

2. COASTAL RESOURCES & HAZARDS

- Sea Level Rise/Climate Change
- Shoreline Erosion and Protective Devices
- Marine Environment
- Water Quality Protection
- Environmentally Sensitive Habitat Areas

TOPIC 2: COASTAL RESOURCES AND HAZARDS

TABLE 2 PAD 1

developments on former coastal oil fields
situate buildings on methane "deposits" without
environmental study (like what has occurred in
Playa Vista

- I fully agree with the above comment

- Sand sources for beach nourishment
to mitigate erosion due to climate change

CONSIDER BEACH GRASS PLANTINGS, PER-
MANENT SAND FENCING, STUDY LOSS OF
BEACH DUE TO WIND AS WELL AS RISING
WATER.

SEVERAL DIFF KINDS OF GRASS W/BE
APPROPRIATE USE IN NORTHERN
CAL.

- NEED BETTER TRASH PICKUP AT SHORELINE AND
MORE TRASH AND RECYCLING BINS PROVIDE
PLASTIC BAGS FOR PEOPLE TO USE TO PICK UP ALONG
WATERLINE.

"Consider beach grass*
plantings, permanent
sand fencing, study loss
of beach due to wind as
well as rising water.

*Several different kinds of
beach grass will be
appropriate and are used
in northern California."

"Need better trash pickup
at shoreline and more
trash and recycling bins.
Provide plastic bags for
people to use to pick up."

TOPIC 2: COASTAL RESOURCES AND HAZARDS

Keep Venice Beach CLEAN,
TOO MANY TOURISTS complaining
Venice is DIRTY.

We will lose TURISM
DOLLARS!!!

get Rid of This
SANCTUARY CITY!!!

we will end up Paying
AT THE END.

I pay TOO MANY PROP.
TAX DOLLARS.

TOPIC 2: COASTAL RESOURCES AND HAZARDS

"Trash cans on..."

TRASH CANS ON

HIGH TRAVELLED
STREETS - WINDWARD,
RIVERA, MARKET, ABOUT KINNEY,
MONITOR - FIVE TICKETS TO
~~THE~~ PED. WHO LITTER.

MORE COPS ON WEEKENDS
PATROLING NEIGHBORHOOD.

- NEED MORE TRASH/SERVICES ON PUBLIC
STREETS AND BEACHES. MORE FREQUENT
CLEANUP!

TOPIC 2: COASTAL RESOURCES AND HAZARDS

Venice brings as many people
to So Cal as Disneyland.
I would like to see a RETURN
that is proportionate to our tourism
numbers.

These funds could rebuild our
infrastructure — save us.

**BREAK-UP THE COASTAL
COMMISSION INTO THREE (3)
REGIONAL AGENCIES. THIS WOULD
GUARANTEE EFFECTIVE HOME RULE
AND REPRESENTATION FOR
VENICE!**

TOPIC 2: COASTAL RESOURCES AND HAZARDS

We need to keep the curfew in place! Without it
criminal activity goes unchecked!

Commissioners & Decision Makers should care
about Community (that they are ruining).

Cannot put price tag on open space.

Greed is killing limited resources of open land
wildlife & vegetation (natural - not contrived
in the guise of "drought tolerant" which is used to
grant their permission to destroy existing vegetation
- which is obviously also drought tolerant if alive still
after our years of drought!)

PLEASE SAVE & SPARE MDR!
*

TABLE 2 PAD 2

Affordable housing! Where has it gone?
Is there any consideration given to housing for
working people, not in billionaire's income level? It
once existed in Venice + needs to be re-instated.

With the \$\$\$'s generated by Venice to City
of LA - seems more \$\$\$'s could be used to
expand bike + walking + strolling paths
benches for ocean wave watching.

- Need more frequent cleaning of gutters and
streets to keep trash from accumulating and
flushing to ocean. More trash cans.

OFW NEEDS TO BECOME A PUBLIC/
PRIVATE PARTNERSHIP LIKE THE
SANTA MONICA PIER!

TOPIC 2: COASTAL RESOURCES AND HAZARDS

WE NEED PUBLIC TRASH CANS
ALONG MAIN STREET, PACIFIC, AK,
ROSE, AND LINCOLN AT MOST MAJOR
INTERSECTIONS.

- The Ballona wetlands help with coastal flooding & erosion
- Environment sensitive habitats should be reserved even if it is county-city - city & county should liaise within a 1 mile radius of each other - it affects us all
- The ripping up of native species that has adapted to the area means that we are killing wildlife. This needs to be a gradual work plan

Environment(ally) sensitive habitats should be reserved even if it is county-city -& county should liaise within a 1 mile radius of each other- it affects(ing) us all. The ripping up of native species that has adapted to the area means that we are killing wildlife. This needs to be a gradual work plan.

TOPIC 2: COASTAL RESOURCES AND HAZARDS

~~THE~~ OUR MARINE LIFE IS SUFFERING +
Disappearing. I have over 50 years memory of City SM Bay
PLEASE DO ALL YOU CAN TO HELP
THE ENVIRONMENT - MARINE, BIRDS, HABITAT

"All our marine life is suffering +
disappearing. I have over 50 years memory of the SM Bay.
Please do all you can to help
the environment- Marine, Birds, Habitat"

TABLE 2 PAD 3

Walking down the Boardwalk looking at all the vt
and the sea at the same time is a memory everyone
deserves and should stay that way. However the winds
do seem to have gotten stronger and sand/shoreline erosion is
a concern. Keep the beach the same. Beltran

- TRASH CANS ON HIGH
PED TRAFFIC STREETS,
i.e., WINDWARD, MARKET,
AK, ETC.
