Introduction

The Hollywood Community Plan sets a direction for the future of Hollywood. A wide range of planning topics— including land use and housing, parks and open space, urban design, mobility, arts and culture, and history— are addressed in the Plan, encompassing the full spectrum of issues related to the physical development of the community. The Hollywood Community Plan serves several important purposes:

- To outline a vision for Hollywood's long-term physical and economic development and community enhancement;
- To provide strategies and specific implementing actions that will allow this vision to be accomplished;
- To establish a basis for judging whether specific development proposals and public projects are in harmony with Plan policies and standards;
- To direct City departments, other public agencies, and private developers to design projects that enhance the character of the community, taking advantage of its setting and amenities; and
- To provide the basis for establishing and setting priorities for detailed plans and implementing programs, such as the Zoning Ordinance, design overlays, development standards, the Capital Improvements Program, facilities plans, and area plans.

The Community Plan's importance lies in its ability to shape positive community change, fostering sustainable land use patterns while balancing the unique character of the community with citywide policies and regional initiatives. The process of developing the Hollywood Community Plan was a multi-year collaborative effort in which broad public participation was obtained through a series of meetings and workshops where stakeholders provided input and recommendations.

Plan Organization

The Hollywood Community Plan is organized into seven chapters. Each chapter is further organized into sections that address specific topics described below, and includes an approach section at the beginning that describes its contents and relationship to the Plan. An overview of each of the chapters is provided below.

Chapter 1: Introduction. Chapter 1 describes how to use the Community Plan by providing a reader's guide for understanding the Community Plan and describing its relationship to the City's General Plan as well as plans developed by other City agencies.

Chapter 2: Community Profile. Chapter 2 provides a detailed description of the historical development of Hollywood by describing Hollywood’s relationship to adjoining communities, its environmental setting, its existing land uses as well as identifying population, employment, housing trends and projections.

Chapter 3: Land Use & Urban Form. Chapter 3 specifies overarching goals, and policies that support citywide goals and policies while addressing issues unique to the Community Plan. This chapter describes the community’s land uses, and specifies goals and policies that address residential, commercial, and industrial development.

Chapter 4: Public Realm and Open Space. Chapter 4 defines goals and policies for the community’s public realm and open space, which includes public and public-facing private spaces, such as streetscapes, sidewalks, walkability, public gathering places like plazas and parklets, alleys, urban green spaces, as well as other transitional spaces and community entry points.

Chapter 5: Preservation. Chapter 5 expresses the community’s vision for historical preservation and the conservation of neighborhood character. It outlines the various histories of Hollywood’s historic cultural resources and districts as well as goals and policies to protect, preserve, and incentivize preservation.

Chapter 6: Mobility and Connectivity. Chapter 6 defines goals and policies for the community’s circulation system, focusing on enhancing mobility and access for all users. Different modes of transportation are discussed, including a discussion of their relation to and interaction with one another.

Chapter 7: Implementation Programs. Chapter 7 describes how the Community Plan will be implemented. This chapter describes the implementation programs and identifies the responsible implementing City department or agency.

How to Use the Plan

The Hollywood Community Plan is intended for use by all members of the community, including residents, Neighborhood Councils, business owners, developers, and public officials. The Community Plan is organized to allow the user to easily find information most relevant to their interest, without perusing the entire document. However, it is important to note that the Community Plan's policies, guidelines, and implementation programs were not created in isolation, but rather developed collectively to address community issues in a comprehensive manner.

For residents and Neighborhood Councils, the Community Plan identifies the type and scale of land uses permitted, describes changes that may affect neighborhoods, and explains the policies, and implementation programs that guide decisions about future development.

For businesses, the Community Plan identifies land use measures that support business and encourage future success by providing policies and programs to guide adoption of clear and predictable standards that support and enhance commercial and industrial development. The Community Plan also discusses land use strategies to attract new investment in commercial centers and along boulevards.

For developers, the Community Plan introduces the community, provides background information, and again establishes policies and programs to guide adoption of clear and predictable development standards. Developers should review all maps, policies and programs throughout this document to better understand where and what type of development may occur.

For public officials, the Community Plan is a part of the General Plan, which is the basis for land use decisions and findings by the City Planning Commission, other boards and commissions, and the City Council.

For public agencies, the Community Plan is intended to help agencies contemplate future actions in the City, such as transportation infrastructure improvements, parks, and schools. The policies located throughout the Community Plan are inter-related and should be examined comprehensively when making planning decisions.

Melrose Avenue features a pedestrian scale commercial corridor that includes fashion, art galleries, and a variety of cultural venues and small businesses

The Los Angeles River's soft bottom fosters vegetation and habitat for animals

The Hollywood and Highland development incorporates open space, creating direct access to Hollywood Boulevard

Reader's Guide

The Community Plan is a document that represents the land use vision and values for a distinct geography. A main function of the Community Plan is to guide decision-making with respect to land uses. This includes guidance for legislative decisions, such as adoption of overlay zones or supplemental development regulations, as well as amendments to the land use or zoning maps. The goals and policies, together with the General Plan Land Use map are intended to guide decision-making.

Community Plan goals and policies are intended to be supportive of one another. However, it is important to recognize that goals and policies are sometimes in competition and may entail trade-offs. The singular pursuit of one goal or policy may, in some cases, inhibit the achievement of other goals or policies. For example, the Community Plan includes policies that recognize the need to minimize water consumption in light of limited water resources. However, to eliminate the watering of sites being graded for permitted development or to eliminate landscape irrigation may conflict with objectives relating to maintenance of air quality or community design and beautification. Thus, when implementing the Community Plan, decision-makers must strike a balance between competing goals and policies, recognizing that all objectives cannot be fully implemented all the time. In relation to any decision, some goals and policies may be more compelling than others. It is up to the decision-makers to balance and weigh the applicability and merits of the goals and policies on any given project, program, or action.

Ultimately, the Community Plan's goals, policies, programs, and guidelines are intended to provide guidance, and shall be interpreted as directory, unless expressly indicated as mandatory by an asterisk (*). Compliance with the land use General Plan Land Use Map is mandatory.

Goals

A goal is a statement that describes a desired future condition or “end” state. Goals are change and outcome oriented, achievable over time, though not driven by funding. Each goal in the Community Plan begins with an abbreviated chapter title followed by the number of the goal (e.g. LU.1).

Policies

A policy is a clear statement that guides a specific course of action for decision makers to achieve a desired goal. Policies may refer to existing programs or call for the establishment of new ones. Each policy in the Plan is labeled with the abbreviated chapter title, the goal they refer to, and a unique number (e.g., LU.1.1). Policies with corresponding program(s) are followed by an implementation program number (e.g., P1).

Programs

An implementation program is an action, procedure, program or technique that carries out goals and policies. Implementation programs are comprehensive in nature, encompassing amendments of existing and preparation of new plans, ordinances, and development and design standards; modification of City procedures and development review and approval processes; and interagency coordination. Completion of a recommended implementation program will depend on a number of factors such as citizen priorities, finances, and staff availability. These recommendations are suggestions to future City decision-makers as ways to implement the goals and policies contained in this Community Plan. The listing of recommended implementation programs in the Community Plan does not obligate the City to accomplish them. Chapter 7 contains a list of all the Community Plan’s implementation programs. They are grouped by general topic and individually numbered (e.g., P1).

Relationship to the General Plan

California state law requires that cities prepare and adopt a comprehensive, integrated, long-term General Plan to direct future growth and development. The General Plan is the fundamental policy document of a city. It defines how a city's physical and economic resources are to be managed and utilized over time. Decisions by a city with regard to the use of its land, design and character of buildings and open spaces, conservation of existing and provision of new housing, provision of supporting infrastructure and public and human services, and protection of residents from natural and human-caused hazards are guided by and must be consistent with the General Plan.

State law requires that the General Plan contain eight elements: land use, transportation, housing, conservation, open space, noise, safety, and environmental justice. Cities may also choose to incorporate additional elements to more directly address other locally significant issues. There must be internal consistency among the elements. In Los Angeles, thirty-five Community Plans (refer to Figure 1-2, City of Los Angeles Community Plan Areas), including the Hollywood Community Plan (Figure 1-1), comprise the City's land use element. The City has adopted the "Framework Element," which can be considered the organizing Element. Its policies address and connect all the Elements of the General Plan, and is discussed below.

Citywide General Plan Framework Element

The City’s General Plan Framework Element is the citywide plan that established the guide for how Los Angeles will grow in the future. Adopted in 1996, the Framework Element is a strategy for long-range growth and development, setting a citywide context for the update of Community Plans and citywide elements. The Framework Element responds to State and Federal mandates to plan for the future by providing goals, policies, and objectives on a variety of topics, such as land use, housing, urban form, open space, transportation, infrastructure, and public services. The Framework Element’s key guiding principles, summarized below, are advanced at the community-level through the Community Plans.

Our City’s commercial areas serve a variety of roles and functions, from small neighborhood gathering places with local cafes and shops to major job centers and entertainment hubs. Although these areas are typically designated for commercial use, they contain residential and mixed use buildings as well. Commercial areas are grouped into the four general categories: Regional Center, Commercial Center, Neighborhood District and Mixed-Use Boulevard.

Figure 1-2
City of Los Angeles
Community Plan Areas
Hollywood Community Plan Area

This is an informational map provided for reference purposes only. It is not adopted as a part of the Community Plan

City of Los Angeles Planning Department • February 2021

Map is not to scale

Framework Element Guiding Principles

Grow strategically. Should the City's population continue to grow, as is forecasted by the Southern California Association of Governments (SCAG), growth should be focused in a number of higher-intensity commercial and mixed-use districts, centers, and boulevards, particularly in proximity to transportation corridors and transit stations. This type of smart, focused growth links development with available infrastructure and encourages more walkable, transit-friendly neighborhoods, helping to ease our reliance on the automobile, and minimize the need for new, costly infrastructure.

Conserve existing residential neighborhoods. By focusing much of the City's growth in centers and along commercial corridors, the City can better protect the existing scale and character of nearby single- and multi-family neighborhoods. The elements that contribute to the unique character of different residential neighborhoods should be identified and preserved whenever possible.

Balance the distribution of land uses. Maintaining a variety of land uses is crucial to the long-term sustainability of the City. Commercial and industrial uses contribute to a diverse local economy, while residential uses provide necessary housing for the community. Integrating these uses within smaller geographical areas can better allow for a diversity of housing types, jobs, services, and amenities.

Framework Element Hierarchy

Neighborhood District. A Neighborhood District is a focal point for surrounding residential neighborhoods and contains a diversity of land uses that serve the daily needs of these residents and employees. Local businesses and services often include restaurants, retail outlets, grocery stores, child care facilities, small professional offices, community meeting rooms, pharmacies, religious facilities and other similar services. The clustering of these types of uses and the frequency of their location near neighborhoods are intended to encourage walking and bicycling to and from adjacent neighborhoods, minimizing the need for automobile trip-making. Neighborhood Districts are often characterized by smaller-scaled development and a pedestrian oriented character. They may also be nodes of higher density along Mixed-Use Boulevards (described below).

Community Center. Community Centers differ from Neighborhood Districts in their size and intensity of business and social activity. While they typically include the types of businesses and services found in Neighborhood Districts, they also contain uses that serve the larger community, such as hotels or motels, small offices, cultural and entertainment facilities, and schools and libraries. Generally, Community Centers are medium-scaled, although this varies depending on the character of the surrounding area. Community Centers are often served by small shuttles, local and rapid buses, or rail.

Regional Center. A Regional Center is a hub of regional commerce and activity and contains a diversity of uses such as corporate and professional offices, residential buildings, retail commercial malls, government buildings, major health facilities, major entertainment and cultural facilities, and supporting services. Regional Centers cater to many neighborhoods and communities and serve a much larger population than either Community Centers or Neighborhood Districts. They are generally high-density places whose physical form is substantially differentiated from the lower-density neighborhoods of the City. They typically provide a significant number of jobs, but are also non-work destinations as well. As a result of their densities and functions, Regional Centers are usually located near major transportation hubs or along major transportation corridors.

Mixed-Use Boulevard. Mixed-Use Boulevards serve as “connecting spaces,” linking Neighborhood Districts, Community Centers, and Regional Centers with one another. The scale, density, and height of development along designated Mixed-Use Boulevards vary throughout the City, but are intended to be compatible with adjacent residential neighborhoods. The term “mixed-use” connotes a variety of uses occurring within the boulevard, but also the potential for mixing uses within individual structures, such as commercial on the ground floor and residential above. Mixed-Use Boulevards should provide community and neighborhood commercial uses, public services, cultural facilities, school classrooms, and similar facilities to residents and employees within walking distance of surrounding residential neighborhoods and accessible from the boulevard’s public transit.

Enhance neighborhood character through better development standards. Better development standards are needed to both improve the maintenance and enhancement of existing neighborhood character, and ensure high quality design in new development. These standards are needed for all types of development; residential, commercial, and industrial uses.

Create more small parks, pedestrian districts, and public plazas. While regional parks and green networks are an important component of the City's open space strategy, more small-scale, urban open spaces must be developed as well, as they are crucial to the quality of life of the City's residents. There are many opportunities at the community level to create public "pocket" parks as part of new developments, to enhance pedestrian orientation in key commercial areas, and to build well-designed public plazas.

Improve mobility and access. The City's transportation network should provide adequate accessibility to jobs, services, amenities, open space, and entertainment, and maintain acceptable levels of mobility for all those who live, work, travel, or move goods in Los Angeles. Attainment of this goal necessitates a comprehensive program of physical infrastructure improvements, traffic systems management techniques, and land use and behavioral changes that reduce vehicle trips. An emphasis should be placed on providing for and supporting a variety of travel modes and users of all ages and abilities, including walking, bicycling, public transit, and driving.

Identify a hierarchy of commercial districts and centers. The Framework Element provides an overall structure and hierarchy for the City's commercial areas. This hierarchy, which includes Neighborhood Districts, Community Centers, Regional Centers, and Mixed-Use Boulevards, has helped shape the development and urban form of the City and will continue to do so in the future. Understanding this hierarchy helps us better understand the roles that these different types of "activity centers" play within our communities so that their unique characteristics can be enhanced.

Relationship to Mobility Plan 2035

In 2008, the California State Legislature adopted AB 1358, The Complete Streets Act, which requires local jurisdictions to "plan for a balanced, multimodal transportation network that meets the needs of all users of streets, roads, and highways, defined to include motorists, pedestrians, bicyclists, children, persons with disabilities, seniors, movers of commercial goods, and users of public transportation, in a manner that is suitable to the rural, suburban or urban context."

Mobility Plan 2035 provides the citywide policy foundation for achieving a transportation system that balances the needs of all road users. As a 2015 update to the City's General Plan Circulation Element, Mobility Plan 2035 incorporates "complete streets" principles and lays the policy foundation for how future generations of Angelenos interact with their streets.

The City's transportation system will continue to evolve to fit the context of the time and situation. Today, we are faced with environmental constraints, public health issues, regional inequity, and some of the longest, traffic delays in the nation. The way Mobility Plan 2035 addresses these issues through policy initiatives today will set the stage for the way we move in the future.

Mobility Plan 2035 includes goals that are equal in weight and define the City's high-level mobility priorities. Each of the goals contains objectives (targets used to help measure the progress of the Mobility Plan 2035) and policies (broad strategies that guide the City's achievement of the Plan's five goals):

- Safety First
- World Class Infrastructure
- Access for All Angelenos
- Collaboration, Communication and Informed Choices
- Clean Environments & Healthy Communities

These goals represent a confluence of transportation and public health policy that can create opportunities to address the historic inequities in the City that have starkly limited quality of life in low-income communities. By placing a citywide emphasis on safety, access, and health, the City can begin to equalize the playing field and first address socioeconomically disadvantaged areas with the highest need to connect people to more prospects of success through mobility.

While the Mobility Plan 2035 provides a citywide approach to enhancing safe, accessible transportation options, the Hollywood Community Plan provides the opportunity for a more focused and nuanced transportation discussion at a community level. Localized recommendations that complement the citywide policies and address community-specific transportation conditions are described in Chapter 6 of the Hollywood Community Plan.

Vision Zero intersection treatments create safer crossings for pedestrians

New street configurations provide better connectivity for multi-modal trips

Buses, shared mobility, and trains all work together to connect Hollywood to the rest of Los Angeles

Relationship to Other Agency Plans

There are a variety of non-City agencies and organizations that function within the Hollywood Community Plan Area. In varying degrees, these agencies through research and advocacy, guide and influence planning decisions across a wide spectrum of interests affecting land use within the Community Plan Area. In each case, the community plans and use of land by other agencies must be consistent with the Community Plan in which they are located.

This required consistency holds true for capital improvement programs, development entitlements, and other actions pertaining to the City’s physical development. Relevant plans in the Hollywood Community Plan include Redevelopment Project Areas and State Enterprise Zones.

Los Angeles County Metropolitan Transportation Authority (Metro). The Los Angeles County Metropolitan Transportation Authority is the state chartered regional transportation planning and public transportation operating agency for the County of Los Angeles. The agency develops and oversees transportation plans, policies, funding programs, and both short-term and long-range solutions that address the County’s increasing mobility, accessibility and environmental needs. Metro operates the five Metro transit stations in the Hollywood Community Plan Area (refer to Figure 1-3, Other Relevant Agency Planning Areas).

The Hollywood Redevelopment Project. The 1,107-acre Hollywood Redevelopment Project, established by the Hollywood Redevelopment Plan (Redevelopment Plan), is located approximately six miles northwest of the Los Angeles Civic Center at the foot of the Hollywood Hills. The Project Area is generally bounded by Franklin Avenue on the north, Serrano Avenue on the east, Santa Monica Boulevard and Fountain Avenue on the south, and La Brea Avenue on the west (refer to Figure 1-3, Other Relevant Agency Planning Areas). The Redevelopment Plan was historically implemented by the Community Redevelopment Agency of the City of Los Angeles (Agency). In 2012, the Dissolution Act (Assembly Bill x1 26) dissolved the Agency, along with all other redevelopment agencies in the State, and the CRA/LA, a Designated Local Authority (DLA), became the successor to the Agency. The DLA’s role under the Dissolution Act is to wind down the enforceable financial obligations of the Agency. The DLA also assumed responsibility for administering the still active Redevelopment Plan, including those provisions related to the use and development of land in the Project Area. In November 2019, at the request of the City Council under a provision in State law, all “land use related plans and functions” of the Hollywood Redevelopment Plan transferred to the City of Los Angeles.

Hollywood Redevelopment Plan, first amended on May 20, 2003.

The Hollywood Redevelopment Plan, as first amended on May 20, 2003, (First Amended Redevelopment Plan), which expires by its terms on May 7, 2028, includes substantial provisions regulating the use and development of land in the

Project Area. Pursuant to the First Amended Redevelopment Plan, the purpose of those regulations was to encourage economic development, promote and retain the entertainment industry, revitalize the historic core, preserve and expand housing for all income groups, meet the social needs of area residents, provide urban design guidelines and preserve historically significant structures. Section 502 of the First Amended Redevelopment Plan, provided that upon update of the Hollywood Community Plan or its implementing zoning ordinances, with regard to land use in the Project Area, the First Amended Redevelopment Plan was to be automatically modified without a formal amendment process to ensure the First Amended Redevelopment Plan conforms to the Community Plan or its implementing zoning ordinances.

The Hollywood Community Plan, comprehensively updated on _____, with its implementing zoning ordinances, includes contemporary land use and zoning strategies to address economic development, promote and retain the entertainment industry, revitalize the historic core, preserve and expand housing for all income groups, meet the social needs of area residents, provide urban design guidelines and preserve historically significant structures. The Hollywood Community Plan, with its implementing ordinances, provides a complete vision and regulatory scheme for the land uses in the Project Area. The provisions in the First Amended Redevelopment Plan intended to regulate, control, or shape the use and development of land in the Project Area, including without limitation Sections 400 through 412, 500 through 521, and 700, are in conflict with the Hollywood Community Plan and its implementing ordinances because they: (1) prohibit what is allowed under the Hollywood Community Plan and its implementing ordinances; or (2) allow what is prohibited under the Hollywood Community Plan or its implementing zoning ordinances; or (3) add undesirable additional regulations, processes, costs, and burdens on the City, property owners, and developers that impede or prevent beneficial and urgently needed housing and other desirable uses in the Project Area. As such, any provision in the First Amended Redevelopment Plan that purports to regulate, control, or shape the development of land in the Project Area, including but not limited to those provisions in Sections 400 through 412, 500 through 521, and 700, is in conflict with, and does not conform to, the allowed land uses in the Hollywood Community Plan.

Second Amended Hollywood Redevelopment Plan.

On _____, the City adopted an amendment to the First Amended Redevelopment Plan, (Second Amended Hollywood Redevelopment Plan), to delete all land use related plans and functions of the Redevelopment Plan. The purpose of the Second Amended Hollywood Redevelopment Plan is to ensure that from the effective date of the amendment, the Hollywood Redevelopment Plan shall not regulate or have any further force and effect over: (i) the use and development of land in the City, (ii) obligations of the City to prepare or make any report, survey, study or undertake any other planning effort, and (iii) any other land use related plan or function in the City.

Figure 1-3
Other Relevant Agency Planning Areas
Hollywood Community Plan Area

Los Angeles Community College District (LACCD). The Los Angeles Community College District (LACCD) consists of nine colleges, including Los Angeles City College (LACC), which is located within the Hollywood CPA.

Los Angeles Unified School District (LAUSD). The Los Angeles Unified School District (LAUSD) currently operates several K-12 schools in the Hollywood CPA. In addition, LAUSD operates early childhood education centers, adult schools, and a continuation program within the CPA.

Santa Monica Mountains Conservancy (SMMC). The Santa Monica Mountains Conservancy (SMMC) was established by the California State Legislature in 1980 to help create and preserve parkland in both wilderness and urban settings. The SMMC Zone covers an area from the edge of the Mojave Desert to the Pacific Ocean, including the Santa Monica Mountains and the Rim of the Valley Trail Corridor which are in the northern portions of Hollywood.

Promise Zone. Established in 2014, the LA Promise Zone targets resources to help create jobs, boost public safety, improve public education and stimulate better housing opportunities for our residents and neighborhoods. The Promise Zone serves six culturally diverse neighborhoods in Los Angeles, including East Hollywood (refer to Figure 1-3, Other Relevant Agency Planning Areas).

Vine Street Elementary School is just one of many schools serving Hollywood students

The W Hotel is located in the Regional Center and the Hollywood Signage Supplemental Use District

Relationship to Specific Plans and Overlay Zones

There are several specific plans, supplemental use districts and overlay zones that apply to the Plan area. These planning tools customize the regulations of the Los Angeles Municipal Code to plan the land use of specific geographic areas. The Hollywood CPA contains four specific plans, two supplemental use districts, and multiple overlay zones.

The Vermont Western Station Neighborhood Area Plan (SNAP). The Vermont Western Station Neighborhood Area Plan (SNAP) is a specific plan created to encourage transit-oriented development around the Metro Red Line in East Hollywood. It features different planning rules for six different subareas. SNAP regulations for residential areas (Subarea A) are intended to conserve the scale of existing neighborhoods. In community centers (Subarea C) located around Metro Red Line stations, the SNAP provides floor area incentives for commercial, hospital and medical uses. Commercial corridors connecting the community centers are designated as mixed-use boulevards (Subarea B).

Hollywoodland and Mulholland Scenic Parkway Specific Plans. The Hollywoodland and Mulholland Scenic Parkway Specific Plans were enacted to protect the scenic features and residential character of several hillside communities (Figure 1-4). The Hollywoodland Specific Plan also protects the unique architectural styles of this neighborhood – traditional cottages and villas which create a European village flavor.

Paramount Pictures Specific Plan. The Paramount Pictures Specific Plan was created to guide the modernization and future development of the Paramount Pictures property (Figure 1-4). The Specific Plan will allow for the continued development of the site as a major studio/entertainment institution and establishes permitted uses, quantifies net new floor area for stage, production office, office, retail and support uses, sets height restrictions, and has historic preservation regulations.

Signage Supplemental Use Districts. The Hollywood Signage Supplemental Use District (Figure 1-4) was established to promote signage which complements the historic architecture and signage of Hollywood Boulevard and allows new sign technologies which are well designed and carefully located. The Sunset Bronson Studios Supplemental Use District (Figure 1-4) was established to permit a comprehensive and unified signage theme to promote creative content produced or edited on the Sunset Bronson Studios campus, a multi-tenant, mixed-use, creative office campus with on-site motion picture, news station and television production facilities.

Mixed-use in the Vermont-Western Station Neighborhood Area Plan (SNAP)

Figure 1-4
Overlay Zones, Specific Plans, & Supplemental Use Districts
Hollywood Community Plan Area

Historic Preservation Overlay Zones. There are six Historic Preservation Overlay Zones (Figure 1-4) in the Hollywood CPA: Sunset Square, Spaulding Square, Whitley Heights, Melrose Hill, Hollywood Grove and a portion of Hancock Park. The regulations of historic preservation overlay zones ensure that the rehabilitation of historic houses is performed in a manner which respects the historic integrity of the structures and the neighborhood. New development is also reviewed to assure that the character of the historic neighborhood is maintained.

Los Angeles River Implementation Overlay (RIO). The Los Angeles RIO (Figure 1-4) established design standards that address watershed, urban design, and mobility in order to enhance the special qualities of river adjacent communities. The RIO enables the City to better coordinate land use development all along the 32-mile corridor of the Los Angeles River that flows within the City's boundaries, which includes the northern portion of the Hollywood CPA, as well properties near the LA River.

Hillside Construction Regulation Supplemental Use District (HCR). The Hillside Construction Regulation Supplemental Use District was established to provide extra protections from construction-related impacts of single-family residential development in the hillside areas. The Hollywood neighborhoods in the HCR District are Bel Air-Beverly Crest and Birds Streets and Laurel Canyon (Figure 1-4). The HCR addresses grading limits, hauling truck operations standards, and operating hours and construction activity. If applicable, site plan review is required.

Community Background

The last update of the Hollywood Community Plan was in 1988. Since that time, significant changes have occurred, new issues have emerged and new community objectives, aiming to balance new development with community preservation, have evolved. It is necessary to update the Community Plan to reflect current conditions and at the same time plan for future changes. Many changes occurring in Hollywood are caused by larger forces beyond the community's direct control, such as demographic trends, advances in technology, climate change, economic conditions, and rising energy costs. Planning for upcoming changes is the most effective and beneficial way for the community to accommodate evolving needs.

Located five miles west of downtown Los Angeles and 12 miles from the Pacific coast, Hollywood is a mosaic of districts, including the historic entertainment district on Hollywood Boulevard, Theatre Row, the Media District south of Santa Monica Boulevard, and the major medical facility cluster in East Hollywood, with many distinctive local commercial corridors and residential neighborhoods throughout. Among these are historically significant districts that benefit from their proximity to regional attractions, but require measures to enhance and preserve these districts from development pressures. Hollywood's iconic assets and hub of media and technology companies are highlighted under two of the eight long-term economic development goals in the City's Citywide Comprehensive Economic Development Strategy report adopted by the City Council in 2019.

The most intensely developed commercial area stretches east of La Brea Avenue, south of Yucca Street, west of Gower Street and north of De Longpre Avenue. This area is the heart of historic Hollywood, the original movie capital of the world, and home to the second largest concentration of historic buildings in the City of Los Angeles.

Drawing crowds of tourists during the day, with bustling nightlife activity, the regional center of Hollywood is developing into an attractive mixed-use neighborhood, where people can live, work, shop and play. An array of historic, boutique, and mixed-use hotels accommodate the needs of visitors who come to Hollywood for business or tourism. Tourism growth and international trade growth are listed under a priority to strengthen regional and global partnerships and trade networks in the Citywide Comprehensive Economic Development Strategy report. The other five priorities include expanding access to affordable housing, supporting a prepared workforce, and promoting equitable economic growth.

The Hollywood Community Plan presents policies to guide the renewed interest in commercial and residential development that is taking place in Hollywood's core or designated Regional Center. The Plan also protects the district's valuable historic resources and establishes programs to integrate the emerging land uses with the area's rich transit infrastructure.

South of Santa Monica Boulevard between La Brea Avenue and Van Ness Avenue, stretches the Media District. This industrial area is home to facilities engaged in new media, film and tape editing, film archiving and storage, studio equipment manufacturing, rental and storage, sound recording and many other pre- and post-production uses. Also located within the Media District is a flourishing equity-waiver theater district, known as Theatre Row, where some of the City's most critically-acclaimed live theater companies perform nightly. The Hollywood Community Plan protects the industrial uses of the Media District and the theaters of Theatre Row, while allowing for a mixture of uses along the edges of the District on La Brea Avenue and Santa Monica Boulevard.

East Hollywood is home to a cluster of prominent medical facilities, including Kaiser Hospital, Children's Hospital, Hollywood Presbyterian Medical Center, and associated medical offices and research facilities. Children's Hospital is one of the nation's leading teaching hospitals for physicians and nurses who specialize in pediatrics. These East Hollywood medical facilities are major employment centers, providing roughly one-tenth of Hollywood's jobs.

Much of East Hollywood is regulated by the existing Vermont-Western Station Area Neighborhood Plan (SNAP), a transit-oriented Specific Plan, that encourages development around the Red Line Metro stations located on Vermont Avenue and Hollywood Boulevard, while preserving nearby residential neighborhoods. Interlaced between these station neighborhoods are many distinctive single-family and multifamily residential neighborhoods.

The Hollywood Community Plan seeks to direct anticipated growth away from the many lower scale existing residential neighborhoods and towards transit-oriented districts and corridors. The Regional Center and the SNAP area contain Hollywood's transit stations connecting Hollywood to Downtown, the Valley, the Eastside, South LA, and the Westside.

Hollywood's regional significance and revival can be attributed to the successful collaboration of community stakeholders — the Hollywood Chamber of Commerce, the Hollywood Entertainment Business Improvement District and the neighborhood councils — working together with city government and the private sector.

Hollywood and Highland represents one of the City's most sought out destinations, attracting over 25 million visitors annually

Historic Development Patterns

The history of Hollywood is a story of the evolution of a sleepy agricultural town into the global capital of the entertainment industry. Today, Hollywood is a renowned destination that draws people from across the world.

The earliest recorded inhabitants of the Los Angeles Basin were the Tongva Native Americans, or Gabrielenos. Soon after the Spanish explored the area, many of the Tongva were relocated into missions and much of what is now Hollywood was divided in two by the Spanish government. Acreage to the west became part of Rancho La Brea, and settlements to the east became Rancho Los Feliz. In 1853, one adobe hut was the only building in the Hollywood area. By 1870, an agricultural community was well established in Hollywood, which produced citrus, alfalfa, hay, and many other crops.

In the 1880s the Ranchos were subdivided, and in 1886, Harvey Henderson Wilcox moved from Topeka, Kansas, with his wife and bought 160 acres of the former Rancho La Brea. That same year, Hollywood was given its name by Hobart Johnstone Whitley. Wilcox created a grid map of his new town, which was submitted to the county recorders office in 1887. Prospect Avenue served as the main street for the town, later renamed Hollywood Boulevard.

By 1900, Hollywood was a growing community and featured a hotel, several markets, a post office, and a population of around 500 citizens. In 1903, Hollywood was incorporated as a municipality, but cityhood was short lived. In 1910, the citizens of Hollywood voted for their city to be annexed into the City of Los Angeles to secure a stable water supply and other services.

Hollywood slowly emerged as a motion-picture production center. Though most major production companies were originally located on the East Coast, the center of the film industry gradually moved west, drawn by the warm weather and natural beauty of Los Angeles.

The first studio built in Hollywood was Nestor Studio located at the intersection of Sunset Boulevard and Gower Avenue in 1911. Numerous studios followed, and soon Hollywood was recognized as the movie capital of the world. Movie theater mogul, Sid Grauman, built the Egyptian Theater in 1922, followed by the Chinese Theater in 1927 to showcase new films and further establish Hollywood's dominance in the industry. The first Academy Award ceremony, recognized as the biggest evening for the industry, was held at the Roosevelt Hotel in 1929.

Hollywood also serves as a major center for television and music. In 1939, Don Lee Broadcasting System began broadcasting from W6XAO, the world's highest television broadcasting tower, built atop its namesake, Hollywood's Mount Lee. In the 1950s, music recording studios and offices were established in Hollywood, the most famous, Capitol Records, built in 1956.

Long before the Metro Red Line, tourists flocked to Hollywood on streetcars in 1905

Early travel through Cahuenga Pass

The Hollywood Bowl has been drawing outdoor crowds since 1916

Recent development in Hollywood's Regional Center mixes with its historic core

Mixed-use buildings create accessible, walkable, and convenient neighborhoods

Since the 1960s, many studios have relocated to neighboring communities, such as Studio City and Burbank. However, Hollywood remains a primary location for pre- and post-production processes. Development slowed in the 1970s and 1980s, and many parts of Hollywood fell into disrepair. During this period, many businesses closed or moved to other parts of the region.

Recent Development

In 1999, the opening of the Metro Red Line subway connected Hollywood to the San Fernando Valley and Downtown Los Angeles, extending the area's mobility to the entire Metro Rail network. The Red Line has been paramount in facilitating the revitalization of Hollywood. In 2001, the Hollywood and Highland complex took advantage of this transit hub, creating stores and restaurants that could be served by multimodal alternatives. Hollywood Boulevard and Vine Street serves as another transit-oriented center, featuring the W Hotel, and a mixed-use, mixed-income development.

In recent years, after the 2008 Great Recession, investment in Hollywood emerged again. New development projects feature a mix of commercial and residential uses, such as restaurants and multi-family residential buildings, and hotels in central Hollywood near the Red Line Metro stations. Transit and mobility options will be a key component of future development, supporting the growth of Hollywood as a place of residence, entertainment, and tourism.

The community of Hollywood continues to accommodate the needs of many visitors as well as residents. With annual visitor totals near 25 million, the number of persons visiting Hollywood fluctuates widely on any given day, depending on hour or season. Hundreds, sometimes thousands, of persons come to Hollywood to work, shop, tour, seek entertainment at a nightclub, theater or concert venue, or spend the night in a hotel.

At the same time, as Hollywood continues to evolve, neighborhood protections have been established to balance residents' needs. Since the last plan update, the SNAP, HPOZs, and baseline and hillside mansionization regulations have been established to maintain and preserve Hollywood's stable neighborhoods.

Geography

The geography of Hollywood is diverse and the CPA can be characterized by its extremes. Hollywood is situated at the heart of the City of Los Angeles, almost equidistant from the northern and southern extents of the City. In its midst sits the City's most wild open space, Griffith Park, and contained alternately within some of the most historic and expensive single-family neighborhoods in the City. The CPA contains the foothill terminus of the Santa Monica Mountains which extend westward, all the way to the ocean. Elevations of the Santa Monica Mountains range to 1,709 feet above sea level in Griffith Park and 1,821 feet outside the park. Hollywood's topography therefore includes both wilderness and hillside communities as well as flat lands that have been significantly urbanized. Hollywood's flatlands stretch generally south from Franklin Boulevard to Melrose Avenue in the east and to Rosewood Avenue in the west.

The hillside area north of Franklin Avenue is divided between single-family neighborhoods and two regional parks, Runyon Canyon and Griffith Park. The western half of the hills contains the single-family neighborhood known as Hollywood Hills. The eastern section of the hillsides encompasses Griffith Park and the Los Feliz neighborhood. Covering nearly 4,171 acres, or roughly 30% of the Hollywood CPA, Griffith Park is one of the largest urban parks in North America.

The grid of streets south of Franklin Boulevard is lined with commercial centers and corridors. These flatlands are densely populated with multifamily residential neighborhoods. They also include a few low-density neighborhoods around the western, southern and eastern edges of the Plan area, which are planned to maintain predominately single-family neighborhoods.

This diversity of topography articulates the unique socio-economic character of the CPA, juxtaposing some of the most expensive residential estates in Los Angeles with some of the densest multi-family housing in the City. In addition to diverse land forms, the Hollywood CPA has one of the most diversified and densely populated land use patterns in the City, containing multiple centers of commercial and industrial activity.

The Hollywood Reservoir, also known as Lake Hollywood, was created with the construction of Mulholland Dam in 1924

Built in 1926, the Shakespeare bridge provides a whimsical connection between Franklin Hills and Los Feliz

Tudor Revival architecture is just one of many genres represented in the Spaulding Square Historic Preservation Overlay Zone

Existing Land Uses

The Hollywood Freeway (State Route 101) traverses the Community Plan Area from north to south, the Ventura Freeway borders the north boundary, and the Golden State Freeway (Interstate 5) defines the eastern boundary. Streets in the flatlands are laid out in a grid pattern, often oriented on primary compass points, while the street pattern in the hills is generally circuitous and narrow. Major transportation corridors include Los Feliz, Hollywood, Sunset, and Santa Monica Boulevards, and Melrose Avenue, all providing east-west circulation. Major north-south circulation is provided along Vermont, Western, Highland, and La Brea Avenues, and Cahuenga, Crescent Heights, and La Cienega Boulevards. There are five Metro Red Line Stations in the Community Plan Area, and they are located in the Regional Center and in the Vermont-Western Station Area Plan (SNAP) Specific Plan.

Courtyard apartment buildings and bungalows were built throughout Hollywood's studio era

Almost half of the acreage in Hollywood is allocated for residential uses. Single-family uses are located primarily in the hills, while duplexes and multifamily uses are concentrated south of the hills, in the flatland. In the 1980s, many of Hollywood's multi-family neighborhoods were downzoned to lower-density land use designations and zones. Because of this rezoning, the built form in these neighborhoods often reflects a more urban development pattern than the zoning or land use designation allows.

Existing commercial land uses in the Community Plan Area account for approximately 850 acres or 6 percent of the CPA's total acreage. Commercial land uses promote local services and retail while fostering economic development and are predominantly located within the Regional Center, the SNAP, and along commercial corridors located throughout the Community Plan Area. Commercial corridors are generally located along major transportation corridors within the CPA.

The Vermont Avenue Commercial Corridor is lined with shops

Commercial areas thrive primarily due to their pedestrian scale and walkability. They are anchored by their local users who live in the surrounding communities and are significant quality of life contributors to the community of Hollywood. Features that maintain and improve this environment include streetscape improvements and plans, traffic calming measures, safe pedestrian crossings, and development in scale with the surrounding building typologies.

The Regional Center lies in the heart of Hollywood, located south of Franklin Avenue, east of La Brea Avenue, north of Fountain Avenue, generally west of the 101 freeway. The Regional Center is a focal point of regional commerce, identity, and activity, and contains diverse uses such as corporate and professional offices, multi-family residential uses, retail commercial malls, restaurants, mixed-use buildings, government buildings, major health facilities, major entertainment and cultural facilities (see Figure 2-1), and supporting services.

The Regional Center is both historic and contemporary, occupied by tourist and entertainment-related commercial uses and multi-family residential development. A highly urbanized area, the Regional Center has considerable pedestrian activity and population density. The construction of new, mixed-use development has occurred at major intersections, such as Sunset Boulevard and Vine Street, especially near the Metro Red Line which runs along Hollywood Boulevard, stopping at Vine Street, and Highland Avenue within the Regional Center.

Commercial corridors change in their scale and uses throughout the Hollywood CPA, with varying heights, uses, and cultural facilities (refer to Figure 2-1) that may draw residents from further afield. Hollywood is home to many commercial neighborhoods which are typically low-rise and pedestrian oriented, facilitating a village feeling and a sense of community. Hillhurst Avenue and Vermont Avenue in the Los Feliz neighborhood feature a variety of shops, services, bars, and dining establishments. Franklin Avenue between Gower Avenue and Van Ness Avenue hosts a number of small stores and restaurants, a market, and other neighborhood oriented services. Portions of Sunset Boulevard west of La Brea Avenue also maintain a neighborhood identity with a variety of historic commercial low-rise buildings. In East Hollywood, the concentration of hospitals and adjoining medical facilities continues to expand along Sunset Boulevard. This medical complex is supported by the Metro Red Line station at Sunset Boulevard and Vermont Avenue and the SNAP Specific Plan. Theatre Row lies on Santa Monica Boulevard between Gower Avenue and Highland Avenue and features several independent theaters and art galleries. Melrose Avenue is the largest neighborhood-serving commercial corridor that caters to both local and regional visitors.

Existing industrial uses, which account for 2 percent of the Community Plan Area and total approximately 273 acres, are primarily in the southern portion of the CPA. There are several clusters of low-intensity industrial uses scattered throughout the Hollywood CPA. The largest is the entertainment industry's Media District, generally bounded by Fountain Avenue, Vine Street, Waring Avenue, and La Brea Avenue. The Media District is the center of pre- and post-production, such as set construction, still photography, film and tape editing, film archiving and storage, studio equipment manufacture, rental and storage, sound recording, film projection and screening, prop houses, lumber yards, rehearsal and broadcast studios, production offices, and new media uses.

Open space (refer to Figure 4-3) comprises 39 percent of the CPA's total acreage. It includes a variety of different types of parks that meet different needs and have different functions, including sports and recreational facilities, playgrounds, nature preserves, passive green spaces, and cultural facilities. Unique to Hollywood, residents benefit from direct access to Griffith Park and other areas in the Santa Monica foothills.

Mixed-use development in the Regional Center creates an environment for people to live, work, and play

The highly urbanized Regional Center serves as one of the region's major commercial hubs

Sidewalk dining is a key feature of Hollywood's neighborhood Commercial Corridors

Commercial Corridors in Hollywood host some of the southland's most historic eateries

Iconic businesses like Wacko serve as small business anchors on Hollywood's Commercial Corridors

Relationship to Adjacent Communities

The Hollywood Community Plan covers 25 square miles, extending from the foothills of the Santa Monica Mountains, roughly south of the Cities of Burbank and Glendale, west of the LA River, north of Melrose Avenue and east of Mulholland Drive and the Cities of West Hollywood and Beverly Hills, including a strip of land south of the City of West Hollywood and north of Rosewood Avenue, between La Cienega Boulevard and La Brea Avenue.

As illustrated in Figure 1-2, City of Los Angeles Community Plan Areas, adjoining community plan areas include Sherman Oaks-Studio City-Toluca Lake-Cahuenga Pass and Bel Air-Beverly Crest to the northwest, Wilshire to the south, and Silver Lake-Echo Park and Northeast Los Angeles to the east.

Population, Housing, and Employment

The State of California requires that cities plan for changes in population, housing, and employment; if growth is projected, each city must accommodate a share of the region's anticipated growth. These projections are prepared by the Southern California Association of Governments (SCAG), which forecasts population and job growth for the cities and counties in the six-county Southern California region. The City plans for the reasonable expected development through its Community Plans. This section describes the Hollywood Community Plan's population, housing, and employment projections, as well as other influencing factors that may impact these estimates. In addition, recent state legislation, including two important climate change bills, is discussed.

SCAG's 2040 demographic and socio-economic forecasts for Los Angeles are based on historic and recent growth trends. The Department of City Planning (DCP) refines the population and housing allocations within the City's 35 communities so that projected growth is directed to regional and commercial centers, consistent with the Framework Element and other City policies. The Hollywood Community Plan is designed to accommodate the population, housing, and employment projections for 2040. The ability of this Plan to accommodate the projections is based on assumptions about the level of development that can reasonably be expected to occur during the life of the Plan, given the Plan's land use designations and policies. Estimates for population, housing units and employment in the Hollywood Community Plan are shown in Table 2-1.

Past building data demonstrates that not all sites will be built to the maximum densities permitted by the plan for a variety of reasons, including economic conditions and market trends, financial lending practices, and construction and land acquisition costs, physical site constraints, and other General Plan policies or regulations. The reasonable expectations about the level of future development determine the Plan's capacity to absorb any increase in population, housing, and employment. A

more detailed discussion of population, housing, and employment projections and reasonable expected development is included in the Environmental Impact Report (EIR) for the Hollywood Community Plan.

**Table 2-1
Population, Housing and Employment**

	Existing (2016 Estimate) ^{1, 2}	2040 Projection ¹	Plan’s Reasonable Expected Development ²
Population (persons)	206,000	226,000	243,000 - 264,000
Housing	104,000	113,000	121,000 - 132,000
Employment (jobs)	101,000	119,000	124,000 - 127,000

¹ Based on SCAG estimates (2016-2040 SCAG RTP/SCS).

² City of Los Angeles Department of City Planning
Numbers are rounded to the nearest thousand.

The Jim Henson studio property is one of many studio and entertainment facilities in Hollywood.

Other Influencing Factors

In any planning effort, population projections and estimates are prepared in an attempt to anticipate, predict, and forecast population trends over a planning period. Understanding population change is necessary to predict future demand for housing units, transportation, community facilities, and natural resources within the Plan area. It needs to be recognized, however, that these figures are only best estimates and are derived from regional data disaggregated to the City and community level. The intensity of development is affected by many factors, and the rate at which population, jobs, and housing grow may be faster or slower than anticipated. External factors, such as global economic trends, demographic changes, immigration and migration rates, global warming, and water rights may also influence community development.

Hollywood is home to a multitude of small studios and boutique production companies

New developments in the Media District continue to increase employment opportunities in the area

State Legislation

At the State level, senate and assembly bills are often adopted that influence local planning policy. For example, recent legislation calls for greater local emphasis on greenhouse gas reductions as well as better integration of transportation and land use planning:

Global Warming Solutions Act of 2006 (Assembly Bill 32)

This bill required California to reduce its greenhouse gas emissions to 1990 levels by no later than 2020. The California Air Resources Board (CARB), as the State's lead air pollution control agency, was assigned primary responsibility for coordinating development of those measures needed to achieve the required emissions reductions.

Complete Streets Act of 2008 (Assembly Bill 1358)

This bill requires the City of Los Angeles in updating their General Plan, to identify how the jurisdiction will provide for the routine accommodation of all users of the roadway including motorists, pedestrians, bicyclists, individuals with disabilities, seniors, and users of public transportation.

Sustainable Communities and Climate Protection Act of 2008 (Senate Bill 375)

This bill helped to implement Assembly Bill 32's greenhouse gas reduction goals by targeting transportation-related emissions through better integration of land use and transportation planning. Regions must adopt a "sustainable communities strategy" which demonstrates that their housing and transportation plans reduce greenhouse gas emissions.

The Hollywood Community Plan includes goals, policies and programs that address these important objectives through:

- The inclusion of policies and implementation programs that address the unique opportunities afforded to area residents, employees, and visitors through an expanded mass transit system that provides safe and efficient access to jobs, services, recreation and other community assets so that automobile dependence can be reduced.
- Improved air quality and health of residents as a direct result of decreased single-occupant automobile demand and reduced vehicle miles traveled (VMT) than would otherwise occur as a result of development under the existing plan.
- The creation of multi-modal alternatives to automobile use through the adoption of “Complete Street” and “Complete Neighborhood” principles that enhance convenient use of the area’s transit system through the provision of safe and accessible, pedestrian and bicycle linkages throughout the area, as well as land use incentives that encourage the location of a greater variety of neighborhood amenities within close proximity to residential areas.

Alternative Vehicle Metrics (Senate Bill 743)

The State of California signed SB 743 into law in 2013, which requires a shift in the way cities measure transportation-related environmental impacts under the California Environmental Quality Act (CEQA). The intent of SB 743 is to appropriately balance the needs of congestion management with statewide goals related to the reduction of greenhouse gas emissions, infill development, and the promotion of public health through active transportation. This new approach encourages development that results in more walkable communities, enhancements to active transportation facilities, development of transportation demand management programs, and expansion of public transit systems. The State’s Office of Planning and Research requires all cities to measure transportation impacts with vehicle miles traveled (VMT), which replaces delay-based Level of Service (LOS) at signalized intersections or roadway segments. In July 2019, the City of Los Angeles adopted VMT as a criteria in determining transportation impacts under CEQA.

Land Use & Urban Form

The Land Use & Urban Form Chapter guides the pattern of development in the Hollywood Community Plan Area. Based on the City of Los Angeles' General Plan, the Land Use Chapter formulates a coherent set of development policies to guide future development. These land use policies serve as a central organizing element for the Community Plan, providing strategies for accomplishing the Plan's vision.

Overall, the pattern of land uses presented in the Plan is therefore linked to the Plan's objectives for an economic development, affordable housing, and jobs generation, as well as the type of urban form and character that is envisioned.

The Land Use & Urban Form Chapter directs how the Hollywood community will evolve and mature over the next 20 years. Policies in this chapter establish a basis for evaluating whether specific development and project proposals are consistent with the intent of the Plan. These land use policies lay the groundwork for a livable, sustainable, and growing community made up of vibrant neighborhoods, districts, corridors and open spaces. To this end, the Land Use & Urban Form Chapter identifies goals and policies that are informed by these guiding principles:

- Conserve viable neighborhoods, districts, and historic/cultural resources
- Provide a range of employment and housing opportunities
- Promote the vitality and expansion of Hollywood's media, entertainment, and tourism industry
- Encourage sustainable land use
- Ensure that buildings and neighborhoods are well designed

Vision and Guiding Principles

The Hollywood Community Plan envisions a compact community that mixes residential, commercial and industrial uses in new and interesting ways. With core industries in entertainment, tourism and health care, this is a Hollywood which supports a strong local and regional economy. A rich, multimodal transit system, an inviting walking environment, and mixed-use housing along transit corridors promote a livable community and enable many Hollywood residents to reduce their use of cars. The plan aims to extend the walkability, connectivity, and accessibility of Hollywood.

The balanced growth of commercial and residential uses provides increased opportunities for jobs and housing, enabling an increasing number of residents and visitors to live, work, play and shop in Hollywood. Implementation of mixed-income housing

incentives creates opportunities for people who work in Hollywood to find affordable housing nearby. Policies that support this vision encourage more people to walk to nearby destinations.

Hollywood houses the City's largest public open space asset and looks to innovative solutions for providing more localized neighborhood public open space. Therefore, the Hollywood Community Plan promotes building, preservation, landscape, transportation and land use policies that take the long view towards protecting the environment. Recognizing the value of Hollywood's impressive historic architecture and cultural resources, the Community Plan seeks to protect these assets, as well. These guiding principles are presented in the following "Community Themes."

Community Themes

As discussed in Chapter 1, the General Plan Framework Element establishes guiding principles for growth and development at a citywide context. While all community plans implement these guiding principles, Los Angeles is a city of diverse neighborhoods and communities and with that comes many varied and localized issues. The Hollywood Community Plan draws upon the General Plan Framework Element guiding principles to create distinct neighborhoods, districts, centers and boulevards and further articulates these at a more focused community level. The themes underlie the community's vision statement and lay the foundation for the Community Plan's goals, policies, and implementation programs. They build on major points of agreement that emerged from community discussions about the valued qualities of the community, hopes and aspirations for the future, as well as strategies for achieving the vision. The community themes directing planning efforts within the Hollywood CPA are:

Provide a Range of Housing and Employment Opportunities

The Plan seeks to accommodate future anticipated growth, and address the City's ongoing housing crisis, by increasing the development rights of properties that are served by transit infrastructure and/or in proximity to employment centers. The Plan supports the development of affordable housing by linking the provision of increased development rights with an affordable housing incentive system. By focusing housing and employment growth in this manner, the Plan allows for significant expansion of housing and jobs, while conserving surrounding lower scale multi-family and single-family neighborhoods.

Hollywood provides a unique balance of commercial and industrial land uses that attract employment

Public facilities, schools, and community centers serve the area's residents

Preserving employment centers like Hollywood's studio facilities supports the area's economic success

The Hollywood Walk of Fame supports tourism with shops, tours, and historic destinations

Promote the Vitality and Expansion of Hollywood's Media, Entertainment, and Tourism Industry

The Community Plan recognizes Hollywood's internationally known role as a center for media and entertainment, and proposes strategies to safeguard land for media and entertainment related uses, offer development incentives for such uses linked to the provision of onsite community benefits in focused areas, and regulatory changes to better facilitate more contemporary media and entertainment uses. The Community Plan also recognizes the place-making, economic, and job-productive benefits of Hollywood's role as a visitor-serving destination, while proposing strategic provisions to safeguard housing stock within Hollywood for long term tenancy.

Conserve Lower-scale Neighborhoods

The Hollywood Community Plan endeavors to accommodate future growth within transit served areas, while minimizing future change in lower scale neighborhoods. Lower-scale multi-family neighborhoods in Hollywood tend to have a high proportion of rent-stabilized housing, and can be most vulnerable to the effects of displacement. Therefore, the Community Plan proposes a number of policies and programs to minimize the loss of existing affordable and rent stabilized housing and protect renting households. The Community Plan recognizes the role that the recently adopted Accessory Dwelling Unit regulations will play in expanding housing opportunities within existing single-family neighborhoods and does not propose additional changes within these areas.

Hillsides are a notable part of Hollywood's natural environment.

Safeguard Hillside Areas

The Hollywood Community Plan does not include zoning increases in the hillside areas, and has provisions to reduce future subdivisions. The Plan redesignates a number of hillside residential land use to open space for preservation, and includes a program to establish a new Hillside Construction Regulation (HCR) District. The Plan also includes future programs to expand open space, as well as protections for wildlife and ridgelines.

Create a Network of Safe, Multi-Modal Linkages

The Hollywood Community Plan promotes community health and sustainable mobility by envisioning a network of safe, multi-modal linkages that connect neighborhoods to nearby recreational and activity areas. In particular, the Community Plan supports the enhancement of underutilized existing roadways, parkways, greenways and utility corridors in order to expand mobility options. The Plan bolsters the creation of new paths, routes and lanes that facilitate better movement of pedestrians, bicyclists and motorists throughout the Community Plan Area. The Plan also identifies future streetscape plans and alley protections as a means to cultivate a more walkable and livable pedestrian experience.

Street treatments that calm traffic increase multi-modal linkages

Promote Sustainable Development

The Hollywood Community Plan proposes to promote sustainable development by establishing a land use pattern where future growth occurs in areas that are well served by transit and/or employment opportunities thus reducing future greenhouse gas emissions. The Community Plan seeks to encourage walkability by providing development standards for transit served corridors, and seeks to increase greenery and shade canopy by proposing new building breaks and landscape requirements within denser areas.

Hollywood provides extensive regional-serving medical facilities and institutions

Preserve and Enhance Social, Cultural and Historic Identity

The collective sense of place existing within the neighborhoods of Hollywood is an enduring source of cultural and civic pride. The area's numerous historic and cultural resources continue to serve as invaluable assets toward developing both positive neighborhood identity, and international cache. The Community Plan proposes a number of innovative strategies to promote the preservation of historic resources, provide incentives for preservation, and provide development regulations to guide new development within areas where historic resources are concentrated.

Capitol Records is just one of many culturally and historically significant Hollywood icons

Healthy communities start with public recreational spaces

Land use tools protect the character of Hollywood's distinctive neighborhoods

Improve Open Space, Parks, and Public Spaces

Open spaces, parks, and other spaces within the public realm have dynamic and important contributions to a healthy and happy community. The Community Plan supports existing open space resources within the Community Plan Area as well as new projects that expand the public realm like the creation of additional park space and the utilization of public right of way for pedestrian-oriented uses. The Plan proposes new development incentives within the Central Hollywood area that link the provision of on-site publicly accessible open space to increased development rights.

Conserve Neighborhoods, Districts, Historic/Cultural Resources, and Public Rights-of-Way

The Hollywood Community Plan endeavors to direct the enhancement of the area's distinctive neighborhoods by conserving, preserving and developing thoughtfully around viable neighborhoods, districts, historical and cultural resources, and public rights-of-way. By providing land use tools that protect Hollywood's heritage, and identifying guidelines and strategies to enhance the areas' greatest assets, the Plan regulates harmonious growth and development around Hollywood's history, respecting established and desirable community character and context. In this regard, the Plan orients growth towards transit, leaving historic neighborhoods intact. Development standards and guidelines are designed to protect historic, hillside, and other stable neighborhoods, providing transition in scale and height to low-density neighborhoods, while maximizing accessibility and mobility for more dense areas.

Sustainable Development

Sustainable development encompasses established principles of good planning by meeting the needs of current generations without compromising the ability of future generations to meet their own needs. Sustainable development can be further defined as promoting the “three E’s:” environment, economy, and equity. For example, a decision or action aimed at promoting economic development should not result in social inequity or decreased environmental quality.

What does sustainable development look like on the ground? In a community that is developing sustainably, the neighborhood is the basic building block of urban design and is characterized by walkability, mixed-use development, and mixed-income housing. Walkability is a function of compactness and density. Attention to streetscape and public spaces is a key design element in creating desirable places to live. Such neighborhoods are more likely to support efficient transit systems. This approach to planning, from the neighborhood to the regional level, is often referred to as “smart growth.”

Healthy Communities

A growing body of research has shown that there are connections between development patterns, community design and health outcomes. Crafting a more health-friendly Community Plan is critical to the overall health of a community. Healthy communities are characterized by equitable access to recreation facilities such as parks and community centers to promote physical activity; grocery stores and healthy foods; safe, active transportation options such as biking and walking; health services; affordable housing; economic development opportunities; healthy environmental quality; and safe public spaces.

Citywide Design Guidelines

The City of Los Angeles’ General Plan Framework Element and each of the City’s 35 Community Plans promote architectural and design excellence in buildings, landscape, open space, and public space. They also stipulate that preservation of the City’s character and scale, including its traditional urban design form, be emphasized in consideration of future development. To this end, the Citywide Design Guidelines were developed to carry out the common design objectives that maintain neighborhood form and character while promoting design excellence and creative infill development solutions. These guidelines are intended for developers and architects as well as for advisory and decision-making bodies when evaluating a project.

The Citywide Design Guidelines serve to implement the 10 Urban Design Principles, a part of the Framework Element. These principles are a statement of the City's vision for the future of Los Angeles, providing guidance for new development and encouraging projects to complement existing urban form in order to enhance the built environment in Los Angeles. While called "urban", the Urban Design Principles reflect citywide values to be expressed in the built environment of the City, establishing a design program for the City. They are intended to embrace the variety of urban forms that exist within Los Angeles, from the most urban, concentrated centers to our suburban neighborhoods. Guiding values and themes include creating a walkable Los Angeles, valuing each community's distinctive context and history, and designing for sustainability and health and wellness. The Planning Department's Urban Design Studio utilizes three interrelated design approaches for project-specific recommendations: pedestrian first, 360 degree design, and climate-adapted design. The Citywide Design Guidelines supplement the Citywide Urban Design Principles. By offering more direction for proceeding with the design of a project, the Design Guidelines illustrate options, solutions, and techniques to achieve the goal of excellence in new design. It is important to remember, though, that they are performance goals, not zoning regulations or development standards and therefore do not supersede regulations in the municipal code.

The Citywide Design Guidelines are intended for the Planning Department, as well as other City agencies and department staff, developers, architects, engineers, and community members to use in evaluating project applications along with relevant policies from the General Plan Framework and Community Plans. To achieve the stated purpose, the Guidelines apply to all new developments and substantial building alterations that require approval by decision-making bodies and planning staff. However, all "by-right" development projects are also encouraged to incorporate the Design Guidelines into their project design. Each of the Citywide Design Guidelines should be considered in a proposed project, although not all will be appropriate in every case, as each project will require a unique approach. The Citywide Design Guidelines provide guidance or direction for applying policies contained within the General Plan Framework and the Community Plans. Incorporating these guidelines into a project's design will encourage more compatible architecture, attractive multi-family residential districts, pedestrian activity, and context-sensitive design.

General Plan Land Use

The 35 Community Plans, which constitute the Land Use Element of the General Plan, guide the location and intensity of private and public uses of land; direct the arrangement of land uses, streets, and services; and encourage the economic, social, and physical health, safety, welfare, and convenience of people who live and work in the community. Land uses are organized into general classifications— residential, commercial, and industrial—which are further categorized by use, intensity, and density (see Table 3-1). Each land use category includes a list of corresponding zones, which further delineate the types of uses, densities, intensities, and heights permitted on a particular

parcel. The General Plan Land Use Map is a graphic representation of the Community’s land use classifications, which reflect the policies contained in the Community Plan. Figure 3-1 on page 3-9 is a generalized version of the General Plan Land Use Map.

**Table 3-1
Proposed General Plan Land Use**

General Plan Land Use	Corresponding Zones	Net Acres	% of Area	Total Net Acres	Total % of Area
Total				13,961	
Residential				6,552	47%
<i>Single-Family Neighborhoods</i>				3,397	31%
Minimum Residential	RE40	617	4%		
Very Low II Residential	RE15, RE11	1,457	10%

General Plan
Land Use
Hollywood Community Plan Area

Residential Neighborhoods

Much of Hollywood has been designated for residential uses, predominantly with single- and multi-family residential housing. This section provides overarching guidance and a broad spectrum of goals and policies that generally address residential neighborhoods. Recognizing the complexity of established and evolving residential needs, this Chapter also includes sub-themes to address various forms and topography within residential areas, such as single-family, multi-family, low-scale, and medium to higher intensity areas.

Goal LU1: Complete, livable and quality residential neighborhoods that provide a variety of housing types, densities, forms, and designs and a mix of uses and services that support the needs of residents throughout Hollywood.

Policy

- LU1.1 **Neighborhood character.** Maintain the distinguishing characteristics of Hollywood’s residential neighborhoods with respect to lot size, topography, housing scale and landscaping, to protect the character of existing stable neighborhoods from new, out-of-scale development. (P1, P5, P7)
- LU1.2 **Adequate housing and services.** Provide housing that accommodates households of all sizes, as well as integrates safe and convenient access to schools, parks, and other amenities and services.
- LU1.3 **Neighborhood transitions.** Assure smooth transitions in scale, form, and character, by regulating the setback, stepbacks, rear elevations, and backyard landscaping of new development where neighborhoods of differing housing type and density abut one another.
- *LU1.4 **Hillside development.** Limit density in hillside areas. Notwithstanding any land use designation maps to the contrary, all projects with average natural slopes in excess of 15 percent, including both Tract Maps and Parcel Maps, shall be limited to the minimum density housing category for the purposes of enforcing the slope density formula of LAMC Section 17.05C and 17.50E.
- LU1.5 **Slope density.** Projects in the hillsides that request lot line adjustments, where either lot is subject to the Slope Density Ordinance prior to the lot adjustment, should include conditions of approval to document existing average natural slopes for the entire parcel and maintaining overall density restrictions pursuant to the intent of the slope density formula of Section 17.05.

Hillside residential communities dot the foothills of the Santa Monica Mountains

Crape Myrtles line the historic streets of the Melrose Hill neighborhood

Old and new residential development mixes throughout Hollywood

- LU1.6 **Alleys.** Maintain and improve existing neighborhood alleys as an alternative, safe, well-maintained vehicular access to homes that reduces curb cuts, driveways, and associated pedestrian-automobile conflicts along sidewalks.
- LU1.7 **Front yard character.** Discourage parking between the street and the front of the structure on surfaces that are not part of required driveways. (P82)

Single-Family Residential and Hills

Comprising approximately 4,528 acres of land, or roughly 32 percent of the overall Community Plan Area, the single-family neighborhoods of the Hollywood Community Plan Area are diverse in architectural style and topography. Located in the hillside communities in the north and northwest portion of the CPA, as well as in the flats of Hollywood, these communities represent single-family housing stock within the Community Plan Area. Single-family properties range from new to 100 years in age and Hollywood contains several single family neighborhoods that have been designated as Historic Preservation Overlay Zones (HPOZs), to protect homes well in excess of 70 years. Careful guardianship of these neighborhoods are of primary importance when considering any long range initiatives to meet the emerging economic and physical needs of residents. The Plan preserves existing lower-density neighborhoods by maintaining lower-density land use designations.

Goal LU2: High quality single-family residential areas in the hillsides and flatlands that recognize the distinct scale and character of neighborhoods.

Policy

- LU2.1 **Preserve neighborhood scale.** Preserve stable single-family zoned residential neighborhoods by preventing out of scale development. Ensure that new single-family construction is compatible with the scale and character of existing residential neighborhoods. (P2, P3, P4, P5, P6, P7, P146)
- LU2.2 **Neighborhood height transitions.** Provide height transitions between established single-family neighborhoods and adjacent multi-family, commercial, and industrial areas.
- LU2.3 **Public views.** Consider the protection of public views visible from public roadways and parklands when reviewing discretionary development proposals for new development in the hills and foothills.

- LU2.4 **Hillside secondary access.** Investigate and consider feasible secondary access connections as part of hillside subdivisions, as well as extensions, completions, and connections of existing street networks where feasible for emergency access to improve public safety in the hillsides.
- LU2.5 **Hillside neighborhood character.** Consider the existing built character of distinctive hillside neighborhoods, including Laurel Canyon, Outpost Estates, and Hollywood Knolls, when reviewing discretionary development proposals. (P5)

Low-Scale Multiple-Family Residential

Comprising approximately 1,168 acres of land, or roughly 8 percent of the overall Community Plan Area, low-scale multi-family neighborhoods have Low Medium I and Low Medium II Residential designations, which include housing forms, such as duplexes, bungalow courtyards, and townhomes. Hollywood’s low-scale multi-family neighborhoods generally range between one and three stories. A portion of the low-scale multi-family housing stock is historic, built during the early studio boom. The enduring sense of history created by these multi-family neighborhoods form core aspects of Hollywood’s identity as the birthplace of the film and entertainment industry. For this reason careful consideration for the quality of life within these neighborhoods should be of primary importance when considering long range initiatives to meet the emerging economic and physical needs of residents.

Goal LU3: Improved height transitions between established single-family neighborhoods, low-scale multi-family neighborhoods, and neighborhood commercial uses.

- LU3.1 **Design for context.** Encourage smooth transitions in scale, form and character where new neighborhood commercial development abuts residential neighborhoods.
- LU3.2 **Architectural compatibility.** Encourage the design of new residential development projects or renovations, including small lot subdivisions, to complement the existing architectural and building patterns of the surrounding neighborhood, including front-yard setbacks and height.
- LU3.3 **Massing and scale.** Encourage the overall scale, massing, and roof form of infill development, including additions, to be compatible and cohesive with the existing residential character and context.
- LU3.4 **Maintain affordable housing through renovation.** Encourage renovation of affordable housing stock to maintain historic neighborhood integrity and minimize displacement of residents. (P98)

Low-scale multiple-family residential.

Low-scale multiple-family residential.

Many of Hollywood's multi-family neighborhoods feature historic architectural styles

LU3.5 **Neighborhood investment.** Guide the design of new buildings and the rehabilitation and repair of existing buildings to foster neighborhoods that are attractive and livable.

LU3.6 **Parking.** Encourage parking location to the rear of established low-scale multiple-family neighborhoods or other suitable locations that are not visible from the public street to maintain compatibility with the existing neighborhood character.

LU3.7 **Rooftop deck design.** Encourage rooftop use and design that respect neighboring properties. Major mechanical systems, lighting and reflective materials or other sources of glare (like polished metal surfaces) are encouraged to be screened or designed to limit adverse impacts.

Multiple-Family Residential

Design guidelines for new construction can help neighborhoods to maintain consistency

Comprising approximately 1,017 acres of land, or roughly 7 percent of the Community Plan Area, denser multi-family residential neighborhoods have buildings that generally range from two to six stories. Hollywood also has some historic apartment buildings that are taller in the area east of Highland Avenue, north of Hollywood Boulevard, west of Cahuenga Boulevard, and south of Franklin Avenue. The Plan supports existing citywide measures to increase the supply of housing, and supports providing a range of housing opportunities for residents of all income levels, including affordable housing. The Plan also provides policies consistent with and building upon the Framework and Housing Elements to concentrate housing density around transit and the Regional Center in central Hollywood.

Goal LU4: Multi-family residential neighborhoods that are well-designed, safe, provide amenities for residents, and exhibit the architectural characteristics and qualities that distinguish Hollywood neighborhoods.

Policy

LU4.1 **Context-sensitive housing.** Encourage multi-family housing development within neighborhoods designated for higher density multi-family residential. (P38, P39)

LU4.2 **Design for scale.** Support design standards to achieve transition in scale where neighborhoods planned for multi-family residential uses abut neighborhoods planned for single-family residential uses.

Multi-family housing development around transit facilitates multi-modal lifestyles

- LU4.3 **Compatibility with adjacent development.** Seek a high degree of architectural compatibility, parking design configuration, and landscaping for new and infill development to protect the character and scale of existing multi-family residential neighborhoods.
- LU4.4 **Design guidelines.** Recommend that new multi-family residential development be designed in accordance with the adopted citywide residential design guidelines and provide amenities such as on-site open space, recreational, and community-serving facilities.

Goal LU5: Multi-family residential neighborhoods that provide a range of housing opportunities at a variety of price points including affordable housing, through a mix of ownership and rental units.

- LU5.1 **Individual choice and affordability.** Provide a variety of rental and ownership housing opportunities for households of all income levels, sizes, and needs, including middle income and workforce populations. (P99)
- LU5.2 **Home ownership for diverse groups.** Encourage greater access to homeownership of adequate housing for all persons regardless of income, age, and cultural, racial or ethnic identity.
- LU5.3 **Housing for families.** Promote family-friendly projects that include more bedrooms suitable for larger families. (P100)
- LU5.4 **Mixed-income neighborhoods.** Promote the distribution of mixed-income housing opportunities throughout the Plan area to avoid the over-concentration of low-income housing. (P101)
- LU5.5 **Affordable housing and transit.** Encourage affordable housing near transit.
- LU5.6 **Senior housing.** Encourage that adequate affordable housing units for senior citizens are developed according to incomes in neighborhoods that are accessible to public transit, commercial services and health facilities.
- LU5.7 **Complementary development.** Encourage clustering of homes (as allowed in the RD5 and RD6 zones, and small lots) that complement the existing neighborhood’s scale and architecture.
- LU5.8 **Permanent supportive housing.** Encourage the construction of permanent supportive housing for the homeless through the master leasing of private apartment blocks, the purchase of for-profit single room occupancy hotels, and the conversion of short-term emergency shelter facilities.
- LU5.9 **Transitional housing.** Support the development of transitional housing units and emergency shelters that are appropriately located within the Community Plan Area. (P102)

Rehabilitated buildings like Step Up on Vine provide much needed housing and services for the homeless

New multi-family residential housing units in Hollywood

Transit-oriented development surrounding the Western Avenue Red Line Station includes affordable housing and shopping

Senior housing with neighborhood retail on the ground floor.

Permanent supportive housing with LEED Platinum rating for sustainability.

- LU5.10 **Maintain affordable housing.** Encourage the replacement of demolished or converted affordable housing stock with new affordable housing opportunities while minimizing the displacement of residents, through programs that support development while meeting the relocation needs of existing residents. (P98)
- LU5.11 **Address diverse resident needs.** Provide for the preservation of existing housing stock and for the development of new housing to meet the diverse economic and physical needs of existing residents and the projected population of the Community Plan Area to the year 2040. (P98, P103)
- LU5.12 **Affordability.** Encourage affordable housing options by promoting the benefits of tax credit programs such as LAHD’s Mortgage Credit Certificate program, homebuyer incentive programs that involve the reuse and rehabilitation of existing structures, other tax programs and the density bonus ordinance.
- LU5.13 **Preserve rent stabilized units.** Encourage the preservation and maintenance of rental units that are protected by the Rent Stabilization Ordinance and strive for a no net-loss of covenanted affordable units in the Plan Area and discourage the displacement of existing residents. (P98, P103)
- LU5.14 **Minimize displacement.** Decrease displacement of current residents and strive for a no net loss of covenanted affordable housing units, including those protected by the Rent Stabilization Ordinance. (P103, P104, P105, P106, P107)
- LU5.15 **Tenants’ rights of return.** Support projects that offer former low income tenants of demolished units with the first right of refusal on leases for the new housing units. (P108)
- LU5.16 **Strategic use of public property.** Encourage the use of public property and joint development to create 100 percent affordable and/or supportive housing projects. (P109)
- LU5.17 **Cohousing.** Amend regulations to facilitate innovative multi-family housing types such as “cohousing” and other non-traditional housing types where significant neighborhood support is indicated. (P110, P111)
- LU5.18 **Off-site acquisition options.** Coordinate with non-profits, community-land trusts, and affordable housing developers to take advantage of off-site acquisition options.

- LU5.19 **Coordination with community based organizations.** Foster effective collaboration and coordination between City departments and tenant organizations working in the Community Plan Area to more quickly identify displacement and eviction threats and more efficiently respond with adequate resources and strategies.
- LU5.20 **Architectural compatibility.** Ensure that the new development of multi-family, duplex, small lot subdivisions or lower density units located in or adjacent to single-family neighborhoods maintain the visual and physical character of single-family housing and is designed to respect and complement the architectural and building patterns of surrounding existing residential development.

Mixed-use buildings have long been part of Hollywood's commercial corridors

Theatre Row has transformed antiquated buildings into vibrant neighborhood anchors

Cafes and the Upright Citizen's Brigade Theatre line a neighborhood commercial corridor

Commercial Commercial Districts

Commercial districts provide integral support and amenities for adjacent neighborhoods, providing for walkable communities where multiple needs can be met without relying on travel by vehicles, potentially reducing travel time. Commercial land uses in Hollywood are concentrated in the heart of Hollywood near Metro stations and along commercial corridors generally served by transit.

The Hollywood Community Plan seeks to enhance commercial districts, promote jobs creation and support the development of mixed-use and pedestrian-oriented projects; it restores the citywide standards for FAR in Height District 1 along commercial corridors.

Because of Hollywood's historic pattern of development, commercial districts are diverse and showcase a mix of uses and character. Besides attracting a global audience for entertainment in and around the Regional Center, Hollywood's commercial districts also support many regionally important hospitals and medical facilities, as well as a variety of locally cherished village-like corridors. Lower scale corridors that serve both residents and visitors include Melrose Avenue, Sunset Boulevard west of La Brea Avenue, and Hillhurst Avenue in Los Feliz; these walkable neighborhood commercial areas should retain their local flavor and unique character while improving pedestrian amenities and supporting local economic development.

Goal LU6: Neighborhoods with local serving businesses that provide employment opportunities, community services, and amenities, and sustain unique scale, block patterns, and cultural design elements.

- LU6.1 **Cultural elements.** Retain, support, and reinforce the legacy and cultural elements of neighborhood commercial areas, including the businesses and cultural institutions within the community. (P125, P126)
- LU6.2 **Maintain walkability.** Apply pedestrian-oriented design to new projects and encourage pedestrian first design guidelines to maintain walkable commercial neighborhoods. Also see PR1.8.
- LU6.3 **Pedestrian amenities.** Provide pedestrian amenities that make walking convenient, safe and practical, like benches, pedestrian paths, lighting, and street trees to activity centers. Encourage projects to incorporate such features. (P127)
- LU6.4 **Activated ground floors.** Encourage activated ground floors to support pedestrian activity along key corridors. Also see PR1.16. (P23)

- LU6.5 **Recreation and social interaction.** Support an improved public realm, including a range of open space types that can offer opportunities for recreation and social interaction. Also see PR1.3, PR3.2.
- LU6.6 **Neighborhood design features.** Support new and infill development that evokes the distinct architectural and site design features of the neighborhood. Seek compatibility to protect the existing character and scale.
- LU6.7 **Neighborhood height transitions.** Provide height transitions between established single-family neighborhoods and adjacent multi-family, and commercial areas.
- LU6.8 **Neighborhood transitions.** Encourage smooth transitions in scale, form, and character by regulating the setback, stepbacks, rear elevations, and landscaping of new development adjacent to residential districts.
- LU6.9 **Neighborhood retail.** Protect small, neighborhood-serving retail in residential districts with high pedestrian activity.
- LU6.10 **Small business retail space.** Encourage mixed-use and commercial developments to provide retail spaces conducive to community-serving small businesses and business incubation. (P115, P128)
- LU6.11 **Support neighborhood establishments.** Support existing neighborhood stores (i.e. mom-and-pop establishments) that support the needs of local residents, are compatible with the neighborhood and create a stable economic environment. (P116)
- LU6.12 **Local employment.** Ensure that neighborhoods are well connected to adjacent employment areas that provide services, amenities, and employment opportunities to the local community.

Goal LU7: Strong and competitive commercial districts that are aesthetically appealing, pedestrian-oriented, easily accessible and serve the needs and enhance the character of the community.

- LU7.1 **Encourage investment.** Strengthen and encourage investment along Hollywood’s existing commercial corridors. (P8, P9)
- LU7.2 **Extended use hours.** Encourage 24/7 or extended hour active commercial uses adjacent to Metro stations and major transit stops to create safe waiting environments for transit commuters. Discourage concentrations of commercial uses which have limited operating hours in areas with high pedestrian activity.

Low-scale neighborhood retail.

Low-scale neighborhood retail.

The Regional Center has attracted many boutique hotels like the Dream Hotel

The W Hotel showcases the potential of joint public-private, mixed-use, and mixed-income development

Hollywood's Regional Center features both historic and contemporary buildings

- LU7.3 **SNAP.** Evaluate the Vermont-Western Station Neighborhood Area Plan (SNAP), a transit-oriented plan in East Hollywood, which plans for development around Metro rail stations and protects residential neighborhoods. (P15)
- LU7.4 **Pedestrian-friendly building design.** Encourage building designs that create interesting, safe, and welcoming walking environments on streets with high pedestrian activity. Utilize the Citywide Urban Design Guidelines to promote pedestrian-oriented retail with transparent facades to allow visibility of commercial uses.
- LU7.5 **Pedestrian connections.** Encourage large commercial or mixed-use projects to consider designs which break up the floor plane— providing pedestrian connections— and human scale design features, such as plazas, greenspace or a public focal point. Discourage “superblocks.”
- LU7.6 **Pedestrian-oriented land uses.** Promote pedestrian-friendly land uses along streets with high pedestrian activity and retain uses, such as performing arts theaters and restaurants, which support pedestrian activity.
- LU7.7 **Theatre row.** Preserve and promote Theatre Row. Maintain existing land use controls to protect the cluster of small equity-waiver theaters on Santa Monica Boulevard between El Centro and McCadden. (P10)
- LU7.8 **Commercial signage.** Promote aesthetically pleasing commercial signage, limiting the use of billboards, pole signs, and cabinet signs.
- LU7.9 **Sign districts.** Limit the number of sign districts allowed in Hollywood to the Hollywood Signage District only.
- LU7.10 **Limit electronic signage.** Discourage digital or electronic signage outside of the Hollywood Signage District. Ensure that the lighting of digital or electronic signage is not overly bright. (P11)

Regional Center And Transit Corridors

Tall buildings have shaped Hollywood’s urban setting since the 1920s, when office buildings and hotels about 12 or 13 stories were built, including the Taft Building and the Roosevelt Hotel. Today, the Regional Center serves a vast diversity of users and uses including media, entertainment, tourism, hotels, cultural attractions, night-life, and more. Hollywood’s greatest assets lie in its historic entertainment roots, but to maintain cultural relevance, Hollywood must continue to welcome and embrace innovation. As the Regional Center continues to grow and evolve, the Plan must strike a balance between new development and historic preservation, considering local, citywide, regional, and even global influences.

The Hollywood Community Plan seeks to create harmony by thoughtfully considering and weighing each project against multiple goals. The Regional Center serves as an important economic generator for Hollywood, providing jobs for the city as well as the region. The Plan encourages a balance of jobs and housing growth in specific locations which have supportive infrastructure.

Outside the Regional Center, the Proposed Plan includes Incentive Areas for mixed-use development along key transit corridors frequented by Metro Rapid and local bus service with high levels of service (see Figure 6-2). These areas include select properties along Vine Street; Santa Monica and La Cienega Boulevards; and Fairfax, La Brea, and Western Avenues. Pedestrian-oriented design is also envisioned for corridors with existing, intact storefronts at the sidewalk, such as Santa Monica Boulevard and Vine Street.

Mobility options make it possible for Hollywood’s residents and visitors to reduce their dependence on automobiles. By directing residential and commercial development to the Regional Center, which is adjacent to transit infrastructure, and transit corridors, the Plan increases accessibility to the transit system.

Goal LU8: A vital Regional Center that serves as the heart of Hollywood, balances new development and existing scale, and promotes jobs, housing, and visitor-serving uses.

Policy

- LU8.1 **Commercial and residential development.** Provide opportunities for commercial office and residential development within the heart of Hollywood. (P12)
- LU8.2 **Balance jobs and housing.** Encourage a balance of jobs and housing growth in the Regional Center. (P13, P14)
- LU8.3 **Variety of uses.** Consider C2 zoning in the Regional Center to support a variety of uses, including neighborhood serving uses for residents. (P129, P130)
- LU8.4 **Entertainment and tourism.** Support entertainment, hotel, and tourist-serving land uses in the Regional Center which address the needs of visitors who come to Hollywood for business, conventions, trade shows, entertainment and tourism. (P131)
- LU8.5 **Flexible parking models.** Encourage flexible parking models to best serve the local context. (P132, P133)

Hollywood is a host to many architecturally innovative buildings

Emerson College located in the Regional Center of Hollywood

The heart of Hollywood historically features a mix of commercial and residential development

Transparent building frontages make streets more friendly for pedestrians

- LU8.6 **Preserve buildings.** Promote the preservation and reuse of existing buildings, when feasible. Recognize the legacy of historic resources in the Regional Center as key features contributing to Hollywood’s prominence.
- LU8.7 **Noise abatement.** Consider requiring noise abatement plans for newly proposed entertainment venues requiring discretionary approval.
- LU8.8 **Rooftops.** Ensure that discretionary commercial rooftop uses within 500 feet of residentially zoned areas mitigate noise levels, which may include any necessary noise analysis reports in order to identify feasible mitigation.
- LU8.9 **Architectural excellence.** Support architectural innovation and dynamic roof forms while balancing life safety issues in consultation with the Fire Department.
- LU8.10 **Building design.** Locate and design tall buildings to provide access to sunlight and sky view within the surrounding context of streets, street trees, public and private open space, and neighboring properties. (P38)

Goal LU9: Residential and commercial density, transit-oriented districts, affordable housing, and employment opportunities near transit infrastructure that support sustainable and walkable neighborhoods.

A new mixed-use development.

- LU9.1 **Jobs and housing near transit.** Incentivize jobs and housing growth around transit nodes and along transit corridors.
- LU9.2 **Affordable housing near transit.** Encourage new affordable housing near transit in the Regional Center. (P16, P98, P101, P103, P107)
- LU9.3 **Mixed-use around transit.** Utilize higher Floor Area Ratios (FAR) to incentivize mixed-use development around transit nodes and along commercial corridors served by the Metro Rail, Metro Rapid buses or high-frequency bus service.
- LU9.4 **Alternative modes of transportation.** Encourage projects that utilize Floor Area Ratio (FAR) incentives to incorporate uses and amenities that make it easier for residents to use alternative modes of transportation and minimize automobile trips. Encourage affordable housing near transit. Consider neighborhood-serving uses such as grocery stores, shared mobility options, bicycle parking, bicycle lockers, safe and secure bicycle storage, and/or other vehicle trip reducing features.
- LU9.5 **Community benefits.** Condition new large scale commercial and mixed-use development in the Regional Center to provide green spaces, such as a public plaza, community garden space or other community amenities onsite.

- LU9.6 **Diverse and affordable housing.** Prioritize housing that is affordable to a broad cross-section of income levels, that provides a range of residential product types, and that supports the ability to live near work. (P112, P113)
- LU9.7 **Local jobs.** Maintain and increase the commercial employment base for community residents, including those facing barriers to employment, through local hiring, living wage provisions, job resource centers and job training. (P113, P115)
- LU9.8 **Minimize displacement of small businesses.** Encourage the retention of existing small businesses that strengthen the local economic base of the Community Plan Area. (P114)

The Paramount Studios campus represents one of Hollywood's premiere entertainment employment hubs

Industrial Areas

The largest industrial area in Hollywood consists of a cluster of pre- and post-production media-related facilities located south of Santa Monica Boulevard. Maintaining existing Industrial uses is integral to Hollywood's local economy and workforce. This Plan preserves valuable job-creating land uses with incentives that support entertainment, design, graphic, tech, media, and related, allied or associated industries.

The Plan provides a transition between industrial uses and the surrounding neighborhoods by utilizing the Hybrid Industrial land use designation. This designation allows a mixture of industrial uses within and around the borders of the Media District.

Goal LU10: Industrial, media-related, and entertainment-related uses that promote jobs in Hollywood.

- LU10.1 **Media and entertainment uses.** Promote the establishment, retention, and expansion of media, entertainment, and creative office uses in Hollywood. (P83)
- LU10.2 **Studios and jobs.** Support the investment, modernization, and growth of Hollywood's studio facilities and supporting uses as important job providers.
- LU10.3 **Preserve industrial and media uses.** Preserve the core of the Media District south of Santa Monica Boulevard for industrial uses. Protect the Media District from encroachment by residential uses.

Industrial land uses have been maintained in order to support entertainment employment industries

Community gardens provide access to fresh food

Low water plants furnish lush landscapes for yards and parkways

LU10.4 **Media district incentives.** Encourage media-related industrial uses in the Media District (generally bounded by Lexington Avenue, Vine Street, Waring Avenue, and La Brea Avenue) through the discretionary approval of additional FAR (up to 3:1).

LU10.5 **Hybrid industrial incentives.** Incentivize development within the Hybrid Industrial land use designation, which incorporates and maintains targeted industrial uses while also providing a mix of uses where appropriate. (P18)

LU10.6 **Mixed-use development.** Encourage mixed-use development at the perimeter of industrial districts.

LU10.7 **Schools.** Support dramatic arts and entertainment industry schools in Hollywood.

Sustainability

The Hollywood Community Plan recognizes sustainability as a key component of nurturing the City's long-term environmental, economic and social integrity. Through innovative design and practices, new development can utilize sustainable design to reduce negative environmental impacts. Sustainable policies have multiple benefits which are mutually reinforcing.

Reducing air pollution improves air quality and visibility, reduces greenhouse gas emissions, while promoting public health and livability. Improving energy efficiency reduces energy costs as well as protects the environment. The consumption of fresh produce which is locally grown strengthens the local economy while promoting public health and reducing the environmental and financial costs of long distance shipping. The Hollywood Community Plan promotes land use policies which foster a quality of life that is livable and sustainable.

Goal LU11: Sustainable land uses, site design, and development, including paving and stormwater infiltration systems.

LU11.1 **Promote sustainability.** Promote sustainable land use, streetscape and building policies to protect the environment and public health.

LU11.2 **Green building.** Encourage development to use clean, efficient, renewable materials and green building policies. Encourage discretionary and major projects to exceed Green Building Standards. (P84)

LU11.3 **Flexibility in design.** Encourage flexibility in building designs in developments to use green building practices and incorporate solar, clean, or efficient energy. (P85)

- LU11.4 **Conserve water.** Support policies which conserve water, recharge local groundwater aquifers and reduce the pollution of water resources. Meet increases in the demand for water through conservation and recycling.
- LU11.5 **Daylight streams.** Encourage the daylighting of buried streams and other policies which promote stormwater infiltration.
- LU11.6 **Green infrastructure and green streets.** Encourage green infrastructure and green streets (e.g. bioswales, infiltration cut outs, permeable pavement, and street trees). Encourage the use of natural, permeable materials for the paving of sidewalks and driveways, when feasible.
- LU11.7 **Permeable surfaces.** Discourage the paving over of yard surfaces and those portions of easements which exceed the required sidewalk width and are not used for necessary driveways, sidewalks and other pedestrian uses. Encourage the use of natural, permeable materials and surfaces to allow infiltration of water.

Goal LU12: Development that reflects sustainable practices such as food sustainability, healthy eating, sustainable energy production, and zero waste. (See also the Health and Wellness Element for additional goals and policies.)

- LU12.1 **Sustainable food.** Support food policies which promote healthy eating, strengthen regional agriculture and food security and reduce the environmental and financial costs of long distance shipping. Encourage the cultivation and sale of locally sourced produce.
- LU12.2 **Farmers' markets.** Encourage providing space for Farmers' Markets.
- LU12.3 **Community gardens in vacant lots.** Encourage the use of vacant publicly-owned parcels for community gardens.
- LU12.4 **Community gardens as public benefits.** Encourage the provision of space for a community garden as a public benefit.
- LU12.5 **Joint use of public facilities.** Encourage the joint use of public facilities for the purpose of promoting the efficient use of space, energy and public resources.

On-site groundwater capture allows water to re-enter the aquifer instead of heading out to sea

Wattles Farm has been in continuous operation since 1975

Farmers markets provide important food resources and encourage small business development

Trees provide shades and reduce the heat island effect

LU12.6 **Clean energy.** Promote the use of clean, renewable energy that is diverse in technology and location to decrease dependence on fossil fuels, reduce emissions of greenhouse gases and increase reliability of power supply. Support the use of wind energy, hydropower, geothermal energy, biomass energy and solar power. Encourage passive and active solar energy systems, particularly photovoltaic.

Goal LU13: A community that is resilient to climate change and natural disasters.

LU13.1 **Shade trees.** Encourage the planting of shade trees in the public right-of-way and on private property in order to mitigate urban heat island effects and contribute to the health of the community’s urban forest canopy. (P117, P118)

LU13.2 **Urban forest.** Encourage the preservation of the existing tree population and include new shade trees in an effort to achieve optimum canopy cover to reduce and mitigate the heat island effect. Include on-site trees in new development projects, whenever possible.

LU13.3 **Pollution filtering trees.** Increase planting of thick canopy trees and dense vegetation near and along freeways using species proven to filter particulate matter pollution.

LU13.4 **Tree protection.** Encourage and promote the retention of trees where practical and appropriate, through education, outreach and incentives offered by the Bureau of Street Services.

LU13.5 **Mature trees preservation.** Preserve and nurture mature trees and when projects call for the removal of mature trees on private property pursue creative strategies to integrate them into the layout and design of new development. (P118)

LU13.6 **Disaster preparedness.** Improve preparedness for disasters, including those related to climate change. Coordinate with other City departments to assess preparedness for increased frequency of extreme weather events, such as heat waves, drought, wildfires, flooding, and sea level rise. (P19)

LU13.7 **Adapt to climate change.** Support adaptation to climate change through the preparation of land use plans, building codes and zoning codes which mitigate impacts. (P20)

LU13.8 **Department coordination.** Coordinate with other City departments to assess preparedness for public health emergencies, earthquakes and other disruptions of civic life.

Public Realm, Parks, And Open Space

Murals, street art, and galleries line Melrose Avenue, a commercial corridor well known for its cultural offerings

Trails Cafe provides an opportunity to snack before venturing further into Griffith Park

Hollywood Boulevard features a lively and engaging streetscape oriented to pedestrians

The public realm, parks and open spaces are vital to the overall health and sustainability of a community. The public realm refers to areas that are publicly accessible, such as streets, sidewalks, squares, bridges, and park and open spaces. The public realm can also include publicly accessible spaces between buildings. Where yard areas and landscaping is scarce, public and “green” spaces - which also include community gardens, green roofs, parkways and greenways, and even our streets - provide much needed opportunities for passive and active recreation, social and cultural events, and serve as important gathering places in the community. In this regard public spaces can be part of the community’s valuable green infrastructure, improving connectivity and sustainability. Alleys, bustling corridors like the Walk of Fame, and Griffith Park are all public realm assets to Hollywood, yet there is a continuing need for neighborhood parks and more localized green space.

The Framework Element contains citywide goals and policies for the provision of recreation and parks; the provision, management, and conservation of open space resources; and the management of the local urban forest. Towards this end, the goals and policies in this chapter seek to:

- Enhance the livability of all neighborhoods by upgrading the quality of development and improving the quality of the public realm.
- Reinforce or encourage the establishment of a strong pedestrian orientation in designated neighborhood districts, community centers, and pedestrian-oriented subareas within regional centers, so that these districts and centers can serve as a focus of activity for the surrounding community and a focus for investment in the community.
- Protect the City’s natural settings from the encroachment of urban development, allowing for the development, use, management, and maintenance of each component of the City’s natural resources to contribute to the sustainability of the region.
- Maximize the use of the City’s existing open space network and recreation facilities by investing in the existing community and enhancing those facilities and providing access and linkages, particularly from targeted growth areas and economically disadvantaged areas, to the existing regional and community open space system.
- Ensure that the City’s open spaces contribute positively to the stability and identity of the communities and neighborhoods in which they are located or through which they pass.
- Conserve natural resources and minimize detrimental impacts.

- Identify areas for the establishment of new open space opportunities to serve the needs of existing and future residents. These opportunities may include neighborhood parks, urban open spaces, unimproved streets, trails and a citywide linear open space and greenway system that connect the City's regional open spaces, communities and neighborhoods.
- Enhance access to centers and mixed-use boulevards for people walking, rolling, bicycling, or taking other non-motorized travel modes.

Public Realm

Improvements to the public realm are significant to the character of a neighborhood. The Plan recommends policies guiding scale, massing and orientation of new buildings.

Accessible streets are important for all people, including people walking, bicycling, or taking transit. The Hollywood Community Plan employs several strategies to make the streets of Hollywood more convenient for non-motorized users. The Plan encourages street design features and pedestrian-friendly land uses to create streets that are interesting and inviting for users of all ages and abilities. Pedestrian comfort and safety is highlighted. Streetscape improvements are envisioned for several street segments which have high volumes of pedestrian traffic, including segments of Cahuenga, Hollywood and Santa Monica Boulevards, and Western, La Brea, Fairfax and Melrose Avenues. Alleys are preserved to continue to provide access to and buffering for adjacent uses (see Figure 4-1).

Goal PR.1: Streets that are safe, comfortable and convenient.

Policy

- PR1.1 **Safe sidewalks.** Encourage wider sidewalks along Boulevards and Avenues to promote safe access for users of all ages and abilities with appropriate traffic control features and ADA accessibility. (P21)
- PR1.2 **Sidewalk paving.** Encourage the use of sidewalk pavement materials which maintain flat, walkable surfaces.
- PR1.3 **Sidewalk for active uses.** Ensure adequate sidewalk width in commercial district areas that accommodate sidewalk dining and other active uses in the public realm.
- PR1.4 **Curb cuts.** Discourage curb-cuts next to sidewalks on streets with a high level of people walking, when alternative access exists.

Sidewalk dining on Vermont Avenue has cultivated a pedestrian-oriented and vibrant corridor

Murals are common on Hollywood's commercial corridors like Western Avenue

The sidewalk accommodates dining and pedestrians.

Historic venues such as the Egyptian Theater feature large quasi-public open spaces for events and public gatherings

Alleys provide important access and open space opportunities

Streetscape details like custom benches create a sense of place and cultural identity for commercial corridors

- PR1.5 **Rights-of-way for recreational uses.** Improve available rights-of-way throughout the Plan Area with landscaping, benches, and walkways and bikeways for low-intensity recreational uses.
- PR1.6 **Public parking.** Maintain public parking opportunities so that people can easily access restaurants and other entertainment uses. Discourage the siting of parking lots next to sidewalks that carry high volumes of people walking.
- PR1.7 **Preserve alleys.** Preserve and maintain existing alleys at the rear of lots which front a Boulevard or Avenue to encourage rear access.
- PR1.8 **Pedestrian amenities.** Provide pedestrian amenities that make walking convenient, safe and practical, like benches, pedestrian paths, lighting, and street trees to activity centers. Encourage projects to incorporate such features.
- PR1.9 **Access to large venues.** Support improved pedestrian access to large entertainment venues, such as the Hollywood Bowl.
- PR1.10 **Visibility.** Maintain streets that are well-lit and clean with safe, clearly marked street crossings.
- PR1.11 **Pedestrian crossings.** Support alternative pedestrian crossing strategies, such as diagonal crossing to enhance pedestrian crossing at intersections.
- PR1.12 **Pedestrian-friendly street design.** Encourage roadway reconfiguration, pedestrian refuges, and bump outs, where feasible, in consultation with the Department of Transportation and Bureau of Engineering.
- PR1.13 **Studies for pedestrian and streetscape improvements.** Support LADOT in the study of additional crosswalks, complete streets strategies, and streetscape improvements, especially for streets near schools. (P52)
- PR1.14 **Street lighting districts.** Support the establishment of street lighting districts to restore character street lights and fixtures.
- PR1.15 **Street design.** Design streets that are safe, well landscaped, and are pleasant and appealing to pedestrians. Protect the open garden character of front yards. Discourage parking between the street and the front of the structure, on surfaces that are not part of required driveways. (P22, P23, P24, P25, P53)
- PR1.16 **Distinctive street features.** Preserve distinctive street features such as wide landscaped parkways, landscaped medians, special paving and street lights, when feasible, to enhance walkability.

LEGEND

-  Alley
-  Metro Station
-  Community Plan Boundary

Figure 4-1
Existing Alleys
 Hollywood Community Plan Area

A public plaza with place making features.

PR1.17 **Street management.** Encourage green space, landscaping and street management policies that reduce energy costs, support the pedestrian environment, reduce the effects of climate change, automobile usage and fuel consumption, and improve the public realm. (P54, P55)

PR1.18 **Public access to streets and alleys.** Maintain streets and alleys to be open and accessible for shared public use. Limit closures, vacations and gating for private use. Discourage the creation of “superblocks.” Maintain alleys to provide commercial uses with opportunities for off-street loading and unloading and provide pedestrians, bicyclists and motorists with alternative routes of travel. (P26, P56, P57, P134)

PR1.19 **Undergrounding of utilities.** Encourage the underground placement of utilities to the greatest extent feasible.

Goal PR.2: Public spaces with healthy and growing urban forests that provide cleaner air, cooler streets, and serve as communal gathering places in areas of high pedestrian activity.

Policy

PR2.1 **Public plazas.** Encourage the construction of public plazas, in addition to greenspaces.

PR2.2 **Public plaza and open space incentives.** Support granting a Floor Area Bonus through a discretionary process in exchange for the provision of a public plaza or other publicly accessible open space and bikeway dedications along major Boulevards.

PR2.3 **Street closures.** Support the consideration of limited and selective street closings for public plazas, when circulation and access is not adversely impacted. (P58)

PR2.4 **Vacant and underutilized land.** Encourage the use of vacant or underutilized land for community gardens. Improve underutilized land or infrastructure to demonstrate strategies and outcomes that can serve as a national model for the creation of new green open space in a dense urban environment.

PR2.5 **Landscaping along sidewalks.** Improve landscaping along sidewalks with low maintenance shade trees and varied drought-tolerant planting in parkways to create a pleasant and interesting walking environment. (P117, P118)

PR2.6 **Place making.** Enhance tree planting and landscaping in parkways, medians, and neighborhood gateways as a place making strategy.

LEGEND

- Open Space

- Hollywood Central Park (Proposed)
- M Metro Station

Figure 4-2
Open Space
Hollywood Community Plan Area

- PR2.7 **Tree selection.** Support policies of the Bureau of Street Services to reduce conflicts with existing infrastructure through proper tree selection and through the recognition of street trees as a vital component of the City’s infrastructure.
- PR2.8 **Tree maintenance.** Facilitate the planting and maintenance of street trees, which provide shade and give scale to residential and commercial streets in all neighborhoods. (P119)

Open Space

Open space, broadly defined as land which is essentially free of structures and buildings and/or is natural in character, encompasses both publicly and privately owned properties that are unimproved. It is often used for the preservation of natural resources, managed production of resources and wildlife corridors, outdoor recreation, for connecting neighborhoods and people, and for the protection of life and property due to natural hazards. “Open Space” is also designated in the City’s land use classification system.

The Hollywood Reservoir provides wild open space, as well as an ideal view of the famous Hollywood Sign

Nearly 39 percent of the land area in the CPA is designated Open Space (see Figure 4-2), which includes Runyon Canyon Park, Barnsdall Art Park, Hollywood Forever Cemetery, Forest Lawn Memorial Park, the Santa Monica Mountains, the Rim of the Valley corridor, and some properties along Mulholland Drive. The Santa Monica Mountains range from the Hollywood Hills in the east to Ventura County in the west. The eastern edge of the Santa Monica Mountains comprise Griffith Park. Griffith Park, located in the northeastern portion of the CPA, makes up a majority of the approximately 5,250 acres designated as Open Space. Griffith Park, the largest municipally-owned park in the nation, is recognized as a Historic-Cultural Monument. In 1944, Griffith Park’s boundary expanded to include a 444 acre site donated to the City by the Sherman Company. Griffith Park contains several of the City’s most outstanding educational, cultural and recreational amenities, including: Griffith Observatory, the Los Angeles Zoo, the Greek Theater, the Los Angeles Equestrian Center and the Autry National Center. These resources represent regional open space resources serving not just the CPA but City and county residents, as well as visitors.

Underutilized public rights of way can provide open space opportunities

As opportunities for traditional open space resources diminish, it is important to identify areas of open space that have not generally been considered as resources, such as vacated railroad lines, drainage channels, planned transit utility and even freeway rights-of-way, pedestrian-oriented streets and privately developed mini/pocket parks. There is also a need to protect existing ecological and cultural resources. To this end, there is great potential to enhance these and other such open space and park opportunities into passive and active recreational uses existing within Hollywood. Trail systems offer recreational opportunities to explore the City’s open spaces and parks on foot, horseback, or bicycle. Portions of Hollywood are located in the Santa Monica

Mountains National Recreation Area. These and other areas are within the Proposed Rim of the Valley Trail System, a system of existing and proposed trails that connect various open spaces surrounding the San Fernando Valley. The Community Plan encourages access to existing resources via enhanced pedestrian and bicycle linkages along opportunity corridors such as the Los Angeles River Greenway and even portions of the 101 Freeway right-of-way. These opportunities in addition to the enhancement of pleasant streetscapes within the emerging pedestrian-oriented environments throughout the Community Plan Area will promote more social connection, lower stress, and facilitate greater safety for people walking and biking within the Community Plan Area and provide public space opportunities that strengthen the sense of community.

Parks and Recreation

Recreation and park services in the Community Plan Area are primarily provided by the City Recreation and Parks Department (RAP) and the Los Angeles County Department of Parks and Recreation. There are three types of parks: neighborhood, community, and regional parks. Neighborhood Parks provide space and facilities for outdoor and indoor recreation activities to all residents in the immediate residential area surrounding the park. Community parks provide a broader range of services than neighborhood parks, and satisfy the needs of the nearby community as well as other service areas. A regional park provides specialized recreational facilities such as hiking trails, lakes, golf courses, campgrounds, wilderness areas and museums, which normally serve persons living throughout the Los Angeles area.

A number of issues regarding the amount, quality and access to parkland amenities within the Community were identified during the outreach process, including the desire to see, at a minimum, enhanced linkages to existing open space and recreational amenities. Therefore, in addition to identifying the following goals and policies to collaboratively increase the amount of parkland throughout the CPA, the Community Plan also encourages access to existing resources such as Griffith Park via enhanced pedestrian and bicycle linkages along opportunity corridors. The Plan also supports proposed improvements for open space along the Los Angeles River from the Los Angeles River Revitalization Master Plan as well as observing guidelines established in the Los Angeles River Improvement Overlay Zone.

One open space challenge for Hollywood is to increase the number of small, local parks and public spaces. The difficulty of creating open space in an urban environment where real estate is expensive and built out has led to many creative proposals for alternative concept, such as the proposal to create a park over the Hollywood Freeway. The Hollywood Community Plan supports these creative proposals and encourages the reimagining of open space to include public spaces as well as parkland.

List of Parks (Figure 4-2)

1. Rosewood Gardens
2. Broadway Terrace Walk Street
3. Dorothy and Benjamin Smith Park

14. Seily Rodriguez Park
15. Fountain Community Gardens
16. Lexington Avenue Pocket Park
17. La Mirada Avenue Park
18. Lemon Grove Recreation Center
19. Madison Avenue Park

Wayfinding on the LA River Bike Path

Yucca Park provides recreational areas for sports and more

Abundant diversity of open space is a hallmark of Griffith Park, especially along the fern lined creek of Fern dell

Goal PR.3: New and improved open space and public parks that provide opportunities for recreation and social gathering.

Policy

- PR3.1 **Preserve open space.** Maintain, preserve, and enhance open space, and recreational facilities, and park space within the Hollywood Community Plan Area. Encourage the retention of passive open space which provides a balance to the urban development of the Community Plan Area. (P120, P122, P123, P136)
- PR3.2 **Green space and plazas.** Develop new public green spaces and public plazas where possible. (P27)
- PR3.3 **Site remediation.** Pursue resources to clean up land, especially brown-fields, that could safely be used for public recreation or open space.
- PR3.4 **Open space easements.** Support the ongoing use of paper streets as open space and support the rezoning of paper streets for open space easements that can be used to connect trails and access recreational uses. (P136)
- PR3.5 **Preserve easements.** Discourage the paving over of easements. (P59)
- PR3.6 **Underutilized rights-of-way.** Identify opportunities to increase recreational resources by converting underutilized rights-of-way like railroads and powerlines to accommodate greenways and bicycle trails, and by utilizing public easements for community gardens. Promote resource efficient new infill development that creates recreational open space and creative placemaking projects in public rights of way. (P60, P109)
- PR3.7 **Surplus City property.** Coordinate with the Department of Recreation and Parks and Department of General Services to review and evaluate surplus property as potential sites for parks and recreational facilities. (P120)
- PR3.8 **Acquire vacant land.** Encourage and support continuing efforts of non-profits in partnership with County, State and Federal agencies to acquire vacant land for publicly owned open space.
- PR3.9 **Freeway landscaping.** Coordinate with CalTrans to develop landscape plans for freeway rights-of-way that will reduce exposure to air pollutants for people using the rights-of-way as outdoor recreational areas.
- PR3.10 **Access to open space.** Maintain and improve access to existing open space and new open space including walking, hiking, and equestrian trails. Maintain and improve bicycle access to open space. Support the

connection of existing walking, hiking and equestrian trail segments in the Plan Area, including the Rim of the Valley trails corridor, where feasible. (P61, P62)

- PR3.11 **Rooftops.** Support the use of rooftops for Open Space, including running tracks, gardens and other recreational purposes, where public safety permits.
- PR3.12 **Rivers and streams.** Maintain and expand public green space around rivers and streams.
- PR3.13 **Los Angeles River.** Support recommendations of the Los Angeles River Revitalization Master Plan for establishing parks, walking paths, bicycle trails, gathering spaces, and public art along the Los Angeles River.
- PR3.14 **Los Angeles River Improvement Overlay (RIO) Zone.** Observe guidelines for mobility, watershed management and urban design as established by the Los Angeles RIO Zone.
- PR3.15 **101 Cap Park.** Support the proposal to cap subterranean portions of the 101 Freeway for the purposes of creating parkland that can serve as a national model for the creation of new green open space in a dense urban environment. (P64)
- PR3.16 **Headworks Reservoir.** Support the plans of LADWP to provide parkland on top of the proposed Headworks Reservoir in Griffith Park between Ventura Freeway and Forest Lawn Drive and in future infrastructure projects, where appropriate.

Goal PR.4: Quality public facilities that serve the community.

Policy

- PR4.1 **Adequate parks and recreational facilities.** Provide adequate park and recreation facilities that meet the recreational needs of existing and new residents for all age-groups in the community.
- PR4.2 **Parks and recreational spaces.** Conserve, maintain and better utilize recreational facilities and park spaces.

Hollywood Cap Park

The City of Los Angeles Department of Recreation and Parks, in conjunction with the Friends of Hollywood Cap Park (FHCP), is evaluating the development of the Hollywood Central Cap Park, which is a 38-acre park and recreational facility that would cap a segment of the US 101 (Hollywood Freeway). The park will create a street-level urban park that will reconnect communities that were separated by the construction of the freeway more than sixty years ago.

Playgrounds meet the recreational needs of Hollywood's youngest residents

Parks and recreational facilities provide flexible open space for a wide variety of classes and activities

- PR4.3 **Community-serving facilities.** Encourage the provision of community facilities and open space within private discretionary projects. Such facilities could include those to be used for classes, bicycle amenities, adult and child daycare, community meetings and other community purposes.
- PR4.4 **Parking at community facilities.** Allow community-serving facilities to utilize alternative means of providing required parking.
- PR4.5 **Open space designations.** Maintain all open space designations within the Hollywood Community Plan Area. Designate parkland as Open Space as it is acquired by the Department of Recreation and Parks.
- PR4.6 **Lands for funeral services and interment.** Support the retention and provision of adequate lands for funeral services, interment sites, and the protection of existing cemeteries as a public benefit use.

Goal PR.5: Improved access to recreation facilities and open space.

Policy

- PR5.1 **Disparities in park space.** Encourage and target the development of park and recreation projects in areas with the greatest need.
- PR5.2 **Input for new parks.** Utilize community input to assist the Department of Recreation and Parks in locating development opportunities for new parks. Prioritize recommendations of the Community-Wide Needs Assessment prepared by the Department of Recreation and Parks.
- PR5.3 **Connect neighborhoods to parks.** Support the connection of neighborhoods to destination parks with public transit and well maintained pedestrian and bicycle facilities. (P121)
- PR5.4 **Joint use agreements.** Support the establishment of joint-use agreements with other public and private entities to increase recreational opportunities in Hollywood, including shared use of land owned by public agencies and private property owners. (P63, P137)
- PR5.5 **Improve accessibility.** Prioritize and improve accessibility to recreational uses in Griffith Park using tools such as easements and trail and greenway linkages. (P61)
- PR5.6 **Greenways and trail systems.** Preserve and encourage acquisition, development and funding of new recreational facilities and park space with the goal of creating greenways and trail systems.

Goal PR.6: Protect existing natural areas and wildlife habitat.

Policy

- PR6.1 **Wildlife habitats.** Evaluate existing conditions and identify areas important for supporting habitat and movement for wildlife. (P122, P123)
- PR6.2 **Conservation.** Preserve passive and visual open space that provides wildlife habitat and corridors, wetlands, watersheds, groundwater recharge areas, and other natural resources areas. (P124)
- PR6.3 **Surplus City property.** Prioritize the reuse of surplus City owned sites in the hillsides for open space and wildlife conservation purposes. (P124)
- PR6.4 **Ecologically sensitive areas.** Coordinate with the County of Los Angeles in identifying significant ecological areas featuring ecological or scenic resources that should be preserved and protected within State reserves, preserves, parks, or natural wildlife refuges. (P124)

Passive open space

THIS PAGE IS INTENTIONALLY LEFT BLANK

Sunset Square includes a variety of historic architectural styles, like this example of colonial revival

The city-owned Hollyhock House, located within Barnsdall Art Park, is the first UNESCO World Heritage site in Los Angeles. The Hollyhock House was designed by Frank Lloyd Wright.

The Melrose Hill neighborhood, one of Hollywood's Historic Preservation Overlay Zones, was built in the early 1900s

Preservation

Hollywood has reinvented itself many times over throughout the 20th century, with each phase contributing important themes, character, and qualities to the built environment. The preservation of Hollywood's historic and cultural heritage will continue to play an important role in the area's continued evolution in the 21st century. The Community Plan recognizes the value of Hollywood's impressive historic architecture and cultural resources, and therefore seeks to protect these assets. This chapter compiles a roadmap of where Hollywood has been and provides guidance for preserving important historical and cultural resources and maintaining Hollywood's heritage through its built character.

Historic Resources in Hollywood

The Hollywood Community Plan Area has a rich built history, with key buildings and places that have become significant for their notable architecture or association with the social and cultural history of Hollywood. The preservation of historical resources protects this built legacy, ensuring continuity and the retention of the community's collective memory. Historic preservation also offers economic benefits - communities throughout the nation have used preservation as a successful tool to promote revitalization and economic development.

The Hollywood Community Plan Area boasts one of the highest concentrations of significant historical buildings in the City of Los Angeles, and the City's first UNESCO World Heritage site, the Hollyhock House, located within Barnsdall Art Park. The Hollyhock House, a harbinger of California Modernism, was Frank Lloyd Wright's first Los Angeles commission. The personal residence in East Hollywood was built between 1919 and 1921 for Aline Barnsdall, who asked Wright to incorporate her favorite flower, the hollyhock, into the design. The Plan Area also contains a significant portion of Historic Route 66. The Hollywood Boulevard Commercial and Entertainment District includes 63 contributing properties, and was listed in the National Register of Historic Places in 1984. The Plan area includes more than 190 City Historic-Cultural Monuments, representing nearly 15% of the total designated Monuments in the entire city.

Hollywood development extended in a band across the CPA between Hollywood and Santa Monica Boulevards during the early 20th century. Although a variety of property types exist in the CPA, the patterns of development were conducive to widespread single-family residential development. The Hollywood CPA contains many residential neighborhoods that retain their historical architectural character. The neighborhoods in Whitley Heights, Spaulding Square, Melrose Hill, Hollywood Grove, and the northwestern portion of Hancock Park, and Sunset Square feature concentrations of early 20th century single-family residences. These neighborhoods

developed primarily due to their proximity to historic streetcar routes. Multi-family development, which is intermittently dispersed throughout the predominantly single-family residential neighborhoods, typically consists of duplexes, fourplexes, small, and medium sized apartment buildings that are low-scale in keeping with the surrounding single-family neighborhoods. Scattered throughout the Hollywood CPA are bungalow courts from the early 20th century, designed in a variety of popular architectural styles including Craftsman and Mission Revival. While many intact historical structures are found throughout Hollywood, many of the residential buildings in the Hollywood CPA have been altered over time.

Commercial properties are commonly found on major thoroughfares running north-south and east-west through the CPA. Although few intact examples of streetcar-related commercial development still remain in Los Angeles, a small number occur in the CPA. For example, commercial resources in the Hollywood CPA include streetcar-related retail development along portions of Franklin Avenue, Virgil Avenue, Hollywood Boulevard, Highland Avenue, Western Avenue, and Santa Monica Boulevard, all of which are former streetcar routes. The CPA also has a number of institutional properties that serve the local residential communities. Common institutional properties include churches, social halls, schools, and government buildings, such as fire stations and Department of Water and Power facilities.

Hollywood’s renaissance over the past two decades has been spurred by the rehabilitation and adaptive reuse of its remarkable historical resources. From the revitalization of Hollywood’s historical theaters to the conversion of historical commercial buildings to new housing opportunities, historic preservation and rehabilitation has enhanced Hollywood’s authenticity and economic vitality. Citywide historic preservation policies have been established through a Cultural Heritage Master Plan, the Conservation Element of the General Plan, and the work plan of the Department of City Planning’s Office of Historical Resources (OHR). In addition to these policies, the City of Los Angeles has completed SurveyLA - an ambitious citywide survey documenting historical resources across Los Angeles. Results of SurveyLA will inform the development of policies to preserve historically and architecturally significant buildings that have not yet achieved official historic designation. SurveyLA completed the Historical Resources Survey Report for the Hollywood Community Plan Area, with the exception of the CRA area, in 2011 and it was recently revised in 2015. Additionally, the City and the Getty Conservation Institute launched HistoricPlacesLA.org, an online information system for the City’s historical resources.

Palm trees were historically planted throughout Hollywood and many of LA’s old neighborhoods

Many commercial corridors feature historic architecture

Historic Development Pattern

This brief historical account is intended only to establish a general background to the pattern of development in the Community Plan Area. It is not meant to be an exhaustive history.

First map of Hollywood by real estate developer H. Wilcox, 1887

Early settlers in Hollywood grew crops, establishing the area's agricultural roots

Large estates are part of Hollywood's early development history

First Settlement to Rancho Era

Originally settled by the Tongva Native American people, Hollywood still features native names like Cahuenga, the road synonymous with one of the tribe's most substantial settlements. Prior to the mid-1800's the Hollywood Community Plan Area consisted of a combination of rancho lands and public lands. The rancho lands were the northernmost portion of the historic Rancho La Brea and Rancho Los Feliz, with the public lands falling between them.

Cahuenga Pass was the principal route between southern and northern California during the Spanish and Mexican periods of Hollywood's history. The Cahuenga Pass continued its role as an important transportation artery as a Pacific Electric Railway Line route in the early decades of the twentieth century. Today it is the route to the San Fernando Valley by way of the Hollywood Freeway.

Hollywood began as a small agricultural community in the 19th century. Farmers, many of whom were European immigrants, experimented in cultivating a wide variety of exotic fruits, vegetables, and flowers. The area was developed as individual tracts of land by a handful of Anglo settlers beginning in the 1860s. The agricultural character of the community changed in the early twentieth century as large real estate tracts were developed, transforming the community into a bustling suburb of Los Angeles.

Early Development: Subdivisions, Transit, and the Streetcar Suburbs

In 1900, the first electric streetcar track was completed along Hollywood Boulevard (then Prospect Avenue), and other streetcar lines soon followed. Original railroad, interurban and street car routes were often directly tied to real estate ventures. Residential developments in Hollywood ranged from sprawling estates encompassing tens of acres, to large residences with substantial gardens, to more modest suburban residences.

Large estates lined Prospect Avenue, and as the area became increasingly developed, churches, clubs and schools built in close proximity to single-family residences were executed in styles such as Mission Revival, American Foursquare, and Craftsman Bungalow. The Plan Area has extant examples of residential development during this era, although these examples are relatively rare.

By 1909, like many of its neighboring communities, Hollywood had experienced growth on an exponential scale. While its population in 1903 was 700, by 1909 it reached 4,000. Though dwarfed by the neighboring City of Los Angeles with 100,000 inhabitants, the small City of Hollywood was experiencing growing pains with water shortages, drainage issues and sewage problems. It was around this time that the city's attitudes towards annexation began to change; the infrastructure that

Suburban neighborhoods were marketed by developers and eventually consolidated into the City of Los Angeles

a city like Los Angeles could offer was seen as a solution to some of these issues. In November of 1909, the Hollywood Board of Trade announced to residents that it would not be able to resolve sewer problems on its own. Just two months later, in February of 1910, Hollywood was consolidated to the City of Los Angeles.

The relationship between Hollywood and Los Angeles had been increasingly strengthened in the decade preceding annexation. As early as 1904, the Red Car Balloon Route – a balloon shaped route through Los Angeles and its environs operated by the Los Angeles Pacific Railroad – facilitated transportation between Hollywood and downtown Los Angeles. It brought tourists on excursions to popular Hollywood stops, such as the studios and gardens of Paul de Longpré. The relationship of Hollywood to Los Angeles was further strengthened shortly following incorporation as the east end of Hollywood Boulevard was routed to curve into Sunset, the main road to Los Angeles.

Interwar Development: The Entertainment Industry and Studio Housing

Five years after the 1910 annexation of Hollywood by the City of Los Angeles, the area was in the midst of a real estate boom. No longer a struggling small independent city, Hollywood was a thriving suburb of Los Angeles increasingly attracting residential and commercial interests. The most significant factor in the development of Hollywood in the twentieth century was the entertainment industry. Film production began in Hollywood in 1911, and quickly grew into a significant economic force. As the popularity of motion pictures grew, more physical facilities related to motion picture production were constructed in Hollywood. In 1919, the City established a series of industrial zones specifically designated for motion picture use.

The largest and most significant of these zones is located in the heart of the Plan Area and from 1919 to 1925 numerous studios were built. Charlie Chaplin, Mary Pickford, Douglas Fairbanks and D.W. Griffith located United Artists Studios at Santa Monica Boulevard and Formosa Avenue. Charlie Chaplin also built an independent facility nearby at Sunset Boulevard and La Brea Avenue. Other studios located further east along Sunset Boulevard and Melrose Avenue. The burgeoning entertainment industry brought about the development of thriving business districts along Hollywood Boulevard, Vine Street, and Sunset Boulevard. Due to its key role in the motion picture industry, Hollywood later became a center for radio, television, and record production. Today, industrial resources include intact motion picture studios dating to the 1920s and a wide variety of support services.

From the 1910s through the boom of the 1920s and into the 1930s, Hollywood experienced tremendous population growth. Whereas the population of Hollywood had been a little over 4,000 people upon incorporation, the area would boast a population of 153,000 by the 1930s. The rapidly expanding film business attracted migrants from around the United States and around the globe, resulting in a true

"melting pot." For a period of time preceding World War II, the entertainment industry also became a refuge for émigrés from Eastern Europe. To accommodate the growing population of newcomers, residential development sharply increased. While residential development in Hollywood during the first decade of the twentieth century had focused on Prospect Avenue (present-day Hollywood Boulevard) due to its proximity to streetcar lines, by the 1920s, development was widespread throughout the area in response to the automobile. Concentrations of residential properties from this period are located adjacent to the major motion picture studios and include modest single-family residences along with a wide variety of multi-family housing types. The historical integrity of many of these properties is poor, and intact neighborhoods of early twentieth-century studio-adjacent residences are now rare.

Many of the people (including some movie actors and actresses) who bought homes in Hollywood embraced the modest life-style associated with the bungalows being built at a rapid rate north and south of Hollywood Boulevard. The bungalow court has particular significance in Hollywood as large colonies of courts were built just blocks away from the studios. These were developed primarily in the 1920s, and reflect the prevalent architectural styles of the period. While many of these properties have been lost, Hollywood still contains a substantial population of bungalow courts.

During the 1920s, there was also significant residential development in the Hollywood Hills, in particular in Los Feliz, Laurel Canyon, and Beachwood Canyon. Several residential developments from this period were specifically marketed to people working in the entertainment industry, with advertisements touting their proximity to the Hollywood studios.

Post War Rise and Decline

Density in Hollywood increased substantially following World War II. In the hillsides, residences were built on previously undeveloped lots. In the flatlands, inexpensive stucco-clad apartment buildings were erected as infill in previously established residential neighborhoods. Along the major commercial corridors, earlier buildings were updated or replaced with new construction. By the 1950s, entertainment industry-related properties began to spread out throughout the greater Los Angeles area, and the major industry in Hollywood shifted to tourism. During the late 1950s, the Capitol Records Building was constructed on Vine Street and the Hollywood Walk of Fame was created on Hollywood Boulevard as a tribute to actors, directors, and other contributors to the entertainment industry.

Also during this period, some of the nation's most important Modernist architects were working in Los Angeles, building sleek commercial buildings in the flatlands and highly innovative residential projects in the hillsides. The CPA contains residential and commercial properties designed by a number of important Modernists,

including Richard Neutra, Rudolph Schindler, Lloyd Wright, John Lautner, Craig Ellwood, Raphael Soriano, Gregory Ain, and Pierre Koenig.

In the 1960s and 1970s, Hollywood's population became more ethnically diverse as new immigrant groups began settling in the area. In addition to a significant Latino population, Armenian and Thai immigrants began living and working in the East Hollywood area and opened shops and other businesses in neighborhoods now known as Little Armenia and Thai Town. Community and residential densities continued to increase, as original single-family houses, bungalow courts, and smaller apartment buildings were replaced with larger multi-family residential complexes.

By the 1980s, the Hollywood community was in a state of economic decline. The Community Redevelopment Agency of Los Angeles established the Hollywood Redevelopment Project Area in 1986 to encourage development in the area. Among the goals of the agency were to revitalize the historic core and preserve historically significant buildings.

Recent Development in Hollywood

By the start of the new millennium, Hollywood began to experience a resurgence that continues today. The establishment of the city's Adaptive Reuse ordinance greatly facilitated the reuse of under-utilized historical buildings into new housing. New, large-scale mixed-use projects (such as the Hollywood & Highland, which includes the Dolby Theater, the Loews Hotel, and the W Hotel at Hollywood and Vine) along with the Metro Red Line subway stations, have helped to revitalize Hollywood's streets and its economy, bringing with it an influx of new residents and tourists, higher rents, and new development pressures.

Cultural and Historical Designations and Resource Preservation Tools

Historic Preservation Overlay Zones

A Historic Preservation Overlay Zone, or HPOZ, is a designated area of the city that contains structures, landscaping, natural features or sites that have historic, architectural, cultural or aesthetic significance. The regulations of HPOZs ensure that the rehabilitation of historical structures takes place in a manner that respects its historic integrity. New development is also reviewed to assure that the character of the historical neighborhood is maintained.

The Hollywood CPA contains six existing HPOZs: Whitley Heights, Spaulding Square, Sunset Square, Melrose Hill, Hollywood Grove, and the northwestern portion of Hancock Park. In addition, the Melrose Hill Expansion Area is under study.

Historic Preservation Overlay Zones identify historic contributors and regulate on-site improvements

Craftsman homes and palm trees populate the residential streets of Hollywood Grove

Melrose Hill was built largely in the same period and architectural style

Local Designated Historic Properties: Historic Cultural Monuments

The City of Los Angeles Cultural Heritage Ordinance, enacted in 1962, has made possible the designation of buildings and sites as individual local landmarks, called “Historic-Cultural Monuments” (HCM). The Hollywood CPA contains around 190 of the City’s 1,000+ Historic-Cultural Monuments. Designation as a HCM provides official recognition and protection for Los Angeles’ most significant and cherished historical resources.

Any interested party may apply for a proposed designation of an HCM. Each nomination is reviewed by the Cultural Heritage Commission, then by the Planning and Land Use Management Committee of the City Council, and the City Council as a whole. Once a property has been designated a Monument, the Commission and its staff review permits for alteration, relocation, or demolition. The Commission can delay demolition of a Monument for 180 days and has the authority to recommend to the City Council to delay demolition for another 180 days. Locally designated cultural resources are presumed to be historically significant under the California Environmental Quality Act (CEQA). Therefore, per State law, demolition and/or alterations of HCMs are subject to review under CEQA.

The gates to Hollywoodland, HCM #20, offer a dramatic entrance to the Hollywood Hills

Designation as an Historic-Cultural Monument:

- Recognizes the building, structure, site, or plant life as important to the history of the city, state, or nation;
- Provides eligibility for the Mills Act program, providing a Historical Property Contract that can result in a property tax reduction;
- Permits use of the California Historical Building Code;
- Allows property owners to purchase and display a plaque showing that the property has Historic-Cultural Monument status;
- Requires Cultural Heritage Commission review for proposed exterior and interior alterations in accordance with the Secretary of the Interior's Standards for Rehabilitation, the nationally accepted criteria for evaluating change to historic properties;
- Allows the Cultural Heritage Commission to object to the issuance of a demolition permit for 180 days, with an additional 180 day extension possible upon approval of the City Council, thereby granting up to 360 days stay of demolition in order to evaluate preservation alternatives;
- The California Environmental Quality Act (CEQA) requires environmental review to determine if a project will cause adverse impact to character defining features (see the State Office of Historic Preservation document on CEQA and historical resources);
- Entitles Historic-Cultural Monument owners to technical assistance in complying with the Secretary of the Interior's Standards for the Treatment of Historic Properties;
- Fosters civic pride in neighborhoods and business districts and helps develop a sense of place and time.

National Register, California Register, and Locally Designated Properties

The Hollywood CPA has one of the highest concentrations of designated resources in Los Angeles. These include:

The Hollywood Boulevard Commercial and Entertainment Industry National Register District

American Legion Hollywood Post 43 (1919)

Andalusia Apartments (1926)

Bukowski Court (1922)

Casa Laguna (1928)

Château Élysée (1927)

Château Marmont (1927)

Chemosphere (1960)

Ennis House (1924)

First United Methodist Church of Hollywood (1930)

Franklin Avenue Bridge/Shakespeare Bridge (1926)

Freeman House (1924)

Gilmore Gasoline Service Station (1935)

Griffith Observatory (1935)

Griffith Park (1896)

Highland-Camrose Bungalow Village (1916- 1923)

Hollyhock House (1921)

Hollywoodland Granite Stairways and Retaining Walls (1923)

Hollywoodland Stone Gates (1923)

Hollywood Bowl (1922)

Hollywood Memorial Cemetery (1899)

Hollywood Pilgrimage Memorial Monument (1923)

Hollywood Sign (1923)

John C. Fremont Branch Library (1927)

Lake Hollywood Reservoir & Mulholland Dam (1924)

Los Feliz Heights Steps (1924)

Lovell Health House (1929)

Magic Castle (1909)

Samuel-Navarro House (1928)

Sowden House (1926)

Stahl House/Case Study House No. 22 (1960)

Storer House (1923)

Toberman Estate (1926)

Villa Carlotta (1926)

Wattles Mansion (1907)

William Mulholland Memorial Fountain (1940)

Yamashiro/Bernheimer Estate (1914)

YWCA Hollywood Studio Club (1925)

Note: this representative list of resources is subject to change as new resources become designated in the Community Plan Area. Please see the Los Angeles City Planning historic preservation website for the latest information.

Citywide Historical Resources Survey (SurveyLA)

SurveyLA identifies potentially historic properties and/or districts that appear eligible for listing in the National Register, California Register, and/or for local designation as a HCM. In 2005, the City of Los Angeles entered into a multi-year grant agreement with the J. Paul Getty Trust to complete a Citywide historical resources survey, a process of systematically identifying and gathering information on properties and neighborhoods that reflect Los Angeles' architectural, social, and cultural history. The project is managed by the staff of the Office of Historic Resources within the Los Angeles Department of City Planning (DCP) and is called SurveyLA. The survey identifies and evaluates properties according to standardized criteria for listing in the National Register, the California Register, and for local designation as HCMs and HPOZs. SurveyLA findings are subject to change over time as properties age, additional information is uncovered, and more detailed analyses are completed. Resources identified through SurveyLA are not designated resources. Designation by the City of Los Angeles and nomination to the California Register or National Register require more in-depth research, an application process, and a separate public review process. SurveyLA identifies the following resource types:

- *Individual Resources* are generally resources located within a single assessor parcel such as a residence or duplex.
- *Non-Parcel Resources* generally do not have addresses. Examples may include street trees, street lamps, landscaped medians, bridges, and signs.
- *Historic Districts* are areas that are related geographically and by theme. Districts may include single or multiple parcels depending on the resource. Examples of resources that may be recorded as historic districts include residential neighborhoods, garden apartment complexes, commercial areas, large estates, school and hospital campuses, and industrial complexes. These areas require additional analysis and field work for HPOZ determination.

Hollywood is home to a wide variety of mid-century architecture

The western portion of Sunset Boulevard features many examples of historic commercial architecture

Many older properties in Hollywood required seismic retrofitting after the 1994 Northridge Earthquake

Moorish revival architecture mixes eclectically with other historic forms

Spanish colonial revival architecture is a common style in most historic areas

Potential Historic Properties in Hollywood

Properties in the Hollywood CPA identified by SurveyLA as eligible for historic designation include single-family homes, multi-family buildings, commercial buildings, and institutional properties. SurveyLA also identifies non-parcel resources such as air raid sirens, landscaped medians, and uniform street trees that appear to be part of original neighborhood subdivisions as resources eligible for historic designation. A large number of single-family residences have been identified as appearing individually eligible for historic designation because they are representative of a particular style or because they retain character defining features of a streetcar suburb. Eligible multi-family buildings and bungalow complexes were mainly recorded as individual resources that are significant examples of the property type and/or their representative architectural style. A number of public staircases, walkways, bridges, signs, and parkways were determined to be eligible as well. Commercial buildings determined to be individually eligible for historic designation in the SurveyLA report were typically exemplary of the property type or a particular style. Additionally, a number of institutional properties including churches, schools, and government buildings were determined to be individually eligible as exemplary of the property type and their representative architectural style.

Demolition Delay

City Ordinance No. 183312 prohibits the Department of Building and Safety from issuing a building permit to demolish a building or structure 45 years or older without at least 30 days prior public notice. Required public notice includes notifying abutting property owners, the Council District Office, and a conspicuous public posting located near the entrance of the property. During the noticing period, interested stakeholders have an opportunity to file an application for HCM designation, a separate process. If the HCM nomination is accepted for review by the City's Cultural Heritage Commission, all permits for the property are frozen until a determination is reached. An approval and adoption of the designation may take up to 180 days. Once a property nomination is approved, the Cultural Heritage Commission may opt to delay demolition for 180 days and has an opportunity to extend the delay by an additional 180 days, given City Council approval. This time provides an opportunity for preservation alternatives to be found or negotiated for the historic property.

Notable Historical and Cultural Districts and Features

The many small neighborhoods of Hollywood are as noteworthy as the glamorous downtown core. Hollywood has emerged in the 21st century as an extraordinarily diverse community made up of a mosaic of neighborhoods which are culturally, architecturally and topographically distinct. These include neighborhoods that have sought formal recognition from the City of Los Angeles, such as Thai Town and Little Armenia in East Hollywood, which reflect settlement patterns of cultural groups, residential communities in the Hollywoodland and Mulholland Parkway Specific Plans (see Figure 1-4), and a number of historic districts scattered throughout Hollywood. Hollywood’s notable districts appeal to a wide range of visitors, making them regionally and even globally significant.

Hollywoodland and Mulholland Scenic Parkway Specific Plans

The Hollywoodland and Mulholland Scenic Parkway Specific Plans were enacted to protect the scenic features and residential character of several hillside communities (Figure 1-4). The Hollywoodland Specific Plan also protects the unique architectural styles of this neighborhood – traditional cottages and villas which create a European village flavor. The Mulholland Scenic Parkway Specific Plan protects Mulholland Drive and the surrounding area that traverses the Santa Monica Mountains, a resource recognized as a National Recreation Area.

Hollywood Signage Supplemental Use District (SUD)

The Hollywood Signage Supplemental Use District (Figure 1-4) was established to promote signage which complements the historical architecture and signage of Hollywood Boulevard and allows new sign technologies which are well designed and carefully located. New signs are required to meet the regulations of this SUD.

Walk of Fame

The Walk of Fame, which spans multiple city blocks along Hollywood Boulevard and Vine Street, serves as a tribute to actors, directors, and other contributors to the entertainment industry. It was initially proposed by members of the Hollywood Chamber of Commerce in 1953. Sponsored by the Hollywood Property Owners Association and the Hollywood Improvement Association, stakeholders worked with the City to create an assessment district in 1958 to construct the Walk and beautify the streetscape. The boulevard features many of Hollywood’s major theatres – Graumann’s Chinese Theatre, the Pantages, and many hotels, notably Roosevelt Hotel, which served as the

Trees, bridges, lamp posts, and landscaping all add important historical context to neighborhoods

Neighborhood businesses in Thai Town.

Deodar Cedars and large parkways create a scenic drive along Los Feliz Boulevard

original home to the Oscars; all markers of Hollywood's ties to the entertainment industry. Twenty years later, in 1978 the Walk of Fame was designated a Historic-Cultural Monument by the Cultural Heritage Board and the City Council.

Theatre Row

Within the Media District of Hollywood there is a stretch of Santa Monica Boulevard between McCadden Place and El Centro Avenue that is home to a number of critically-acclaimed theatre companies. Known as Theatre Row, this area includes over a dozen live theatres that have a maximum of 99 seats, many of which have been in operation for decades. It is the highest concentration of live theatres in Los Angeles. Hollywood Theatre Row has served as an important cultural incubator. The concentration of so many theatres in one area has encouraged a sense of collaboration and community among artists, which further enriches the cultural fabric of the City.

Thai Town

In 1999 the City Council designated 6 blocks in East Hollywood along Hollywood Boulevard between Normandie Avenue and Western Avenue as "Thai Town." Thai Town serves as a major economic and cultural hub for the Thai Community of Los Angeles, hosting a high concentration of Thai residents, businesses and cultural activities. This designation has promoted neighborhood pride, multi-cultural/ethnic exchange, and tourism, and lends the Thai community a greater voice in Los Angeles and Southern California.

Little Armenia

Designated as "Little Armenia" by the City Council in 2000, this East Hollywood neighborhood serves as an epicenter of the Armenian community in Los Angeles and is a major economic and vibrant cultural hub for the Armenian community. This area contains a high concentration of Armenian businesses, residents, and social and cultural institutions including schools, churches, social and athletic organizations.

Other Important Features

Trees, bridges, street lamps, landscaped medians, signs and other historic features contribute to the unique character of Hollywood neighborhoods. For example, in 1935 the Los Feliz Improvement Association and the Los Feliz Woman's Club planted Deodar Cedar Trees in the parkways along Los Feliz Boulevard between Riverside Drive and Western Avenue. These Cedars have since grown into large, beautiful trees which define the character of Los Feliz Boulevard. In 1970, the City declared these trees an HCM. Similarly, the Shakespeare Bridge, a gothic-style bridge on Franklin Avenue, is a beloved neighborhood landmark of Franklin Hills. The bridge

was designated an HCM in 1974. The Deodar Cedar Trees and Shakespeare Bridge are two examples of many notable historic and cultural features in the Hollywood Community Plan Area.

Historic Preservation Goals and Policies

The Hollywood Community Plan identifies areas where the existing uses or features are desirable and appropriate and where infill development should reinforce this existing historic or cultural context. These areas include regionally significant entertainment industry employment districts and areas with distinctive cultural resources and historic neighborhoods (refer to Figure 1-4, Overlay Zones, Specific Plans, and Supplemental Use Districts).

Goal P.1: Honor Hollywood’s legacy through the preservation of the built environment that reflects Hollywood’s cultural, social, economic, and architectural history.

Policy

- P1.1 **Significant neighborhoods and districts.** Support the preservation of culturally and historically significant neighborhoods and districts. (P28, P29, P30, P31, P68)
- P1.2 **Adaptive reuse.** Promote the preservation and adaptive reuse of existing building stock, especially for designated or eligible historical resources. (P65)
- P1.3 **Designated and potentially significant resources.** Preserve designated Historic Cultural Resources and further study eligible resources as potentially significant resources. (P38)
- P1.4 **Historical buildings.** Protect designated and eligible historical buildings in the Regional Center. (P33, P38)
- P1.5 **Distinctive street features.** Protect distinctive features of prominent streets in Hollywood, such as the Walk of Fame, a recognized Historic-Cultural Monument of the City of Los Angeles. (P34, P66, P138)
- P1.6 **Study preservation tools.** Support the study of R1 Variation Zones, Community Design Overlays (CDOs), or a Community Plan Implementation Overlay (CPIO) for neighborhoods that retain a cohesive character but are not eligible to become Historic Preservation Overlay Zones.

- P1.7 **Preserve designated resources.** Any development project which involves designated historical resources, including City of Los Angeles Historic-Cultural Monuments, shall conform with the Secretary of the Interior's Standards for Rehabilitation. (P35)
- P1.8 **Complementary design.** Encourage the design of new buildings that respect and complement the character of adjacent historical resources through design standards outlined in implementation tools such as Community Design Overlays (CDOs), or a Community Plan Implementation Overlay (CPIO). (P36, P37, P38)
- P1.9 **Land use and zoning.** Maintain appropriate General Plan Land Use designations and zoning in existing historic districts which are either listed in, or are eligible to be listed in the National Register of Historical Resources. Promote infill development that matches the scale of historical resources within each district, including the following: height, massing, setbacks, stepbacks, and development pattern. (P39)
- P1.10 **Height limits.** Maintain height limitations on commercial zones that border designated or eligible historic neighborhoods. Encourage the design of new buildings that respect and complement the character of adjacent historic neighborhoods. (P40)
- P1.11 **Financial resources.** Support efforts to identify financial resources for rehabilitation of historical resources. Promote the use of the City's Mills Act Historical Property Contract Program, the Federal Historic Rehabilitation Tax Credit, and the California Historical Building Code. (P67)
- P1.12 **Documentation.** Support ongoing opportunities to document Hollywood's history and architectural legacy and share that history with the community. (P41, P68)
- P1.13 **Preserve murals.** Support efforts to preserve and restore the rich inventory of murals found in Hollywood. (P32)

NO RIGHT TURN ON RED

Cars, bicycles, pedestrians, and transit all mix in the Regional Center of Hollywood

Mobility And Connectivity

Mobility is critical to support the diverse range of places and activities in Hollywood. Providing safe and convenient access throughout Hollywood’s neighborhoods addresses several of the guiding principles of this Plan. A safe, accessible circulation system reinforces land use policies and connects people to jobs, homes, and services. Respectively, land use and urban design policies can support a range of mobility options by creating an environment that is friendly to people walking, rolling, biking, and riding transit.

The mobility system should be person-focused. Safety for all users is a priority of the Hollywood mobility system. Ensuring safety will improve access and health outcomes in Hollywood. Several streets in the CPA are identified on the City’s High Injury Network, demonstrating the need for safety improvements.

Because of its density, Hollywood has great potential for walkable neighborhoods

Encouraging more people to walk, bike, or ride transit in Hollywood will help make the community more livable by reducing pollution and greenhouse gas emissions and reinforcing sustainable land use policies. Walking should be the primary form of mobility within Hollywood’s regional center and pedestrian friendly design is a priority throughout Hollywood. Every person in Hollywood is, at some point a pedestrian. An enhanced pedestrian environment will not only improve safety and access, but will also support economic growth by making retail and other corridor uses comfortable and attractive.

The Mobility Chapter integrates citywide policies established in the General Plan Framework Element and Circulation Element, with community-specific land use and transportation objectives. The Circulation Element, Mobility Plan 2035, (adopted in 2015) is an update to the 1999 Transportation Element and defines the City’s transportation goals and policies to provide a first-class, multimodal transportation system that supports a healthy, sustainable and economically prosperous city in which jobs, services and amenities are easily accessible to all residents and visitors, and which respects the City’s unique communities and neighborhoods.

Walkable neighborhoods ensure safe and accessible streets for users of all ages and abilities

Our City’s streets serve many different roles within a community. They are a means to get people to places they need to go—via bus, light rail, car, motorcycle, scooter, bicycle, on foot, and more. Streets are also places to gather, recreate, shop, exercise, and meet friends. They are the backbone of a healthy community and an indicator of a local neighborhood’s culture and values. Streets must also provide mobility for our businesses, which often rely on the timely delivery of merchandise to their stores or the ability to deliver services in customer’s homes or offices. Furthermore, streets accommodate utility and sewer lines as well as collect and transport water on rainy days. Simply stated, daily life demands a great deal from our streets; thus, the sustainable future of our neighborhoods depends on a network of roadways and pedestrian paths of travel that balance the needs of these multiple interests and functions.

Circulation System

The Community Plan Area is well served by a circulation system of highways (freeways or high capacity roadways), arterials (moderate capacity roadways), collector streets and local streets. The construction of the Metro Red Line has enabled the Community Plan Area to emerge as a “transit rich” environment providing a robust public transit system including Metro Rail service, Local and Rapid bus service, as well as LADOT DASH bus service (local circulator). The Community Plan Area is served by the Ventura Freeway (CA-134) to the north, the Golden State Freeway (I-5) to the east, and bisected by the Hollywood Freeway (CA-101).

The Circulation System (Figure 6-1) delineates the Community Plan Area’s street network and establishes right-of-way widths and dedication requirements. The Circulation System map establishes the designated street classifications for arterial streets (Boulevards and Avenues), collector streets, scenic highways, and divided streets, as well as depict modified segments as well. Scenic Highways have special controls for protection and enhancement of scenic resources. Any changes to street designations require a general plan amendment.

The circulation system serves pedestrian, bicycling and other alternative modes of travel as well. All of these modes are discussed in the following sections. For additional mobility goals and policies specific to pedestrian uses, sidewalks, and streetscapes, see Chapter 4, Public Realm, Parks, and Open Space.

The Plan envisions a circulation system that provides safe and convenient passage for all modes

Street Classifications

Streets are organized by official standard street classifications established in the Mobility Element, and street dimensions, depicted in the Bureau of Engineering Standard Plan Forms, as adopted by the City Planning Commission. The purpose of standardizing street dimensions is to assign appropriate street right-of-way widths — which accommodate features such as sidewalks, street parking, travel lanes, and medians — for each street type. Boulevards and Avenues are commonly referred to as arterial streets while collector and local roads are referred to as non-arterial streets. Mobility Plan 2035, as an update to the 1999 Transportation Element, replaces Standard Plan Form S-470-0 with S-470-1 and includes the following street types:

Boulevards I and II

Boulevards, formerly Major Highway – are designed to carry high volumes of traffic at relatively high speeds. A Boulevard I typically includes 136 feet of right-of-way with three lanes of traffic in each direction. A Boulevard II typically includes 110 feet of right-of-way with two lanes of traffic in each direction. Access to individual parcels along the street should be limited.

Avenues I, II and III

Avenues, formerly Major Highway Class II or Secondary Highways, are intended to supplement the through-traffic carrying characteristics of Boulevards, and are designed for fewer daily trips than a Boulevard and typically provides more access to individual parcels. The road-bed is commonly 70 feet for Avenue I, 56 feet for Avenue II and 46 for Avenue III. Avenues typically have two travel lanes in each direction, with left turn lanes at signalized intersections. Local serving on-street parking should be encouraged to support pedestrian scale commercial along Secondary Highways.

Collector Streets (standard, industrial, and hillside)

Collector Streets are moderate-volume, medium-speed roadways that provide access between neighborhoods and higher volume arterial streets. Collector streets are not intended to accommodate “thru traffic” seeking to avoid congestion on parallel arterial streets.

Local Streets (standard, industrial, and hillside)

Local Streets are designed to allow local traffic access to individual properties and/or destinations.

Safe routes to school encourage walking

Traffic calming measures make neighborhoods friendly to people walking and biking

Complete Streets

“Complete streets” are roadways designed and operated to enable safe, attractive, and comfortable access and travel for all users. Pedestrians, bicyclists, equestrians, motorists, and public transportation users of all ages and abilities are able to safely and comfortably move along and across a complete street. In 2007, the State of California adopted the “Complete Streets Act,” which requires local municipalities to plan for the routine accommodation of all roadway users when updating General Plans.

Mobility Goals and Policies

The Hollywood Community Plan Area is an urbanized community substantially developed at a range of densities from high to low scale. It includes hillside areas developed with housing, as well as large hillside areas devoted to open space. The Hollywood Community Plan Area represents the City’s second largest regional center and #1 tourist attraction, drawing over 25 million tourists annually. Hollywood is also the only Community Plan Area with a wild regional-serving park, Griffith Park, thereby providing an invaluable open space amenity to residents and visitors.

The implementation of enhanced connections to these regional assets and other local serving amenities represents an opportunity that is of high community interest. In realizing multi-modal connections, many of the Community Plan Area’s streets are in need of enhancements such as better and wider sidewalks, bike lanes and streetscape elements such as street trees, lighting, shade structures, benches, bike racks, among others.

Existing improved streets, however, have little additional land available for widening to accommodate other modes. Hollywood’s street network is significantly influenced by the area’s land development history, with many streets not meeting contemporary roadway width or sidewalk standards, and is further restricted for modification by the historic build out of property frontage. On these streets, new facilities for one mode, such as a wider sidewalk or a bicycle lane, may have to come at the expense of another, such as street parking or a travel lane for automobiles, or transit. The street network in some of the area’s hillside communities contains remnants of historic trolley rights of way that influence roadway layout, creating curves, cuts, and inconsistencies in what might otherwise be a grid. Recognizing that all streets cannot serve all purposes, this chapter identifies priorities for certain key arterials, streets or street segments to better assist planners, engineers, developers, and the community in making these difficult choices.

The following goals and policies seek to address concerns and ensure a well-functioning mobility system for Hollywood.

Goal M.1: Safe, accessible, and convenient mobility options for users of all ages and abilities.

Policy

M1.1 **Mobility for all modes.** Maintain the street system to facilitate the mobility of all modes. Support the maintenance and rehabilitation of all Streets and Highways.

- M1.2 **Enhanced Network treatments.** Consider benefits of moderate, moderate plus, and comprehensive treatments for Mobility Plan 2035 Enhanced Networks. Consider treatments suggested by Mobility Plan 2035 for the Transit Enhanced Network, Bicycle Enhanced Network, Vehicle Enhanced Network, and Neighborhood Enhanced Network.
- M1.3 **Prioritize safety improvements.** Prioritize and implement intersection and corridor safety improvements such as those identified in the Vision Zero High Injury Network (HIN) and Safe Routes to School, addressing high risk sites throughout the Hollywood Community Plan Area.
- M1.4 **Emergency vehicles.** Consider the mobility needs of emergency service vehicles when planning a multi-modal transportation system. (P139)
- M1.5 **Street dedications.** Support street dedications that comply with Mobility Plan 2035.
- M1.6 **Ingress and egress.** Encourage new development to design the site's vehicular ingress and egress to minimize interference with pedestrian and bicycle facilities and bus traffic. (P47)
- M1.7 **High volume venues and special events.** Support LADOT efforts to manage traffic and circulation needs resulting from the Hollywood Bowl, film premieres and award shows, theaters, and other events that require planning and execution of Traffic Management Plans. (P140)
- M1.8 **Peak hour parking restrictions.** Discourage peak hour parking restrictions on streets with high volumes of bicyclists. Consider peak hour parking restrictions or no on-street parking on designated segments of Boulevards and Avenues in the Vehicle Enhanced Network that facilitate travel for rush hour freeway commuters.
- M1.9 **Residential neighborhoods.** Continue to implement traffic calming measures in residential neighborhoods, including hillsides, which are impacted by speeding and/or commuter cut-through traffic, while improving pedestrian and bicycle circulation. (P69, P70, P144)
- M1.10 **Neighborhood traffic management.** Support the establishment of a neighborhood traffic management plan as a potential mitigation, upon approving a major development project. (P71)
- M1.11 **Street maintenance.** Implement on-street maintenance work during non-peak days and hours. Park street maintenance vehicles, equipment, materials, supplies, etc. away from Avenues I, II, and III during weekdays.

Motorized Vehicles and Greenhouse Gas Emissions

Gasoline and diesel powered motor vehicles contribute significantly to greenhouse gas emissions measuring localized air pollution and resulting in long-term climate change. According to the California Air Resources Board, 2006 Greenhouse Gas Inventory, tail-pipe emissions from motor vehicles accounted for 35.3 percent of the greenhouse gas emissions in California. Reducing the number of vehicle trips (trips) and the length of vehicle trips (vehicle miles of travel, or VMT) becomes an important sustainability goal for residents' health and quality of life.

Alternative Mobility Options

Alternative mobility options can be identified and supported through Transportation Demand Management (TDM) Strategies. TDM strategies decrease the load of vehicles on the transportation system by providing incentives for the use of transit, shared vehicles, and shared commute programs. Policies are listed here to facilitate the use of transit and shared car options, which include taxis, rental cars, shared cars, van pools, and shuttles. The Community Plan also recommends a nexus study as a first step toward developing a traffic impact fee, and the study of other financing mechanisms to support mobility options.

Capital Improvements

World class cities require investment in capital improvements necessary to maintain the transportation infrastructure. The Community Plan together with the Mobility Element identify potential capital improvements throughout the Hollywood Community Plan Area.

M1.12 **Park once strategy.** Collaborate with the business community to improve parking services including shared-parking facilities and public valet services in appropriate locations to more effectively use the overall parking supply and implement a “park once and walk” strategy for commercial districts.

Goal M.2: A transportation system that provides abundant convenient alternatives to single-driver motor vehicles.

Policy

- M2.1 **Sustainable mobility options.** Encourage sustainable mobility options. Support transportation options for persons who do not have cars or want to use their cars less and promote the use of taxis, rental cars, shared cars, shared bicycles, van pools, shuttles, secure bicycle parking, consolidated pick-up and drop-off areas for Transportation Network Companies (TNCs), and other short trip and first/last mile connections to transit. Encourage the location of these services and bus layovers near Metro Rail Stations and major transit nodes.
- M2.2 **Shuttles and shared rides.** Support expansion of shuttle and shared ride services around Hollywood, especially to and from significant trip generators and destinations, like event spaces, destination parks, large residential, commercial, industrial, and mixed use projects, and Metro Stations. Encourage large residential, commercial, industrial and mixed use projects to provide shuttle services for their tenants or employees to Metro stations. (P43, P74)
- M2.3 **Mobility Hubs.** Coordinate with the Mobility Hubs Program to plan, design, construct, operate, and maintain first/last mile improvements near five existing Metro Rail stations.
- M2.4 **Incentives for transit users.** Encourage incentives that benefit transit users. (P44, P45, P46)
- M2.5 **Transportation demand management.** Support implementation of transportation demand management strategies to minimize vehicle trips and improve mobility. (P72, P73)
- M2.6 **Benefit Assessment Districts.** Coordinate with Business Improvement Districts and other community-based organizations to promote the establishment of Benefit Assessment Districts that can fund capital improvements for transit and shared car options.

- M2.7 **Transportation Management Organizations.** Support the establishment of a Hollywood Transportation Management Organization (TMO) to coordinate local transportation demand management activities and conduct program and project evaluation.
- M2.8 **Trips to work and TDM.** For non-residential developments, encourage employers to offer employees flexible work schedules and off-site telecommuting facilities to minimize peak hour congestion. Encourage Transportation Demand Management (TDM) Plans including Transportation Management Organizations (TMOs) membership for large projects. TDM Plans should establish parameters that include, but are not limited to, vehicle trip caps, a program for monitoring vehicle trips, and a system of incentives and penalties for meeting, or failing to meet, vehicle trip reduction goals.

Goal M.3: A world class transportation system supported by a robust and well planned capital improvement program.

- M3.1 **Capital improvements.** Support the study of and investment in capital improvements of the transportation system. (P75, P76, P77, P78, P79, P80, P81, P86)
- M3.2 **Impact fee.** Support the adoption of a transportation or mobility impact fee to fund multi-modal transportation enhancement strategies. (P42)
- M3.3 **Connection between US Route 101 and State Route 134.** Coordinate with Caltrans and other local agencies to improve the connection between the US 101 Freeway and the SR 134 Freeway. Pursue the addition of connector ramps to connect the 101 Freeway south of this interchange with the 134 Freeway east of this interchange, to minimize overflow of regional traffic onto local streets, such as Forest Lawn Boulevard, Barham Boulevard and Lankershim Boulevard. (P87)
- M3.4 **US Route 101 Cap Park.** Support the construction of pedestrian pathways, bicycle paths and facilities, and the reconnection of Van Ness Avenue, as part of any park space built over the 101 Freeway.
- M3.5 **Current travel information.** Utilize electronic media to provide motorists current traffic information. Support the use of Variable Message Signs or similar technologies along key arterials. Implement Intelligent Transportation Systems (ITS) improvements and install upgraded Traveler Information System to better inform motorists of approaching congestion, associated with street closures and special events, and alternate routes.

Transportation Systems Management

TSM strategies increase the efficiency of existing transportation infrastructure through traffic engineering and traffic operation control, by monitoring and synchronizing traffic signals, imposing peak period parking restrictions, and making improvements to intersections. Mobility Plan 2035 recommends TSM strategies to apply throughout the Hollywood Community Plan Area, with several locations highlighted for attention.

Bicycle racks on buses provide a seamless transition for multi-modal trips

Transportation Demand Management (TDM)

Transportation Demand Management (TDM) is the term given to a variety of measures that encourage people to change their mode or time of travel or not make the trip at all (e.g., ridesharing, pricing incentives, parking management and telecommunication). TDM measures and services incentivize alternatives to the single-occupant vehicle to manage congestion and often include the following:

- Formation of a Transportation Management Association
- Merchant incentives
- Preferential parking
- Encourage employers to participate in Metro's B-Tap program
- Parking management strategies to incentivize ridesharing
- Park-and-ride shuttle services to activity centers and special events
- Public parking structures
- One-stop parking (valet service system)
- Incentives for walking and bicycling
- Adequate and appropriate lighting for pedestrian, vehicular, bicycle and transit uses
- Bicycle access and parking facilities
- Flexible work hours
- Carpooling and vanpooling
- Local business centers to facilitate work at home strategies
- Technology and marketing events to enhance the use of transit
- Enhanced transit services, including a transit center, and improved transit safety
- Strategies that bridge the first/last mile gap between transit stop/station and a person's origin/destination

- M3.6 **Online access to travel information.** Support the development of online Real-Time Traveler Information which can be accessed by cell phone or handheld devices, to provide information about parking access, street closures, construction-related traffic impacts, bus route changes, traffic conditions, taxi stand and first/last mile service locations, valet parking, etc.

Transit

The following policies recommend a number of transit improvement policies to support and increase the percentage of commuters choosing transit over the solo driver trip, including preferential bus lanes, street improvements to facilitate bus movement, and transit commuter amenities at transit stops.

Improving access to transit is accomplished by land use policies which direct growth to Plan areas accessible by transit, and other policies which make transit use more safe and attractive. Acknowledging that a transit trip often involves more than one segment and more than one mode of travel, the following policies facilitate the seamless transfer from one mode of travel to another (such as the transfer from bus to bicycle, from Metro to taxi, or from Metro Rail to DASH).

Hollywood's transit system includes the Red Line Metro Rail, Metro Rapid Bus lines, neighborhood DASH lines (refer to Figure 6-2, Major Public Transit Corridors), one Commuter Express Bus and numerous local bus lines, including both regular and Metro Owl Service lines to provide 24-hour coverage.

Transit Providers

Metro Rail

The Metro Red Line is a subway line which travels between Union Station in downtown Los Angeles and North Hollywood, making five stops in Hollywood, including Vermont/Santa Monica, Vermont/Sunset, Hollywood/Western, Hollywood/Vine and Hollywood/Highland.

Metro Rapid Bus Service

Metro Rapid buses are buses which provide more frequent service, make fewer stops, and have signal priority. They are located on major transit corridors such as Vermont and Western Avenues, and Hollywood and Santa Monica Boulevards.

LEGEND

Figure 6-2
Major Public Transit Corridors
Hollywood Community Plan Area

Not to Scale

Numerous transit providers serve the Plan Area including LADOT Commuter Express and DASH buses

The Metro Red Line enables regional access to Hollywood without relying on a car

The Vermont/Sunset Metro station provides easy access to nearby medical facilities.

Local Bus Service

There are over 20 local buses which service Hollywood on fixed routes and stop at all stops on the bus line upon passenger request.

Commuter Express Bus

A Commuter Express Bus line provides transit service to the San Fernando Valley/ Thousand Oaks area from a bus stop at Western Avenue and the 101 Freeway.

DASH Service

DASH buses are small buses which circulate around one neighborhood or center and make many stops. DASH service areas in Hollywood include the Fairfax, Hollywood/West Hollywood, Hollywood, Beachwood Canyon and Los Feliz lines.

Goal M.4: A comprehensive transit system that provides safe and efficient access to, around and from Hollywood that minimizes automobile dependence.

- M4.1 **Improvements for transit users.** Support public transportation improvements that increase the quality, ease, safety, and affordability of travel for transit users. (P88)
- M4.2 **Metro Rail expansion.** Support the expansion of the Metro Rail system. Support routes that provide connections from Hollywood to the Westside and from Hollywood to destinations south, including LAX.
- M4.3 **Transit corridors and TEN.** Support improvements, projects, and initiatives that work towards achieving high quality transit corridors on the designated Transit Enhanced Network. Support preferential bus lanes and work with other departments and agencies to study and pilot bus rapid transit where appropriate.
- M4.4 **Intermodal linkages.** Support the development of coordinated intermodal strategies to implement linkages to future public transit services.
- M4.5 **Mobility Hubs.** Support the development of Mobility Hubs at key destinations.
- M4.6 **Major transit stops.** Provide enhanced amenities at major transit stops, including widened sidewalks, where possible, pedestrian waiting areas, transit shelters, comfortable seating, enhanced lighting, information kiosks and wayfinding signage (directing pedestrians to transit stops and stations, and from transit facilities to points of interest in the surrounding neighborhood), advanced fare collection mechanisms, shade trees and

landscaping, bicycle access, self-cleaning restrooms, and enhanced, ADA compliant street crossing elements adjacent to transit stops and stations (ie. enhanced crosswalks, crossing signals, and accessible ramps). Support transit information kiosks at major transit stops, transfer points, and activity centers to supply travelers with real time information about transit services. Consult Mobility Hubs Project plans to coordinate improvements.

- M4.7 **Access, mobility, and connectivity.** Support the development of strategies and pilot programs that improve transit access, multimodal mobility, and connectivity. Support improvements that create an easy and convenient user experience by providing on-street access for people walking and bicycling, improving transit waiting areas, and enhancing pedestrian and bicycle routes connecting to transit waiting areas, Mobility Hubs, and other passenger facilities at Metro Red Line Stations.
- M4.8 **Pedestrian features near transit nodes.** Encourage projects located near transit nodes and Mobility Hubs to provide people-oriented built environment features such as shade trees, countdown crosswalk signals, bus shelters, bicycle racks or lockers, and enhanced or decorated crosswalks.
- M4.9 **Monthly parking leases.** Encourage commercial, residential and mixed-use projects located within walking distance of a Metro Station to offer monthly parking leases to Metro commuters.
- M4.10 **Pick up zones.** Support the location of taxi, bus stop, and bus layover zones, shared and on-demand mobility, shuttles, and passenger pick up zones on corridors near Metro stations and major pedestrian destinations. (P89, P90)
- M4.11 **Street improvements for buses.** Support street improvements that help facilitate the movement of buses, such as jog eliminations, bus bays or turnouts, street signage, striping, and colored pavement.
- M4.12 **Mobility service technology.** Support transportation technologies that provide users with access to mobility services as an alternative to private vehicle ownership.
- M4.13 **Priority parking.** Encourage new developments, especially those located near a Metro station, to provide exclusive parking areas for shared cars and/or exclusive parking areas/waiting areas for carpools/vanpools, taxis, and Transportation Network Companies (TNCs).
- M4.14 **On-street parking for shared vehicles.** Support the dedication of on-street parking spaces for shared cars near Metro stations.

- M4.15 **Direct pedestrian connections.** Where feasible, encourage new development located adjacent to Metro stations to prioritize transit and provide direct pedestrian connections to the Metro Subway Station Platform/ Mezzanine, in consultation with Metro, Department of Transportation and the Department of City Planning.
- M4.16 **Metro review.** Development within 100 feet of a Metro facility will require Metro review and approval, including compliance with Metro’s Development Guidelines. (P48)

Developments can provide bike rooms for their tenants

Bicycling

Bicycle travel is an important and growing part of the mobility system in Hollywood (refer to Figure 6-3, Bicycle Network). Mobility Plan 2035 has proposed a Bicycle-Enhanced Network (BEN), which is a selection of streets that provide comfortable and safe routes for localized travel of slower moving modes such as bicycling. Bicycles are used for short trips or for parts of longer trips. Metro policies enable bicyclists to store their bicycles at Metro Stations, take bicycles on board the Metro subway and load their bicycles onto the front of buses. The Hollywood Community Plan contains policies to support the needs of bicyclists for safe bikeways and convenient bike storage, bicycle accessories and amenities.

Goal M.5: A safe and integrated bicycle network that provides access to transit and key destinations.

Policy

- M5.1 **Safety and convenience.** Support and encourage bicycling as a mobility option by supporting infrastructure, facilities, and programs that create a safe and convenient environment to ride bicycles.
- M5.2 **Funding and construction.** Encourage funding and construction of safe, low-stress, connected, and attractive bicycle facilities. Support the implementation of the Bicycle Enhanced Network (BEN). Support facilities for people walking and biking to residential neighborhoods, schools, open space areas, neighboring cities and employment centers.
- M5.3 **Protected bicycle lanes.** Support protected bicycle lanes in identified segments of the Bicycle Enhanced Network.
- M5.4 **Bikeway connections.** Connect existing and proposed bicycle facilities such as bike paths, protected bike lanes, bike lanes and bike routes, in the Hollywood Community Plan Area to bicycle facilities in other communities, where possible.

Parking facilities like bicycle corrals connect people to parks, large venues and more

Bicycle Friendly Streets and Neighborhood Streets offer special treatments and slower speeds for people walking and biking

High Injury Network

The Community Plan and the Mobility Plan 2035 include goals and policies aimed at creating a safer transportation environment for all mobility users, in particular the roadway's most vulnerable users, such as bicyclists and pedestrians. Through its Vision Zero initiative, the City has identified a High Injury Network (HIN) (Figure 6-4) spotlighting priority intersections and corridors with a high concentration of traffic collisions that result in severe injuries and fatalities, with an emphasis on collisions involving people walking and bicycling. The Community Plan supports implementation of safer bicycle and pedestrian facilities on the High Injury Network streets segments within the Hollywood Community Plan Area.

M5.5 **Bikeway connections to LA River.** Connect bicycle facilities such as bike paths, protected bike lanes, bike lanes and bike routes by the Los Angeles River to bicycle facilities in central Hollywood.

M5.6 **Bikeway connections to Metro Rail.** Support bikeway improvements connecting Metro Rail stations to facilitate the use of Metro Rail by bicyclists.

- Support Metro efforts to supply secure bicycle parking at or near Metro Rail stations.
- Support Metro efforts to maintain and expand space within train car for bicycles during both on- and off-peak hours.

M5.7 **Markets and shopping centers.** Support the provision of bicycle and pedestrian facilities at markets and shopping centers.

M5.8 **Parking and shower facilities.** Support the provision of short and long term bicycle parking and shower facilities in new non-residential development and municipal buildings, as required by LAMC 12.21 A 16. (P91)

M5.9 **Access to large venues.** Support bicycle access to large entertainment venues, such as the Hollywood Bowl. Provide secure and free or affordable bicycle parking at venues.

M5.10 **Routes.** Maintain existing planned bicycle routes and consider future connections and routes. (P92)

Class I Bike Path:

- The Los Angeles River Bike Path

Class II Bike Lanes:

- Forest Lawn Drive between Barham Boulevard and Zoo Drive
- Los Feliz Boulevard between Crystal Springs Drive and Griffith Park Boulevard
- Sunset Boulevard between Hillhurst Avenue and Santa Monica Boulevard
- Mulholland Drive between Laurel Canyon Boulevard and the 101 Freeway
- Griffith Park Boulevard between Los Feliz Boulevard and Hyperion Avenue

Class III Signed Bike Routes:

- Zoo Drive between Forest Lawn Boulevard and Crystal Springs Drive
- Crystal Springs Drive between Zoo Drive and Los Feliz Boulevard

M5.11 **Bicycle lane improvements.** Support the improvement of bicycle lanes on the following streets: (P49)

- Fountain Avenue between La Brea Avenue and Sunset Boulevard
- Fairfax Avenue between Hollywood Boulevard and Fountain Avenue
- Fairfax Avenue between Willoughby Avenue and Melrose Avenue.

M5.12 **Opportunities for improvements.** Coordinate with the Department of Transportation to identify opportunities for providing the following bicycle facilities and improvements:

- expanded bicycle lanes, bicycle routes and bicycle friendly streets
- bicycle friendly drainage grates parallel to the path of travel
- directional/wayfinding signage
- bicycle signals and/or push buttons accessible from the path of travel
- bicycle loop detectors
- wide outside curb lanes
- wide buffers from parked vehicles to avoid the “door zone”
- use of “bikes may use full lane” rather than “share the road” signs in construction zones, consistent with LADOT standards

Efficient management of parking is especially important in high volume areas like the Regional Center

Parking Management

Mobility Plan 2035 recognizes that there is a strong demand for parking resources in Hollywood, but that at any given moment many available parking spaces remain unoccupied. Acknowledging that existing parking resources are underutilized, Mobility Plan 2035 supports parking policies which allow flexibility in the application of existing parking requirements to improve the utilization of the existing parking supply and land in Hollywood.

Mobility Plan 2035 recommends the creation of a parking management district in the Regional Center to allow for evening parking on lots and structures for banks and other similar uses that are closed in the evening. Vehicle Parking Assessment Districts are proposed to finance the improvement of existing public parking structures and fund the construction of new public/private parking structures, where needed.

Screening above ground parking lots with greenery makes for a more pleasant walking experience

Not to Scale

Goal M.6: A well-managed parking supply where parking resources are used efficiently.

- M6.1 **Efficient management.** Improve utilization and management of existing public parking supply. Support their use and encourage shared parking, market-driven pricing, and other parking innovations to ensure parking efficiency. (P50, P51, P93, P141)
- M6.2 **Resources in Regional Center.** Maintain appropriate supply of publicly accessible parking resources in the Regional Center of Hollywood.
- M6.3 **Flexibility in requirements.** Encourage flexibility in parking requirements within parking management districts or when a public parking facility is located within walking distance of a proposed development. For example, encourage the 24-hour use of offsite parking spaces.
- M6.4 **Sharing.** Encourage the sharing of parking resources, for example, by new development and shared use of public agency parking facilities or uses that do not utilize parking 24 hours.
- M6.5 **Priority parking.** Encourage residential, commercial and mixed-use projects to provide exclusive parking areas for shared cars, and/or exclusive parking areas/waiting areas for carpools/vanpools.
- M6.6 **Peak hour parking restrictions.** Discourage peak hour parking restrictions on streets in older residential neighborhoods which have limited off-street parking.
- M6.7 **Parking replacement.** Encourage projects located within the Regional Center to consider replacing publicly available parking spaces which are lost to new development by any of the following means:
- on-site spaces
 - off-site spaces obtained through private leasing arrangements
 - off-site spaces obtained through alternative parking programs such as a parking management district.
- M6.8 **Excess parking for public use.** Consider requiring residential, mixed-use or commercial projects that request parking spaces which exceed the minimum required to make the additional requested spaces available for use by the general public.
- M6.9 **Metro adjacent projects.** Consider reductions in parking requirements for projects located within 1500 feet of a Metro Rail station.

- M6.10 **Parking leases for Metro commuters.** Encourage property owners with excess parking resources located within walking distance of a Metro station to offer monthly on-site parking leases to Metro commuters.
- M6.11 **On-street parking.** Maximize the use of on-street parking spaces in commercial areas. (P94)
- M6.12 **New lots and structures.** Support construction of new parking lots and structures located in high demand areas that share spaces with multiple uses and adhere to design standards. New parking structures should be built to be adaptive to a future non-parking use. (P95, P96, P97)
- M6.13 **Design.** Encourage projects to minimize negative impacts of visible, above-grade, structured parking. (P145)
- Consider requiring ground-floor commercial uses in off-street parking facilities located in commercial areas.
 - Encourage projects to provide required parking spaces in underground facilities.
 - When parking is provided above grade, consider design features such as above-grade parking with lined habitable uses, parking levels integrated into the building design, parking structures that are free of blank walls, and/or parking structures that are otherwise screened completely with architectural features.
 - Design parking levels to complement the rest of the building with flat levels and standard ceiling heights which can increase flexibility of use over time.
 - On larger sites with multiple buildings, provide parking in a shared stand-alone parking structure rather than embedded within multiple buildings.
 - Encourage the screening and landscaping of parking lots.
- M6.14 **Permeable paving.** Promote use of permeable paving material on new and existing parking lots.
- M6.15 **Assessment districts.** Promote the use of assessment districts and other financing tools as a means of constructing new parking structures in high-demand areas with limited parking. Support the establishment of Vehicle Parking Assessment Districts to pay for the improvement of existing public parking structures and the construction of joint public-private parking structures in the Regional Center and the Media District.

Recreation and Scenic Highways

Recreational opportunities are an important amenity in healthy, livable communities. The circulation network both serves and can become an integrated part of recreational opportunities. Communities need to plan for the use and access of natural features, including hillsides and rivers, with a system of trails. Additionally, the value of scenic vistas must be considered in planning for accessibility.

Goal M.7: A community with abundant opportunities for exploration of its natural and recreational assets.

The Mulholland Scenic Parkway and Corridor is a famous thoroughfare that offers panoramic views of the City and surrounding mountains.

Policy

- M7.1 **Identification and preservation.** Support programs that encourage the identification and preservation of scenic highways. (P142)
- M7.2 **Public views.** Development adjacent to a Scenic Highway should integrate public view protection of scenic vistas to the maximum extent feasible; be adequately landscaped to soften the visual impact of development; and where appropriate, provide access, hiking or biking trails, a turn out, vista point or other complementary facility.
- M7.3 **Trail connections.** Encourage, where appropriate, a network of trails to facilitate recreational uses such as mountain biking, horseback riding and hiking. (P61, P62, P143)

THIS PAGE IS INTENTIONALLY LEFT BLANK

STAGE 4

Implementation

The Hollywood Community Plan is a comprehensive and long-range document that expresses a vision for the future and guides how that vision is implemented through private and public development. The Community Plan identifies policies that are limited to authorities that can be implemented under the jurisdiction of the City of Los Angeles (all departments) and does not prescribe actions of other agencies, such as the City's school districts.

A variety of ordinances, programs, and decisions made by the City in regard to discretionary and non-discretionary building projects are employed to implement the Plan. City actions on discretionary projects involving land use require a finding that the action is consistent or in conformance with the General Plan. City Planning Department decision makers, such as City Planning Commission, hearing officers and zoning administrators, refer to the Community Plan text and the Land Use Map of the Community Plan when making findings of consistency and land use decisions.

Implementation programs are mechanisms put in place to ensure that Hollywood Community Plan goals and policies are realized. This chapter discusses how the Community Plan policies and programs are implemented in land use decision making. The chapter details the programs, shown in a series of tables, which implement the goals and policies found throughout the Community Plan.

The Implementation Process

The goals and policies set forth in Chapters 3, 4, 5, and 6 of the Hollywood Community Plan are implemented through a variety of mechanisms, including regulation and development review; financing and budgeting; and inter-departmental and inter-governmental coordination.

Many Community Plan policies are implemented through regulations, such as zoning, adopted by the City based on the City's "police power" to protect the public health, safety, and welfare of its citizens. City ordinances also create a development review process that can provide for City review of individual project proposals and authorizes the City to approve, deny, or condition projects based on their consistency with the Community Plan. Some development review programs, such as the California Environmental Quality Act (CEQA), are ongoing and will continue to be used as a tool for land use decision making. Other programs are implemented at the time of Community Plan adoption, such as zone changes, community plan implementation overlay districts, supplemental use districts, specific plans, and design overlays.

Coordination among City departments is critical to the successful implementation of many Community Plan policies, such as park planning and streetscape

improvements. While the Community Plan policies and implementation programs are limited to authorities that can be implemented under the jurisdiction of the City of Los Angeles, implementation of some Plan policies may also require coordination and joint actions with numerous local, regional, state, and federal agencies. These agencies provide services, facilities, or funding and administer regulations that directly or indirectly affect many issues addressed in the Community Plan. These external governmental agencies, such as the California Department of Transportation (CALTRANS), the Los Angeles Unified School District, water service providers, the Los Angeles County Metropolitan Transit Authority (METRO), among others, also look to the Community Plans for their planning and guidance in decision making.

Amendments to the Community Plan

Changes to the Community Plan may be proposed from time to time to address changing conditions, new opportunities, and unforeseen circumstances. As such, the Community Plan must be a living, flexible document, allowing for changes that ultimately assist in enhancing and implementing the community's vision. It is necessary, therefore, to establish a fair, orderly, and well defined process to govern how amendments occur.

Community Plans are part of the City's General Plan and thus any changes to the Community Plan are considered General Plan amendments. Amendments may propose a change in the land use designation for a particular property or changes to the Community Plan's policies and text. Private requests are subject to an established public review and approval process. Under the City Charter, only the Director, City Planning Commission, and City Council may initiate an amendment. The amendment process allows for the City to deny a proposed amendment if it is inconsistent with the goals and policies of the Community Plan.

Specific Implementation Programs

Some recommendations of the Hollywood Community Plan are enacted concurrently with adoption of the Plan. These include zone changes (including the removal of, addition to or change in Qualifying [Q] condition and / or "D" limitations, a community plan implementation overlay and height district changes). These are included in Table 7-2.

Implementation programs are identified with a distinct number (i.e. P1), followed by a program description and a list of the policies that the program implements. A suggested time frame identifies when each program can be expected to be completed: (1) Short-term or (2) Long-term. Lastly, the table identifies the primary City Department(s), including main external agency when applicable, that is responsible for implementation of particular programs.

Sources of Funding

The development, maintenance, and operation of parks, public facilities and improvements (i.e., in the public right-of-way), and the provision of city services require financial resources that are derived from various sources. Programming of City capital projects and their funding over time is outlined in the City’s Capital Improvement Program. Although the Community Plan does not mandate specific capital improvements, the policies serve as a guide for other city departments to identify and budget for potential future capital projects. Typical revenue sources used to fund these projects include property tax revenue, sales tax revenue, user fees, Quimby Act (Park) dedications, business improvement districts, special assessment districts, municipal bonds, and county, state, and federal funding.

It is important to note that program implementation is contingent on the availability of adequate funding, which is likely to change over time due to economic conditions, the priorities of federal, state and regional governments and funding agencies, and other conditions. Potential funding sources which are considered to be the most likely funding sources include a development impact fee, tax allocation bonds, Metro funds, business improvement districts and various public revenue funds. Some typical funding sources for public services and infrastructure are identified in Table 7-1.

**Table 7-1:
Potential Funding Sources for Policies and Programs**

Fees and Exactions	Taxes
<ul style="list-style-type: none"> • Quimby Fees • Development Impact Fees • Permit and Application Fees • Regulatory Fees • Property Assessments Benefit Assessment District Business Improvement District Vehicle Parking District 	<ul style="list-style-type: none"> • Special taxes such as Mello-Roos • Community Facilities Districts • Taxes for mobility improvements which are allocated by Metro’s Call for Projects: <ul style="list-style-type: none"> Proposition A sales tax Proposition C sales tax State retail sales tax State motor vehicle tax Federal gas tax

**Table 7-2
Hollywood Implementation Programs**

	Program Number	Number Description	Policy/ Section Reference	Responsible or Coordinating Agency
Short Term Programs	P1	Study lower density in low-scale multi-family neighborhoods.	LU1.1	DCP
	P2	Maintain and enforce the City’s Baseline Hillside Mansionization Ordinance, The Oaks’ hillside zoning restrictions, and the Mulholland and Hollywoodland Specific Plans.	LU2.1	DCP/LADBS
	P3	Study hillside neighborhoods, including the Laurel Canyon, Nichols Canyon, Doheny Sunset Plaza and Los Feliz neighborhoods, to protect single family neighborhoods in the hillsides from out-of-scale “mansionized” development.	LU2.1	DCP
	P4	Consider the development of a Ridgeline Protection Ordinance to preserve the contours of natural ridgelines and continue to study hillside regulation.	LU2.1	DCP
	P5	Consider design standards to protect hillside neighborhoods from over-sized development. Further study R1 variation zones in the hillsides based on physical features such as lot size and slope.	LU1.1, LU2.1, LU2.5	DCP
	P6	Evaluate additional or revised retaining wall regulations to improve the quality of hillside development.	LU2.1	DCP
	P7	Coordinate with City Departments to further study ridgeline mapping in Hollywood to further inform hillside protection areas and improve regulations.	LU1.1	DCP/BOE
	P8	Restore citywide standards for Floor Area Ratio in Height District 1 along commercial corridors.	LU7.1	DCP
	P9	Provide incentives for development of retail and office commercial, and mixed uses.	LU7.1	DCP
	P10	Create an exemption for off-street automobile parking requirements for new equity-waiver theaters seeking change of use permits within Theatre Row.	LU7.7	DCP
	P11	Study standards to regulate lighting intensity and brightness for all digital or electronic signage in Hollywood.	LU7.10	DCP/LADBS
	P12	Extend the Regional Center land use designation to include Hollywood Boulevard and Sunset Boulevards, between Gower and the 101 Freeway.	LU8.1	DCP
	P13	Utilize Floor Area Ratio (FAR) bonuses to incentivize commercial and residential development in the Regional Center.	LU8.2	DCP
	P14	Limit stand-alone residential development in Floor Area Ratio (FAR) Incentive Areas.	LU8.2	DCP
	P15	Study the Vermont-Western Station Neighborhood Area Plan (SNAP) for future revision and updates to reflect legislative changes.	LU7.3	DCP
	P16	Create incentives for affordable housing units in the Regional Center by providing additional FAR in exchange for units reserved for Low Income and Very Low Income tenants based on Area Median Income.	LU9.2	DCP
	P18	Establish new zoning districts that encourage a mix of industrial uses with commercial or residential uses.	LU10.5	DCP
	P19	Study and update evacuation routes for hillside areas, including substandard hillside streets. Implement clear and consistent signage to delineate no street parking on Red Flag Days for hillside streets in designated Very High Fire Hazard Severity zones.	LU13.6	LADOT/LAFD/ LAPD
	P20	Review current zoning and building codes to minimize impact on climate change.	LU13.7	DCP/LADBS
	P21	Support Modified Street Standards that preserve wide sidewalks (15 feet or wider) and that widen sidewalks less than 15 feet. Widen sidewalks to a minimum of 15 feet, or maintain existing sidewalk widths of 15 feet, along Boulevards and Avenues with high levels of pedestrian traffic.	PR1.1	DCP/LADOT/BOE

**Table 7-2
Hollywood Implementation Programs**

	Program Number	Number Description	Policy/ Section Reference	Responsible or Coordinating Agency
Short Term Programs	P22	Establish Community Design Overlay Districts or other overlay to maintain and improve the pedestrian-oriented scale and character of districts which are walkable and pedestrian-oriented.	PR1.15	DCP
	P23	Establish design guidelines for commercial uses in pedestrian-oriented districts.	LU6.4, PR1.15	DCP
	P24	Create pedestrian-oriented design guidelines including a possible Streetscape Plan for commercial uses that foster pedestrian-oriented scale and character for the following street segments: <ul style="list-style-type: none"> •Sunset Boulevard between Fairfax Avenue and Vista Street •Melrose Avenue between Highland Avenue and Orlando Avenues, inclusive of Melrose Place •Santa Monica Boulevard between Seward Avenue and Hoover Street •Hillhurst Avenue between Franklin and Los Feliz Avenues 	PR1.15	DCP
	P25	Develop an ordinance to limit paving in the front of residential structures to the paving required by LAMC driveway regulations only.	PR1.15	DCP
	P26	Utilize existing alleys to reinforce pedestrian character, walkability and bikeability in multifamily residential neighborhoods. Encourage use of rear alleys for access to parking areas.	PR1.18	DCP/LADOT
	P27	Conduct a nexus study to determine the impact of future commercial and multifamily residential development on the need for open space in Hollywood, and develop community-wide mitigations funded by impact or Qimby fees.	PR3.2	DCP
	P28	Ensure that the character of historic neighborhoods are maintained by existing and new HPOZs in Hollywood by providing guidance for the rehabilitation of historic structures and the review of new development within historic neighborhoods.	P1.1	DCP
	P29	Develop a historic preservation district or districts in Los Feliz with community involvement and support.	P1.1	DCP
	P30	Study and support efforts to initiate a California Main Street district through the state for the Hollywood Boulevard National Historic District area.	P1.1	DCP
	P31	Study the historical resources in neighborhoods surrounding the Melrose Hill HPOZ.	P1.1	DCP
	P32	Collaborate with the Department of Cultural Affairs to encourage the preservation of murals in Hollywood.	P1.13	DCP/DCA
	P33	Study the feasibility of implementing a Transfer of Development Rights program in Hollywood to encourage preservation of historical resources.	P1.4	DCP
	P34	Preserve and enhance existing street dimensions and street designation along the Walk of Fame.	P1.5	DCP/LADOT/BOE
	P35	Establish zoning regulations to ensure appropriate review of design for resources.	P1.7	DCP
	P36	Utilize adopted Citywide Design Guidelines for new and infill development.	P1.8	DCP
	P37	Study the garden apartments in the block bounded by Prospect Avenue on the north, Rodney Drive on the west, Lyman Place on the east, and the alley north of Hollywood Boulevard on the south for potential historic significance.	P1.8	DCP
	P38	Study the implementation of a Specific Plan, Community Plan Implementation Overlay (CPIO), or other zoning tools in central Hollywood, including Sunset Boulevard and Hollywood Boulevard, which may include guidelines for site planning and building design, controls on lot consolidation, and possible requirements for approved plans prior to demolition, in order to ensure that infill development in the Regional Center complements existing neighborhood character.	LU4.1, LU8.10, P1.3, P1.4, P1.8	DCP

**Table 7-2
Hollywood Implementation Programs**

	Program Number	Number Description	Policy/ Section Reference	Responsible or Coordinating Agency
Short Term Programs	P39	Study design regulations for: <ul style="list-style-type: none"> • Afton Square Historic District: Eastern half of block between Leland Way on the north, El Centro to the east, De Longpre to the south and Vine to the West. • Selma-Labaig Historic District: Both sides of Labaig roughly between Gower and Gordon, including the north side of Harold Way. • Serrano Historic District: East side of Serrano roughly between Hollywood Boulevard and Sunset/west side of Serrano generally between Carlton Way and Sunset. 	LU4.1, P1.9	DCP
	P40	Study the creation of new height limits on portions of Sunset Boulevard and Western Avenue that abut designated or eligible historic neighborhoods.	P1.10	DCP
	P42	Conduct a nexus study to determine the impact of future development on transportation infrastructure in Hollywood, and develop community-wide improvements funded by impact fees.	M3.2	DCP
	P43	Maintain and expand existing shuttle services that provide transportation to and from satellite parking lots for significant trip generators such as the Hollywood Bowl and major employers, such as the hospitals in East Hollywood.	M2.2	DCP
	P44	Encourage new developments and existing multifamily residential and mixed-use projects to offer tenants incentives for using transit, such as subsidized Metro monthly passes to tenants and/or employees and subscriptions to programs that provide first/last mile connections such as bike share, carshare, or Transportation Network Companies. Coordinate guaranteed ride home programs or carpooling among tenants.	M2.4	DCP
	P45	Encourage employers to provide employees with incentives for using transit.	M2.4	DCP
	P46	Promote the offer of merchant incentives to customers for using transit.	M2.4	BID/METRO
	P47	Minimize driveways along streets served by articulated buses on the High Injury Network or the Bicycle Enhanced Network (BEN).	M1.6	DCP/LADOT/BOE
	P48	Inform future development in close proximity to Metro facilities that may impact Metro bus operations of notification procedures and considerations for projects.	M4.16	DCP/METRO
	P49	Implement public right-of-way improvements on Fairfax Avenue between Willoughby Avenue and Melrose Avenue to complement bikeway improvements in the City of West Hollywood north of Willoughby Avenue on Fairfax Avenue. Restripe this segment of Fairfax Avenue to allow for bike lanes, northbound and southbound.	M5.11	LADOT
	P50	Encourage projects located within the Regional Center to participate in District Valet Programs to mitigate any project-generated parking impacts. Participation in a District Valet Program should be considered as a traffic mitigation measure.	M6.1	DCP/LADOT
	P51	Consider allowing nightclub and other entertainment venues in the Regional Center to submit a private parking plan certified by the Department of Transportation to utilize underused private commercial parking areas for certification by the Department of Transportation in lieu of providing required on-site parking spaces.	M6.1	DCP/LADOT
	P83	Update the zoning in the Media District to support ground-floor individual small scaled retail and restaurant.	LU10.1	DCP
	P94	Work with LADOT to implement Express Park, an intelligent parking management system that provides information on the location and pricing of available parking in current time and adjusts pricing and time limit in response to changes in supply and demand.	M6.11	LADOT

**Table 7-2
Hollywood Implementation Programs**

	Program Number	Number Description	Policy/ Section Reference	Responsible or Coordinating Agency
Short Term Programs	P101	Establish a CPIO that provides incentives for the development of affordable housing near public transit areas, along commercial corridors that are well-served by transit and in close proximity to jobs, services and facilities.	LU5.4, LU9.2	DCP
	P145	Study and implement above ground parking design standards for multi-family, commercial, and industrial areas.	M6.13	DCP
Long Term Programs	P41	Support and complete Historic Places LA within the Hollywood Community Plan area, and incorporate SurveyLA findings, and ongoing efforts to create a comprehensive online archive.	P1.12	DCP
	P52	Study the addition of crosswalks and complete streets improvements on the High Injury Network, especially those near schools identified among the top 50 most vulnerable schools by Safe Routes to School, including but not limited to: <ul style="list-style-type: none"> •Hollywood High School • Selma Elementary School • Grant Elementary School •Ramona Elementary School •Lexington Avenue Primary Center •Lockwood Elementary School •Dayton Heights Elementary School 	PR1.13	LADOT
	P53	Consider the following street segments as candidates for Streetscape improvements: <ul style="list-style-type: none"> •Hollywood Boulevard between Gower Avenue and the 101 Freeway •Western Avenue between Franklin Avenue and Melrose Avenue •Santa Monica Boulevard between Seward Avenue and Hoover Street •Cahuenga Boulevard between Hollywood and Sunset Boulevards •La Brea Avenue between Franklin and Rosewood Avenues •Melrose Avenue between La Cienega Avenue and Highland Avenue, and between Seward Avenue and Hoover Street (or Madison Avenue) 	PR1.15	DCP/BSS
	P54	Promote the planting of street trees to provide comfortable, shady walking environments, cooling, and absorption of carbon dioxide.	PR1.17	DCP/BSS
	P55	Coordinate with other City departments, neighborhood associations, business improvement districts and private developers to promote trees in parkways, landscaped medians, community gateways and throughout the Plan Area.	PR1.17	DCP/BSS/BID
	P56	Conduct a study of the alleys in the Regional Center as the basis for preparing an Alley Improvement Plan to coordinate alley improvements with new development.	PR1.18	DCP/BSS
	P57	Consider an Alley Maintenance Plan for the alleys located behind the commercial uses along Melrose Avenue between Highland Avenue and Orlando Avenues, inclusive of Melrose Place extending west to La Cienega.	PR1.18	BSS
	P58	Study the closure of Hudson Avenue, between Hollywood Boulevard and Yucca Street, to create a public plaza.	PR2.3	LADOT
	P59	Develop guidelines for commercial streets to encourage the landscaping of those portions of easements which extend past the required sidewalk width and are not used for necessary driveways, sidewalks and other pedestrian uses.	PR3.5	DCP/LADOT/BOE
	P60	Work with the Council Office, the Office of Historic Resources, Bureau of Street Services, Bureau of Engineering, the Hollywood Entertainment Business Improvement District, and the Hollywood Chamber of Commerce to establish a Treatment Plan to guide future rehabilitation work affecting the Hollywood Walk of Fame and seek on-going potential funding streams, mechanisms, and resources.	PR3.6	LADOT

**Table 7-2
Hollywood Implementation Programs**

	Program Number	Number Description	Policy/ Section Reference	Responsible or Coordinating Agency
Long Term Programs	P61	Study the connection of Griffith Park trails with Elysian Park trails, when possible.	PR3.10, PR5.5, M7.3	RAP
	P62	Improve pedestrian access to Barnsdall Park in East Hollywood. Encourage access from Vermont Avenue.	PR3.10, M7.3	DCP/LADOT
	P63	Support school-specific agreements with LAUSD, which will enable communities to jointly use schools for recreational purposes.	PR5.4	DCP/LAUSD
	P64	Create Hollywood Central Park as a new cap park over the 101 Freeway, with a mix of public-serving uses including libraries, etc.	PR3.15	CALTRANS/RAP
	P65	Improve and streamline the building permit process and ensure compatible rehabilitation of historical resources by providing early technical advice and assistance from the staff of City Planning and Building and Safety.	P1.2	DCP/LADBS
	P66	Work with the Bureau of Engineering, the Hollywood Historic Trust, and the Hollywood Chamber of Commerce to establish a Treatment Plan to guide future rehabilitation work affecting the Hollywood Walk of Fame.	P1.5	DCP/BOE
	P67	Partner with the Los Angeles Housing and Community Investment Department, and other agencies to identify new financial resources for rehabilitation grants and loans to low- and moderate-income owners of historic homes.	P1.11	DCP/HCIDLA
	P68	Seek opportunities to partner with Council Offices, preservation organizations, business improvement districts, certified neighborhood councils, and other community stakeholder groups to create new interpretive programs, tours and signage highlighting the community's history and architectural legacy.	P1.1, P1.12	Preservation Organizations, Neighborhood Councils
	P69	Study the effects of cut-through traffic in the area bounded by Franklin Avenue and Hollywood Boulevard on the north, La Brea Avenue on the east, Fountain Avenue on the south, Fairfax Avenue on the west, and the area bounded by Hollywood Boulevard on the north, Fairfax Avenue on the east, Sunset Boulevard on the south, Laurel Canyon Boulevard on the west, and prepare a neighborhood traffic management plan, pending results of study.	M1.9	LADOT
	P70	Consider the implementation of Neighborhood Traffic Management Plans, which may include treatments like speed humps, medians, directional signs, improved bicycle and pedestrian crossings, and other improvements per the Complete Streets Design Guide adopted with Mobility Plan 2035, along canyon routes and associated streets across the Hollywood Hills, as well as neighborhoods generally located between the following streets: <ul style="list-style-type: none"> • Franklin Avenue and Hollywood Boulevard • Sunset and Hollywood Boulevards • Sunset and Santa Monica Boulevards • Santa Monica Boulevard and Melrose Avenue, including blocks south of Melrose Avenue • Franklin Avenue and Mulholland Drive • Highland Avenue, La Brea Avenue, and Martel Avenue along the Willoughby Corridor 	M1.9	LADOT
	P71	Coordinate with the Department of Transportation to design routes for valet parking operations and ride-sharing pick-up and drop-off locations to minimize traffic impacts on residential neighborhoods.	M1.10	DCP/LADOT
	P72	Initiate a study of funding mechanisms for transportation demand management activities and programs, such as a Transportation Impact Fee, tax increments, bonds, grants, benefit assessment districts, and other financing measures.	M2.5	DCP/LADOT
	P73	Secure funding sources to implement Mobility Plan 2035 Action Programs.	M2.5	DCP
	P74	Promote the operation of shared ride and shuttle services that connect users to public parking facilities, and major residential, commercial and transit locations.	M2.2	DCP/LADOT
	P75	Implement transportation systems management strategies to use the existing transportation facilities more efficiently.	M3.1	DCP/LADOT
	P76	Implement signalization improvements to reduce conflicts and facilitate traffic flow.	M3.1	LADOT

**Table 7-2
Hollywood Implementation Programs**

	Program Number	Number Description	Policy/ Section Reference	Responsible or Coordinating Agency
Long Term Programs	P77	Implement traffic signal control systems that optimize traffic flow and safety throughout a network and provide priorities for high capacity bus systems.	M3.1	LADOT
	P78	Implement or enhance "Smart Corridors" to coordinate Caltrans' freeway traffic management system with the ATSAC/Adaptive Traffic Control System (ATCS) highway and street traffic signal management system to enhance incident management and motorist information to reduce traffic delays.	M3.1	LADOT/ CALTRANS
	P79	Provide information to motorists regarding alternative routes and modes of travel using changeable message signs, highway advisory radio or other appropriate traffic management techniques.	M3.1	LADOT
	P80	Identify chronically congested intersections and implement improvements, considering safety and connectivity impacts on pedestrians and bicyclists.	M3.1	LADOT
	P81	Support evaluation and improvement of the complex five-way intersection at Sunset Boulevard, Sunset Drive, Hollywood Boulevard, Hillhurst Avenue and Virgil Avenue.	M3.1	LADOT
	P82	Coordinate with LADOT to study the feasibility of a program that addresses parking between the street and the front of the structure on non-driveway surfaces.	LU1.7	LADOT
	P84	Encourage new buildings to achieve sustainability certification such as LEED and implement evolving best practices for energy efficiency.	LU11.2	DCP
	P85	Encourage architectural innovation like vertical forests, and other developments that include trees while balancing life safety issues in consultation with the Fire Department.	LU11.3	DCP/LAFD/UF
	P86	Restripe Cahuenga Boulevard East south to the US 101 Freeway on-ramp near Pilgrimage Bridge to provide two lanes on Cahuenga Boulevard East between the US 101 on-ramp and the US 101 Barham Boulevard off-ramp and from there, three lanes northbound.	M3.1	LADOT
	P87	Evaluate the following recommendations of the Highway 101 Citizens Advisory Committee Report: <ul style="list-style-type: none"> •Add and eastbound right-turn lane on Sunset Boulevard from Virgil Avenue to Vermont Avenue. •Widen the southbound 101 off-ramp at Van Ness Avenue to add a right-turn only lane. •Widen eastbound Santa Monica Boulevard to provide a right-turn lane onto the 101 southbound on-ramp. •Widen the 101 northbound on-ramp from Normandie Avenue to two lanes. 	M3.3	LADOT/ CALTRANS
	P88	Coordinate with Metro and LADOT to provide feedback that will improve local, Metro Rapid and community-level bus service in Hollywood.	M4.1	LADOT/METRO
	P89	Identify and secure spaces that accommodate both consolidation and expansion of bus layover zones.	M4.10	DCP/METRO
	P90	Maintain bus stop zones in the corridor as well as Metro bus layover zones.	M4.10	LADOT/METRO
	P91	Work with Metro and the Department of Transportation to secure state and federal funding for bikeway construction, bikeway maintenance and bicycle safety education.	M5.8	METRO/LADOT

**Table 7-2
Hollywood Implementation Programs**

	Program Number	Number Description	Policy/ Section Reference	Responsible or Coordinating Agency
Long Term Programs	P92	Study the following corridors for potential bike lanes, bike routes or bicycle boulevards: <ul style="list-style-type: none"> • Hollywood Boulevard between Fairfax Avenue and Hillhurst Avenue • Sunset Boulevard between Fairfax Avenue and Hillhurst Avenue • Fairfax Avenue between Melrose Avenue and Rosewood Avenue • Highland Avenue between Barham Boulevard and Rosewood Avenue • Bronson Avenue between Franklin Avenue and Santa Monica Boulevard • Edgemont Street between Franklin Avenue and Melrose Avenue • Virgil Avenue between Los Feliz Avenue and Melrose Avenue • US-101 Cap Park between Santa Monica Boulevard and Hollywood Boulevard • Virgil Avenue between Los Feliz and Sunset Boulevard • Hillhurst Avenue between Sunset Boulevard and Melrose Avenue • Vermont Avenue between Rosewood Avenue and Los Feliz Boulevard • Wilton Place between Franklin Avenue and Melrose Avenue • Vine Street between Melrose Avenue and Franklin Avenue • La Brea Avenue between Franklin Avenue and Rosewood Avenue • Orange Drive between Rosewood Avenue and Franklin Avenue • Las Palmas Avenue between Waring Avenue and Selma Avenue • June Street between Waring Avenue and Rosewood Avenue • Gower Avenue between Melrose Avenue and Fountain Avenue • Van Ness Avenue between Sunset Boulevard and Melrose Avenue • Oxford Street between Melrose Avenue and Romaine Street • Heliotrope Drive between Rosewood Avenue and Los Feliz Boulevard • Hoover Street between Santa Monica Boulevard and Melrose Avenue • Santa Monica between Sunset Boulevard and La Brea Avenue • Franklin Avenue between La Brea Avenue and Vermont Avenue • Los Feliz Boulevard between Western Avenue and Riverside Drive • Cahuenga Boulevard between Barham Boulevard and Highland Avenue • Barham Boulevard between Cahuenga Boulevard and Forest Lawn Drive • Waring Avenue between La Cienega and Gower Avenue • Rosewood between La Cienega Boulevard and June Street • Rowena Avenue between Hyperion Avenue and Glendale Boulevard • Finley Avenue between Edgemont Street and Talmadge Street • Tracy Street between Talmadge Street and Hyperion Avenue • Rowena Avenue between Hyperion Avenue and St. George Street • St. George Street between Rowena Avenue and Franklin Avenue • Franklin Avenue between St. George Street and Vermont • Finley Avenue between Talmadge Street and Edgemont Street • Yucca Avenue between Gower and Highland Avenue • Selma and Hawthorne Avenues between Gower and La Brea Avenue 	M5.10	DCP/LADOT
	P93	Create a parking management district or districts in areas of high parking demand.	M6.1	LADOT
	P95	Develop new off-street public parking resources, including parking structures and underground parking, in accordance with design standards.	M6.12	DCP/LADOT
	P96	Support proposals to build parking structures that can be shared by patrons and occupants of various building sites in areas of high parking demand.	M6.12	DCP
	P97	Support design and construction of off-street parking structures that can be converted to other uses in the long term.	M6.12	DCP

**Table 7-2
Hollywood Implementation Programs**

	Program Number	Number Description	Policy/ Section Reference	Responsible or Coordinating Agency
Long Term Programs	P98	Support the maintenance and rehabilitation of the existing single-family, multi-family and affordable housing stock for existing residents and encourage the use of the Housing Department’s housing development programs, which provide financing and loans for new construction, as well as the rehabilitation of existing low-income single-family homes and multi-family apartments.	LU3.4, LU5.10, LU5.11, LU5.13, LU9.2	HCIDLA
	P99	Promote the use of available homebuyer programs that make purchasing a single-family home affordable such as the California Housing Finance Agency’s First-time Homebuyer Program and FHA Loan Program as well as the City of Los Angeles Housing Department’s Neighborhood Stabilization Program.	LU5.1	HCIDLA
	P100	Coordinate with the City of Los Angeles Housing Department to create strategies for the provision of more bedrooms in new housing developments which are suitable for larger families.	LU5.3	HCIDLA
	P102	Support the goals and policies of the City’s Housing Element to address homelessness.	LU5.9	DCP
	P103	Work with LAHCID, Council Offices, City Attorney and other relevant City Agencies to explore the creation of a no net loss program that minimizes the displacement of residents and ensures that there is no loss of covenanted affordable rental housing or the production of new affordable housing.	LU5.11, LU5.13, LU5.14, LU9.2	HCIDLA/DCP
	P104	Monitor the inventory of units that are subject to a recorded covenant, ordinance, or law that restricts rents to levels affordable to persons and families of Lower or Very Low-Income; subject to the Rent Stabilization Ordinance; and/or occupied by Lower-Income or Very Low-Income households during the effective term of Measure JJJ.	LU5.14	HCIDLA
	P105	Study a program for the enhancement of RSO enforcement such as a neighborhood-based RSO Enforcement Specialists group responsible for proactively working with tenants, landlords, and community groups to enhance the habitability and prevent the loss of RSO units in the Plan Area.	LU5.14	HCIDLA
	P106	Monitor the implementation of policies and programs relating to affordable housing and/or rental housing issues and opportunities. The Affordable Housing Commission could be utilized for this purpose or another commission could be created.	LU5.14	HCIDLA
	P107	Develop strategies to prevent and recover affordable housing loss, such as annual reports on existing affordable housing inventory and Ellis Act evictions, as well as specific programs and investments to prevent further loss of covenanted affordable units and steps to increase affordable housing production in the Plan Area.	LU5.14, LU9.2	HCIDLA
	P108	Support HCID with future effort to establish new programs and strengthen existing programs to provide former low income tenants of demolished or converted units with the first right of refusal on leases for new housing units.	LU5.15	HCIDLA
	P109	Support the re-use of former CRA-owned and surplus City-owned property in Hollywood for community uses, prioritizing affordable housing and park space.	LU5.16, PR3.6	CAO
	P110	Support the goals and policies of the City’s Housing Element to facilitate non-conventional housing that fosters neighborhoods which are livable and sustainable for all segments of the community.	LU5.17	DCP
	P111	Work with relevant City agencies to explore the initiation of cohousing purchase opportunities that require noticing requirements for property owners that intend to sell or redevelop multifamily residential or commercial properties and provides existing tenants the opportunity to match the recorded offer price to co-purchase or co-develop the property.	LU5.17	HCIDLA/DCP
P112	Support efforts to identify potential funding sources for 100% affordable housing developments including permanent supportive housing.	LU9.6	GSD	

**Table 7-2
Hollywood Implementation Programs**

	Program Number	Number Description	Policy/ Section Reference	Responsible or Coordinating Agency
Long Term Programs	P113	Collaborate with Economic Workforce Development Department to support efforts to provide business outreach and mentorship programs.	LU9.6, LU9.7	EWDD
	P114	Coordinate with relevant departments such as CAO, EWDD, and others to explore the creation of a Good Jobs Zone which could include incentives for small business retention, finance tools, first source referral, among other components.	LU9.8	EWDD
	P115	Develop partnerships to create business outreach programs targeting local schools for student participation in business apprenticeship and internship programs, as well as work with LAUSD’s Mentorship Programs.	LU6.10, LU9.7	DCP
	P116	Increase the availability of resources to finance small business startup/expansion for local entrepreneurs committed to benefitting the local community. Explore and enhance resources to finance development that is committed to leasing to local and less-credit-ready small businesses.	LU6.11	EWDD
	P117	Create a publicly accessible database that displays the tree types within the City’s public rights-of-way. Identify goals to improve air quality and reduce the urban heat island effect locally.	LU13.1, PR2.5	UF/LADBS/DCP
	P118	Develop partnerships between public agencies, community groups, local businesses, and private developers to increase trees in the public rights-of-way, resulting in tree planting and maintenance programs for specified parkways, landscaped medians, and community gateways.	LU13.1, LU13.5, PR2.5	DCP/DPW
	P119	Support City efforts to develop and implement sustainable urban forest plans, including the City’s First Step Forest Management Plan. Support implementation strategies in the Hollywood Community Plan Area.	PR2.8	UF
	P120	Coordinate with agencies including the Department of Recreation and Parks to expand open space opportunities.	PR3.1, PR3.7	RAP
	P121	Study ways to provide improved pedestrian, vehicle, and public transit access to Griffith Park and Runyon Canyon Park.	PR5.3	LADOT
	P122	Support the citywide Wildlife Pilot Study efforts to create development regulations for conserving biological resources in identified areas important for supporting habitat and movement for wildlife.	PR3.1, PR6.1	DCP
	P123	Support related City, County, State, and Federal government ecological efforts.	PR3.1, PR6.1	DCP/Los Angeles County
	P124	Identify and preserve wildlife habitats and ecologically improved areas in a natural state.	PR6.2, PR6.3, PR6.4	RAP
	P125	Encourage the preservation of buildings, murals and eclectic design features that define the areas along Melrose Avenue, Sunset Boulevard west of La Brea Avenue, and Hillhurst Avenue.	LU6.1	DCP/DCA
	P126	Study commemorating the Pacific Electric Red Car diagonal street running from Sierra Bonita to Vista for historic recognition.	LU6.1	DCP/LADOT
	P127	Enhance pedestrian amenities and promote neighborhood identity with improvements, such as plantings, unique crosswalks, banner signage, and branded trash containers.	LU6.3	DCP
	P128	Continue to develop and promote agency programs that assist small business owners and entrepreneurs in the form of low-interest loan programs, management assistance, business retention efforts, and the establishment of incubation centers.	LU6.10	EWDD
	P129	Encourage neighborhood uses such as high quality shops, restaurants, cafes, bars, and retail services.	LU8.3	DCP
	P130	Study design standards for sidewalk dining elements along the Hollywood Walk of Fame.	LU8.3	DCP

**Table 7-2
Hollywood Implementation Programs**

	Program Number	Number Description	Policy/ Section Reference	Responsible or Coordinating Agency
Long Term Programs	P131	Encourage flexible parking models to best serve the local context.	LU8.4	LADOT
	P132	Develop a program to allow privately-owned parking garages to be listed on City wayfinding signage, in exchange for matching the rates offered at City-owned parking garages in the Regional Center.	LU8.5	LADOT/DCP
	P133	Work with the Council Office, LADOT, business improvement districts, and other community stakeholders to improve the visitor experience and improve the City-owned parking garages in the Regional Center. Potential improvements include signage, lighting, rate adjustments, validation from local businesses, and valet.	LU8.5	CD/LADOT/DCP
	P134	Study and map streets that have been withdrawn from public use in the hillsides.	PR1.18	BOE/BOS
	P136	Support the identification and mapping of paper streets in the hillsides.	PR3.1, PR3.4	LADOT/BOE
	P137	Encourage the siting of recreational facilities (e.g. libraries, parks, schools, and auditoriums) together as shared-use facilities.	PR5.4	LAUSD/RAP/LAPL
	P138	Support plans and initiatives, such as the HEART of Hollywood, a long-term strategic and creative initiative to promote economic growth and design, to improve features of prominent streets.	P1.5	CD/BOE/DCP
	P139	Consider and study street design factors in collaboration with City departments to accommodate the travel and physical working space of emergency responders.	M1.4	LAFD/LAPD/LADOT/EMD
	P140	Study strategies in collaboration with LADOT that help effectively manage traffic and circulation needs due to special events.	M1.7	LADOT
	P141	Study and evaluate the feasibility of Modified Parking Districts.	M6.1	LADOT/DCP
	P142	Study additional highways for designation in accordance with Mobility Plan 2035's selection criteria for scenic highways as well as preserve the designated General Plan Mobility Element scenic highways.	M7.1	LADOT/DCP
	P143	Work with City departments to identify and/or map a network of trails to help implement the development of trails, as funding becomes available.	M7.3	RAP
	P144	Study the effects of cut-through traffic in the hillsides and consider the implementation of neighborhood traffic management plans.	M1.9	LADOT
	P146	Consider amendments to the existing Hillside Construction Regulations (HCR) to address enforcement; coordinate hauling and grading activities; and clarify public and private street improvement standards. Expand application of HCR as appropriate.	LU2.1	DCP/BOE/LADBS
