect and Howel G. Hawkins was the contractor. In addition to opening new offices at the Vine and Afton location, Fairbanks retained his existing quarters at 6052 Sunset Blvd, where he had been housed for twenty years.

This property appears California Register-eligible as an example of the earliest extant grocery constructed during the Depression. It...(continued on next page)

The earliest permit available for this property is a building alteration/repair permit, issued in 1931 for addition of 2-roller awnings to the building. The permit states that the building was, in 1931, being used as a store and that it would continue to be used as a store after the alterations were complete. The owner at the time was Jean Swartz, Ltd. of 1770 N. Vine St. No architect is listed on the permit. The contractor for the awning work was A. Hoegee & Sons, Inc. of 745 Merchant Street. Sanborn Maps (corrected through 1951) corroborate that the building located at the southeast corner of Vine and Yucca Streets was used as a store.

In 1920, the Diamond Louisiana Oil Company... (continued on next page)

DPR 523B (1/95)
B10. Statement of Significance (continued): hed an office at 1770 Vine St. In 1936, tenants of 1770 N Vine St included the Master Life Insurance Company (MD and GH King) and tenants of 6272 Yucca St included: Jas M. Fidler (radio columnist), Henry L Gogerty (architect), and an office for the Country Church of Hollywood. In 1955 Brown Motel Investment, Inc., of which David A. Brown was president, had an office at 1770 N. Vine.

This property appears significant both for its architecture as well as a fine example of commercial architecture constructed during the Depression. Moderne architecture is associated with the City’s sustained prominence in automobile and early aerospace industry and culture; with the special horizontal quality of growth that characterizes Los Angeles as a 20th Century “suburban metropolis” city. This property exhibits character-defining features including a strong sense of horizontality, a curved, semi-circular volume at the corner, windows “punched” into walls, and relatively unadorned, unornamented surfaces.

Commercial buildings during this period were carefully designed to maximize visibility to both pedestrians and vehicles through their design and location. The sites for commercial buildings and chain stores, in particular, were carefully studied in advance of construction. The most desirable sites for the location of commercial buildings were those within the city core and with proximate to mass transit points or other generators of pedestrian traffic. The strong dependence upon a large volume of customers for the rapid turnover of goods was expressed architecturally through large expanses of glass in ground level storefronts. Large storefronts with inset entries were intended to lure the passing pedestrian as well as the faster-moving motorist with an instantly-visible and attractive display of goods. The space inside such commercial stores was often flexible to accommodate a variety of tenants, and much attention was often devoted to a layout conducive to efficient movement of goods and customers to maximize sales and profits.

In 1949, a building permit was issued to owner Episcopal Church of St. Stephen of 6129 Carlos Ave, for construction of the 2-story parish hall located on the westernmost portion of the parcel. According to drawings attached to the permit, the main church building fronting Yucca Street was already in existence when the permit was issued for construction of the parish hall. The architect is listed as Carleton M. Winslow Jr. No engineer or contractor are listed on the permit. A single-family residence and a church building were already present on the lot in 1949. The parish hall was constructed at a cost of $35,000 (LA Building Permit no. 28219).

Period of Significance: 1928 Property Type: Apartment Applicable Criteria: A/1

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

A permit to erect a four-story, ninety-toom apartment at 6720 Franklin Place at a cost of $80,000 was granted to H.L. Farr in 1928. The apartment building located at 6720 Franklin Place is identified as the La Habra Apartments in the 1936 LA City Directory.

This apartment building appears significant as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Despite the pervasive American ideal of single family ownership evidenced at the turn of the twentieth century, there was, nonetheless, a growing trend in large cities across the nation towards people living together in collective...

B10. Statement of Significance (continued): dwelling arrangements. Initial, the communal living arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers. Typically four or five stories tall, they were usually constructed of brick or of reinforced concrete and were generally designed to fill as much of the lot as feasibly possible with configurations in the shape of an U, L, T or barbell. This building, five stories tall, was designed in a modest Beaux Arts style and exhibits character-defining features of the style including a composition in a base-shaft-capitol arrangement, a base that appears to be rusticated stone, and terra-cotta medallions. Construction history was not available.

This courtyard apartment appears significant as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Well into the 1920s, apartment buildings of any kind were typically viewed as an intrusion within areas previously established as neighborhoods comprised of single family residences. The construction of courtyard housing allows speculative landowners to develop their parcels at higher densities than that afforded by the construction of a single family home. Courtyard apartments, arranged around a central landscaped area, allowed tenants exterior space that provided additional privacy.

*B10. Significance: Area: Los Angeles    Theme:

Period of Significance: 1922    Property Type: Multi-family Residential    Applicable Criteria: A/1

Permits were issued for construction of 4 5-room, single-family residences located on this property in 1922. Each building was originally designed as either a 1 or 1 1/2-story building constructed at a cost of $3,000 for owner Lionel M. Waugh of the same address (specifically, 1768 N Las Palmas Ave). Lionel Waugh was a pharmacist and owned the first drugstore in Hollywood, located just south of his Las Palmas residence at 6676 Las Palmas Ave (at Hollywood Blvd).

This bungalow court appears significant as an increasingly rare example of a formerly ubiquitous property type in Hollywood that represents an important pattern of dense, urban development to accommodate a rapid increase in...(continued on next page)

**Property Type:** Apartment  **Applicable Criteria:** A/1

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

In 1955, a permit was issued to owner/engineer Sam Feldman & Associates/"Hollywood Hawaiian Apts" of 10417 Wilshire Blvd for erection of a 2-story, apartment/hotel building with 58 apartment units and 7 guest rooms located at 1801 Grace Ave. No architect is listed on the original building permit. The engineer was L.J. Breinin of 10417 Wilshire Ave. Total valuation of proposed work was $350,000. Drawings included with the original building permit show that the building was originally designed in an irregular shape surrounding a central courtyard with an open patio. Garages were located underneath dwelling units situated at the south side/rear of the property. The 1956 LA City...(continued on next page)

**Date of Evaluation:** 01/27/2009

(This space reserved for official comments.)
B10. Statement of Significance (continued): Directory refers to the building located at 1801 Grace Ave as the “Hawaiian Hotel of Hollywood.” 6 tenants are listed in 1956. Sam Feldman is also associated with development of the 28-unit apartment building located at the southwest corner of Sunset and Laurel Blvds. In the 1970s, the apartment building served as a rocker hangout.

This building appears significant as an excellent example of a Postwar Apartment House. It was constructed in response to the same development pressures. Development pressure to more intensively develop the land caused the area to become largely built out with small, single-family houses and large multi-family housing during the 1920s. Throughout the 1930s, residential development in the survey area occurred at a much slower pace as it was limited to infill on scattered sites that had not yet been developed. However, in the decade and a half following World War II, the pace of residential development in Hollywood once again accelerated. The increase in development in the post-war years reflected both a generalized building boom that was occurring nationwide in the post-war years but also a more intensely localized building boom unique to the Los Angeles region. As growth of single-family residential areas moved further out from the city center, dense multi-family development occurred as infill in areas of the city that had previously been considered suburban in character. The building exhibits character defining features of a postwar apartment building, including a modern style aesthetic and a stucco finish with stone panels, and a donut shape with an interior pool.

*B10. Significance: Area: Los Angeles  Theme:

Permits were issued in 1961 for demolition of 7 dwellings and 1 garage to make way for a 13-story, 122-foot tall apartment and garage building, located at 1850 N. Whitley Ave. Total valuation of construction of the new building was $5,500,000. The architect is Robert C. Lessen. The engineer is Barnhard Cardan. The contractor is M.J. Brock and Sons of 2894 Rowena.

A 1961 Los Angeles Times article notes that the building was originally known as the Hollywood Ardmore, built as a co-operative apartment development with 202 units and basement garages for parking. In this cooperative arrangement, the dwelling units were essentially sold as condominiums. The Ardmore Development Company...(continued on next page)

B10. Statement of Significance (continued): offered the benefits of home-ownership without the hassle of maintenance. Services, such as a maid, valet, 24-hour switchboard, catering, bar and snack services, parking attendant and more were offered to residents, called "shareholder-residents." Upon completion in 1962, the Hollywood Ardmore was valued at $6.4 million. A coffee shop, barber shop, and beauty salon were planned to be opened on the main floor and mezzanine area.

The lobby of the building was originally designed with a combination of ceramic tile and stone. Two free-standing walls added as design elements at both sides of the front of the building were done in ceramic glaze in green and black. Apartments were designed with individual balconies with dividers that form planter boxes. Colorful glass mosaic decorated planters are evident on balconies and along the primary facade at street level. Glass mosaic tile was also used to elaborate the building entrance. Quarry tile was used to finish the floor area of all patios and the pool deck.

Robert Charles Lesser & Associates designed several other "Ardmore Cooperatives" throughout Los Angeles, including the $9.4 million, 208-unit Wilshire Ardmore Cooperative Apartments, located at 1129 Westwood Blvd in Westwood and prepared plans for buildings located at: 1903 Fremont in South Pasadena, 3132 South Sepulveda Blvd in West Los Angeles, and 6342 Coldwater Canyon Ave in North Hollywood.

Robert C. Lesser, AIA, is an architect by training and started the Robert Charles Lesser & Co. realty and market research firm, a real estate consulting and market analysis firm, headquartered at 8383 Wilshire Blvd in Beverly Hills. Prior to October of 1972, the headquarters was located at 1180 S. Beverly Drive.

This property appears to be an especially fine example of Mid-Century Modern architecture. What is now known as Mid-Century Modern architecture was a continuation of Modern movements that came earlier and much is an amalgamation of architectural expressions from an earlier period, including the International and Bauhaus styles. The most notable architects combined new architectural solutions to integrate traditional precedents into a style that moved the entire field of architecture, and sometimes public consciousness, in a new direction. This building exhibits many character-defining features, including a simplification of form and elimination of ornament, with ornament limited to mosaic tile along balcony planters. Other character-defining features include a flat roof and construction materials of masonry and glass.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

A building permit was issued in June of 1923 for construction of a 2-story, 13-room, office and stores building located at 1606-1608 Highland for owner Mrs. Alice Harrod of 6833 De Longpre. The architect and contractor were both Arthur Kelly of 1201 Van Nuys Blvd. Total valuation of proposed work was $26,000. One other building, a single family home, was present on the lot at the time of construction. The lot now contains only the office and stores building with a surface parking lot to the rear.

This property appears significant for its association with the entertainment industry as well as for its association with important local architect Arthur Kelly. From 1925-1926, the...(continued on next page)

DPR 523B (1/95)
B10. Statement of Significance (continued): building housed the Screen Library Service, Inc, a revolutionary organization created to cast potential motion picture artists by films rather than by photos. The organization was originally headed by Brooks B. Harding. It was housed at this location for approximately one year, after which it was moved into the Taft Realty Building, located at Taft Ave and Hollywood Blvd. After that time, the building housed the first offices of the Hollywood Reporter.

Prolific Southern California architect Arthur Kelly designed numerous buildings throughout the Los Angeles area, including the 1928 Spanish Colonial Revival "El Adobe Market, located at the corner of Hollywood Blvd and Kingsley Drive (extant). He designed many large single-family residences throughout the Los Angeles area, including a Spanish Colonial Revival residence for E.C. Gates in West Hollywood, an English Cottage for George S. Rees in Beverly Hills, a 30-room Gothic mansion in Holmby Hills for Arthur Letts Jr. (son of the founder of the Broadway department store), a Colonial mansion for R.W. Kirkley in Hacienda Park, a residence for M.S. Waite on Los Feliz Blvd, and a 10-room residence for Ben Thorpe in Covina. Arthur Kelly showed photographs and renderings of 6 of his residential projects in the "Pillars of Fine Architecture" exhibition of residential architecture of Southern California in September of 1930. Approximately 20 other architects had work featured in the exhibit, including noted architects, Myron Hunt, Gordon B. Kaufmann, and Wallace Neff ("Permanent Exhibition Announced," LA Times, 21 Sep 1930, D4). Kelly's architectural practice was located at 1201 Van Nuys Building prior to December of 1923 and was moved to 2512 West Seventh Street after December of 1923 ("Display Ad 279," LA Times, 2 Dec 1923, V6). Arthur Kelly also designed 1 of 6 houses included in the 1935 "House and Garden Exhibition," a showcase of 6 homes, each designed in a different architectural style, located on the 5900 block of Wilshire Blvd, between Genessee and Spaulding Avenues. The other 5 architects who designed homes included in the exhibition were: Richard Neutra, Joe Estep, Henry Carlton, Newton and Robert Dennis Murray, Winchton L. Risley, and Paul R Williams ("Construction to be Shown," LA Times, 15 Sep 1935, 17). This development is no longer extant.

**B10.** Significance:  
**Area:** Los Angeles  
**Theme:**  

Context: Architecture, Engineering and Designed Landscapes, 1850-1912  
Theme: Arts and Crafts Movement, 1895-1918; Context: Residential Development and Suburbanization, 1913-1945  
Theme: Multifamily Development in Hollywood, 1911-1945

**Period of Significance:** 1912  
**Property Type:** Multi-family Resident  
**Applicable Criteria:** A/1, C/3

(Describe importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This duplex is significant as an increasingly rare example of a formerly ubiquitous property type in Hollywood that represents an important pattern of dense, urban development to accommodate a rapid increase in population as well as an important example of the Craftsman style. Well into the 1920s, apartment buildings of any kind were typically viewed as an intrusion within areas previously established as neighborhoods comprised of single family residences. Perhaps because of the resistance towards multifamily residential buildings during this period, a couple of different strategies were employed to make their primary façade appear more like a single family residence. Designed in a...(continued on next page)

DPR 523B (1/95)  
*Required Information*
B10. Statement of Significance (continued): Craftsman style, the primary façade is broken down by placing entry porches on opposite sides of the elevation so that individual units recall the imagery of an individual single-family residence.

Popular from the early 1900s through the 1920s, the Craftsman style utilizes design elements of the Arts and Crafts style and represented a conscious search for the supposed simplicity of pre-Industrial times. The bungalow's simplicity of form, informal character, direct response to site, and extensive use of natural materials, was a regional interpretation of the socio-economic and aesthetic reforms espoused by the Arts and Crafts Movement's founder, William Morris. Although modest in size, this property demonstrates a relatively rare example in Hollywood of a two-story variation. The property exhibits character-defining features, including wood shingle siding and a low-pitched roof with wide, exposed rafter tails, and venting under gable peaks. Building permits were not available for this property.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
This building appears significant as both an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population as well as for its distinctive use of the Spanish Colonial Revival style. Despite the pervasive American ideal of single family ownership evidenced at the turn of the twentieth century, there was, nonetheless, a growing trend in large cities across the nation towards people living together in collective dwelling arrangements. Initial, the communal living arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not...(continued on next page)

B10. Statement of Significance (continued): immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers.

While many residential buildings were constructed in the Spanish Colonial Revival style during this time period, this property is a particularly excellent example of the style, serving as a paradigm of characteristic features of the style. What we now call Spanish Colonial Revival style is really the second phase of a larger, more encompassing style which began in the 1890s and 1900s. Developing alongside a national trend of high style, academic architects employing historic eclectic styles, Spanish Colonial Revival style, in the broadest sense of the term, was an attempt to create and define a prototypical Californian expression of architecture. The 1890s-1930s was a period in which historic eclecticism was the dominant mode of architectural expression. The academic, high style expression of Spanish Colonial Revival style was popularized by the Panama-California Exposition of 1915 in San Diego. The L-plan layout of the subject building provides more streetfront elevations to showcase stylistic elements, including the tower elements, balconies, and arched entryways.

*DPR 523B (1/95)  *Required Information*
B10. Statement of Significance (continued): ownership evidenced at the turn of the twentieth century, there was, nonetheless, a growing trend in large cities across the nation towards people living together in collective dwelling arrangements. Initial, the communal living arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers. Typical of this property type, this building is five stories tall, constructed of brick or of reinforced concrete and designed to fill as much of the lot as feasibly possible with configurations in the shape of a T. The building is designed with elements of the Gothic Revival style, such as corner elements at corners made to appear as towers.

Born in Tennessee, Richard King (1879-1945) worked primarily in Southern California. He is best known for his design of the Riviera Apartment House in Long Beach, which was constructed in 1929 in the Chateauesque style. The cooperative apartment building was the tallest commercial building in the greater Los Angeles area from the time of its construction until the late 1950s. Richard King is also known for his design of Vernon City Hall, as well as a children’s home in Hermosa Beach for the Children’s Hospital of Los Angeles. In Hollywood, Richard King was responsible for the design of the Hollywood Professional Building at 7046 Hollywood Boulevard in 1922, also designed in a Gothic Revival style.

DPR 523A (1/95)

*Required Information
The building located at 1441 McCadden Place was originally designed as a Knights of Columbus clubhouse. A permit was issued to owner Hollywood Columbus Club, Inc. of 1646 Las Palmas Ave for erection of the 13 room "club building" located at 1441 N. McCadden Place. An architect and contractor are listed on the original building permit but the text is unreadable. Total valuation of proposed construction was $30,000. It was formally opened in August of 1927. George P. Caldwell was Grand Knight of the unit at the time. It remained the Knights of Columbus clubhouse through at least 1951.

This property appears significant for its association with the social club Knights of Columbus. ...(continued on next page)
B10. Statement of Significance (continued): The pervasive influence within American cultural life of traditional institutions, such as churches and fraternal organizations, began to decline after 1910, while other social organizations emerged to play a more prominent role in people’s lives. This shift was one in which people increasingly sought out social groupings that they believed embodied the values they, themselves held. Accompanying the rise of social groupings such as business groups, professional groups, and labor unions was that of social clubs and public service organizations. In the 1920s, membership in social clubs grew parallel with the growth in population and perceived social ills.

The Knights of Columbus is the world's largest Catholic fraternal service organization. It was founded in the United States in 1882 as a charitable organization. Many early members were recent immigrants who often lived in unsanitary conditions and performed hazardous jobs for poor pay. Since its founding, a primary mission of the Knights of Columbus has been to protect families against the financial ruin caused by the death of the breadwinner.

Beginning in 1965, the building was used by TTG Recording (for Two Terrible Guys), which was founded in 1965 by Ami Hadini and Tom Hidley. Due to its high decibel level threshold, the studio became popular with rock musicians of that time, including The Monkees, Eric Burdon, Alice Cooper, Jimi Hendrix, and Frank Zappa.

DPR 523A (1/95)
P3a. Description (continued): integrity: medium, setting, location, materials, workmanship, association, design, feeling
Formally opened in March of 1929, the Aloha Apt - Hotel was built at a cost of $300,000. It was proposed for construction in 1928. Plans were prepared by Hillier & Sheet, architects and engineers for William Berkowitz and Associates. The brick construction, Mediterranean style building was designed to be 4-stories plus basement, covering an area of 100x142 feet, and containing a "spacious" lobby and 72 apartment units. It was purchased by W.J. Wallace from the Angeles Holding Company for $325,000 in May of 1929, shortly after its opening. In July of 1929, the Aloha Apt-Hotel was announced to be one of 100 properties in a hotel and apartment chain owned by Consolidated Hotels, Inc. ...(continued on next page)
B10. Statement of Significance (continued): Early residents of the Aloha Apt - Hotel included: Ethel Grey Terry, noted American theater and motion picture performer. She died at the Aloha in January of 1931. She was married for twenty years to actor Carl Gerard.

This apartment building appears significant both as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population as well as for its association with architects Hillier and Sheet. Despite the pervasive American ideal of single family ownership evidenced at the turn of the twentieth century, there was, nonetheless, a growing trend in large cities across the nation towards people living together in collective dwelling arrangements. Initial, the communal living arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers. Typical of this property type, this building four stories tall with a penthouse, constructed of reinforced concrete, and designed to fill as much of the lot as feasibly possible with a configuration in the shape of an U.

Architects & engineers Hillier & Sheet are responsible for the design of many Los Angeles area buildings, including: 837 S. St. Andrews Place, a Mediterranean style, 4-story, $100,000 apartment-house, built with Guaranty Construction & Investment Co.; 1716 El Cerrito Place, a Mediterranean style, 7-story, 49-unit, $200,000 apartment house for William C. Pratt; a $520,000 chateau style apartment building located at Fountain and Sweetzer Avenues in West Hollywood for the Chateau Dijon Holding Company (does not appear to be extant); a 2-story, 10-room Spanish style single family residence built for Simeon Alier at 2243 Cheswick Lane, Los Feliz Hills, constructed at a cost of $25,000; a Mediterranean style 6-story apartment building located at 4649 for A.L. Gindling; a "California design" hotel, 5-stories plus basement with eighty rooms, located on Park Boulevard in San Diego for Brooks Brothers of South Alvarado Street. Architect E. Allen Sheet of the firm Hillier & Sheet is credited with designing the California Mission Springs Sanitarium, a $1,000,000 hotel and sanitarium project for Riverside, CA, including plans for erection of 16 large buildings and 30 bungalows.

*B7. Moved? _X_ No ___ Yes ___ Unknown Date: ____________ Original Location:

*B8. Related Features:

None

*B10. Significance: Area: Los Angeles Theme: Residential Development and Suburbanization, 1850-1912

Context: Annexation and Consolidation, 1895-1910

Applicable Criteria: A/1

Period of Significance: 1901-1910

Property Type: Motel

This property appears significant as the oldest extant building in Hollywood. The 1913 Sanborn Map shows the existing residential building in its current location. In 1913 the entire block was residential, containing four similarly scaled dwellings each set back the same distance from the street. The Hollywood Center Motel residential building is the only remaining residence on the block. The property did not originally contain the bungalow style strip of motel units that exists today immediately east of the residential building.

In 1929, the Los Angeles City Directory refers to the building located at 6722 Sunset Blvd as "Nelsey Place." Also in the same year, an LA Times articles...(continued on next page)

B13. Remarks:

*B14. Evaluator: Jenna Snow

*Date of Evaluation: 12/18/2008

(This space reserved for official comments.)
B10. Statement of Significance (continued): notes that actress Myrtle B.M. Pierce of Chicago resided at 6722 Sunset Blvd. She married New York actor Claude Reese Isaacs in August of 1929. The 1929 City Directory does not list this address among its "Furnished Rooms, Boarding, and Lodging Houses," indicating that the motel component had not yet been added to the property.

In 1942 the Los Angeles City Directory refers to 6720 Sunset Blvd as "Nelsey Court," indicating that the motel units located at 6720 were called "Nelsey Court" and the residence located at 6722 was called "Nelsey Place." The 1942 Directory indicates that May L. Krigbaum was the manager of Nelsey Court where she also lived.

In 1956, 6720 Sunset Blvd appears in the Los Angeles City Directory under the name "Hollywood Center Motel." In the same year, residents of 6722 and 6722 3/4 Sunset Blvd (presumably the c. 1901 residential building) were Vampa A Jr. and Franz Kreisinger.

In 1956, the owner listed on the building permit for erection of two walls with attached neon signs (extant) is Theo J. Ticktin of Consolidated Leasing Corporation, 1445 N. Las Palmas. Site plans attached to the permit indicate that the early 2-story residential building located on the southern portion of the property was used as a motel office building. The two other buildings that existed on the property in 1956 were the 1-story motel building located at the southwest corner of the lot and the 1-story motel building located at the northeast corner of the lot. However, Sanborn maps from 1951 indicate that four single-story bungalow motel units were extant on the east side of the property in 1951. These buildings are extant today, indicating all buildings were not drawn in the 1958 building permit site plan.

The Hollywood Center Hotel was used as one of many Hollywood and Los Angeles film locations for the 1997 feature film adaptation of James Ellroy's novel, L.A. Confidential.

Although this property has a rich history as a motel, this property appears most significant as the oldest extant building in Hollywood. Single family residences from the pre-annexation period of Hollywood appear particularly significant as an important pattern of development, illustrative of Hollywood’s early development as an independent city. Although residential development began a few years earlier, Hollywood became an independent city in 1903. By 1909, Hollywood experienced growth on an exponential scale, with a population increase of 700 in 1903 to 4,000 in 1909 and accompanying difficulties supplying services to residents. As a result of its growing pains, Hollywood became a district of Los Angeles in February of 1910.

**Period of Significance:**

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This building was likely constructed as a single-family residence in 1919 and later converted into an office. In 1919, a building permit was issued to owner/contractor Harris E. Newton of 1811 N Western Ave for construction of a single-story, 5-room, single family dwelling at 6634 Sunset Blvd. Cost of construction was $3,000 (LA Building Permit No. 8005). No architect is listed on the permit. In the same year, a permit was issued to the same owner for construction of a single-story auto barn on the same property. Cost of construction was $100 (LA Building Permit No. 8006). In 1920, a single-story shed was constructed for owner Dr. J.A. Roberts of the same address (LA Building Permit...continued on next page)

| **B11. Additional Resource Attributes:** (List attributes and codes) HP06 |  |
| **B12. References:** |  |
| **B13. Remarks:** |  |
| **B14. Evaluator:** Jenna Snow |  |
| **Date of Evaluation:** 01/16/2009 |  |
B10. Statement of Significance (continued): No. 24188). Dr. Roberts had a laboratory at this address in which he collected and distributed
guinea pigs for use in hospitals and laboratories. He had many advertisements in the LA Times in and around the year 1920 offering money in
exchange for guinea pigs. The advertisement notes that he needed 250,000 guinea pigs yearly ("Display Ad 101," LA Times, 26 Sep 1920,
III2). In 1921, a permit was issued to Roberts, whose home address had by this year changed to 6620 Sunset Blvd (same property as 6634
Sunset Blvd), for construction of a one bedroom and bathroom addition to the residence located at 6634 Sunset. While Roberts is listed as the
owner on the permit, the permit is signed by Harris E. Newton, the original property owner listed on the 1919 building permit, indicating both
Roberts and Newton owned the property (LA Building Permit No. 16568). In 1934, a permit was issued to owner Security First National
Bank of 6th and Spring Streets to replace the roof on the existing dwelling with a composition roof (LA Building Permit No. 10348). In 1934,
an advertisement appeared in the Los Angeles Times for an auction of the complete furnishings of six rooms at 6634 Sunset Blvd on Monday,
Feb 5th at 10am. Items being auctioned included: Birch New York baby grand piano, Majestic Radio, living, dining, and bedroom furniture,
imported and domestic rugs, etc ("Display Ad 13," LA Times, 4 Feb 1934, 14). The building was at some point converted from a dwelling to
an office. The 1936 LA City Directory indicates that a dentist, Vinson A. Soderberg of 925 Cloverdale Ave, had an office on the property. In
1937, a permit was issued to owner Dr. Buell Sprague of the same address to expand the existing office building from 6-9 rooms (LA Building
Permit No. 4281). Another permit was issued in the same year to Sprague to alter the existing property. The permit notes that the present
building was a single-story residence and the building after alteration would be an office. Total valuation of proposed work was $5,000.
Although this is an alteration permit, the description of proposed work reads, "Alteration of present buildings covered by other permit. This
permit covers new class "C" building - see plan." (no plans were found with permit; LA Building Permit No. 9427). Also in 1937, a permit
was issued to the same owner for construction of a bay window on the front of the building at the 2nd floor level (LA Building Permit No.
27836). This is the first mention that the building is two stories, indicating that the original dwelling-turned-office building was either added
to or demolished and rebuilt prior to 1937.

It is likely that the dwelling erected in 1919 is the same, although altered, building that exists today. The original dwelling erected in 1919
contained 5 rooms and the 1921 addition added one bedroom for a total of 6 bedrooms. The 1934 auction indicates that the dwelling was still
a 6-room dwelling in 1934. If the 1919 building was torn down and reconstructed as the existing office building, it is likely that this happened
between 1934-1937.

B10. Statement of Significance (continued): single-family houses and large multi-family housing during the 1920s. Throughout the 1930s, residential development in the survey area occurred at a much slower pace as it was limited to infill on scattered sites that had not yet been developed. However, in the decade and a half following World War II, the pace of residential development in Hollywood once again accelerated. The increase in development in the postwar years reflected both a generalized building boom that was occurring nationwide in the postwar years but also a more intensely localized building boom unique to the Los Angeles region. As growth of single-family residential areas moved further out from the city center, dense multi-family development occurred as infill in areas of the city that had previously been considered suburban in character. The building exhibits character defining features of a postwar apartment building, including a modern style aesthetic, a stucco finish with stone panels, underground parking, a butterfly roof, and a donut shape with an interior pool. While this property is located within the boundaries of a potential historic district, it responds to the scale of the surrounding development.

This courtyard apartment appears significant as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Well into the 1920s, apartment buildings of any kind were typically viewed as an intrusion within areas previously established as neighborhoods comprised of single family residences. The construction of courtyard housing allows speculative landowners to develop their parcels at higher densities than that afforded by the construction of a single family home. Courtyard apartments, arranged around a central landscaped area, allowed tenants exterior space that provided additional privacy.

Period of Significance: 1958 Property Type: Multi-family Resident Applicable Criteria: C/3
(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
The building located at 7070 Franklin Avenue was originally constructed in 1958 as an apartment-hotel with 51 apartments and 14 guest rooms for owner/contractor Merton Baker of 1675 Amberwood Drive, So. Pasadena. The building was arranged in an L-shape, forming a semi-enclosed courtyard around a swimming pool. The total valuation of proposed work was $335,900. The architect was Rochlin & Baran and the engineer was Kenneth Iwata. Permits were issued for construction of the pool in the same year at a cost of $5,000. The building permit for construction of the pool lists the owner as "Fireside Manor Motor Hotel / M.E. Baker."

This building appears significant as an excellent example of...(continued on next page)

DPR 523B (1/95)
B10. Statement of Significance (continued): a postwar apartment. Development pressure to more intensively develop the land caused the area to become largely built out with small, single-family houses and large multi-family housing during the 1920s. Throughout the 1930s, residential development in the survey area occurred at a much slower pace as it was limited to infill on scattered sites that had not yet been developed. However, in the decade and a half following World War II, the pace of residential development in Hollywood once again accelerated. The increase in development in the post-war years reflected both a generalized building boom that was occurring nationwide in the post-war years but also a more intensely localized building boom unique to the Los Angeles region. As growth of single-family residential areas moved further out from the city center, dense multi-family development occurred as infill in areas of the city that had previously been considered suburban in character. The building exhibits character defining features of a postwar apartment building, including a Modern style aesthetic and a stucco finish and rock panels, and horizontal orientation.

Period of Significance: 1956  Property Type: Multi-family Resident  Applicable Criteria: C/3

The 27-unit apartment house located at 7104 Franklin Ave was constructed in 1956 for owner Minit Investment Company of 3425 W. Florence for $98,000. It was originally designed to contain 27 dwelling units and one guest room. 18 parking spaces were originally accommodated on the lot. No architect is listed on the original building permit. The engineer was Tom Woodward. The swimming pool was constructed in the same year for owner Minet Investment Company (Mr. Anicite Landeros), designed by architect J.A. Murrey and built by contractor Cliff M. Hall of 5345 Craner Ave for $3,030.

This building appears significant as an excellent example of a postwar apartment. Development pressure to...

**Applicable Criteria:** A/1, C/3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property appears significant as an excellent example of an increasingly rare property type. Single family residences from the pre-annexation period of Hollywood appear particularly significant as an important pattern of development, illustrative of Hollywood’s early development as an independent city. Although residential development began a few years earlier, Hollywood became an independent city in 1903. By 1909, Hollywood experienced growth on an exponential scale, with a population increase of 700 in 1903 to 4,000 in 1909 and accompanying difficulties supplying services to residents. As a result of its growing pains, Hollywood became a district of Los Angeles in February of... (continued on next page)

DPR 523B (1/95)  
*Required Information*
B10. Statement of Significance (continued): 1910. Building permits were not available for this property.

This property also appears significant for its unique architectural design. As described in the 1984 survey, this building is "One of the most picturesque Craftsman ear dwellings in Hollywood." Features that contribute to the composition include wide bargeboards with flared edges, a keyhole window below the gable peak, and wide, two bay front porch.

(Comment importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

In 1950, a permit was issued to owner Peter O. of 1823 N. Fuller for erection of a 2-story, 14-family, 43-room apartment building located at 1781 Orange Ave between Franklin Ave and Hollywood Blvd. The architect was Multiprice Co., the engineer was E.R. Quirm and the contractor was Nil O. of 10863 Bluffside Drive, North Hollywood. Total valuation of proposed work was $45,000. Drawings included with the building permit showed that the building was designed in an J-shape surrounding a courtyard with car parking spaces to the rear of the building. A certificate of occupancy was issued to owner Peter Olatan of 1024 N. Fuller Ave for the 2-story, Type V, 65' x 90', 14-unit apartment house...(continued on next page)

B9a. Architect: Kenneth Lind

B9b. Builder: unknown

B10. Significance: Area: Los Angeles

Theme: Postwar Multifamily Apartments, 1946-1965

Period of Significance: 1958

Property Type: Multi-family Residential

Applicable Criteria: C/3

Construction of the Hollywood Biltmore, located at 1745 N. Orange Drive, was completed in 1958. The original owner was architect Kenneth Lind, who also designed the structure. The building was originally designed as an apartment-hotel with patios and balconies, central pool and patio, complete air conditioning, and a circular glass and marble lobby. W & J Sloane of Beverly Hills was the interior decorator. The total cost of construction was over $1,000,000.

This building appears significant as an excellent example of a Postwar Apartment House. It was constructed in response to the same development pressures. Development pressure to more intensively develop the land caused the...(continued on next page)

B10. Statement of Significance (continued): area to become largely built out with small, single-family houses and large multi-family housing during the 1920s. Throughout the 1930s, residential development in the survey area occurred at a much slower pace as it was limited to infill on scattered sites that had not yet been developed. However, in the decade and a half following World War II, the pace of residential development in Hollywood once again accelerated. The increase in development in the post-war years reflected both a generalized building boom that was occurring nationwide in the post-war years but also a more intensely localized building boom unique to the Los Angeles region. As growth of single-family residential areas moved further out from the city center, dense multi-family development occurred as infill in areas of the city that had previously been considered suburban in character. The building exhibits character defining features of multi-family residences of the period, including a modern style aesthetic and a stucco finish with sunscreens as the dominant decorative element, as well as a donut shape with an interior pool.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property appears significant as an excellent example of an increasingly rare property type. Single family residences from the pre-annexation period of Hollywood appear particularly significant as an important pattern of development, illustrative of Hollywood’s early development as an independent city. Although residential development began a few years earlier, Hollywood became an independent city in 1903. By 1909, Hollywood experienced growth on an exponential scale, with a population increase of 700 in 1903 to 4,000 in 1909 and accompanying difficulties supplying services to residents. As a result of its growing pains, Hollywood became a district of Los Angeles in February of...(continued on next page)

DPR 523A (1/95)  *Required Information
P3a. Description (continued): basement. 2nd building behind primary building. G) Alterations or changes to the property. Retains integrity: medium, setting, location, materials, workmanship, association, design, feeling H) Setting (immediate); mature landscaping, driveway
In 1930, a permit was issued to owner W.W. Hampe (spelling of last name unclear on permit) for erection of a 3-story, 42-room, 18-family apartment building. Total valuation of proposed work was $48,000.

This apartment building appears significant as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Despite the pervasive American ideal of single family ownership evidenced at the turn of the twentieth century, there was, nonetheless, a growing trend in large cities across the nation towards people living together in collective dwelling arrangements. Initial, the communal living...(continued on next page)
B10. Statement of Significance (continued): arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers.

This property also appears significant as an important example of Spanish Colonial Revival architecture. What we now call Spanish Colonial Revival style is really the second phase of a larger, more encompassing style which began in the 1890s and 1900s. Developing alongside a national trend of high style, academic architects employing historic eclectic styles, Spanish Colonial Revival style, in the broadest sense of the term, was an attempt to create and define a prototypical Californian expression of architecture. Based on designs for the California Missions, the aim of the earlier phase of Spanish Colonial Revival style, what is now called Mission Revival style, was to transmit a romantic myth of California’s European origins. The academic, high style expression of Spanish Colonial Revival style was popularized by the Panama-California Exposition of 1915 in San Diego. Typical of buildings in this style, this property has an asymmetrical composition, a low-pitched, red-tile roof and stucco wall surface, sometimes interrupted by arched openings. It also exhibits other defining decorative elements, which derive from the full range of Spanish history, incorporate Moorish, Byzantine, Gothic, Renaissance, and Latin influences, including decorative open railings and wooden security grills, and stucco decoration along the cornice.

A permit was issued in March of 1923 for erection of a 2-story, 7-room, single family dwelling at 7045 Lanewood Ave for owner/builder H.J. Beck of 7106 Hawthorne Ave. The architect listed on the permit is Harold Dunn of Monrovia. The total valuation of the proposed work was $7,000. A permit was issued for construction of a 3-room private garage on the same property for the same owner at a cost of $300 in the same year.

This property appears significant as the one of the only remaining single-family residence in close proximity to Hollywood Boulevard. While residential development in Hollywood during the first decade of the twentieth century had focused on Prospect Avenue...(continued on next page)

DPR 523B (1/95)
B10. Statement of Significance (continued): (present-day Hollywood Boulevard) due to its proximity to streetcar lines, by the 1920s, development was widespread throughout the area in response to the automobile. According to Sanborn Maps (corrected through 1951), 7045 Lanewood Ave is situated on a block originally comprised mostly of similarly scaled, single family residences with the same setback from the street. 7045 Lanewood contains the only remaining building on the block originally designed as a single family residence. Two multi-family buildings from the same era, designed in the Spanish Colonial Revival style, remain and are located at 7051 Lanewood Ave (built 1932) and 7063 Lanewood Avenue (built 1930).

This courtyard apartment appears significant as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Well into the 1920s, apartment buildings of any kind were typically viewed as an intrusion within areas previously established as neighborhoods comprised of single family residences. The construction of courtyard housing allows speculative landowners to develop their parcels at higher densities than that afforded by the construction of a single family home. Courtyard apartments, arranged around a central landscaped area, allowed tenants exterior space that provided additional privacy.

DPR 523A (1/95)  *Required Information
In 1913, permits were issued to owner A.F. Allmond of 5542 Bayer Street for erection of four single-story, 5-room dwellings located at 6817 (rear unit) and 6819 (Units A, B, and C) Leland Way. The dwelling unit located at 6817 was constructed at a cost of $1,671 and the other three units were constructed at a cost of $766 each. No architect is listed on the building permits. The contractor was P.J. Leaver & Co. of 817 Higgins Bldg.

This bungalow court appears significant as an increasingly rare example of a formerly ubiquitous property type in Hollywood that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Designed in a...(continued on next page)
B10. Statement of Significance (continued): modest Craftsman style, the property exemplifies character-defining features of a bungalow court including multiple, semi-dethatched buildings on a single residential lot arranged around a landscaped courtyard.

This property appears significant as an excellent example of an increasingly rare property type. Single family residences from the pre-annexation period of Hollywood appear particularly significant as an important pattern of development, illustrative of Hollywood’s early development as an independent city. Although residential development began a few years earlier, Hollywood became an independent city in 1903. By 1909, Hollywood experienced growth on an exponential scale, with a population increase of 700 in 1903 to 4,000 in 1909 and accompanying difficulties supplying services to residents. As a result of its growing pains, Hollywood became a district of Los Angeles in February of...*(continued on next page)*

This flat is significant as an increasingly rare example of a formerly ubiquitous property type in Hollywood that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Well into the 1920s, apartment buildings of any kind were typically viewed as an intrusion within areas previously established as neighborhoods comprised of single family residences. Perhaps because of the resistance towards multifamily residential buildings during this period, a couple of different strategies were employed to make their primary façade appear more like a single family residence. This property, designed in a Spanish Colonial Revival style, articulates...(continued on next page)

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

In 1964, a Certificate of Occupancy was issued to owner Guardian Bank of 818 N. La Brea for the 1-story, type V, 60' x 119' bank with 18 parking spaces located at 7014 Sunset Blvd. In 1963, Guardian Bank was a new, independent Hollywood Financial Institution with Sherwin L. Memel as chairman of the board. Irving D. Shapiro & Associates was the building architect, John Follis & Associates designed the bank interiors and Fellows Construction Company, Inc. was the contractor. A 1963 Los Angeles Times article describes the architecture: "The 2-story, glass-enclosed building features a driveway under the building from Sunset Blvd. to the bank's parking areas. The Sunset Blvd. facade feature..." (continued on next page)

(This space reserved for official comments.)
B10. Statement of Significance (continued): is designed to reveal the interior, emphasized by a 20-ft glass enclosure. The banking area occupies 7,300 sq ft, and a mezzanine floor containing officers board rooms has 1,970 sq ft. A second article about the building further elaborates: "A community room, designed with a separate entrance and open to local organizations, will be provided. The bank vault is exposed to view and surfaced with polished, travertine tile. The bank's symbol, in metal bas-relief, highlights the outer vault surface, visible from Sunset Blvd. Reflecting pools are located in entry areas". A 1963 advertisement for the Guardian Bank notes that Guardian Bank was the only independent bank in Hollywood at the time.

This property appears significant for its Mid-Century Modern architecture as well as for its association with architect Irving Shapiro. What is now known as Mid-Century Modern architecture was a continuation of Modern movements that came earlier and much is an amalgamation of architectural expressions from an earlier period, including the International and Bauhaus styles. The most notable architects combined new architectural solutions to integrate traditional precedents into a style that moved the entire field of architecture, and sometimes public consciousness, in a new direction. Modernism became the pre-eminent design solution from about 1932 to about 1984 for commercial buildings. While they were largely unsuccessful in convincing developers to adopt the modern style for residential buildings, Modern architects found commercial clients who were willing to adopt a modern style to distinguish their buildings. Like other examples, this building is characterized by a simplification of form and elimination of ornament. Other character-defining features include its flat roof, deep roof overhang, and a mix of masonry and glass exterior cladding.

Irving D. Shapiro, of Irving D. Shapiro & Associates, received his BA and MA degrees in Architecture from UC Berkeley in 1949 and 1950, respectively. Prior to establishing his own architecture and land use planning firm in Beverly Hills, Shapiro attended Columbia University where he received an MBA in real estate in 1956 and a Ph.D. in urban land economics in 1961. This building is one of two early projects located on Sunset Boulevard in Hollywood, the other an office building located at 7033 Sunset Boulevard. Shapiro also designed the Columbia Savings & Loan Association building, located at 5220 Wilshire Boulevard in 1965. At around the same time, Shapiro’s firm was also involved in designing a high-rise office building (MacArthur-Broadway Building) in Oakland, California. In 1965, the Shapiro firm won a Merit Award from the National Prestressed Concrete Institute for their Oakland project. Other projects of the firm included: Anaheim Towers project (1964, may have been demolished), Bank of California Building in San Bernardino (1967) and a regional shopping complex in Honolulu, Hawaii (1968).

Context: Multifamily Development in Hollywood, 1911-1945

Period of Significance: 1922

Property Type: Multi-family Residential

Applicable Criteria: A/1

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

Three permits were issued in 1921 for construction of three 2-story residential buildings at 1351-1355 La Brea Ave to owner Dr. F. Traughfer of 1326 La Brea. Two of the buildings were originally constructed as 8-room, 4-family residential buildings and the third building was originally constructed as an 8-room 3-family residential building. Each building was constructed at a cost of $6,000. No architect is listed on the permits. The contractor was J. LeRoy Moser of 8335 Sunset Blvd.

This bungalow court appears significant as an increasingly rare example of a formerly ubiquitous property type in Hollywood that represents an important pattern of dense, urban development to...(continued on next page)

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property appears significant as an important example of the Craftsman style. Popular from the early 1900s through the 1920s, the Craftsman style utilizes design elements of the Arts and Crafts style and represented a conscious search for the supposed simplicity of pre-Industrial times. The bungalow's simplicity of form, informal character, direct response to site, and extensive use of natural materials, was a regional interpretation of the socio-economic and aesthetic reforms espoused by the Arts and Crafts Movement's founder, William Morris. Although modest in size, this property demonstrates most character-defining features, including a low-pitched roof with wide, exposed eaves...(continued on next page)

Context: Residential Development and Suburbanization, 1850-1912

Period of Significance: 1911

Property Type: Single Family Residence

Applicable Criteria: A/1

This property appears significant as an excellent example of an increasingly rare property type. Single family residences from the pre-annexation period of Hollywood appear particularly significant as an important pattern of development, illustrative of Hollywood’s early development as an independent city. Although residential development began a few years earlier, Hollywood became an independent city in 1903. By 1909, Hollywood experienced growth on an exponential scale, with a population increase of 700 in 1903 to 4,000 in 1909 and accompanying difficulties supplying services to residents. As a result of its growing pains, Hollywood became a district of Los Angeles in February of... (continued on next page)

Theme: Revival of Colonial Styles: The Search for Identity 1913-1945

Context: Architecture, Engineering and Designed Landscapes, 1913-1945

Period of Significance: 1920

Property Type: Single Family Residence

Applicable Criteria: C/3

In 1920, permits were issued to owner S.L. of 7101 Sunset Blvd for erection of a 6-room single family dwelling and 1-room garage at 1342 La Brea Ave. The dwelling was originally designed as a single-story structure with a brick chimney and shingle roof, constructed at a cost of $4,000. The garage was constructed at a cost of $100 (LA Building Permit No 775-76). Permits were also issued in the same year for construction of a 6-room, single-family dwelling and 1-room garage located nearby at 1307 La Brea Ave for the same owner and constructed by the same contractor. (LA Building Permit No 777-78).

This property appears to be a particularly fine, albeit modest, example of Colonial...(continued on next page)

(This space reserved for official comments.)
B10. Statement of Significance (continued): Revival architecture in a single-family residence. The Colonial Revival style resulted from a rejection of the Classical Revival style, and a desire to return to a more “traditional” American building type. The style took on added popularity with the restoration of Colonial Williamsburg in the 1920s. This style draws from the simple building forms typical of early American colonial structures, and elements of classical or Georgian architecture. Although modest in size, this property demonstrates most character-defining features, including a symmetrical composition of the facade, an accentuated front door, extended forward into an entry porch supported by slender columns, and grouped windows. Rezoned for commercial use in the 1920s, this formerly single-family residence is a remnant of a neighborhood that has since made way for commercial buildings.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The bungalow court located at 1346-50 Sycamore Avenue was likely constructed in 1922 as an 8-unit, 1-room court for owner L.D. Rich (also architect and contractor). A 1922 LA building permit lists L.D. Rich of 1408 Orange Drive as the owner, architect, and contractor responsible for erection of a private garage and laundry room on the property. However, no original new building permit for erection of the bungalows. A 1936 LA building permit notes that the present building is an "8-unit single stucco court for 8 families."

This bungalow court appears significant as an increasingly rare example of a formerly ubiquitous property type in Hollywood that represents an important pattern of...(continued on next page)

*B10. Significance: Area: Los Angeles

Theme: Multifamily Development in Hollywood, 1911-1945

Context: Residential Development and Suburbanization, 1913-1945

Period of Significance: 1923

Property Type: Multi-family Residential

Applicable Criteria: A/1

This bungalow court appears significant as an increasingly rare example of a formerly ubiquitous property type in Hollywood that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Designed in a Mediterranean Revival style, the property exemplifies character-defining features of a bungalow court including multiple, semi-dethatched buildings on a single residential lot arranged around a landscaped courtyard. Building permits were not available.

(Describe importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

Permits were issued in 1952 for construction of the apartment building and garage located at 1311 N. Orange Drive. The building was originally designed as a 2-story, frame-and-stucco, 8-family, 16-room apartment house for owner/contractor Louis H. Kelman & Son of 1118 S. Oakhurst Drive. The permit is signed by Carl K. Kelman. Cost of construction was valued at $460,250. No architect or engineer are listed on the original permit.

This postwar multifamily apartment building appears significant for its highest quality of architectural design and epitomizes its property type. Two stories in height and L-shaped in plan, an exterior stair gives access to an exterior corridor covered by...(continued on next page)

This property appears significant as an important example of the Craftsman style. Popular from the early 1900s through the 1920s, the Craftsman style utilizes design elements of the Arts and Crafts style and represented a conscious search for the supposed simplicity of pre-Industrial times. The bungalow's simplicity of form, informal character, direct response to site, and extensive use of natural materials, was a regional interpretation of the socio-economic and aesthetic reforms espoused by the Arts and Crafts Movement's founder, William Morris. Although modest in size, this property demonstrates most character-defining features, including wood shingle siding and a wide front porch...(continued on next page)

Period of Significance: 1923  
Property Type: Multi-family Residential  
Applicable Criteria: A/1  
(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)  
On 4/23/1923, a permit was issued to owner G.C. Rumions for erection of the 2-story, 50-unit, U-shaped apartment complex located at 1800 El Cerrito Place. Total valuation of proposed work was $75,000.  

This apartment building appears significant as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Despite the pervasive American ideal of single family ownership evidenced at the turn of the twentieth century, there was, nonetheless, a growing trend in large cities across the nation towards people living together in collective dwelling arrangements. Initial, the communal living...(continued on next page)

(This space reserved for official comments.)
B10. Statement of Significance (continued): arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers. Typical of the property type, this building is three stories tall, masonry construction, and designed to fill as much of the lot as feasibly possible with a configuration in the shape of an U, arranged around a central landscaped area.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

Permits were issued for erection of the Highland Gardens Hotel in 1955 for owners M. Horowitz and R. Larson of 8052 Beverly Blvd. Originally designed as an apartment/hotel with 2 irregularly shaped 2-story buildings, one containing 46 units (32 dwelling units and 14 guest rooms) and a subterranean garage and the other containing 22 units, arranged around a triangular courtyard with an adjacent 2-unit apartment house and garage located on the same property. It contained a main driveway parallel to Franklin with access from Franklin Ave and Scamore Ave. The total cost of all three buildings was $473,300. The 1960 LA City Directory lists the hotel under the name "Hollywood Landmark Hotel... (continued on next page)

This property appears significant both for its Mid-Century Modern architecture as well as important hangout for musicians and other people in the entertainment industry. Similar in appearance to post-war apartment buildings, This building exhibits the highest quality of design and appears similar to post-war apartment buildings. Like a post-war apartment building character defining features include a Modern style aesthetic and a stucco finish, horizontal orientation, wide, overhanging eaves, and a donut shape with an interior pool.

In addition to its high quality design, this building was where many Hollywood entertainers, such as the New York City Ballet Company, Ice Capades, Sergio Mendes, Roger C. Carmel, Frank Zappa, The Jefferson Airplane, Alice Cooper, Otis Redding, the Chambers Brothers and more stayed. Magicians from the Magic Castle (located adjacent to the motel) would often come and perform impromptu magic shows by the hotel pool. Janis Joplin overdosed and died in room 105 in 1970.

P3a. Description (continued): driveway
In 1928, permits were issued to owner/architect/contractor Edwin C. White to move an existing single-family residence (unknown construction date) located at 5727 Carlton Way to make way for erection of a 2-story, 12-room, 4-family apartment building with stucco exterior walls and a 1-room garage. The single family residence was moved to the back of the lot and the apartment building was constructed at the front of the lot. Both buildings are extant. Total valuation of new building construction was $8,000 for the apartment building and $500 for the garage.

This flat is significant as an increasingly rare example of a formerly ubiquitous property type in Hollywood that represents an...(continued on next page)
B10. Statement of Significance (continued): important pattern of dense, urban development to accommodate a rapid increase in population. Well into the 1920s, apartment buildings of any kind were typically viewed as an intrusion within areas previously established as neighborhoods comprised of single family residences. Perhaps because of the resistance towards multifamily residential buildings during this period, a couple of different strategies were employed to make their primary façade appear more like a single family residence. Designed in a Mediterranean Revival style, the primary façade recalls the imagery of an individual single-family residence.

**B10. Significance:**  
**Area:** Los Angeles  
**Theme:** Multifamily Development in Hollywood, 1911-1945

**Context:** Residential Development and Suburbanization, 1913-1945

**Period of Significance:** 1923  
**Property Type:** Multi-family Residential  
**Applicable Criteria:** A/1

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

In 1923, permits were issued to owner J.J. Sherlock of 704 Pacific Finance Building for erection of a single-story, 20-room, 10-family bungalow court and a garage located at 5731-37 Carlton Way. The architect/contractor for both were Sherlock-Kitts Co. of 704 Pacific Financial Building. Total valuation of proposed work for the bungalow court was $12,500 and for the garage was $400.

This bungalow court appears significant as an increasingly rare example of a formerly ubiquitous property type in Hollywood that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Designed in a Spanish Colonial Revival style, the property...(continued on next page)

Theme:

Theme: Postwar Multifamily Apartments, 1946-1965

Period of Significance: 1963

Property Type: Apartment

Applicable Criteria: C/3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

A Certificate of Occupancy was issued to owner Swartz & Kahan of 22030 Sherman Way, Canoga Park, CA for ownership if the 3-story, type V, 15 x 100’ & 155’ x 180’ apartment house with 50 apartments and attached garage on 7/20/1964.

Designed as a place for "modern living" the Carlton Towers apartment building located at 5741 Carlton Way was originally created as a Medallion Apartment. According to a 1964 advertisement in the Los Angeles Times, Medallion homes and apartments featured a variety of built-in modern conveniences, such as a flameless electric kitchen complete with major electric appliances, full house power, and modern planned lighting.

Approximately 30 homes and apartment... (continued on next page)

B12. References:

"Open House Slated for Apartment," Los Angeles Times, 12 Apr 1964, 120

B13. Remarks:

B14. Evaluator: Tanya Sorrell

*Date of Evaluation: 01/29/2009

(This space reserved for official comments.)
B10. Statement of Significance (continued): buildings located in Los Angeles were listed in the advertisement as Medallion home models one could visit. Other Medallion apartment buildings in Hollywood listed in the advertisement are: Executive House of Hollywood (2212 N Cahuenga Blvd), The Maplewoods (5025 Maplewood Ave), Manhattan Park (345 S. Manhattan Pl), and the Vista Los Feliz Condominium (4343 Finley Ave). In addition to its interior amenities, the Carlton Towers was originally designed with an elevator, large heated pool, some private balconies, air conditioning, a recreation room and cabana, a laundry room, and waste chutes on each floor.

This postwar multifamily apartment building appears significant for its highest quality of architectural design and epitomizes its property type. Development pressure to more intensively develop the area caused the area to become largely built out with small, single-family houses and large multi-family housing during the 1920s. Throughout the 1930s, residential development in the survey area occurred at a much slower pace as it was limited to infill on scattered sites that had not yet been developed. However, in the decade and a half following World War II, the pace of residential development in Hollywood once again accelerated. The increase in development in the post-war years reflected both a generalized building boom that was occurring nationwide in the post-war years but also a more intensely localized building boom unique to the Los Angeles region. As growth of single-family residential areas moved further out from the city center, dense multi-family development occurred as infill in areas of the city that had previously been considered suburban in character. The building exhibits character defining features of a postwar apartment building, including a Modern style aesthetic with a stucco finish and horizontal orientation. Three stories in height, the building has what appears to be floating arches above the roofline and balconies in a wave-like shape.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
The Egyptian Revival Karnak Apartments were constructed in 1925 for owner A.S. Tyler of 241 N. Western Avenue at a cost of $50,000. The architect and contractor were J.M. Close of the same address. J.M. Close also designed several of the Karnak's "twins", including the Ahmed Apartments, located within the Hollywood Redevelopment Area at 5616 Lexington Avenue, the Sahara Apartments, located at 1020 S. Kingsley Drive, and a 2-story mini-version of the same building located immediately across the street from the Sahara Apartments. John M. Close was an architect, contractor, and realty broker. He is listed in the 1920 Census as 38 years old, from New York, residing at 1807 Vernon Avenue,... (continued on next page)
B10. Statement of Significance (continued): married to Edna R. of California, with one son and one daughter.

According to the 1930 Census, approximately 12 of the residents of the Karnak worked in the motion picture industry, employed as actors, musicians, and art directors. In addition, among the early residents of the Karnak was Jose Samaniego, Spanish artist and editor of the Prensa de Madrid, a leading illustrated weekly publication in Spain, who lived at the Karnak while visiting the Hollywood area for one year to study American filmmaking as a representative of the Spanish government ("Spanish Artist on Visit Here", LA Times 28 Feb 1931, A5).

The Karnak Apartments appear significant both as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population as well as for its relatively rare and distinctive architectural style. Despite the pervasive American ideal of single family ownership evidenced at the turn of the twentieth century, there was, nonetheless, a growing trend in large cities across the nation towards people living together in collective dwelling arrangements. Initial, the communal living arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers. Typically four or five stories tall, they were usually constructed of brick or of reinforced concrete and were generally designed to fill as much of the lot as feasibly possible with configurations in the shape of an U, L, T or barbell.

Designed in an Egyptian Revival style, the property exhibits character-defining features of the style, including a monolithic structure with lotus-topped pilasters and Egyptian iconography. The style represents an exuberant period of expansion during the 1920s fueled by the explosive popularity of motion picture industry. Not only was the property inhabited by residents connected to the motion picture industry, the building itself provided entertainment for passers-by that invited their participation and reproduction of the city's self-image as a playful, fantastical paradise.

B7. Moved? No Yes Unknown Date: Unknown Original Location: Unknown

B8. Related Features: None

Period of Significance: 1930 Property Type: Multi-family Resident Applicable Criteria: A/1, C/3

In 1929, a permit was issued to owner Raymond J. O'Brian for erection of an 80-room, 40-family apartment building and parking garage at 5611 Carlton Way. The architect listed on the permit is O. Schiller and E.J. Davis. The contractor was C.C. Overpeck of 430 S. La Brea. Total valuation of proposed work was $125,000. Sanborn Maps (corrected through 1951) label the building located at 5611 Carlton Way "Bryn-Carlton Apts" and note that the 5-story Bryn-Carlton contains 40 apts and a garage for 40 cars. In 1931, the building was purchased by the Calan Corporation, Ltd. of the Richfield Building as part of a larger purchase of seven Class A apartment buildings in Hollywood and Wilshire...(continued on next page)

DPR 523B (1/95)
B10. Statement of Significance (continued): sections of the City for approximately $2.2 million. Included in this purchase was the Villa Bonita, located at 1517 Hillcrest Road in Hollywood, just North of the Hollywood Redevelopment Area. According to the 1936 Los Angeles City Directory, the property manager was Frank D. Gardner.

This apartment building appears significant as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Despite the pervasive American ideal of single family ownership evidenced at the turn of the twentieth century, there was, nonetheless, a growing trend in large cities across the nation towards people living together in collective dwelling arrangements. Initial, the communal living arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers. Typical of this property type, the building is five stories tall, constructed of reinforced concrete and designed to fill as much of the lot as feasibly possible.

This property also appears significant for its flamboyant architectural design in an Art Deco style. The property exhibits character-defining features of the style, including smooth stucco wall surfaces decorated with zigzags and other stylized geometric motifs, and pilasters emphasizing verticality. Though comparatively rare, and in vogue for not much more than a decade, this style was highly influential because it embodied the integration of four unlikely features unique to Los Angeles: changing patterns of land use; a popular response to early 20th Century progress and technology; the birth of new industries; and a sense of fantasy fueled by Hollywood and the movie industry that propelled the City's myths and legends.

**Period of Significance:** 1938-1948  
**Property Type:** Restaurant

**Applicable Criteria:** A/1

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

In 1938, a permit was issued for construction of the restaurant located at 5955 Hollywood Boulevard to owner Times-Mirror Co. of 292 West First Street. The restaurant was originally designed by architect Gordon B. Kaufmann as a 20-story concrete building. Total valuation of proposed work was $85,000 (LA Building Permit No. 21686).

Although the Times-Mirror Entertainment Complex, which includes addresses 5931, 5941, 5951, and 5959 Hollywood Boulevard, was determined eligible for listing in the National Register through consensus determination of OHP and a federal agency in 1994, this property is not included in the Historic Property Data File. Nevertheless, it appears eligible for...(continued on next page)

*Required Information*
B10. Statement of Significance (continued): individual listing in the National Register for its association with Hollywood as a night-time entertainment center. For $1, up to a 1,000 people could dine on a six-course dinner and dance in what appeared to be an open-air garden. Later, glamour gals in a chorus line revealed a bit of flesh and customers lined up seven days a week to ogle and participate in the sophisticated stage show. Whereas the Sunset Strip featured many upscale nightspots, Hollywood had more of the working class nightspots and the Florentine Gardens was one of them. The Florentine Gardens went bankrupt in 1948.

(Describe importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Address integrity.)

This property appears significant for its association with United Western Recorders, who purchased the property in 1961. The United Western Records complex also included the building two lots away at 6050 Sunset Boulevard, which also functioned as a recording studio. United Western Recorders has arguably been the scene of more hit records from the 1950s until the present - than any other studio in America. Among those who have recorded there include Nat "King" Cole, Barbra Streisand, Whitney Houston, the Rat Pack of Dino, Frank Sinatra, Bing Crosby; Ray Charles, the Stones, Elton John, Eric Clapton, Torn Petty, R.E.M., k.d. lang, and Bonnie Raitt.

Recording studios were designed as... (continued on next page)

(This space reserved for official comments.)
B10. Statement of Significance (continued): private, functional spaces to accommodate artists as they worked in recording sounds, whether for incorporation into films or as music for record production. With the new technological innovation of magnetic tape and its introduction into the recording industry in the 1950s, the spatial requirements for a recording studio became much more flexible than they had been previously. The technological development of magnetic tape for sound recording allowed records to be recorded almost anywhere. Because of the flexibility inherent in the recording process, many of the recording studios were located in buildings not originally built to accommodate them but previously used for some other commercial enterprise. Another factor that affected the flexibility with which recording studios could be located was that the physical production of records was separate from the production of the music placed upon them; while music was recorded in these buildings, it was not the location where records were physically made. Instead, the recording would be made on the premises and then sent elsewhere to press.

Despite the stature of some of personalities that recorded their significant work within the recording studio building type, many of these buildings are characteristically rather unremarkable architecturally. In fact, the consistently non-descript architectural expression of recording studios, as buildings not otherwise distinguishable from the common everyday landscape, suggests that the location of recording studios in small, architecturally unarticulated commercial buildings might have been an intentional strategy to create a working environment conducive to the musicians working there.

Prior to its use in the recording industry, In 1943, the building was called the "Hollywood Casino" and was home to theater productions such as "Burlesque in Hollywood" and "Harlem in Hollywood. ("Directors Collaborate," Los Angeles Times, 16 Apr 1943, 17; "Display Ad 3," Los Angeles Times, 20 Nov 1943, 3). The building also housed West Coast Productions in 1950 and was called the "Radio Center Building" in 1954. ("Eight on Trial in Alleged TV Union Racket," Las Angeles Times, 9 Nov 1950, A8.)

In 1954, the building was called the "Radio Center Building" and was valued at $300,000 in a real estate transfer from the Radio Broadcasting Recording & Service Corporation to Wagner Realty Co. ("Large Volume of Deals Told," LA Times, 10 Jan 1954, F4).

B9a. Architect: Henry Hayden Whiteley (H.H. Whiteley)
b. Builder: Wm H. Bedell of 420 S. Westlake Ave

Context: Architecture, Engineering and Designed Landscapes, 1913-1945

Period of Significance: ____________________________ Property Type: ____________________________ Applicable Criteria: C/3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This brick-wall, 5-room commercial building for stores was erected for owner Bedell and Company of 451 San Fernando Road at a cost of $11,000 Permit No. 26396 (1928) for a 5-room commercial building for use as stores.

This property appears significant as an important example of Italianate architecture as well as for its association with important local architect Henry Hayden Whiteley. The property embodies distinctive character defining features of Italianate architecture, including a low, octagonal hipped roof with a cupola over a corner tower that also features a wrought lion lantern and grill, parabolic-shaped openings flank corner, and plaster corbels.

Henry Hayden Whiteley... (continued on next page)

Period of Significance: 1932 Property Type: Commercial Applicable Criteria: A/1, C/3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

According to the 1936 Los Angeles City Directory, early tenants of the building included: Franklin Liquor Company (6324 Yucca), L L Emery (632 Yucca), a clothing cleaner operated by Louis Bachrach (6318 Yucca), real estate office for Rolland Carr, post office carrier Arthur Frazier and wife Mrs. B Frazier's corsetieres business (6314 Yucca).

This building appears significant both as a commercial building constructed within an emerging commercial center as well as for its design in an Modern style. This building is associated with development of "Peacock Alley," a specialty shopping district concentrated on Vine St between Yucca St and Hollywood Blvd. The first building constructed...(continued on next page)

B13. Remarks:

*Required Information

B14. Evaluator: Jenna Snow

*Date of Evaluation: 01/28/2009

(This space reserved for official comments.)
B10. Statement of Significance (continued): as part of Peacock Alley was the Jean Swartz building, constructed in 1930 and located on the southeast corner of the intersection of Yucca and Vine. Peacock Alley was one of several Vine street development projects planned as part of the City's "Five-Finger Plan," a public works project to improve areas surrounding Hollywood Blvd. According to a 1937 map of the Pacific Electric Railway, Peacock Avenue was located along the Western and Franklin Avenue Line Route, which operated from a downtown terminus at 11th and Hill Streets, collecting Yucca and Vine Streets on the way to its terminus at Vine and Hollywood Blvd. The line operated from 1911 to 1940.

Designed in the relative rare Zigzag Moderne style, the property exhibits character-defining features of the style, including smooth stucco wall surfaces decorated with stylized geometric motifs and pilasters emphasizing verticality. Though comparatively rare, and in vogue for not much more than a decade, this style was highly influential because it embodied the integration of four unlikely features unique to Los Angeles: changing patterns of land use; a popular response to early 20th Century progress and technology; the birth of new industries; and a sense of fantasy fueled by Hollywood and the movie industry that propelled the City's myths and legends.

B9a. Architect: Gordon B. Kaufmann

B10. Significance: Area: Los Angeles

Theme:

Period of Significance: Property Type: Theater

Applicable Criteria:

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The 3-story building currently occupied by Nickelodean Studios at 6230 Sunset Blvd was originally designed by architect Gordon B. Kaufmann in 1938 as the Earl Carroll Theatre Restaurant, a dinner theatre, constructed at a cost of $500,000. The owner listed on the building permit for erection of the restaurant was Inner Circle Corporation of Bank of America Building, Beverly Hills, the contractor was Ford J. Twaits Co. of 816 W. 5th Street, and the engineer was Murray Frick. (LA Building Permit No. 28015). Originally designed with a double revolving stage and three subsidiary stages, the building was, at the time of construction, convertible into a broadcasting station as occasion...(continued on next page)

B11. Additional Resource Attributes: (List attributes and codes) HP10

B12. References:

B13. Remarks:

B14. Evaluator: Tanya Sorrell

Date of Evaluation: 12/18/2008

(This space reserved for official comments.)

A previous Historic Resources Survey performed in 1979 offers the following building description: "Known for its revues, the theatre offered lavish burlesque-like shows with dinners. Designed by Gordon B. Kaufmann, the interior featured a colorful neon ceiling, an art moderne lobby, and a statue holding a neon tube. The exterior had a neon face with the words, "Thru these doors pass the most beautiful girls in the World." The blank wall facing the street once was covered with star signature plates. These plates are now in the basement of the building. The building still has one of its most unusual features; a revolving round stage inside another round revolving stage. The building effectively combines International and Moderne styles. Designed around a parking lot with a side entrance, the once present neon face was all that was visible in the evening. The theatre later became the Moulin Rouge" (Denver Miller, Christy Johnson, 10/1979).

Another previous Historic Resources Survey form for the building elaborates: "The resource was built as a dinner theater by Earl Carroll, a brash entertainer who started his career as a Broadway writer, producer and director who had the distinction of introducing full nudity to the Broadway stage...Theater equipment, including a revolving staircase and a rain machine, were some of the most complex for their time. Earl Carroll died in 1948 in a plane crash, and later in the 1960s, the theater was revived as the "Hullabaloo", a popular Rock 'n' Roll venue (Catherine Barrier,

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The sign at 6260 Sunset Boulevard appears particularly significant, with its sign integrated into the design of the building. Constructed in 1938, likely designed by Rudolph Schindler, design of the sign appears heavily influenced by the Bauhaus School. Many types of signage utilized on buildings during the period of significance derive from signage practices conceived in the nineteenth century. The rise of urbanism and the competitive marketplace that emerged with the mass production of industrial goods prompted business owners to seek new ways to distinguish their businesses from those of others. Due to developments in transportation in the first decades of the twentieth century,...(continued on next page)

Property Type: Office Building  Applicable Criteria: C/3

Period of Significance: 1967

In 1967, a permit was issued to owner Home Savings & Loan of 1500 Vine St to construct a 2-story Home Savings & Loan office building at the same address. The architect/engineer was John A. Anderson. Total valuation of proposed work was $265,000 (LA Building Permit No. 46145).

The Home Savings and Loan building appears eligible for listing in the California Register for its distinctive design. Designed in a late International Style, the building was designed by Millard Sheets in partnership with architects Langdon and Wilson. The building integrates rich materials, such as travertine, banded black marble, and mosaic tile. Millard Sheets may best be known for his designs of over 40...(continued on next page)

*Required Information*
Previous surveys found this property would become eligible for individual listing in the National Register when integrity was restored. After a recent restoration to an earlier appearance beginning in 2004, the Henry Fonda/Music Box Theater appears eligible for listing in the National Register as an important part of Hollywood Theater district.

<td>(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.) Although new construction building permits were not found with this APN, the 1929 Los Angeles City Directory refers to the building located at 1655 N. Sycamore Ave as the &quot;Palacio Apartments.&quot; Mattie Moore is listed as the manager of the building. Another manager, Fred R Neubert (wife Caroline) is listed as the houseman. The earliest permits available for this APN are building alteration permits from 1941. These permits note that the building was being used as a 40-family, 80-room apartment building. This apartment building appears significant as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase...(continued on next page)</td>

(This space reserved for official comments.)
B10. Statement of Significance (continued): in population. Despite the pervasive American ideal of single family ownership evidenced at the turn of the twentieth century, there was, nonetheless, a growing trend in large cities across the nation towards people living together in collective dwelling arrangements. Initial, the communal living arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers. Typical of the building type, this building is five stories tall, constructed of brick and designed to fill as much of the lot as feasibly possible with configurations in the shape of an U.

This building also appears to be a particularly fine example of Italianate architectural style. Characteristic of the style, the building has a base-shaft-capitol composition. The terra-cotta clad shaft, which included the first two floors, is constructed to appear as dressed stone with an arched, inset, centrally located main entry surrounded by decorative, floral terra-cotta. Terra-cotta shields also appear in the spandrel panel between first and second floor windows, while terra-cotta vases are set within the segmental arch above second floor windows.

B9a. Architect: Burman & Rasmussen of Glendale

B9b. Builder: ______________

Period of Significance: 1961 Property Type: Church Applicable Criteria: C/3

(The Seventh-Day Adventist church, located at 1711 N Van Ness Ave in Hollywood, was formally opened July 7, 1962. The minister at this time was C. Lloyd Wyman. The church contained seats for 650 people and was built at a cost of $460,000. Architects Burman & Rasmussen of Glendale, are also responsible for the design of another Seventh-Day Adventist church in Glendale, located at 311 Vallejo Drive, built at a cost of $90,000. Both churches had their groundbreaking ceremonies the same day, May 28, 1961. Burman & Rasmussen are also responsible for the design of the Armenian Protestant church located at 3500 Cahuenga Pass (extant).

The church appears significant for its unique Modern...(continued on next page)

B11. Additional Resource Attributes: (List attributes and codes) HP16

*B12. References:

B13. Remarks:

*B14. Evaluator: Tanya Sorrell

*Date of Evaluation: 01/29/2009

(This space reserved for official comments.)
B10. Statement of Significance (continued): architectural design. Typical of the buildings of this period, the church is masonry construction, which allows for a main, orthogonal portion with a more expressive, circular portion within and atop. An interesting comparison can be made between this building and Le Corbusier's church Notre Dame du Haut in Ronchamp, France (1954). The principal guiding design feature in both buildings are techniques to control light in the interior, including small, pierced openings on the tower overhanging the Hollywood Freeway and larger windows along the Hollywood Boulevard elevation shaded by brise-soliel, or louvers.

B10. Significance: Area: Los Angeles  Theme: Annexation and Consolidation, 1895-1910

Context: Residential Development and Suburbanization, 1850-1912

Period of Significance: 1907  Property Type: Single Family Residence  Applicable Criteria: A/1

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property appears significant as an excellent example of an increasingly rare property type. Single family residences from the pre-annexation period of Hollywood appear particularly significant as an important pattern of development, illustrative of Hollywood’s early development as an independent city. Although residential development began a few years earlier, Hollywood became an independent city in 1903. By 1909, Hollywood experienced growth on an exponential scale, with a population increase of 700 in 1903 to 4,000 in 1909 and accompanying difficulties supplying services to residents. As a result of its growing pains, Hollywood became a district of Los Angeles in February of... (continued on next page)

**B8. Related Features:**

None

**B9a. Architect:** none listed on permit

**B9b. Builder:** Max Shur

**B10. Significance:** Area: Los Angeles Theme: Multifamily Development in Hollywood, 1911-1945

*Context:* Residential Development and Suburbanization, 1913-1945

**Period of Significance:** 1922

**Property Type:** Apartment

**Applicable Criteria:** A/1

In 1922, a permit was issued to owner Mr. Max Shur of Santa Monica and Western for erection of a 2-story, 16-room, 4-family flat located at 1259-t TAMARIND AVE. Total valuation of proposed work was $8,000. (LA Building Permit No. 27023).

This flat is significant as an increasingly rare example of a formerly ubiquitous property type in Hollywood that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Well into the 1920s, apartment buildings of any kind were typically viewed as an intrusion within areas previously established as neighborhoods comprised of single family residences. Perhaps because of the resistance towards apartment...continued on next page

**DPR 523B (1/95)**

*Required Information*

This property, constructed the year Hollywood was annexed to Los Angeles, is designed in a Craftsman style, the most popular style of this period, and exhibits most character-defining features including a low pitched roof with exposed rafters and decorative fascia, broad front porch, wood clapboard siding and wood casement windows, some with a diamond pattern. Building permits were not available for the property.

Theme: Annexation and Consolidation, 1895-1910  

**Period of Significance:** 1909  

**Property Type:** Single Family Residence  

**Applicable Criteria:** A/1  

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)  

This property appears significant as an excellent example of an increasingly rare property type. Single family residences from the pre-annexation period of Hollywood appear particularly significant as an important pattern of development, illustrative of Hollywood’s early development as an independent city. Although residential development began a few years earlier, Hollywood became an independent city in 1903. By 1909, Hollywood experienced growth on an exponential scale, with a population increase of 700 in 1903 to 4,000 in 1909 and accompanying difficulties supplying services to residents. As a result of its growing pains, Hollywood became a district of Los Angeles in February of... (continued on next page)

Context: Architecture, Engineering and Designed Landscapes, 1913-1945 Theme: The Architecture of Fantasy--Period Revival Styles, 1910-1940

Period of Significance: 1913  Property Type: Single Family Residence  Applicable Criteria: C/3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property appears significant as an important example of the Craftsman style. Popular from the early 1900s through the 1920s, the Craftsman style utilizes design elements of the Arts and Crafts style and represented a conscious search for the supposed simplicity of pre-Industrial times. The bungalow's simplicity of form, informal character, direct response to site, and extensive use of natural materials, was a regional interpretation of the socio-economic and aesthetic reforms espoused by the Arts and Crafts Movement's founder, William Morris. Although modest in size, this property demonstrates most character-defining features, including most significantly, a low-pitched roof with... (continued on next page)

B4. Present Use: food market

B5. Architectural Style: International

B6. Construction History: Year constructed: 1962

B7. Moved? No

B8. Related Features: None

B9a. Architect: Maxwell Starkman

B10. Significance: Area: Los Angeles

Theme: Mid-Century Modern, 1946-1964

Context: LA Modernism, 1946-1964

Period of Significance: 1962

Property Type: Commercial

Applicable Criteria: C/3

A permit was issued in April of 1962 for erection of a market-retail sales building located at 1341 Vine Street for owners Mr. and Mrs. I. Mills of 1800 N. Argyle Avenue. The total valuation of the project is listed as $300,000. The architect is Maxwell Starkman and the licensed engineer is Eugene Birnbaum. The original building permit contains an attached site plan which labels the proposed building as "Food Giant Market," indicating that Food Giant Market was the first store to occupy the building. The contractor is "unassigned." A 1962 Los Angeles Times article reported on the opening of Food Giant Market.

This building appears significant for its exemplary architecture in a...(continued on next page)

B13. Remarks:

B14. Evaluator: Jenna Snow

Date of Evaluation: 01/15/2009
B10. Statement of Significance (continued): Mid-Century Modern style and for its association with important local architect Maxwell Starkman. What is now known as Mid-Century Modern architecture was a continuation of Modern movements that came earlier and much is an amalgamation of architectural expressions from an earlier period, including the International and Bauhaus styles. The most notable architects combined new architectural solutions to integrate traditional precedents into a style that moved the entire field of architecture, and sometimes public consciousness, in a new direction. Modernism became the pre-eminent design solution from about 1932 to about 1984 for commercial buildings. While they were largely unsuccessful in convincing developers to adopt the modern style for residential buildings, Modern architects found commercial clients who were willing to adopt a modern style to distinguish their buildings. This building embodies International Style tenants with a large glass facade set back from columns which support the roof structure. Two pods clad in glazed tile are located on either side of the facade.

Period of Significance: 1968  Property Type: Office Building  Applicable Criteria: C/3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

In 1968, a permit was issued to owner Stanley Folb of 6565 Sunset Blvd for erection of an 11-story office building and parking garage located at 6464 W SUNSET BLVD. Total valuation of proposed work was $2,700,000. Early tenants of the building included Motown Record Corp/Motown Productions Inc. and Columbia Artists Management, Inc. The majority of building tenants in 1973 were music recording companies. Remaining tenants worked other areas of the entertainment industry (film, media consulting, etc.) and a small portion of tenants were non-industry professionals, such as doctors. Orange Julius of America leased 10,500 square feet of office space in the building for its new national...(continued on next page)

*Date of Evaluation: 01/15/2009

(This space reserved for official comments.)

This building appears significant for its exceptional architectural design in a Late Modern style. With its base constructed on piloti and split concrete panels and a curtain glass wall shaft slightly separated from the base, this building thoroughly incorporates tenants of the Corporate International Style. The style is derived from the rectilinear designs of Ludwig Mies van der Rohe, one of the three leading architects of the International Style in the 1930s. Mies’s post-WWII designs in America moved toward using more unified, modular patterns that emphasized the separation of the walls from the overall structure. Corporate International buildings are characterized by the use of exposed steel piers and I-beams on a rectilinear form, a curtain wall composed of horizontal bands of windows that are often interspersed with horizontal bands of an alternate material such as brick or tile.

Although the building housed a variety of tenants, including a proliferation of tenants associated with the recording industry in the 1970s, this connection appears tenuous to convey significance to the property.

Local architect Abraham Shapiro designed several other buildings throughout Los Angeles, including 8383 Wilshire Boulevard (1970) and Yavneh Hebrew Academy at Beverly Boulevard and Fuller Street (1964, no longer extant), this appears to be his best work.

B10. Significance: Area: Los Angeles Theme: Annexation and Consolidation, 1895-1910
   Context: Residential Development and Suburbanization, 1850-1912
   Property Type: Single Family Residence
   Applicable Criteria: Any
   Period of Significance: 1903
   (Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)
   This property appears significant as an excellent example of an increasingly rare property type. Single family residences from the pre-annexation period of Hollywood appear particularly significant as an important pattern of development, illustrative of Hollywood’s early development as an independent city. Although residential development began a few years earlier, Hollywood became an independent city in 1903. By 1909, Hollywood experienced growth on an exponential scale, with a population increase of 700 in 1903 to 4,000 in 1909 and accompanying difficulties supplying services to residents. As a result of its growing pains, Hollywood became a district of Los Angeles in February of... (continued on next page)
