Subject: Phase I Environmental Site Assessment
Commercial Property
7025-7035 Laurel Canyon Boulevard
Los Angeles, California 91605
Partner Project No. 19-246632.1

Dear Mr. Tilley:

Partner Engineering and Science, Inc. (Partner) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (310) 615-4500.

Sincerely,

Arcie Propster
Relationship Manager

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in accordance with the scope of work and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by Jacmar Companies for the property located at 7025-7035 Laurel Canyon Boulevard in Los Angeles, Los Angeles County, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide Jacmar Companies with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the west side of Laurel Canyon Boulevard within a mixed commercial and residential area of North Hollywood, a neighborhood within the City of Los Angeles. Please refer to the table below for further description of the subject property:

Subject Property Data

Address(es):	7025-7035 Laurel Canyon Boulevard, Los Angeles, California
Additional Address(es):	7037 Laurel Canyon Boulevard
Historical Address(es):	7041 Laurel Canyon Boulevard
Property Use:	Offices and mail distribution center
Land Acreage (Ac):	2.23 Ac
Number of Buildings:	One
Number of Floors:	One
Gross Building Area (SF):	36,160 SF
Date of Construction:	1957
Assessor's Parcel Number (APN):	2321-005-042; 2321-005-043
Type of Construction:	Brick
Current Tenants:	United States Postal Service mail distribution center (7035) DMV Registration office (7037)
Site Assessment Performed By:	Brant Rotnem of Partner
Site Assessment Conducted On:	May 10, 2019

The subject property is currently developed with a brick-framed, rectangular commercial structure on a concrete slab foundation. The building is utilized as a mail distribution center by the US Postal Service at 7035 Laurel Canyon Boulevard, and as offices for DMV Registration at 7037 Laurel Canyon Boulevard. In addition to the current structure, the property consists of a mail loading dock, and asphalt-paved parking areas (7025 and 7035 Laurel Canyon Boulevard).

According to available historical sources, the subject property was undeveloped from at least 1894 to 1938. From 1940 to 1957, the property was developed with two residences and poultry farms (7029 and 7041 North Laurel Canyon Boulevard). In 1957, the farms and the residence at 7041 Laurel Canyon Boulevard were demolished, and the current commercial structure was constructed. From 1957 to 1973, the building was used for electronics distribution and sales (7035 Laurel Canyon Boulevard). The residence at 7029 Laurel Canyon Boulevard was demolished in 1973, and this area was paved for its present use as a parking area. The building has been occupied by the US Postal Service at 7035 Laurel Canyon Boulevard and offices at 7037 Laurel Canyon Boulevard since 1973.

The immediately surrounding properties consist of Los Angeles Fire Department (LAFD) Fire Station 89 to the north; Laurel Canyon Boulevard to the east followed by PSW Shipping/Receiving and O'Reilly Auto Parts; multi-tenant auto repair to the south, and single-family residences to the west.

According to a subsurface investigation report reviewed for the nearby former Electrofilm Inc. site at 7116 Laurel Canyon Boulevard, the depth to groundwater in the vicinity of the subject property is inferred to be approximately 250-260 feet below ground surface (bgs). Based on topographic map interpretation, groundwater flow is inferred to be toward the south.

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- The subject property is located within the boundaries of the San Fernando Valley (Area 1) National Priorities List (NPL) site plume. This NPL site is an area of contaminated groundwater located in the North Hollywood section of the City of Los Angeles and the City of Burbank. The contaminated groundwater, which underlies an area of approximately 5,156 acres, contains volatile organic compounds, including trichloroethylene (TCE) and perchloroethylene (PCE), and to a lesser extent, carbon tetrachloride and chloroform, according to tests conducted by the California Department of Health Services, as well as numerous local government agencies. The State recommended drinking water guidelines for TCE and PCE (5 and 4 parts per million, ppm, respectively) are exceeded in a number of public wells in this area. To alleviate this contamination, wells are either taken out of service or blended with water from clean sources to ensure that the public receives water with TCE/PCE concentrations below the State guidelines. According to information provided by the Environmental Protection Agency (EPA) Superfund website, the use of an alternate drinking water supply and operation of the groundwater treatment system in the North Hollywood and Burbank Areas have reduced the potential of exposure to contaminated drinking water at the San Fernando Valley (Area 1) site and will continue to protect residents near this site while further cleanup activities are planned and implemented. The VOCs are effectively removed by the existing North Hollywood Operable Unit (NHOU) groundwater treatment system to below Maximum Contaminant Levels (MCLs), and often to non-detectable levels. However, changing groundwater conditions in the aquifer and the discovery of VOC contamination in new areas of the aquifer beneath North Hollywood limit the ability of the existing remedy to fully contain the VOC plume in the NHOU. In addition, the EPA has detected emerging contaminants including hexavalent chromium and 1,4-dioxane, in excess of the state MCL for total chromium and the California Department of Public Health (CDPH) notification level (NL) for 1,4-dioxane at one of the NHOU extraction wells, NHE-2. The existing NHOU treatment system is incapable of removing these contaminants, and a sharp increase in NHE-2 chromium concentrations in 2007 caused the well to be shut down for 18 months. This well serves an important plume containment function for the high levels of contamination. Well NHE-2 is operational again with disposal of the treated water to the sanitary sewer, but its shut

down demonstrates the need for a change in the remedy. In response to the continued migration of VOC-contaminated groundwater and the presence of chromium and other emerging contaminants in the NHOU, EPA conducted a Focused Feasibility Study (FFS) to evaluate alternatives for changing the groundwater remedy. The FFS developed and evaluated a range of alternatives for addressing the contaminants in groundwater.

According to the most recent Five-Year Review (FYR), issued by the Army Corps of Engineers on September 21, 2018, groundwater beneath the subject property has been impacted. The nearest monitoring well to the property is identified as NH-MW-06, which appears to be directly west of the site. During the last sampling event, levels of TCE in this well were found to be 93.9 micrograms per liter ($\mu\text{g/L}$) (stable), and levels of PCE were 23.5 $\mu\text{g/L}$ (decreasing). The presence of volatile organic compounds (VOCs) in groundwater beneath the subject property constitutes evidence of an REC. As groundwater is deep in the vicinity of the subject property (250 to 260 feet bgs), the potential for a vapor encroachment condition (VEC) is considered low.

A review of the listed potential responsible parties (PRP) provided by the EPA Superfund website did not list the subject property owner as a PRP for this NPL. In addition, the subject property was not identified on the list of former PRPs that have been issued a No Further Action (NFA) letter regarding cleanup activities associated with this NPL site. Due to the fact that the EPA is currently taking action at this site as well as the proximity to the subject property, it is unlikely that the owner of the subject property would be financially responsible for the remediation of any contamination associated with the San Fernando Valley (Area 1) NPL site. Therefore, no further investigation is recommended at this time.

A controlled recognized environmental condition (CREC) refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A historical recognized environmental condition (HREC) refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An environmental issue refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- Due to the age of the subject property building, there is a potential that asbestos-containing material (ACM) and/or lead-based paint (LBP) are present. Overall, all suspect ACMs and painted surfaces were observed in good condition and do not pose a health and safety concern to the occupants of the subject property at this time. Should these materials be replaced, the identified suspect ACMs would need to be sampled to confirm the presence or absence of asbestos prior to any renovation or demolition activities to prevent potential exposure to workers and/or building occupants.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 7025-7035 Laurel Canyon Boulevard in Los Angeles, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed evidence of a recognized environmental condition in connection with regional groundwater contamination. Based on the conclusions of this assessment, Partner recommends no further action or investigation at this time.

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 7025-7035 Laurel Canyon Boulevard in Los Angeles, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in accordance with the requirements of ASTM Standard E1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments in order to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the subject

property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

Jacmar Companies c/o TIC Investment Company engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of Jacmar Companies. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever

under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- Information relative to deed restrictions and environmental liens, a title search, and completion of a pre-survey questionnaire from the Report User was not provided at the time of the assessment.
- Partner was unable to determine the property use at 5-year intervals, which constitutes a data gap. Except for property tax files and recorded land title records, which were not considered to be sufficiently useful, Partner reviewed all standard historical sources and conducted appropriate interviews.
- Partner submitted a Freedom of Information Act (FOIA) requests to the Los Angeles Fire Department (LAFD) for information pertaining to hazardous substances, underground storage tanks, releases, inspection records, etc. for the subject property and/or adjacent properties. As of this writing, this agency has not responded to Partner's request. Based on information obtained from other historical sources, this limitation is not expected to alter the overall findings of this assessment.
- Due to the sensitive nature of operations at the subject property, photos were not allowed in the main mail distribution center. All accessible areas of the subject property were accessed during the site reconnaissance.

Due to time constraints associated with this report, the Client has requested the report despite the above-listed limitations.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at 7025-7035 Laurel Canyon Boulevard in Los Angeles, California is located on the west side of Laurel Canyon Boulevard. According to the Los Angeles County Assessor, the subject property is legally described as *Tract 2514 Lots 3 and 4*.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is currently developed with a brick-framed, rectangular commercial structure on a concrete slab foundation. The building is utilized as a mail distribution center by the US Postal Service at 7035 Laurel Canyon Boulevard, and as offices for DMV Registration at 7037 Laurel Canyon Boulevard. In addition to the current structures, the property consists of a mail loading dock, and asphalt-paved parking areas (7025 and 7035 Laurel Canyon Boulevard).

The subject property is designated for limited manufacturing development and parking by the City of Los Angeles.

The subject property was identified as a Hazardous Waste Manifest (HAZNET) site in the regulatory database report, as further discussed in Section 4.2.

2.3 Current Use of Adjacent Properties

The subject property is located within a mixed commercial and residential area of North Hollywood. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Immediately Surrounding Properties

North: LAFD Fire Station 89 (7063 Laurel Canyon Boulevard)

South: Multi-tenant auto repair (7019 Laurel Canyon Boulevard)
Multi-family residential (12137 Hart Street)

East: Laurel Canyon Boulevard followed by:
O'Reilly Auto Parts (7020 Laurel Canyon Boulevard)
PSW Shipping/Receiving (7040 Laurel Canyon Boulevard)

West: Single-family residences (12200 & 12201 Vose Street)

The adjacent properties were identified on the regulatory database report as follows:

- *7019 Laurel Canyon:* Well Investigation Program (WIP); Resource Conservation and Recovery Act (RCRA) Small Quantity Generator (SQG); HAZNET; Facility Index System (FINDS), EDR Historical Auto Station;
- *7020 Laurel Canyon:* RCRA Non-Generator/No Longer Reporting (NonGen/NLR);
- *7040 Laurel Canyon:* Spills, Leaks, Cleanups and Investigations (CPS-SLIC); Enforcement Action (ENF); WIP; RCRA-SQG; FINDS, Enforcement Compliance History Information (ECHO); HAZNET;

- 7063 Laurel Canyon: RCRA-NonGen/NLR; WIP; RCRA-SQG; FINDS; ECHO; Underground Storage Tank (UST); Historical UST listings (SWEEPS UST, CA FID UST, HIST UST);

These listings are further discussed in Section 4.2.3.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS) *Van Nuys, California* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 740 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping gently toward the south.

A copy of the most recent topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

According to topographic map interpretation, the direction of groundwater flow in the vicinity of the subject property is inferred to be toward the south. The nearest surface water in the vicinity of the subject property is the Tujunga Wash, located approximately 1.35 miles southwest of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by the Los Angeles Department of Water and Power (LADWP) serves the subject property vicinity. The subject property is located within the San Fernando Valley Communities, which obtains water from several sources. Sources include the Metropolitan Water District (MWD) State Water Project, which distributes water purchased from the Sacramento-San Joaquin River Delta; the Los Angeles Aqueduct, which transports water from the Owens River in the Eastern Sierra Nevada Mountains, and local groundwater sources.

According to a previous subsurface investigation conducted on nearby former Electrofilm Inc. site at 7116 Laurel Canyon Boulevard, the depth of groundwater in the vicinity of the subject property is inferred to be approximately 250-260 feet below ground surface (bgs).

2.4.3 Geology/Soils

The subject property is located within the San Fernando Valley Basin (SFVB), otherwise known as Upper Los Angeles River Area (ULARA), which is a large alluvial basin of some 122,800 acres lying to the northwest of Downtown Los Angeles. The SFVB is a triangular basin within the Transverse Ranges Province, an area noted for its strong, young deformation. The Santa Monica Mountains share an east-west trend with the rest of the Transverse Ranges. The northern corner of the SFVB is marked by a steep topographic front and by the north-dipping Santa Susana thrust fault. The eastern margin of the valley trends northwest, parallel to the San Gabriel fault, and is bounded by the plutonic and metamorphic rocks of the Verdugo Mountains. The western edge of the valley is defined by exposed Eocene and Cretaceous rocks of the Chatsworth Hills which trend to the northeast. The SFVB is underlain by Miocene to Holocene sedimentary rocks. The Miocene section includes the sandstones and conglomerates of the Topanga Formation and the marine sandstones and shales of the Medelo and Towsley Formations. These rocks are

overlain by the marine sandstones and mudstones of the Pliocene Fernando Formation, which grades upward and laterally into the shallow marine and non-marine Saugus Formation.

Based on information obtained from the USDA Natural Resources Conservation Service Web Soil Survey online database, the subject property is unmapped.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06037C1310F, dated September 26, 2008, the subject property appears to be located in Zone X, an area located outside of the 100-year and 500-year flood plains.

A copy of the reviewed flood map is not included in Appendix B of this report.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information		
Period/Date	Source	Description/Use
1894-1938	Aerial Photographs, Historical Topographic Maps	Undeveloped/Native land
1940-1957	Aerial Photographs, Building Records, City Directories	Two single-family residences and poultry farms
1957-1972	Aerial Photographs, Assessor's Records, Building Records, City Directories	Electronics distribution and sales, and single-family residence
1973-Present	Aerial Photographs, Building Records, City Directories, Interviews, Onsite Observations	Post office and other offices; parking areas

According to available historical sources, the subject property was undeveloped from at least 1894 to 1938. From 1940 to 1957, the property was developed with two residences and poultry farms (7029 and 7041 North Laurel Canyon Boulevard). In 1957, the farms and the residence at 7041 Laurel Canyon Boulevard were demolished, and the current commercial structure was constructed. From 1957 to 1973, the building was used for electronics distribution and sales (7035 Laurel Canyon Boulevard). The residence at 7029 Laurel Canyon Boulevard was demolished in 1973, and this area was paved for its present use as a parking area. The building has been occupied by the US Postal Service at 7035 Laurel Canyon Boulevard and offices at 7037 Laurel Canyon Boulevard since 1973.

No potential environmental concerns were identified in association with the current or former use of the subject property.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Data Resources (EDR) on May 7, 2019. The following was observed on the subject property and adjacent properties during the aerial photograph review:

Date:	1928, 1938	Scale:	1"=500'
Subject Property:	Appears undeveloped and graded		
North:	Appears undeveloped and graded		
South:	Appears undeveloped and graded		
East:	Appears developed with a residence and as undeveloped land across Laurel Canyon Boulevard		
West:	Appears undeveloped and graded		

Date:	1947	Scale:	1"=500'
Subject Property:	Developed with two apparent residential structures on the southern portion, and structures resembling chicken broods on the northern portion		
North:	Appears undeveloped and graded		
South:	Appears developed with two structures resembling residences		
East:	Appears developed with a commercial structure and a residence		
West:	Appears developed with a residence and a portion of a nursery or orchard		

Date: 1952 **Scale:** 1"=500'

Subject Property: No significant changes visible
North: No significant changes visible
South: Appears developed with two additional residential structures
East: No significant changes visible
West: No significant changes visible

Date: 1954 **Scale:** 1"=500'

Subject Property: No significant changes visible
North: No significant changes visible
South: Appears developed with two additional residential structures
East: No significant changes visible
West: No significant changes visible

Date: 1964, 1970, 1977 **Scale:** 1"=500'

Subject Property: The current commercial structure and parking areas are visible
North: The current commercial structures are visible
South: The current multi-family structure is visible, as well as a small apparent commercial structure; the current multi-tenant commercial building is visible by 1970
East: The current industrial structure at 7040 Laurel Canyon Boulevard is visible, as well as a parking lot
West: The current single-family residences are visible

Date: 1983, 1989, 1994, 2002 **Scale:** 1"=500'

Subject Property: No significant changes visible

South: The current multi-family residence and commercial structure are visible
East: No significant changes visible
West: No significant changes visible

Date: 2005, 2009, 2012, 2016 **Scale:** 1"=500'

Subject Property: No significant changes visible
North: No significant changes visible
South: No significant changes visible
East: The current industrial and commercial structures are visible
West: No significant changes visible

Copies of reviewed aerial photographs are included in Appendix B of this report.

3.2 Fire Insurance Maps

Partner reviewed the collection of Sanborn Fire insurance maps from Environmental Data Resources (EDR) on May 7, 2019. The following was observed on the subject property and adjacent properties during the fire insurance map review:

Date: 1960, 1963, 1966, 1969

Subject Property: No coverage in source
North: No coverage in source
South: No coverage in source

Date: 1960, 1963, 1966, 1969

East: Laurel Canyon Boulevard followed by machine shop/nut, bolt and screw manufacturing

West: No coverage in source

Copies of reviewed Sanborn Maps are included in Appendix B of this report.

3.3 City Directories

Partner reviewed historical city directories obtained from Environmental Data Resources (EDR) on May 7, 2019 for past names and businesses that were listed for the subject property and adjacent properties. The findings are presented in the following table:

City Directory Search for 7025-7041 North Laurel Canyon Boulevard (Subject Property)

Year(s)	Occupant Listed
1950	7041: Branderberger Catherine R
1956	7041: Dupuis Victor; Brandenberger Poultry
1960	7035: Arrow Sales
1962	7035: Arrow Sales Inc.; Monarch Electronics International Inc. Importers and Exporters
1964	7035: Monarch Electronics International Inc. Importers and Exporters
1965	7035: Monarch Electronics International Inc. Importers and Exporters
1970	7035: Arrow Sales; Arrow Electronics; Monarch Electronics International Inc. Importers and Exporters
1971	7035: Arrow Electronics
1980	7035: United States Government Postal Service
1981	7037: DG House Corp.
1991	7037: MG Tax Service; Continental Craft Interiors & Window Coverings
2001	7035: XXXX 7037: XXXX
2010	7035: United States Postal Service 7037: JPS Services; Urgent Home Health Care Inc.; Unique Selection Wear
2014	7035: SOS Home Theater & Flat TV; United States Postal Service

* XXXX= A phone number is present but is not registered to a tenant or is disconnected.

According to the city directory review, the subject property has been occupied the US Postal Service since at least 1980, and was formerly occupied as an importer/exporter of electronic products from at least 1960 to 1971. A residence and/or poultry farm were identified at 7041 Laurel Canyon Boulevard, a potential former address for the subject property, in the 1950s. Based on the city directory review, no environmentally sensitive listings were identified for the subject property addresses.

City Directory Search for Adjacent Properties

Year(s)	Occupant Listed
1950	7019 Laurel Canyon: Emmett's Auto Service 7040 Laurel Canyon: Schwartzman J Manufacturing & Supply Co.; Studio Nursery Set Dressers
1956	7019 Laurel Canyon: Troiano Emmett L 7040 Laurel Canyon: Schwartzman J Manufacturing & Supply Co.; Abbey Nut & Bolt Co.

Refer to Section 4.2.3 for discussion of adjacent properties identified in the regulatory database report.

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from Environmental Data Resources (EDR) on May 7, 2019. The following was observed on the subject property and adjacent properties during the topographic map review:

Date: 1894,
1896,
1898,
1900,
1902

Subject Property: No structures or features depicted
Adjacent Properties: No structures or features depicted

Date: 1920,
1921,

Subject Property: No significant changes depicted
North: No significant changes depicted
South: No significant changes depicted
East: Depicted with Laurel Canyon Boulevard, followed by land with no structures or features
West: No significant changes depicted

Date: 1926

Subject Property: No significant changes depicted
North: No significant changes depicted
South: No significant changes depicted
East: Depicted with small structures
West: No significant changes depicted

Date: 1948

Subject Property: Depicted with at least one small, unlabeled structure
North: No significant changes depicted
South: Depicted with at least one small, unlabeled structure
East: Depicted with small structures
West: No significant changes depicted

Date: 1953,
1966,
1972

Subject Property: Shaded to indicate an area of dense development
Adjacent Properties: Shaded to indicate an area of dense development

Copies of reviewed topographic maps are included in Appendix B of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 State Department

Regulatory Agency Data

Name of Agency: California Environmental Protection Agency (CalEPA) Regulated Site Portal
Agency Address: <https://siteportal.calepa.ca.gov/nsite/>
Date of Contact: May 8, 2019
Method of Communication: Online
Summary of Communication: No records were on file for the subject property with the CalEPA.

4.1.2 Health Department

Regulatory Agency Data

Name of Agency: Los Angeles County Fire Department (LACFD)
Agency Address: 1320 Northeastern Avenue, Room 173, Los Angeles, CA 90063
Agency Phone Number: (323) 881-2379
Date of Contact: May 8, 2019
Method of Communication: Online Records Search
Summary of Communication: No records were on file for the subject property with the Los Angeles County Fire Department (LACFD).

4.1.3 Fire Department

Regulatory Agency Data

Name of Agency: Los Angeles City Fire Department (LAFD)
Agency Address: 221 North Figueroa Street, 15th Floor Suite 1500
Agency Phone Number: (213) 482-7115
Date of Contact: May 8, 2019
Method of Communication: Emailed Request
Summary of Communication: As of this writing, Partner has not received a response from the LAFD for inclusion in this report.

4.1.4 Air Pollution Control Agency

Regulatory Agency Data

Name of Agency: South Coast Air Quality Management District (SCAQMD)
Agency Address: 21865 Copley Drive, Diamond Bar, CA 91765
Agency Phone Number: (909) 396-2000
Date of Contact: May 8, 2019
Method of Communication: Online Records Search
Summary of Communication: No Permits to Operate (PTOs), Notices of Violation (NOVs), or Notices to Comply (NTCs) were on file for the subject property with the SCAQMD.

4.1.5 Regional Water Quality Agency

Regulatory Agency Data

Name of Agency:	California Regional Water Quality Control Board (RWQCB)
Agency Address:	www.geotracker.waterboards.ca.gov
Date of Contact:	May 8, 2019
Method of Communication:	Online records search
Summary of Communication:	No records were on file for the subject property with the RWQCB.

4.1.6 Department of Toxic Substances Control

Regulatory Agency Data

Name of Agency:	California Department of Toxic Substances Control (DTSC) EnviroStor database and Hazardous Waste Tracking System (HWTS)
Agency Address:	www.envirostor.dtsc.ca.gov http://hwts.dtsc.ca.gov
Date of Contact:	May 8, 2019
Method of Communication:	Online records search
Summary of Communication:	No records were on file for the subject property with the DTSC EnviroStor or HWTS databases.

4.1.7 Building Department

Regulatory Agency Data

Name of Agency:	Los Angeles Department of Building & Safety (LADBS)
Agency Address:	http://www.ladbs.org/services/check-status/online-building-records
Date of Contact:	May 8, 2019
Method of Communication:	Online
Summary of Communication:	Records were available for review, as discussed below.

Building Records Reviewed for 7025-7041 Laurel Canyon Boulevard (Subject Property)

Year(s)	Owner/Applicant	Description
1940	Frank Luchsinger	Erect Class-D residence, garage, and chicken structure (7029)
1945	William Branderberger	Erect chicken equipment (7041)
1946	William A Brandenberger	Erect residence and brooder house (7041)
1947	William Brandenberger	Erect chicken brooder (7041)
1953	Alvin E Steele	Alterations to dwelling (7029)
1957	Floyd Criswell	Move residence from 7041 Laurel Canyon to 12130 Sherman Way
1958	Arrow Sales Inc.	Sign permit (7035)
1959	Arrow Sales	Alter sales building (7035)
1962	Arrow Electronics	Interior partitions/store and offices (7035)
1972	Continental-Laurel	Add concrete block vault with concrete ceiling / wholesale-retail (7035)
	Monarch Electronics Inc.	Use of land as parking lot (7025)
	Frank Johnson	Demolish dwelling (7029)
1973	US Postal Service	Interior partitions; flagpole/post office (7035)

Regulatory Agency Data

Name of Agency:	Los Angeles Department of Building & Safety (LADBS)	
Agency Address:	http://www.ladbs.org/services/check-status/online-building-records	
Date of Contact:	May 8, 2019	
Method of Communication:	Online	
Summary of Communication:	Records were available for review, as discussed below.	
1974	Continental-Laurel	Use of land as parking lot (7035)
1976	Continental Laurel	Interior partitions/post office (7035)
1978	Continental Van Nuys	Replace concrete wall at rear (7035)
1983	USPS	Partitions / post office (7035)
1994	Continental Van Nuys	Reroof office (7035)
1995	United States Postal Service	Interior remodel post office (7035)
1998	Better Reider	Reroof post office (7035)

4.1.8 Planning Department

Regulatory Agency Data

Name of Agency:	Los Angeles County Department of Regional Planning (LACDRP)
Agency Address:	320 West Temple Street, Los Angeles, CA 90012
Agency Phone Number:	(213) 974-6411
Date of Contact:	May 8, 2019
Method of Communication:	Online (http://planning.lacounty.gov/gis)
Summary of Communication:	According to records reviewed, the subject property is M1-1VL and CM-1 for limited manufacturing, and P-1VL and [Q]P-1VL for parking buffer, by the City of Los Angeles. According to information obtained from the Los Angeles County Zone Information Map Access System (ZIMAS) Website, the subject property is not located within a "Methane Zone," related to historical development of oil wells in the area.

4.1.9 Oil & Gas Exploration

Regulatory Agency Data

Name of Agency:	California Division of Oil, Gas and Geothermal Resources (DOGGR)
Point of Contact:	http://maps.conservation.ca.gov/doggr/index.html
Agency Address:	801 K Street, MS 24-01, California
Agency Phone Number:	(916) 322-1080
Date of Contact:	May 8, 2019
Method of Communication:	Online (http://maps.conservation.ca.gov/doggr/index.html)
Summary of Communication:	According to DOGGR, no oil or gas wells are located on or adjacent to the subject property.

4.1.10 Assessor's Office

Regulatory Agency Data

Name of Agency:	Los Angeles County Assessor's Office (LACAO)
Agency Address:	500 West Temple Street Room 225, Los Angeles, CA
Agency Phone Number:	(213) 974-3211

Date of Contact: May 8, 2019
Method of Communication: Online records search
Summary of Communication: The subject property is associated with Los Angeles County Assessor's Parcel Numbers (APNs) 2321-005-042 and -043, totaling 2.23 acres. The building area was listed as 36,160 square feet. The construction year is 1957, and the effective year is 1960.

4.1.11 Other Agencies

<i>Regulatory Agency Data</i>	
Name of Agency:	Los Angeles County Department of Public Works (LACDPW)
Agency Phone Number:	(626) 458-3517
Date of Contact:	May 8, 2019
Method of Communication:	Online records search http://www.ladpw.org/epd/cleanla/OpenFileReview.aspx
Summary of Communication:	No records were on file for the subject property with the LACDPW.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources was provided by Environmental Data Resources, Inc. (EDR). Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

<i>Radius Report Data</i>				
Database	Search Radius (mile)	Subject Property	Adjacent Properties	Sites of Concern
Federal NPL or Delisted NPL Site	1.00	N	N	Y
Federal CERCLIS Site	0.50	N	N	N
Federal CERCLIS-NFRAP Site	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	N	N
Federal RCRA TSDF Facility	0.50	N	N	N
Federal RCRA Generators Site (LQG, SQG, CESQG)	0.25	N	Y	N
Federal IC/EC Registries	0.50	N	N	N
Federal ERNS Site	Subject Property	N	N	N
State/Tribal Equivalent NPL	1.00	N	N	N
State/Tribal Equivalent CERCLIS	1.00	N	N	N

Radius Report Data

Database	Search Radius (mile)	Subject Property	Adjacent Properties	Sites of Concern
State/Tribal Landfill/Solid Waste Disposal Site	0.50	N	N	N
State/Tribal Leaking Storage Tank Site	0.50	N	N	N
State/Tribal Registered Storage Tank Sites (UST/AST)	0.25	N	N	N
State/Tribal Voluntary Cleanup Sites (VCP)	0.50	N	N	N
State/Tribal Spills	0.50	N	Y	Y
Federal Brownfield Sites	0.50	N	N	N
State Brownfield Sites	0.50	N	N	N
EDR MGP	Varies	N	N	N
EDR US Hist Auto Station	Varies	N	Y	N
EDR US Hist Cleaners	Varies	N	N	N
Hazardous Waste Manifest (HAZNET)	SP/Adj	Y	Y	N
Well Investigation Program (WIP)	SP/Adj	N	Y	Y
Facility Index System (FINDS)/Enforcement Compliance History Information (ECHO)	SP/Adj	N	Y	N
Historical UST listings (HIST UST, CA FID UST, CA SWEEPS UST, HIST CORTESE)	SP/Adj	N	Y	N
Enforcement Action (ENF)	SP/Adj	N	Y	N

4.2.2 Subject Property Listings

The subject property is identified in the regulatory database report as a HAZNET, as discussed below:

- The United States Postal Service at 7035 Laurel Canyon Boulevard generated 0.33 tons of polychlorinated biphenyls and materials containing PCBs in 2006. No hazardous releases have been reported. Based on the nature of operations and the small quantities involved, this hazardous waste generation is not expected to constitute a significant environmental concern.

4.2.3 Adjacent Property Listings

The adjacent properties identified in the regulatory database report are discussed below:

- The property identified as Swedish Auto Service and BM Auto Body at 7019 Laurel Canyon Boulevard is located adjacent to the south of the subject property (hydrologically downgradient). This site was identified as a WIP, RCRA-SQG, HAZNET, FINDS, and EDR Hist Auto site.

WIP listings refer to sites with current or historical well samples points associated with NPL investigation. Refer to Section 4.2.4 below for additional discussion.

RCRA-SGQ sites generate fewer than 1,000 kilograms of hazardous waste per month. Swedish Auto Service was listed as a small-quantity generator in 1996, and a historical large-quantity generator in 1987. BM Auto Body was listed as a small-quantity generator in 1993. No violations were noted.

HAZNET details indicate that Swedish Auto Service generated small quantities (less than one ton) of empty containers in 1994, an unspecified aqueous solution in 1995 and 1996, and an aqueous solution with total organic residues less than 10 percent in 1999.

EDR Hist Auto listings identified general automotive repair shops and automotive transmission repair shops at this site from 1983 to 2014.

No hazardous releases have been reported for this site. Based on this information and the inferred direction of groundwater flow, the listings for this property are not expected to constitute a significant environmental concern.

- The property identified as City of LA General Services and LA City Fire Station Number 89 at 7063 Laurel Canyon Road is located adjacent to the north of the subject property (hydrologically upgradient). This property was identified as a RCRA-NonGen/NLR, WIP, SWEEPS UST, CA FID UST, HIST UST, UST, RCRA-SQG, FINDS, and ECHO site.

According to RCRA details, the City of LA General Services was registered with RCRA in 1987 but did not have reportable quantities of hazardous waste generation. LA Fire Station 89 was identified as an SQG site in 2002 for the generation of lead waste. No violations were noted.

According to UST and historical UST listing details, the site has been equipped with at least one 1,000-gallon diesel UST, one 1,000-gallon motor vehicle fuel UST, and a waste oil UST of an unreported capacity. No releases from the USTs have been reported.

FINDS/ECHO listings serve as "pointers" to other databases, such as RCRA.

Details for the WIP listing are discussed in Section 4.2.4 below.

- O'Reilly Auto Parts #3759 at 7020 Laurel Canyon Boulevard is located adjacent to the east of the subject property (hydrologically cross-gradient). This property was identified as a RCRA NonGen/NLR. According to RCRA details, this business was registered with RCRA in 2014 but did not have reportable quantities of hazardous waste generation. Based on this information, this listing is not expected to constitute a significant environmental concern.
- J. Schwartzman Manufacturing & Supply Co. at 7040 Laurel Canyon Boulevard is located adjacent to the east of the subject property (hydrologically cross-gradient). This business was identified as a CPS-SLIC, ENF, WIP, RCRA-SQG, FINDS, ECHO, and HAZNET site. According to SLIC details (Case 111.0599), a release of chromium and/or volatile organic compounds (VOCs) impacted an aquifer used for drinking water supply. The case was closed by the RWQCB on December 23, 2014. No records are available for the case on the RWQCB GeoTracker resource; however, refer to Section 4.2.4 for discussion of regional VOC concerns in the vicinity of this site and the subject property.

According to RCRA details, this business was a large-quantity generator in 1986, and a small-quantity generator in 1992 and 1996. No violations were noted.

HAZNET details indicate that 0.45 tons of a metal sludge waste were generated in 1993, and 0.4000 tons of an unspecified sludge waste were generated in 1997.

Details for the WIP/ENF listings are discussed in Section 4.2.4 below.

Due to the details and/or regulatory status for the remaining listings, they are not expected to constitute a significant environmental concern.

4.2.4 Sites of Concern Listings

Nearby sites of potential concern were identified in the regulatory database report, as discussed below:

- The subject property is located within the boundaries of the San Fernando Valley (Area 1) NPL site plume. This NPL site is an area of contaminated groundwater located in the North Hollywood section of the City of Los Angeles and the City of Burbank. The contaminated groundwater, which underlies an area of approximately 5,156 acres, contains volatile organic compounds, including trichloroethylene (TCE) and perchloroethylene (PCE), and to a lesser extent, carbon tetrachloride and chloroform, according to tests conducted by the California Department of Health Services, as well as numerous local government agencies. The State recommended drinking water guidelines for TCE and PCE (5 and 4 parts per million, ppm, respectively) are exceeded in a number of public wells in this area. To alleviate this contamination, wells are either taken out of service or blended with water from clean sources to ensure that the public receives water with TCE/PCE concentrations below the State guidelines. According to information provided by the Environmental Protection Agency (EPA) Superfund website, the use of an alternate drinking water supply and operation of the groundwater treatment system in the North Hollywood and Burbank Areas have reduced the potential of exposure to contaminated drinking water at the San Fernando Valley (Area 1) site and will continue to protect residents near this site while further cleanup activities are planned and implemented. The VOCs are effectively removed by the existing North Hollywood Operable Unit (NHO) groundwater treatment system to below Maximum Contaminant Levels (MCLs), and often to non-detectable levels. However, changing groundwater conditions in the aquifer and the discovery of VOC contamination in new areas of the aquifer beneath North Hollywood limit the ability of the existing remedy to fully contain the VOC plume in the NHO. In addition, the EPA has detected emerging contaminants including hexavalent chromium and 1,4-dioxane, in excess of the state MCL for total chromium and the California Department of Public Health (CDPH) notification level (NL) for 1,4-dioxane at one of the NHO extraction wells, NHE-2. The existing NHO treatment system is incapable of removing these contaminants, and a sharp increase in NHE-2 chromium concentrations in 2007 caused the well to be shut down for 18 months. This well serves an important plume containment function for the high levels of contamination. Well NHE-2 is operational again with disposal of the treated water to the sanitary sewer, but its shut down demonstrates the need for a change in the remedy. In response to the continued migration of VOC-contaminated groundwater and the presence of chromium and other emerging contaminants in the NHO, EPA conducted a Focused Feasibility Study (FFS) to evaluate alternatives for changing the groundwater remedy. The FFS developed and evaluated a range of alternatives for addressing the contaminants in groundwater.

According to the most recent Five-Year Review (FYR), issued by the Army Corps of Engineers on September 21, 2018, the subsurface beneath the subject property has been impacted. The nearest monitoring well to the property is identified as NH-MW-06, which appears to be directly west of the site. During the last sampling event, levels of TCE were found to be 93.9 micrograms per liter ($\mu\text{g/L}$) (stable), and levels of PCE were 23.5 $\mu\text{g/L}$ (decreasing). The presence of volatile organic compounds (VOCs) in groundwater beneath the subject property constitutes evidence of an REC. As groundwater is deep in the vicinity of the subject property (250 to 260 feet bgs), the

presence of VOCs in groundwater is not expected to constitute evidence of a vapor encroachment condition (VEC).

A review of the listed potential responsible parties (PRP) provided by the EPA Superfund website did not list the subject property as a PRP for this NPL. In addition, the subject property was not identified on the list of former PRPs that have been issued a No Further Action (NFA) letter regarding cleanup activities associated with this NPL site. Due to the fact that the EPA is currently taking action at this site as well as the proximity to the subject property, it is unlikely that the owner of the subject property would be financially responsible for the remediation of any contamination associated with the San Fernando Valley (Area 1) NPL site.

- Electrofilm Inc. at 7116 Laurel Canyon Boulevard is located 481 feet north-northeast of the subject property (hydrologically upgradient). This property was identified as an EnviroStor, CPS-SLIC, and HWP site. EnviroStor details indicate that a Preliminary Assessment Report was completed on January 9, 1991. The current status is "Inactive-Needs Evaluation" (Facility ID 80001639).

According to SLIC records, this site is under investigation as a potential contributor to the regional solvent plume discussed above (San Fernando Valley Area 1). A subsurface investigation was performed by DPH Contracting Services on August 3, 2005 to identify potential chromium and cadmium release from a clarifier and former chromium UST. Minor chromium contamination was found in soil, and was not expected to have impacted groundwater.

On December 28, 2018, the LARWQCB issued a letter ("Response to Request for Closure from SWLC Partners LLC Pursuant to California Water Code Section 13267 Order No. R4-2018-0080"), in which it is noted that machine shops and historical spray booths where solvent was used have been identified on the site. Additional documentation of subsurface activities was requested.

On April 2, 2019, Partner issued a response to the LARWQCB letter ("Response to Response to Request for Closure from SWLC Partners LLC Pursuant to California Water Code Section 13267 Order Number R4-2018-0080"). In Partner's conclusions, the site was historically occupied with 15 tenant spaces, and used for machine shop and office purposes. However, based on the absence of onsite hazardous substances or conduits to the subsurface, and the small size of onsite operations, the former machine shop tenants were not expected to represent a significant environmental concern. Based on this information, Partner requested a No Further Action (NFA) status for the site.

Although the SLIC case has not been closed for this site, it does not appear that historical operations at this property have impacted the subject property subsurface. The listings for this site are therefore not expected to constitute a significant environmental concern.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.5 Orphan Listings

No orphan listings are identified in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Partner requested the following site information from John Tilley (User representative of this report).

User Responsibilities

Item	Provided By User	Not Provided By User	Discussed Below	Does Not Apply

Title Records, Environmental Liens, and AULs		X		
Specialized Knowledge		X		
Actual Knowledge		X		
Valuation Reduction for Environmental Issues		X		
Identification of Key Site Manager	Section 5.1.3			
Reason for Performing Phase I ESA	Section 1.1			
Prior Environmental Reports		X		
Other		X		

5.1 Interviews

5.1.1 Interview with Owner

Mr. Randy Kobata, representative for the subject property owner, was not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous

substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

5.1.2 Interview with Report User

Please refer to Section 5.2 below for information requested from the Report User. The information requested was not received prior to the issuance of this report. Because the Report User (Client) is a lender, it is understood that the Report User would not have knowledge of the property that would significantly impact our ability to satisfy the objectives of this assessment. The lack of this information is not considered to represent a significant data gap.

5.1.3 Interview with Key Site Manager

Ms. Monica Basse, key site manager, indicated that she had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not conducted since information regarding the potential for contamination at the subject property was obtained from other sources.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

No previous reports or other pertinent documentation was provided to Partner for review during the course of this assessment.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was overcast. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data

Site Assessment Performed By:	Brant Rotnem
Site Assessment Conducted On:	May 10, 2019

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for 7025-7035 Laurel Canyon Boulevard (Subject Property)

Name	Title/Role	Contact Number	Site Walk* Yes/No
Mr. Randy Kobata	Owner's Representative	Not Provided	Yes
Ms. Monica Bassey	Key Site Manager	(818) 503-1947	Yes

* Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property.

No potential environmental concerns were identified during the onsite reconnaissance.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Solid waste generated at the subject property is disposed of in commercial dumpsters located on the subject property. An independent solid waste disposal contractor removes solid waste from the subject property. According to property personnel, only household trash is collected in the on-site solid waste dumpsters. No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property are directed into the municipal sanitary sewer system. The City/Town/Village/unincorporated area of Los Angeles services the subject property vicinity. No wastewater treatment facilities or septic systems were observed or reported on the subject property.

6.1.3 Surface Water Drainage

Storm water is removed from the subject property primarily by sheet flow action across the paved surfaces towards storm water drains located throughout the subject property and in the public right of way. Site storm water from roofs, landscaped areas, and paved areas is directed to on-site concrete swales, which drain to the public right of way, and to on-site storm water drains. The subject property is connected to a municipal owned and maintained sewer system.

The subject property does not appear to be a designated wetland area, based on information obtained from the United States Fish & Wildlife Service; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface

impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

Heating and cooling systems as well as domestic hot water equipment are fueled by electricity provided by the Los Angeles Department of Water and Power (LADWP), and natural gas provided by Southern California Gas (SCG).

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed by means of the sanitary sewer system. No industrial process is currently performed at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

No evidence of the use of reportable quantities of hazardous substances was observed on the subject property. Small quantities of general maintenance supplies were found to be properly labeled and stored at the time of the assessment with no signs of leaks, stains, or spills. The storage and use of maintenance supplies does not appear to pose a significant threat to the environmental integrity of the subject property at this time.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

No evidence of current or former ASTs or USTs was observed during the site reconnaissance.

6.2.3 Evidence of Releases

No spills, stains or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 Polychlorinated Biphenyls (PCBs)

Older transformers and other electrical equipment could contain PCBs at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by United States Environmental Protection Agency regulations 40 CFR, Part 761. Under the regulations, there are three categories into which electrical equipment can be classified: 1) Less than 50 parts per million (ppm) of PCBs – “Non-PCB;” 2) 50 ppm-500 ppm – “PCB-Contaminated;” and, 3) Greater than 500 ppm – “PCB-Containing.” The

manufacture, process, or distribution in commerce or use of any PCB in any manner other than in a totally enclosed manner was prohibited after July 2, 1979.

The on-site reconnaissance addressed indoor and outdoor transformers that may contain PCBs. Three pole-mounted transformers and three interior transformers were observed on the subject property. The transformers are not labeled indicating PCB content. No staining or leakage was observed in the vicinity of the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

Additionally, no other potential PCB-containing equipment (oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, balers, etc.) was observed on the subject property during Partner's reconnaissance.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

No drains, sumps, or clarifiers, other than those associated with storm water removal, were observed on the subject property during the site reconnaissance.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be *presumed* to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building constructed prior to 1981 and have not been appropriately tested are "presumed asbestos-containing material" (PACM).

The subject property building was constructed in 1957 and may have asbestos containing materials (ACMs: materials containing >1% asbestiform components determined by the EPA 600/R-93/116 Method using Polarized Light Microscopy) present. The table below outlines suspect ACM that is generally found in buildings of this age:

Suspect ACM

Drywall Systems

Floor Tiles

Floor Tile Mastic

Spray-Applied Acoustical Material

Stucco

Based on this building's date of construction, prior to disturbance, Partner recommends a comprehensive asbestos survey of the property to determine the presence, condition, friability and likely future condition of suspect or confirmed ACM. All suspect materials must be handled as ACM according to local, state and federal regulations until the results of sampling and analysis indicate the material is a non-ACM. According to the US EPA, ACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance (O&M) Program until removal is dictated by renovation, demolition, or deteriorating material condition.

The limited visual survey consisted of noting observable materials (materials which were readily accessible and visible during the course of the site reconnaissance) that are commonly known to potentially contain asbestos. This activity was not designed to discover all sources of suspect ACM, PACM, or asbestos at the site; or to comply with any regulations and/or laws relative to planned disturbance of building materials such as renovation or demolition, or any other regulatory purpose. Rather, it is intended to give the User an indication if significant (significant due to quantity, accessibility, or condition) potential sources of ACM or PACM are present at the subject property. Additional sampling, assessment, and evaluation will be warranted for any other use.

Partner was not provided building plans or specifications for review, which may have been useful in determining areas likely to have used ACM.

According to the US EPA, ACM and PACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance (O&M) Program until removal is dictated by renovation, demolition, or deteriorating material condition. Prior to any disturbance of the construction materials within this facility, a comprehensive ACM survey is recommended.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm² (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

Based on the age of the subject property building (pre-1978), there is a potential that LBP is present. Interior and exterior painted surfaces were observed in good condition and therefore not expected to

represent a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated.

Actual material samples would need to be collected in order to determine if LBP is present.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones		
EPA Zones	Average Predicted Radon Levels	Potential
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 2. Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by the Los Angeles Department of Water and Power (LADWP) serves the subject property vicinity. The subject property is located within the San Fernando Valley Communities, which obtains water from several sources. Sources include the Metropolitan Water District (MWD) State Water Project, which distributes water purchased from the Sacramento-San Joaquin River Delta; the Los Angeles Aqueduct, which transports water from the Owens River in the Eastern Sierra Nevada Mountains, and local groundwater sources. According to the City of Los Angeles and the 2016 Annual Water Quality Report, water supplied to the subject property is in compliance with all State and Federal regulations pertaining to drinking water standards. Samples of uranium and arsenic exceeded state Preliminary Health Goals (PRGs); however, all samples were within the State Primary Standard (MCL). Of 110 samples analyzed for copper and lead, four were above the Action Limit (AL) for lead, and none was above for copper. Water sampling was not conducted to verify water quality.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g. in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner observed accessible, interior areas for the subject property building for significant evidence of mold growth with the exceptions detailed in Section 1.5 of this report; however, this ESA should not be used as a mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

No obvious indications of water damage or mold growth were observed during Partner's visual assessment.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises. No items of environmental concern were identified on the adjacent properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, PCBs, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards.

7.0 FINDINGS AND CONCLUSIONS

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- The subject property is located within the boundaries of the San Fernando Valley (Area 1) National Priorities List (NPL) site plume. This NPL site is an area of contaminated groundwater located in the North Hollywood section of the City of Los Angeles and the City of Burbank. The contaminated groundwater, which underlies an area of approximately 5,156 acres, contains volatile organic compounds, including trichloroethylene (TCE) and perchloroethylene (PCE), and to a lesser extent, carbon tetrachloride and chloroform, according to tests conducted by the California Department of Health Services, as well as numerous local government agencies. The State recommended drinking water guidelines for TCE and PCE (5 and 4 parts per million, ppm, respectively) are exceeded in a number of public wells in this area. To alleviate this contamination, wells are either taken out of service or blended with water from clean sources to ensure that the public receives water with TCE/PCE concentrations below the State guidelines. According to information provided by the Environmental Protection Agency (EPA) Superfund website, the use of an alternate drinking water supply and operation of the groundwater treatment system in the North Hollywood and Burbank Areas have reduced the potential of exposure to contaminated drinking water at the San Fernando Valley (Area 1) site and will continue to protect residents near this site while further cleanup activities are planned and implemented. The VOCs are effectively removed by the existing North Hollywood Operable Unit (NHOU) groundwater treatment system to below Maximum Contaminant Levels (MCLs), and often to non-detectable levels. However, changing groundwater conditions in the aquifer and the discovery of VOC contamination in new areas of the aquifer beneath North Hollywood limit the ability of the existing remedy to fully contain the VOC plume in the NHOU. In addition, the EPA has detected emerging contaminants including hexavalent chromium and 1,4-dioxane, in excess of the state MCL for total chromium and the California Department of Public Health (CDPH) notification level (NL) for 1,4-dioxane at one of the NHOU extraction wells, NHE-2. The existing NHOU treatment system is incapable of removing these contaminants, and a sharp increase in NHE-2 chromium concentrations in 2007 caused the well to be shut down for 18 months. This well serves an important plume containment function for the high levels of contamination. Well NHE-2 is operational again with disposal of the treated water to the sanitary sewer, but its shut down demonstrates the need for a change in the remedy. In response to the continued migration of VOC-contaminated groundwater and the presence of chromium and other emerging contaminants in the NHOU, EPA conducted a Focused Feasibility Study (FFS) to evaluate alternatives for changing the groundwater remedy. The FFS developed and evaluated a range of alternatives for addressing the contaminants in groundwater.

According to the most recent Five-Year Review (FYR), issued by the Army Corps of Engineers on September 21, 2018, groundwater beneath the subject property has been impacted. The nearest monitoring well to the property is identified as NH-MW-06, which appears to be directly west of the site. During the last sampling event, levels of TCE in this well were found to be 93.9 micrograms per liter ($\mu\text{g/L}$) (stable), and levels of PCE were 23.5 $\mu\text{g/L}$ (decreasing). The presence of volatile organic compounds (VOCs) in groundwater beneath the subject property constitutes evidence of an REC. As groundwater is deep in the vicinity of the subject property (250 to 260 feet bgs), the potential for a vapor encroachment condition (VEC) is considered low.

A review of the listed potential responsible parties (PRP) provided by the EPA Superfund website did not list the subject property owner as a PRP for this NPL. In addition, the subject property was not identified on the list of former PRPs that have been issued a No Further Action (NFA) letter regarding cleanup activities associated with this NPL site. Due to the fact that the EPA is currently taking action at this site as well as the proximity to the subject property, it is unlikely that the owner of the subject property would be financially responsible for the remediation of any contamination associated with the San Fernando Valley (Area 1) NPL site. Therefore, no further investigation is recommended at this time.

A controlled recognized environmental condition (CREC) refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A historical recognized environmental condition (HREC) refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An environmental issue refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- Due to the age of the subject property building, there is a potential that asbestos-containing material (ACM) and/or lead-based paint (LBP) are present. Overall, all suspect ACMs and painted surfaces were observed in good condition and do not pose a health and safety concern to the occupants of the subject property at this time. Should these materials be replaced, the identified suspect ACMs would need to be sampled to confirm the presence or absence of asbestos prior to

any renovation or demolition activities to prevent potential exposure to workers and/or building occupants.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 7025-7035 Laurel Canyon Boulevard in Los Angeles, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed evidence of a recognized environmental condition in connection with regional groundwater contamination. Based on the conclusions of this assessment, Partner recommends no further action or investigation at this time.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at 7025-7035 Laurel Canyon Boulevard in Los Angeles, Los Angeles County, California in conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

CITY OF LOS ANGELES
DEPARTMENT OF BUILDING AND SAFETY
BUILDING DIVISION

Application for the Erection of a Building
OF
CLASS "D"

VAN NUYS DISTRICT

To the Board of Building and Safety Commissioners of the City of Los Angeles:
Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:
First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley or other public place or portion thereof.
Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.
Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

DECLARATIONS AND CERTIFICATIONS

LICENSED CONTRACTORS DECLARATION

I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Date 11/23/82 Lic. Class B Lic. Number 242970 Contractor [Signature]

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).)

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. B. & P. C. for this reason Date Owner's Signature

WORKERS' COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Worker's Compensation Insurance, or a certified copy thereof (Sec. 3800, Lab. C.).

Policy No. Company STATE FUND

Certified copy is hereby furnished. Certified copy is filed with the Los Angeles City Dept. of Bldg. & Safety.

Date 11/23/82 Applicant H.A. KAUFMAN CO.

Applicant's Mailing Address 11747 W. RICE BLVD

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

Date Applicant

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name Lender's Address

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

I realize that this permit is an application for inspection, that it does not approve or authorize the work specified herein, that it does not authorize or permit any violation or failure to comply with any applicable law, that neither the city of Los Angeles nor any board, department, officer or employee thereof make any warranty or shall be responsible for the performance or results of any work described herein or the condition of the property or soil upon which such work is performed. DECLARATIONS AND CERTIFICATIONS

LICENSED CONTRACTORS DECLARATION

16. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

OWNER-BUILDER DECLARATION

17. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code): Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty, of not more than five hundred dollars (\$500).
 I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code). The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.
 I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code). The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.
 I am exempt under Sec. _____, B & P.C. for this reason _____

DECLARATION ATTACHMENT**

JOB ADDRESS	LAUREL CANYON BL 91605 7035 LAUREL CANYON BL North Hollywood, CA	
DESCRIPTION OF WORK	LANDSCAPE UPGRADE	

GENERAL CONTRACTOR

I hereby affirm, under penalty of perjury, that I am the general contractor named on the attached permit and I am licensed under the provisions of Chapter 9, commencing with Section 7000, of Division 3 of the Business and Professions Code, and my license is in full force and effect. I am responsible for the following permits: Building Electrical Plumbing HVAC

I hereby affirm, under penalty of perjury, one of the following declarations:

- I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Sec. 3700 of the Labor Code, for the performance of the work for which the attached permit is issued.
- I have and will maintain workers' compensation insurance, as required by Sec. 3700 of the Labor Code, for the performance of the work for which the attached permit is issued. My workers' compensation insurance carrier and policy number are:
Carrier STATE FUND Policy No. 1118167
- I certify that in the performance of the work for which the attached permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the provisions of Sec. 3700 of the Labor Code, I shall forthwith comply with those provisions.

Sign Dennis Deady Date 5/22/95

CONSTRUCTION LENDING AGENCY

I hereby affirm, under penalty of perjury, that there is a construction lending agency for the performance of the work for which the attached permit is issued. (Sec. 3097, Civil Code).

Lender's Name _____ Lender's Address _____

ASBESTOS REMOVAL

- I declare that notification of Asbestos Removal is not applicable
- I declare that a notification letter has been sent to the AQMD or EPA

OWNER-BUILDER DECLARATION

I hereby affirm, under penalty of perjury, that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business & Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chap. 9 commencing with Sec. 7000 of Div. 3 of the Business & Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Sec. 7031.5 by any applicant for a permit, subjects the applicant to a civil penalty of not more than five hundred dollars (\$500):

- I, as the owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business & Professions Code: The Contractors License Law does not apply to the owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not intend to improve for the purpose of sale).
- I, as the owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business & Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law).
- I am exempt under Sec. _____, Bus. & Prof. Code for the following reason _____

Print _____ Sign _____ Date _____ OWNER AUTHORIZED AGENT

FINAL DECLARATION

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that the attached permit is an application for inspection and that it does not approve or authorize the work specified therein. Also, that it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, that neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed.

**FIVE-YEAR REVIEW REPORT FOR
SAN FERNANDO VALLEY (AREA 1) SUPERFUND SITE
NORTH HOLLYWOOD AND BURBANK, LOS ANGELES COUNTY,
CALIFORNIA**

PREPARED BY

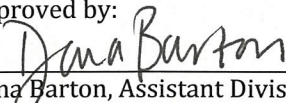

United States Army Corps of Engineers

FOR

U.S. Environmental Protection Agency

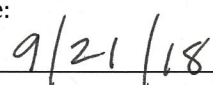

Region IX

Approved by:

Dana Barton, Assistant Division Director
Superfund Site Cleanup Branch
U.S. Environmental Protection Agency, Region 9

Date:

[This page is intentionally left blank.]

Executive Summary

This is the third combined Five-Year Review of the San Fernando Valley Area 1 Superfund Site located in North Hollywood and Burbank, Los Angeles County, California. The purpose of this Five-Year Review is to review information to determine if the remedy is and will continue to be protective of human health and the environment.

The San Fernando Valley Area 1 Site has two groundwater operable units, the North Hollywood Operable Unit and the Burbank Operable Unit, located within its boundaries. This Five-Year Review represents the sixth Five-Year Review for the North Hollywood Operable Unit and the fourth Five-Year Review for the Burbank Operable Unit. The triggering action for this statutory review is the previous Five-Year Review. The Five-Year Review is required due to the fact that hazardous substances, pollutants, or contaminants remain at the Site at levels above those that would allow for unlimited use and unrestricted exposure.

In September 2009, EPA selected the following interim remedy for the North Hollywood Operable Unit: construction of new extraction wells; modification/rehabilitation of several existing extraction wells; expanded treatment; chromium treatment for NHE-1, NHE-2 and two of the new extraction wells; 1,4-dioxane treatment for NHE-2; installation of additional monitoring wells; institutional controls; and, use of the treated water in Los Angeles Department of Water and Power's water supply system. EPA subsequently amended this remedy in 2014 via a Record of Decision Amendment to add reinjection as an end use, and in 2017 via a Memorandum to File to add more extraction wells targeting 1,4 dioxane contamination. EPA recently issued an Explanation of Significant Differences in February 2018, which increases the groundwater extraction rate by adding new extraction wells and expanding the treatment system to accommodate the higher flow from the new wells. EPA determined that increased groundwater extraction would be required to achieve containment. None of these remedy enhancements have yet been implemented.

For the Burbank Operable Unit, EPA's selected remedy in the June 1989 Record of Decision included: extraction of contaminated groundwater, treatment by stripping, and reuse of the water by the City of Burbank for drinking water. Subsequently, EPA signed two Explanation of Significant Differences: November 1990 and February 1997. The 1990 Explanation of Significant Differences included blending of the extracted and treated groundwater with a water supply lower in nitrate, reinjection of excess water, and a clarification that the interim remedy could be designed, constructed, and operated in phases. In the second Explanation of Significant Differences, EPA eliminated the reinjection requirement and suspended the extraction rate requirement when nitrate levels in the extracted groundwater exceed 50 milligrams per liter (mg/l) as nitrate. The City of Burbank committed to accept an annual average of 9,000 gallons per minute (gpm) from interim remedy facilities.

For the Burbank Operable Unit, the results of the data review and the 2015 capture analysis indicate the remedy functions as intended, by meeting the Remedial Action Objectives specified in the Record of Decision; however, the treatment system continued to operate below the interim Record of Decision specified extraction rate of 9,000 gpm. Capture of the contaminated plume is occurring, and the appropriate extraction rate is being evaluated in a new focused feasibility study. An interconnect with Los Angeles Department of Water and Power (LADWP) is under construction, which will provide enough capacity to discharge up to 9,000 gpm, the current capacity of the treatment system. A Focused Feasibility Study is currently underway to address emerging contaminants and to optimize the remedy.

The North Hollywood Operable Unit is not currently operating, and is therefore not achieving capture. EPA recently revised the remedy, and expects capture will be achieved when the revised remedy is implemented.

Exposure assumptions, toxicity data, and Remedial Action Objectives used at the time of remedy selection are still valid for both remedies. Applicable or relevant and appropriate requirements identified in the Record of Decision have not changed since the last Five-Year Review. Toxicity values for Site contaminants of concern have not changed. Risk assessment methodologies have not changed in a way that could affect the protectiveness of the remedy. There are no changes in exposure pathways. The combined remedial action objectives are still valid.

The remedy at the North Hollywood Operable Unit is currently protective of human health and the environment because there is no exposure to untreated groundwater. Despite the fact that the extraction and treatment system is not currently operating, the public is not exposed to untreated groundwater because LADWP is not extracting groundwater from the areas of high contaminant concentrations and governmental controls prevent other extraction of the groundwater. When the system was operational, the treatment system effluent contaminant concentrations were less than their regulatory cleanup goals. Once the new remedy is implemented, EPA expects that all Remedial Action Objectives will be achieved.

The remedy at the Burbank Operable Unit is currently protective of human health and the environment. The treatment system effluent contaminant concentrations are less than their regulatory cleanup goals and there are governmental controls in place that prevent exposure to untreated groundwater.

1. Introduction

The purpose of a Five-Year Review (FYR) is to evaluate the implementation and performance of a remedy in order to determine if the remedy will continue to be protective of human health and the environment. The methods, findings, and conclusions of reviews are documented in FYR reports. In addition, FYR reports identify any issues found and document recommendations to address them.

The U.S. Environmental Protection Agency (EPA) is preparing this FYR pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act Section 121, 40 Code of Federal Regulation (CFR) Section 300.430(f)(4)(ii) of the National Contingency Plan and EPA policy.

This is the third FYR for the San Fernando Valley (Area 1) Superfund Site (Site). The triggering action for this statutory review is the signing of the previous FYR on September 30, 2013. The FYR has been prepared due to the fact that hazardous substances, pollutants, or contaminants at the Site remain above levels that allow for unlimited use and unrestricted exposure.

The Site consists of two operable units¹ (OUs): the North Hollywood Operable Unit (NHOU) and the Burbank Operable Unit (BOU). Both will be addressed in this FYR. Volatile organic compound (VOC)-contaminated groundwater in the North Hollywood area is addressed for the NHOU. The VOC-contaminated groundwater plume in the Burbank area is addressed for the BOU.

Kelly Manheimer and Gary Riley, Remedial Project Managers from EPA, led the Site FYR. Alison Burcham (environmental engineer) and Jeffrey Weiss (hydrogeologist), from the U.S. Army Corps of Engineers (USACE), participated.

¹ During cleanup, a site can be divided into a number of distinct areas depending on its complexity. These areas, called operable units (OUs), may address geographic areas, specific problems, or media where a specific action is required.

Review period: 10/17/2017 - 8/2/2018		
Date of site inspection: 1/24/2018		
Type of review: Statutory		
Review number: 3		
Triggering action date: 9/30/2013		
Due date (five years after triggering action date): 9/30/2018		

1.1. Background

The San Fernando Valley Area 1 Superfund Site (SFV Area 1) consists primarily of two large plumes from multiple sources in the San Fernando Valley. Site contaminant sources include, but are not limited to, the former Bendix Aviation and Allied Signal-Aerospace Company facilities in North Hollywood (successor cooperation is now Honeywell International), the former Lockheed Martin Corporation facilities near the Burbank Airport, and many other known sources throughout Area 1. Trichloroethene (TCE) and tetrachloroethene (PCE) were widely used in the San Fernando Valley starting in the 1940s for dry cleaning and for degreasing machinery. Disposal was not well-regulated at that time, and releases from a large number of facilities throughout the eastern SFV Area 1 have resulted in the large plume of VOC-contaminated groundwater that starts in the Area 1 Site and extends southeast, down-gradient, through the San Fernando Valley Superfund, Area 2 Site and through the San Fernando Valley Superfund, Area 4 Site.

Further investigation to define other sources is ongoing. SFV Area 1 is in a populated urban area, and does not affect any environmentally sensitive areas.

1.2. Physical Characteristics

The Site is an area of VOC-contaminated groundwater that encompasses approximately 13 square miles beneath the Cities of North Hollywood and Burbank in the eastern San Fernando Valley, within the Upper Los Angeles River area.

The San Fernando Valley is a 122,800-acre alluvial basin in the south-central portion of the Transverse Ranges. The San Fernando Valley is bordered on the northeast by the San Gabriel Mountains with the Verdugo Mountains to the southeast, on the north and northwest by the Santa Susana Mountains, on the west by the Simi Hills, and on the south by the Santa Monica Mountains. Average annual precipitation in the San Fernando Valley is approximately 15 inches per year. However, during water years 2006 to 2007 and 2013 to 2014 (October 1 to September 30), precipitation was well below average, at less than 5 inches.

The two OUs located within the Site, North Hollywood Operable Unit (NHOU) and Burbank Operable Unit (BOU), each have a groundwater extraction and treatment system (Figure 2). The treatment facility for the NHOU is located west of Lankershim Boulevard in North Hollywood. There are eight extraction wells associated with the treatment system. The NHOU treatment facility is approximately 3.8 miles north of the Los Angeles River.

The treatment facility for the BOU is located southeast of the airport in Burbank. There are eight extraction wells associated with the BOU treatment facility located approximately half a mile north of the BOU. The BOU treatment facility is located approximately 3.5 miles north of the Los Angeles River.

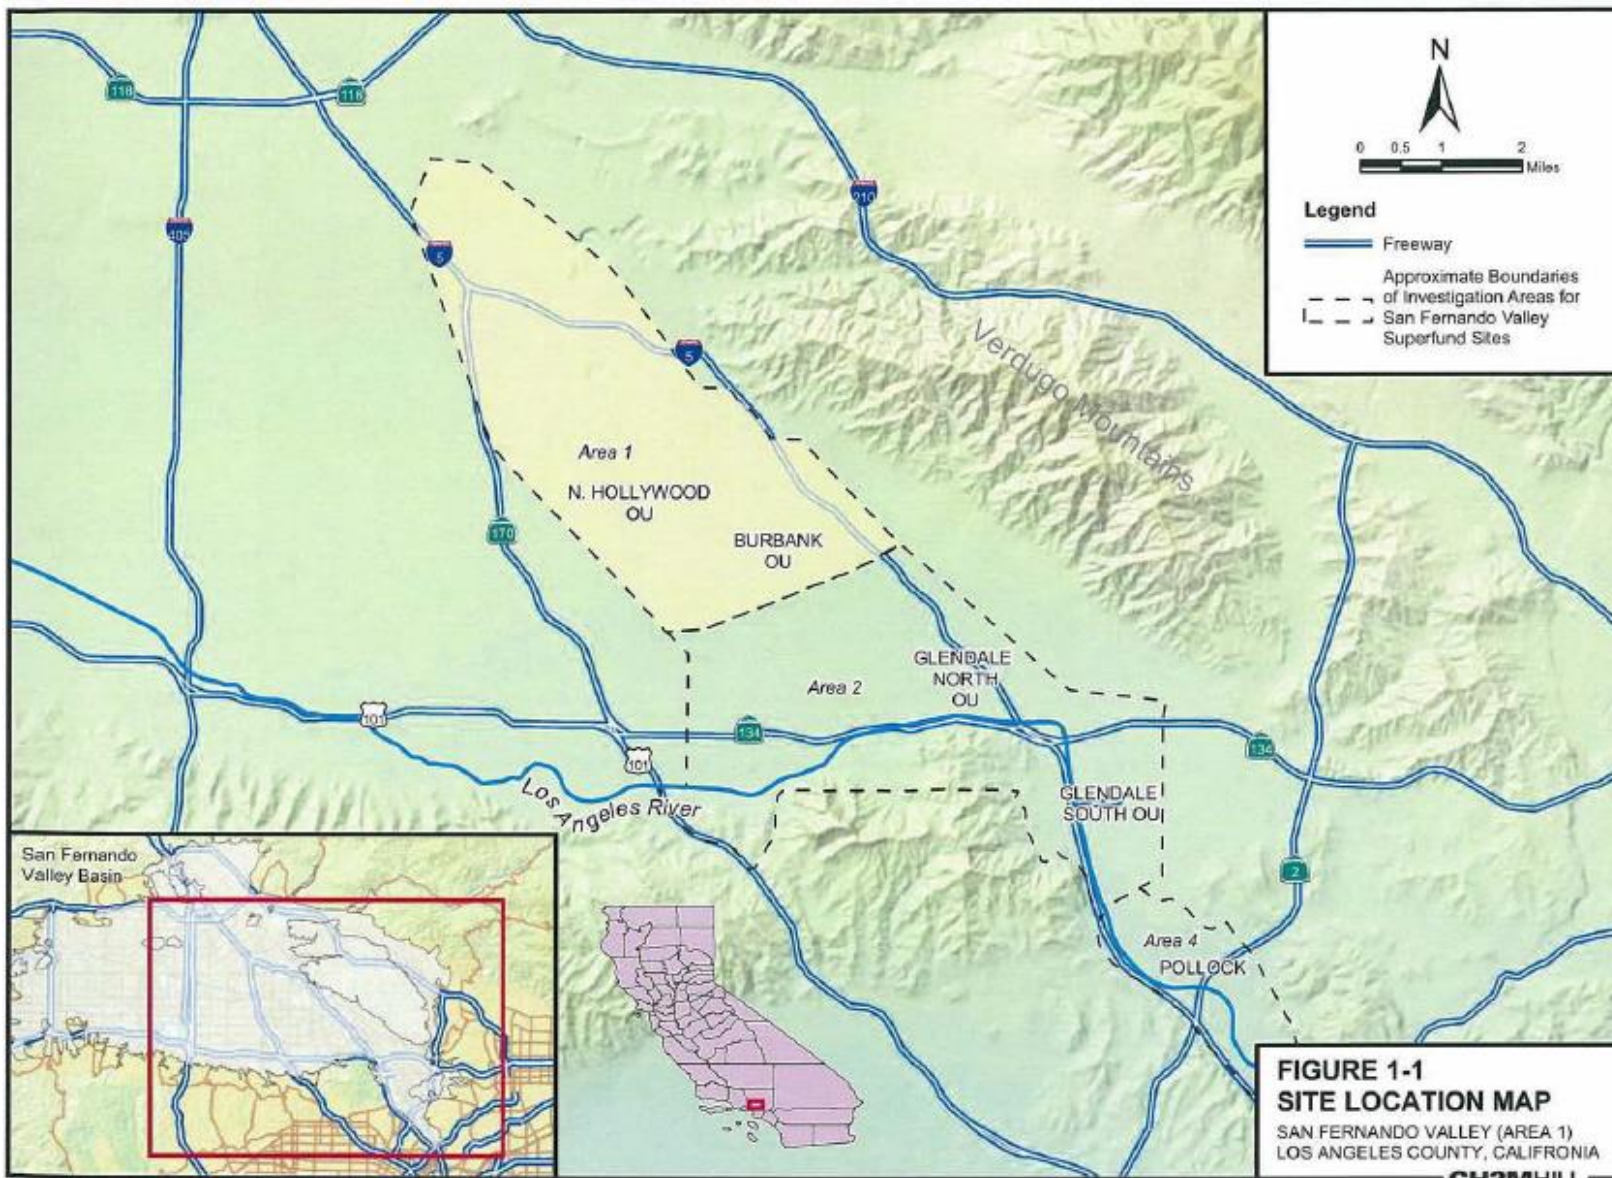

Figure 1. Location Map for the San Fernando Valley (Area 1) Superfund Site

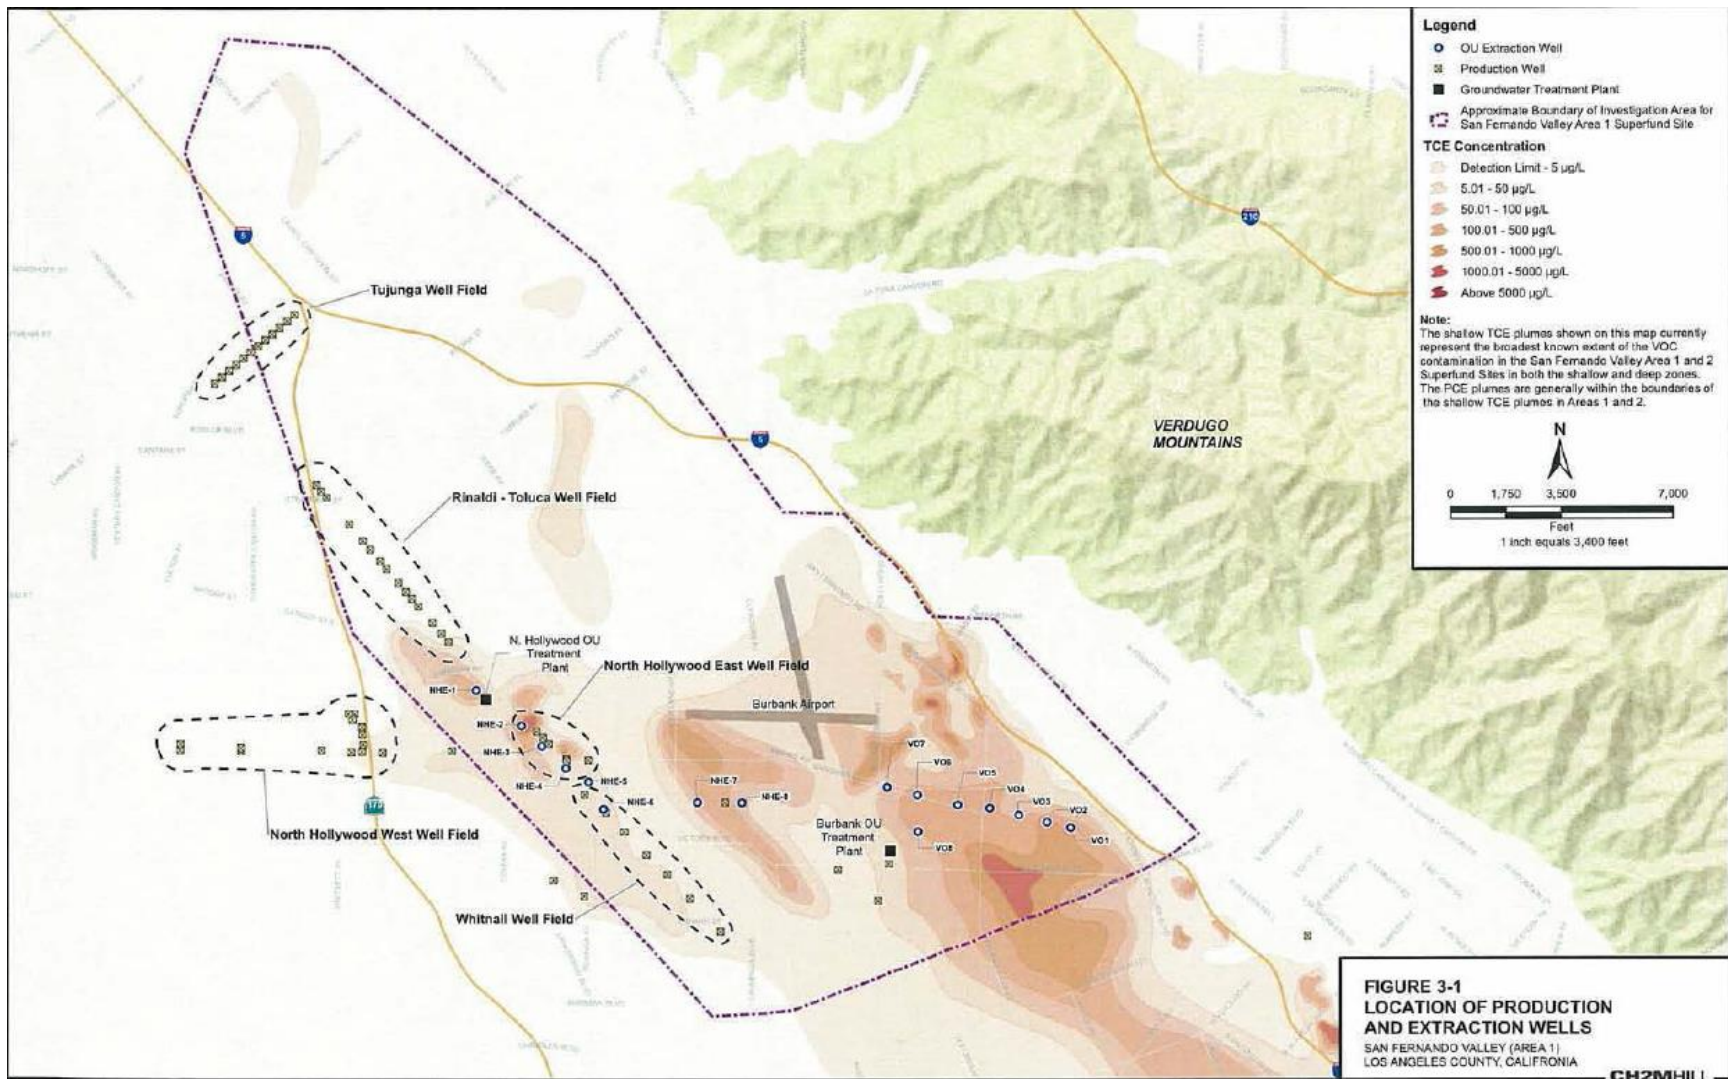

Figure 2. Location of Wells and Treatment Plants

1.3. Hydrology

Alluvial deposits in the San Fernando Basin contain groundwater. Geologic investigations at the Site have defined several hydrostratigraphic units within these alluvial deposits. The primary contaminated units at the Site are the Water Table aquifer and the B-zone aquifer. The Water Table aquifer is an unconfined aquifer within the coarse-grained sands and gravels present up to 350 feet below ground surface, and overlies a leaky aquitard consisting of interbedded sands, silts, and clays. Beneath the aquitard is the B-zone aquifer, which consists of coarse-grained sands and gravels from about 350 to 425 feet below ground surface. The depth to groundwater ranges from approximately 120 to 425 feet below ground surface.

Table 2. Comparison of stratigraphic and hydrostratigraphic units in the SFV Area 1

Approx. Depth (feet)	Geologic Age	JMM (1992) Zone Designation	ULARA Watermaster Units	Oberlander, et al. (1993) units	Depth Region	NHOU Hydrostratigraphic Units ¹

Natural horizontal hydraulic gradients in the eastern San Fernando Valley generally run south and east, toward the Los Angeles River Narrows. However, extraction and production wells in the NHOU and BOU affect the gradient, and draw the flow of groundwater toward these wells. Figure 3 is a recent groundwater elevation map that shows the gradient in the Water Table aquifer within the BOU. Groundwater gradients in the SFV Area 1 were estimated during the Remedial Investigation to range from approximately 0.001 to 0.021. The 2016 Groundwater Elevation Memorandum (Tetra Tech, 2016) for the Burbank Operable Unit reported the groundwater gradient near the BOU extraction wells between 0.0023 and 0.0139.

Figure 3. Burbank Operable Unit Groundwater Elevations in the Water Table Aquifer

2. Remedial Actions Summary

2.1. *Basis for Taking Action*

The presence of TCE and PCE in Site groundwater, at concentrations above their respective maximum contaminant levels (MCLs), provided the basis for taking action. The risk is to human health from potential ingestion of drinking water. TCE and PCE are probable human carcinogens. Carbon tetrachloride, 1,2-Dichloroethane, and arsenic are also found in Site groundwater, and contribute to carcinogenic risk. The primary threat to human health is ingestion.

Groundwater is at least 120 feet below the ground surface, so contaminated groundwater does not interact with Site surface water. Thus, ecological risk posed by contaminants in groundwater is negligible.

2.2. *Remedy Selection*

2.2.1. NHOU

EPA signed the first interim Record of Decision (ROD) for the NHOU in September 1987. The selected interim remedy addressed VOC-contaminated groundwater in the North Hollywood area. Due to the large area and complexity of the Site, EPA and the State of California split responsibility for cleanup, with EPA responsible for oversight of regional groundwater remediation and the State's Los Angeles Regional Water Quality Control Board responsible for source investigation and remediation. The cooperative agreement that formalized this arrangement is still active.

In the 1987 ROD, EPA selected groundwater extraction, treatment of VOCs by air stripping and disinfection with chlorine, and conveyance of the effluent to the North Hollywood Pumping Station Complex as the remedy. The effluent was then blended with water from the Los Angeles Aqueduct Filtration Plant, water purchased from the Metropolitan Water District, and groundwater from other Los Angeles Department of Water and Power (LADWP)-operated pumping fields in the vicinity of the NHOU prior to being served to consumers. VOCs in emissions from the air stripper are treated by vapor phase granular activated carbon (VPGAC) prior to discharge to the atmosphere.

EPA signed a second Interim Action ROD for the NHOU in September 2009. The Remedial Action Objectives (RAOs) are:

- Prevent exposure to contaminated groundwater above acceptable risk levels.
- Contain areas of groundwater with contaminant concentrations that exceed the MCLs and notification levels to the maximum extent practicable.
- Prevent further degradation of water quality at the Rinaldi-Toluca and North Hollywood West production wells fields by preventing the migration toward these well fields of the more highly contaminated areas of the VOC plume located to the east/southeast.

- Achieve improved hydraulic containment to inhibit horizontal and vertical contaminant migration in groundwater from the more highly contaminated areas and depths of the aquifer to the less-contaminated areas and depths of the aquifer, including the southeast portion of the NHOU in the vicinity of the Erwin and Whitnall production well fields.
- Remove contaminant mass from the aquifer.

The second interim remedy for the NHOU requires an extraction well network and above-ground treatment system to contain and remediate contaminated groundwater. The selected remedy includes extraction and treatment of contaminated groundwater at certain locations within the plume, expanded treatment for VOCs, and additional treatment for chromium and 1,4-dioxane. It also includes a groundwater management plan as an institutional control to ensure nearby water supply production well pumping does not negatively impact NHOU remedy performance. Components of the remedy include:

- Construction of new extraction wells.
- Modification/rehabilitation of several existing extraction wells.
- Expanded VOC treatment.
- Chromium treatment for extraction wells NHE-1, NHE-2, and two of the new extraction wells.
- Installation of additional monitoring wells.
- Institutional control (Groundwater management plan)
- Use of the treated water in LADWP's water supply system.

In 2014, EPA issued a ROD amendment allowing re-injection of treated water into the aquifer, in addition to delivering treated water to LADWP. EPA had concluded that re-injection of the treated groundwater might be necessary if LADWP and the NHOU potentially responsible parties are unable to reach an agreement that is acceptable to EPA regarding terms for delivery and acceptance of the treated water. This Amended Remedy ensures that EPA has the flexibility to design the most effective remedy and implement that remedy without significant delay. Although this ROD Amendment allows re-injection as an additional end-use option, it does not specify which end use will be implemented. Consequently, both the drinking water and the re-injection end uses are considered part of EPA's Preferred Alternative in the Amended Remedy.

In 2016, EPA determined that additional extraction wells were necessary to protect the North Hollywood West production wellfield from 1,4-dioxane contamination, and issued a Memorandum to File which clarified that these wells were part of the required remedy.

EPA subsequently issued an Explanation of Significant Differences (ESD) in February 2018, which expanded the amount of water extracted by the remedy. After reviewing additional groundwater data collected since 2009 and securing LADWP's and the City of Burbank's cooperation regarding its planned groundwater extraction rates and potential use of LADWP and Burbank extraction and conveyance infrastructure, EPA determined that increased groundwater extraction in the NHOU could practicably achieve greater containment than the remedy selected in the 2009 ROD. Requirements in the ESD include:

- Addition of new extraction wells.
- Diversion of four wells to the Burbank Operable Unit for treatment.
- Expansion of the NHOU treatment plant to accommodate the additional flow created by the new wells.

2.2.2. BOU

EPA signed the interim ROD for the BOU in June 1989. The selected interim remedy addressed the VOC-contaminated groundwater plume in the Burbank area. The two RAOs used to select the remedy are:

- To partially control the movement and spread of groundwater contaminants in the Burbank Operable Unit area, while contributing to aquifer restoration in the San Fernando Valley Basin Area 1 Superfund Site.
- To address the public health threat posed by contamination of the City of Burbank's public water supply wells by providing residents in the area with a water supply that meets state and federal drinking water standards.

The selected remedy includes extraction wells to pump groundwater to the treatment plant for VOC removal by air stripping followed by a liquid phase granular activated carbon (LPGAC) polishing step. The treated water is conveyed to the City of Burbank for municipal supply. The air stream is treated through VPGAC vessels prior to discharge to the atmosphere.

EPA signed an ESD in November 1990. The ESD concluded that, based on information suggesting high nitrate levels in the groundwater, additional measures were required to meet the MCLs for nitrate in the extracted and treated groundwater. EPA required blending of the extracted and treated groundwater with additional water from a water supply lower in nitrate, such that water served to the public would achieve the MCL. The resultant larger quantity of water raised the possibility that the City of Burbank would not have the capacity to accept the quantity of water produced. In the ESD, EPA required reinjection of excess treated water into the aquifer. Finally, the ESD clarified that the interim remedy could be designed, constructed, and operated in phases.

EPA signed a second ESD in February 1997. Based on additional study of the local groundwater system, an extraction rate of 9,000 gallons per minute (gpm) resulted in substantially the same level of groundwater containment as an extraction rate of 12,000 gpm (the rate called for in the 1989 ROD). Therefore, the interim remedy extraction rate was lowered to 9,000 gpm. EPA decided to eliminate the requirement for reinjection based on projections that the revised extraction rate would not produce excess water. In the second ESD, the City of Burbank committed to accepting an annual average of 9,000 gpm from the interim remedy facilities, contingent on water demand. Finally, EPA suspended the 9,000 gpm extraction rate requirement during times when nitrate levels in the extracted groundwater exceed 50 milligrams per liter. In these cases, the quantity of blend water required to meet the nitrate MCL could make extraction at 9,000 gpm infeasible.

2.3. Remedy Implementation

2.3.1. NHOU

Construction of the original NHOU treatment system was completed in March 1989 and operation commenced December 1989. The system consisted of eight groundwater extraction wells (NHE-1 through NHE-8), one air stripping tower to remove VOCs from the extracted groundwater, two vapor-phase granular activated carbon (VPGAC) adsorbers to remove VOCs from the air stream, and ancillary equipment. Each extraction well is approximately 300 feet deep (screened in NHOU Water Table aquifer) and has an approximate capacity of 300 gpm. Extraction well NHE-1 was never operated because of insufficient groundwater yield. A schematic of the NHOU groundwater treatment facility is shown in Figure 4.

Extracted groundwater fed through a 48-foot-tall packed air stripper (packing height of 22 feet) with a capacity of 2,000 gpm. After disinfection, treated groundwater was discharged into an LADWP blending facility where it combined with water from other sources before entering the LADWP municipal supply system. LADWP tests all treated water on a regular basis to ensure it meets all federal and state standards for drinking water. Both EPA and the State Division of Drinking Water oversaw treatment facility operations to ensure compliance with these standards.

This remedy was shut down in November 2017 due to declining water levels and maintenance issues, and will remain shut down until the new remedy can be designed and built.

Figure 4. Schematic of NHOU groundwater treatment facility

2.3.2. BOU

The treatment system for the BOU was completed in two phases. Construction of Phase I of the BOU treatment system occurred from 1993 to 1994, which included the installation of seven extraction wells capable of producing a combined flow of 6,000 gpm. Operation began in 1996. In Phase II, a new well was added to allow an increase in the groundwater extraction rate from 6,000 gpm to 9,000 gpm. The City's municipal supply well W-10 (also known as WP-180) was modified and incorporated into the interim remedy as BOU extraction well VO-8. Construction of Phase II of the BOU completed in December 1997 and operation commenced in 1998.

The treatment facility for the BOU is located southeast of Bob Hope Airport, and approximately 3.5 miles north of the Los Angeles River. There are eight extraction wells within a half-mile of the treatment facility, VO-1 through VO-8. Wells VO-1 to VO-7 are located north of the treatment plant in an east-west alignment. Well VO-8 is located between the treatment plant and the other wells.

Figure 5 shows a schematic diagram of the BOU groundwater treatment facility. A pipeline conveys the extracted groundwater to the BOU treatment system. The BOU air stripper treats contaminated groundwater and the air-stream then passes through a VPGAC system to remove VOCs prior to release to

the atmosphere. Treated groundwater (effluent from the LPGAC vessels) is then conveyed to the City of Burbank's Valley Forebay for distribution and storage, then to the blending facility. At the blending facility, the groundwater is blended with water from the Metropolitan Water District prior to distribution.

Figure 5. Schematic of BOU Groundwater Treatment Facility

2.3.3. Institutional Controls, for Both OUs

There are no specific institutional control instruments in place within Area 1, although there is an effective governmental control in place which prevents exposure to untreated contaminated groundwater. This governmental control is the 1979 Final Judgment in *Los Angeles v. San Fernando*, (Superior Court Case No. 650079) (*LA v. San Fernando*). The 1979 Final Judgment in *LA v. San Fernando* upheld the Pueblo Right of the City of Los Angeles to all groundwater in the ULARA Basin from precipitation within the ULARA and all surface and groundwater flows from the Sylmar and Verdugo Basins. 14 Cal. 3d 199 (1975). *LA v. San Fernando* also established the water rights of the cities of Los Angeles, Glendale, and Burbank to all water imported from outside the Basin and either spread or delivered within the Basin. With the exception of a few legacy entities including a few cemeteries and a hotel, only the Cities that are party to the Judgment have the authority to extract groundwater from the basin.

The Final Judgment created the entity known as "Watermaster" with full authority to administer the adjudication, under the auspices of the Superior Court. Under the final judgment in *LA v. San Fernando*, with the exception of certain minor historical water rights holders, only the cities of Los Angeles, Burbank, and Glendale are permitted to extract groundwater from the Basin. Each of these municipalities administers a public water system, which is regulated by the California State Water Resources Control Board, Division of Drinking Water.

Additional governmental controls on the use of groundwater as drinking water include EPA and State of California-promulgated MCLs and California State Action Levels that require drinking water standards to be met before delivery of the treated water to the potable water supply. These drinking water controls and the Watermaster's authority to regulate and allocate water resources eliminate unregulated use of area groundwater; therefore, the interim remedies are currently protective of human health.

2.4. *Operation and Maintenance (O&M)*

2.4.1. NHOU

LADWP has been conducting long-term operations and maintenance of the NHOU extraction and treatment system in accordance with the EPA-approved 1988 O&M plan, and the 2003 preventative maintenance schedule. LADWP provided quarterly reports to EPA detailing the operations and maintenance of the NHOU, and to the California State Water Resources Control Board, Division of Drinking Water on the quality of the water delivered from the system. As of November 2017, the extraction wells ceased to provide sufficient water for the treatment plant to operate, so the system was shut down.

2.4.2. BOU

The City of Burbank conducts long-term operations and maintenance activities for the BOU according to the O&M plan provided to EPA in 1998. EPA received a revised Operational Sampling Plan in 2017. This plan presents a treatment plant monitoring program that provides the data necessary to evaluate if the treatment plant is operating within permit conditions. The wider groundwater monitoring program intended to evaluate the near-field and far-field effects of the BOU extraction well field is conducted by the responsible party. The four primary objectives of the long-term groundwater monitoring program are:

- Verify containment of the 5 micrograms per liter ($\mu\text{g/L}$) tetrachloroethene (PCE) and 100 $\mu\text{g/L}$ trichloroethene (TCE) plumes in groundwater.
- Collect sufficient data to evaluate groundwater extraction system performance with respect to mass removal.
- Characterize the nature and extent of emerging compounds.
- Characterize the nature and extent of the primary chemicals of concern (PCE and TCE) to refine and update the conceptual site model.

3. Progress Since the Last Five-Year Review

3.1. Previous Five-Year Review Protectiveness Statement and Issues

The protectiveness statement from the 2013 FYR for the San Fernando Valley Area 1 Site stated:

The remedy at the NHOU is currently protective of human health and the environment because there is no exposure to untreated groundwater. The treatment system effluent contaminant concentrations are less than their regulatory cleanup goals and there are governmental controls in place that prevent exposure to untreated groundwater. However, to be protective in the long term, the existing treatment facility needs to be modified consistent with the remedy selected in the 2009 ROD, and chromium and 1,4 dioxane impacts to the remedy need to be addressed. The implementation of the selected remedy is in the design phase.

The remedy at the BOU is currently protective of human health and the environment because there is no exposure to untreated groundwater. Their treatment system effluent contaminant concentrations are less than their regulatory cleanup goals and there are governmental controls in place that prevent exposure to untreated groundwater. There is uncertainty as to whether containment capture is being achieved since the BOU pumps at rates less than those prescribed in the 1997 ESD. In order to make a containment determination the facility must operate at an average annual rate of 9,000 gpm, or BOU parties must demonstrate that containment can be achieved at lower pumping rates.

The 2013 FYR included three issues and recommendations. Each recommendation and the current status is discussed below.

Table 3. Status of Recommendations from the 2013 FYR

Operable Unit	Issue	Recommendations	Current Status	Current Implementation Status Description	Completion Date (if applicable)
BOU	According to the 1997 ESD, the City of Burbank is committed to accepting an annual average of 9,000 gpm of water from treatment facility, yet the annual extraction for the BOU is consistently less than 9,000 gpm, at average annual rates at or near 6,500 gpm.	A formal evaluation of pumping rates and contaminant capture should be conducted and presented to EPA if pumping rates less than 9,000 gpm is to be used to meet BOU ROD and ESD objectives.	Completed	Lockheed Martin completed a technical memorandum in 2015. EPA responded to the evaluation on August 9, 2016.	8/9/2016
NHOU	The Second Interim Remedy (2009) for the NHOU does not explicitly address treatment of chromium in well NHE-3. Well NHE-3 remains off-line pending an evaluation on how to best address chromium as part of the remedial design.	Address chromium contamination in well NH-3, and additional wells as needed.	Ongoing	Chromium treatment for NHE-3 was added in the 2018 ESD. The new system is currently in design, and there are agreements in place with the PRPs to construct the remedy once design is completed.	
NHOU	The notification level for 1, 4-dioxane has been exceeded at least once in all of the operating NHOU wells.	Sample the influent and effluent of the NHOU plant for 1, 4-dioxane and take appropriate actions to keep concentrations below the notification level.	Ongoing	The 2009 ROD addresses 1,4 dioxane, and treatment will be included in the new system. In addition, the 2016 Memo to File adds new wells to protect the NH West wellfield from 1,4 dioxane contamination.	

3.2. Work Completed at the Site During this Five-Year Review Period

3.2.1. NHOU

During this five-year review period, EPA issued an Explanation of Significant Differences in February 2018 to expand the treatment plant, add additional wells and to divert extracted water from four wells to the Burbank Operable Unit treatment plant. A Memorandum to the File confirmed the need for additional extraction wells to protect the North Hollywood West wellfield from 1,4 dioxane contamination.

In addition, design of the new system is approximately 60% complete. Construction of three new extraction wells has been completed, and construction of the treatment system is expected to be

completed within the next two years. Administrative orders are in place with the potentially responsible parties to complete design, construct and operate the interim extraction and treatment system.

As noted previously, on November 13, 2017, LADWP ceased all operation and maintenance activities in the NHOU First Interim Remedy. When the extraction wells and treatment system operated, the treatment system had significant maintenance issues. These issues are being considered and addressed in the new remedy design.

3.2.2. BOU

Since the completion of the last FYR, Lockheed Martin's contractor, Tetra Tech, completed a capture analysis and associated technical memorandum. Further details about this analysis are in the Data Review section. The City of Burbank updated the conference building and storage buildings at the treatment plant in the last five years, and switched the method for storing contaminants removed from the treatment system to allow for more simplified transportation. They are still configuring the final method for storing contaminants awaiting pickup.

In 2018, Lockheed Martin, under EPA oversight, started a Focused Feasibility Study to assess the current nature and extent of contaminants from the 1989 ROD and emerging contaminants identified since that time. The Focused Feasibility Study will evaluate the impact of emerging contaminants and optimize the remedy. The Focused Feasibility Study will also consider the diversion of four wells from the NHOU to the BOU treatment plant.

4. Five-Year Review Process

4.1. *Community Notification, Involvement and Site Interviews*

On June 27, 2018, a public notice was published in the *Los Angeles Daily News* announcing the commencement of the Five-Year Review process for the San Fernando Valley Area 2 Site, providing contact information for EPA's Remedial Project Managers, Kelly Manheimer and Gary Riley, and inviting community participation. The Five-Year Review report will be made available to the public once it has been finalized. Copies of this document will be placed in the designated public repositories: City of Glendale Public Library, 222 East Harvard St. Glendale, CA or call (818) 548-2021 and Los Angeles Public Library, 630 W. Fifth St., Los Angeles CA 90071 or call (213) 228-7000.

During the FYR process, interviews were conducted to document any perceived problems or successes with the remedy that has been implemented to date. The results of these interviews are summarized below.

During the site visit of the NHOU treatment plant, plant operators, maintenance personnel, and engineers from LADWP were interviewed. Because the treatment plant and extraction wells are not currently operational, most of the discussion focused on the planned upgrades to the system. The plant operators

felt the treatment system was effective when operational, and have relayed operational issues to EPA and other entities in a timely manner.

During the site visit to the BOU treatment plant, plant operators and maintenance personnel from Terranear PMC were interviewed. Overall, the treatment plant and remedy was working well. Within the past five years, two technical memorandums (Tetra Tech 2015 and Tetra Tech 2016) addressing the effectiveness of the capture zone were prepared. The interviewees feel these memorandums address the previous questions regarding the capture zone. Currently, the BOU plant cannot pump at capacity because they do not have sufficient demand in the City of Burbank water system for all of the treated water. However, a new interconnect is being installed between Burbank Water and Power and LADWP conveyance pipelines which will allow the Burbank Water and Power to provide water to LADWP.

Refer to Appendixes F and G for more details from the site inspections and interviews conducted during the site inspections.

4.2. Data Review

Data collected during the past five years were used to evaluate if the interim remedies at NHOU and BOU are meeting the RAOs and remain protective of human health and the environment. Data reviewed for this FYR included groundwater quality data from monitoring and extraction wells and groundwater elevation data from wells within SFV Area 1. The groundwater quality data included plume maps, annual monitoring reports, and monthly groundwater quality reports from the NHOU treatment plants. The groundwater elevation data was obtained from a capture zone study completed by Lockheed Martin within the Burbank Operable Unit and annual monitoring reports for the Burbank Operable Unit.

The data review focuses on how the data relates to the current remedy, which includes hydraulic capture, prevention of further groundwater degradation, and contaminant mass removal.

4.2.1. NHOU

During the past five years, groundwater extraction and treatment within the NHOU has removed contaminant mass and attained partial hydraulic capture through the use of six North Hollywood East (NHE) extraction wells. Mass removal was estimated using the influent PCE and TCE concentrations from the extraction wells and volume of water extracted. Containment of groundwater with concentrations that exceed the MCLs was evaluated by comparing plume maps from 2014 and 2017 and evaluating PCE and TCE trends at select wells during the past five years. The sections below discuss how data from this review period supports the question of whether RAOs are achievable in a reasonable timeframe. Appendix B includes data and trend analysis used for the evaluation.

4.2.2. NHOU Contaminant Mass Removal

Groundwater extraction and treatment within the NHOU has contributed to contaminant mass removal of VOCs, including PCE and TCE, during the past five years. Groundwater was extracted from six wells² in

² NHE-1 and NHE-5 are not used due to declining groundwater levels.

the North Hollywood East well field, including NHE-2, 3, 4, 6, 7 and 8. Groundwater from NHE-4, 6, 7 and 8 was treated at the North Hollywood Treatment Plant and delivered to the public water supply and groundwater from NHE-2 and NHE-3³ was discharged to the sanitary sewer due to elevated chromium concentrations. Figure 8 presents the total volume of water treated each month at the North Hollywood Treatment Plant and the estimated mass of PCE and TCE removed each month. Between March 2013 and June 2017, approximately 1.069 billion gallons of groundwater was treated for VOCs at the North Hollywood Treatment Plant and it was estimated that approximately 305 pounds of TCE and 65 pounds of PCE were removed from the treated water.

Estimated TCE/PCE removal was calculated by multiplying the average influent PCE and TCE concentrations for the past five years by the monthly volume of groundwater treated for the months where influent concentrations were not provided in the quarterly reports.

Figure 8. Estimated Mass of TCE and PCE Removed at North Hollywood Treatment Plant

³ NHE-2 and NHE-3 are operated by Honeywell and the volume of water extracted was not available when preparing this report.

4.2.3. NHOU Hydraulic Containment

A remedial action objective identified for the remedy in the 1997 ROD was to contain high-concentration areas of contaminated groundwater to the maximum extent practicable. The ROD specifically highlighted two areas in the NHOU where the remedy should prevent plume migration: the Rinaldi-Toluca and North Hollywood West production wells fields, and the Erwin and Whitnall production well fields. Hydraulic containment had not been achieved prior to the current five-year review period. Comparison of TCE and PCE plumes from 2014 and 2017 in Figures 8 and 9 indicate the North Hollywood West and Rinaldi-Toluca well fields continue to be impacted by the contaminant plume.

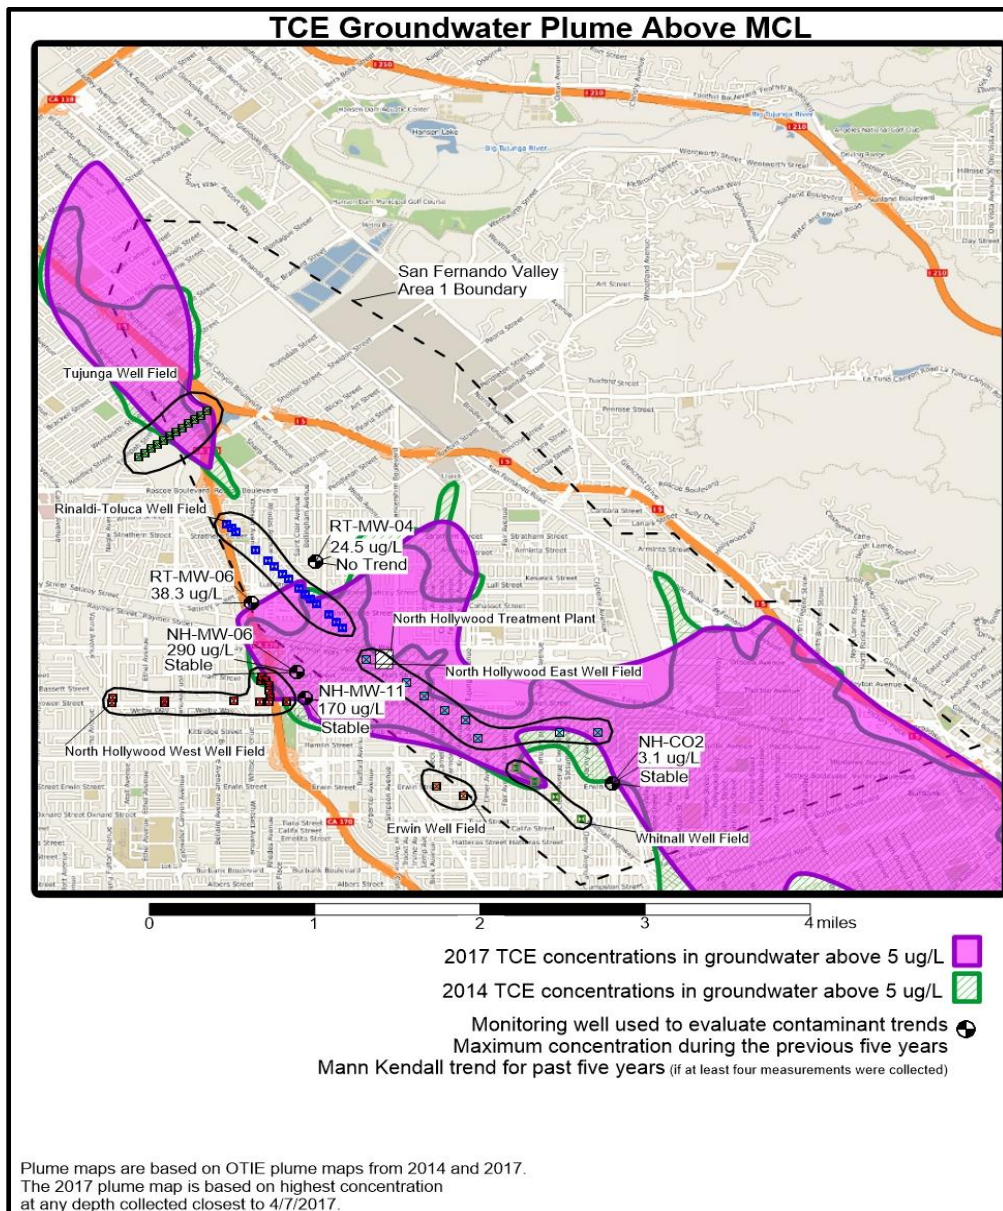

Figure 9. TCE Groundwater Plume above MCL

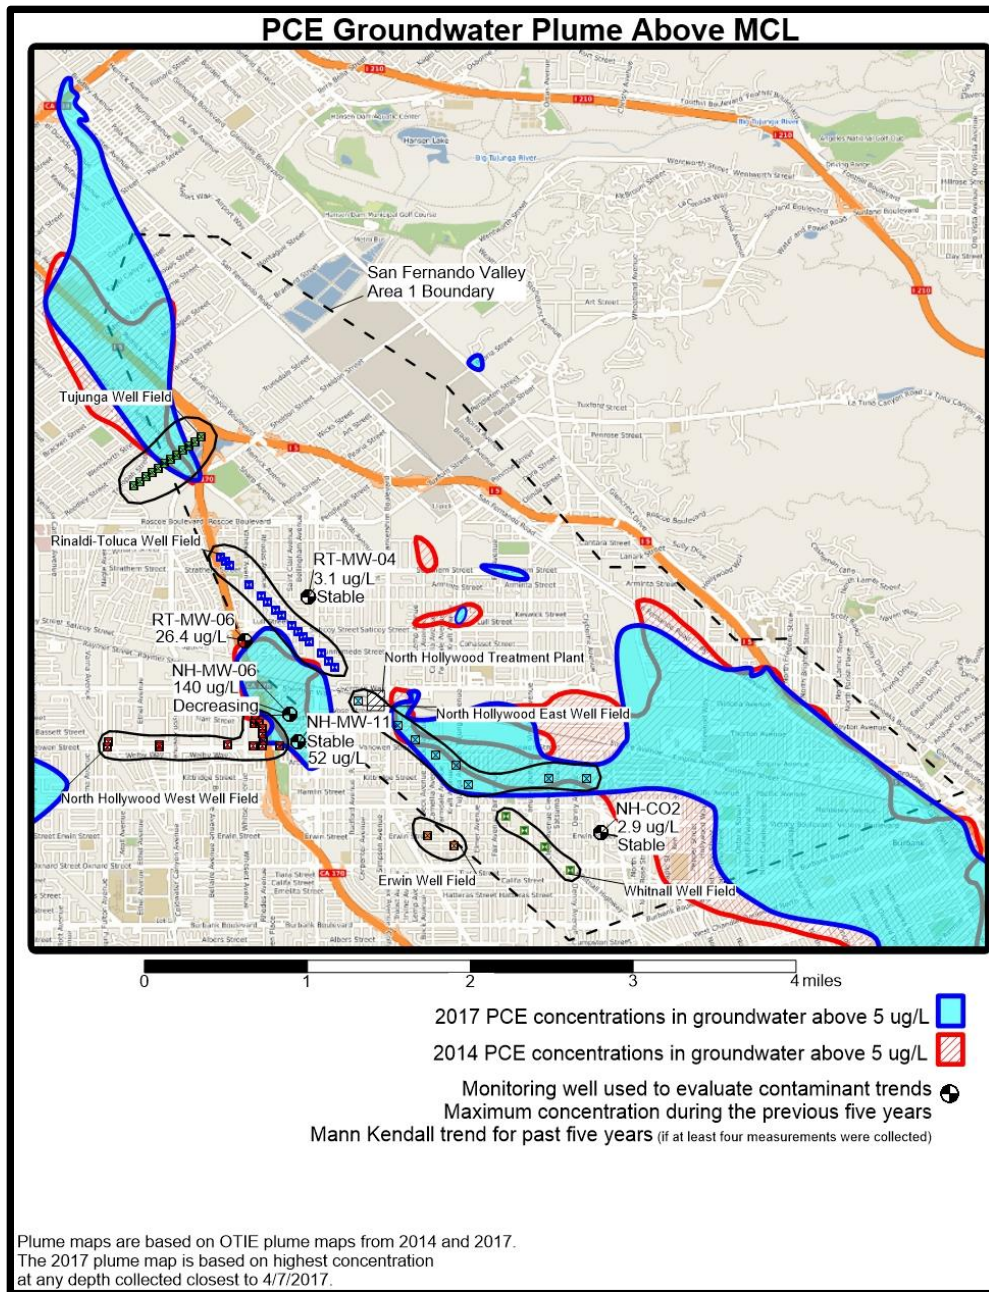

Figure 10. PCE Groundwater Plume above MCL

The contaminant plume for TCE and PCE had migrated into the Rinaldi-Toluca and North Hollywood West well fields prior to 2013. Prior to 2013, monitoring wells located near these well fields that contained TCE and PCE in excess of the 5 micrograms per liter ($\mu\text{g/L}$) MCL include RT-MW-04, RT-MW-06, NH-MW-06 and NH-MW-11. Within this area, it appears that the maximum concentrations of TCE and PCE may have peaked in 2015 at concentrations of 260 $\mu\text{g/L}$ and 140 $\mu\text{g/L}$ respectively. Since the completion of the previous FYR, the TCE and PCE concentration trends have been stable or decreasing in this area.

Table 4. Concentrations at the Rinaldi-Toluca and North Hollywood West well fields

Well ID	Date	PCE (µg/L)	TCE (µg/L)
NH-MW-06	5/15/2014	72	98
	12/16/2015	140	290
	12/1/2016	46.1	127
	8/10/2017	27.4	106
	9/14/2017	23.5	93.9
	Mann-Kendall	Decreasing	Stable
NH-MW-11	5/28/2014	52	32
	10/14/2015	17.3	170
	11/15/2016	35.6	104
	8/31/2017	5.3	10.6
	Mann-Kendall	Stable	Stable
RT-MW-06	6/25/2014	1.8	0.43
	10/18/2016	26.4	38.3
	7/25/2017	2.77	7.65
RT-MW-04	7/18/2014	3.1	2.9
	12/8/2015	1.45	3.09
	10/11/2016	0.718	2.45
	6/15/2017	1.11	24.5
	Mann-Kendall	Stable	No-Trend

Contaminant concentrations have not significantly increased near Whitnall production well field in the southeast corner of the NHOU, and remain below their MCL of 5 µg/L. Mann-Kendall trend analysis of the data from NH-CO2, located east of the Whitnall Well Field in the southern portion of the NHOU, during the past five years indicates that contaminant concentrations are stable and below the MCL. The Erwin production well field has not been impacted.

Table 5. PCE and TCE Concentrations at NHOU near the Whitnall production well fields

Well ID	Date	PCE (µg/L)	TCE (µg/L)
NH-CO2	4/10/2012	2.5	3.1
	10/12/2012	2.9	2.5
	4/11/2014	0.5	0.089
	4/26/2017	0.39	1
	Mann-Kendall	Stable	Stable

Chromium, 1,4-dioxane, 1,2,3-trichloropropane, and nitrate concentrations above their respective MCL do not extend beyond the PCE and TCE plumes. Therefore, conclusions regarding hydraulic capture for PCE and TCE also apply to other contaminants of concern at the Site. Groundwater contamination continues to impact nearby production well fields and extend beyond the boundary of San Fernando Valley Area 1. Additional extraction wells and increased pumping required in the ESD will likely improve the hydraulic containment and prevent further degradation of the aquifer.

4.2.4. BOU

Concentrations of TCE and PCE are declining, hydraulic capture is minimizing groundwater contamination from migrating beyond the BOU, and contaminant mass is being removed. These conclusions were reached after a review of the 2015 capture zone study, an evaluation of groundwater contamination via Mann-Kendall analysis, and the estimation of VOC mass removal from groundwater. The data analysis focused on TCE and PCE, since they are the primary contaminants of concern.

A Mann-Kendall analysis was completed by Tetra Tech using groundwater data from 1996 to 2017, which led to the conclusion that PCE and TCE concentrations at the Site are declining, as presented in the 2017 Annual Groundwater Monitoring Report (Tetra Tech 2017).

USACE also completed Mann-Kendall analysis for select wells, which focused on data from the past five years. The Mann-Kendall analysis⁴ using groundwater data from 1996 to 2017 indicates PCE concentrations are declining at all 20 wells within the Water Table Aquifer, and at 7 of the 10 wells within the B-zone aquifer. Wells with increasing PCE concentrations were located between an extraction well and higher contaminant concentration areas, indicating that the extraction wells are pulling contaminant mass towards the extraction wells. It is expected that monitoring wells close to the extraction wells may show a temporary increase in concentration. A similar pattern was observed when analyzing the TCE concentrations from the 39 wells in Water Table aquifer and B-zone aquifer. Of these 39 wells, only two had increasing trends.

Only contaminant trends for PCE and TCE were analyzed for this FYR, because they are the primary contaminants of concern for the current remedy and have the highest concentrations at the Site. The declining trends for PCE and TCE indicate that water quality is improving and the remedy is moving towards meeting state and federal drinking water standards.

4.2.5. BOU Capture Zone

Hydraulic capture is occurring at the Site based on multiple evaluations presented in a 2015 technical memorandum (Tetra Tech 2015), which used numerical modelling to assess the groundwater capture zones of extraction wells within the BOU. The model indicated the highest concentrations of TCE (above 500 µg/L) are within the BOU capture zone. The memo also included a triangular irregular network analysis to estimate groundwater gradients, which indicated that groundwater down-gradient from the

⁴ Mann-Kendall analysis was completed using contaminant concentrations from wells with at least four values above the detection limit.

extraction wells primarily flows towards the extraction wells. Groundwater plume maps generated using 2014 data and 2017 groundwater data indicate the PCE and TCE plumes are not expanding between 2014 and 2017. Figures 11 and 12 are the PCE plumes from 2014 and 2017, and Figures 13 and 14 are the TCE plumes from 2014 and 2017.

After reviewing the 2015 technical memorandum (Tetra Tech 2015), EPA concluded that a “A sustained long-term flow rate of 9,000 gpm would provide increased capture of the southernmost plume, where PCE and TCE concentrations are well above the 100 ppb and 5 ppb concentration thresholds, respectively. The increased capture would better achieve the ROD’s remedial action objective to “partially control the movement and spread of ground water contaminants in the Burbank OU area, while contributing to aquifer restoration at the SFV Area 1 Site. It would provide for correspondingly higher mass removal, decreased overall cleanup time, and reduced potential for further downgradient migration which may threaten water supply wells.” (EPA, 2016). EPA recommended to increase the average, sustained extraction rate to 9,000 gpm providing increased capture until a second interim remedy is in place. An interconnect with LADWP is under construction, which will provide enough capacity to discharge up to 9,000 gallons per minute, the current capacity of the treatment system. A Focused Feasibility Study is also currently underway, which will result in a second interim remedy.

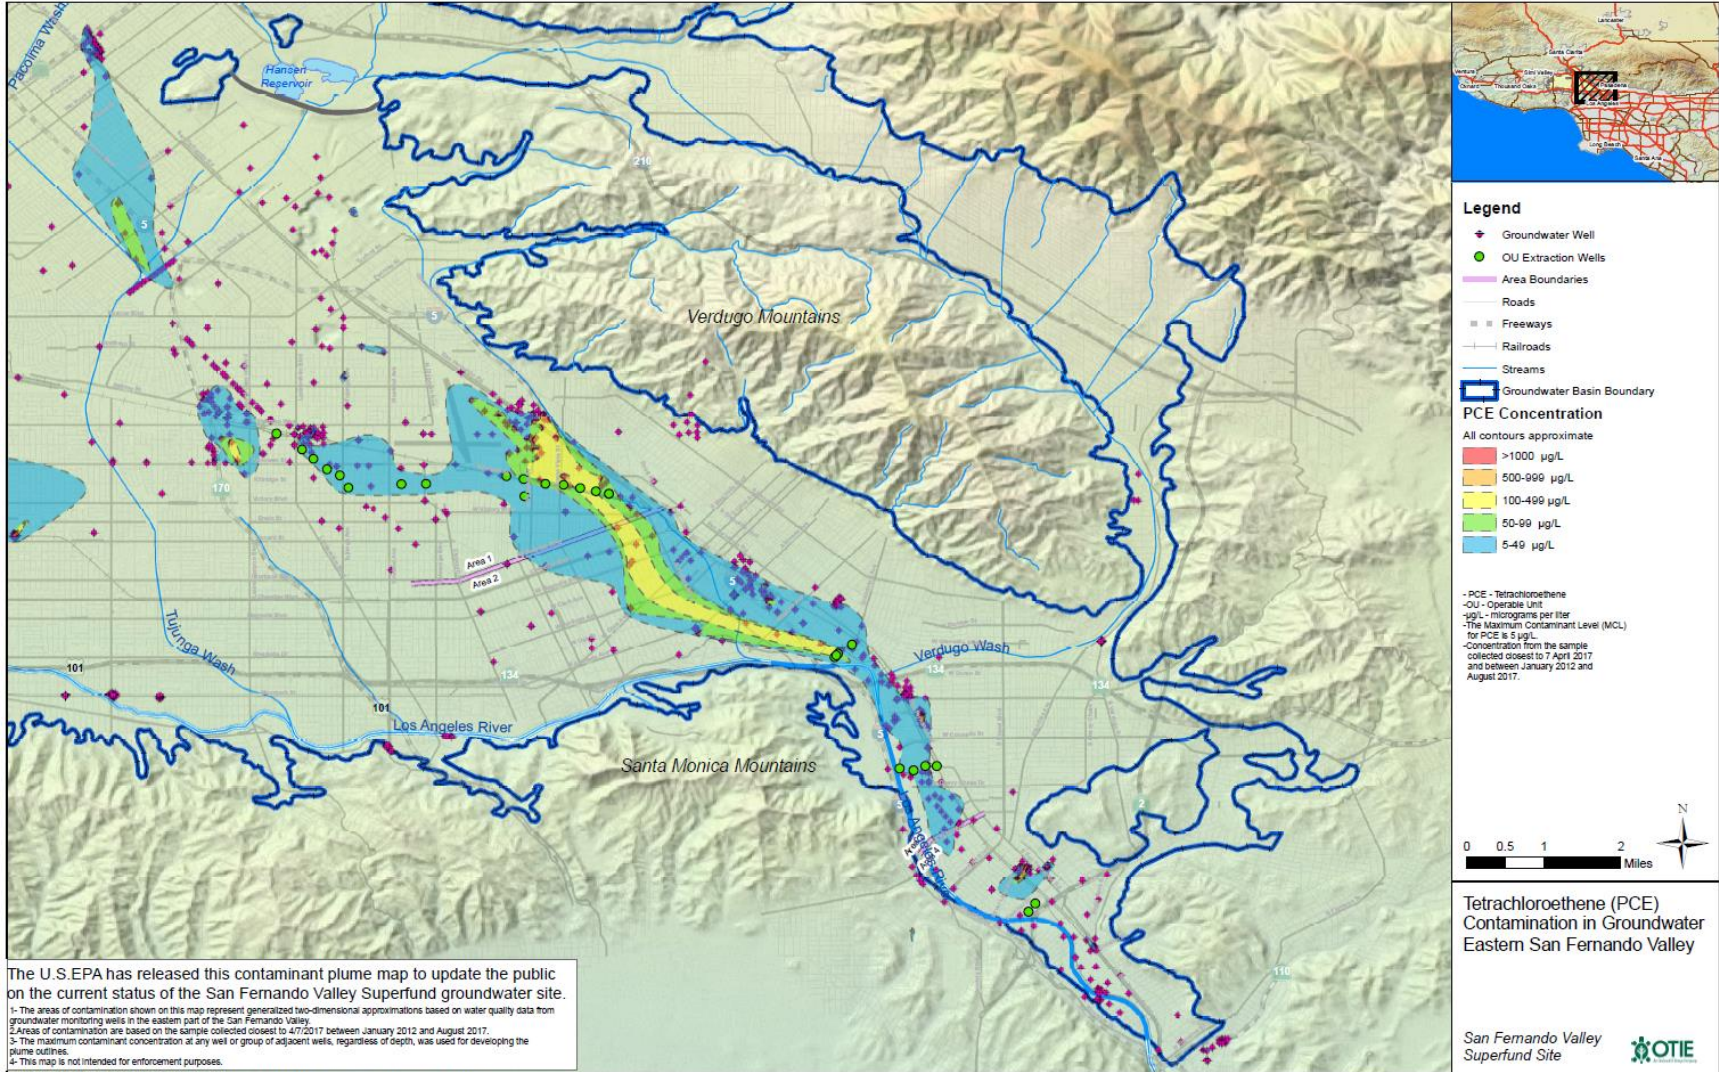

Figure 12. 2017 PCE Concentrations

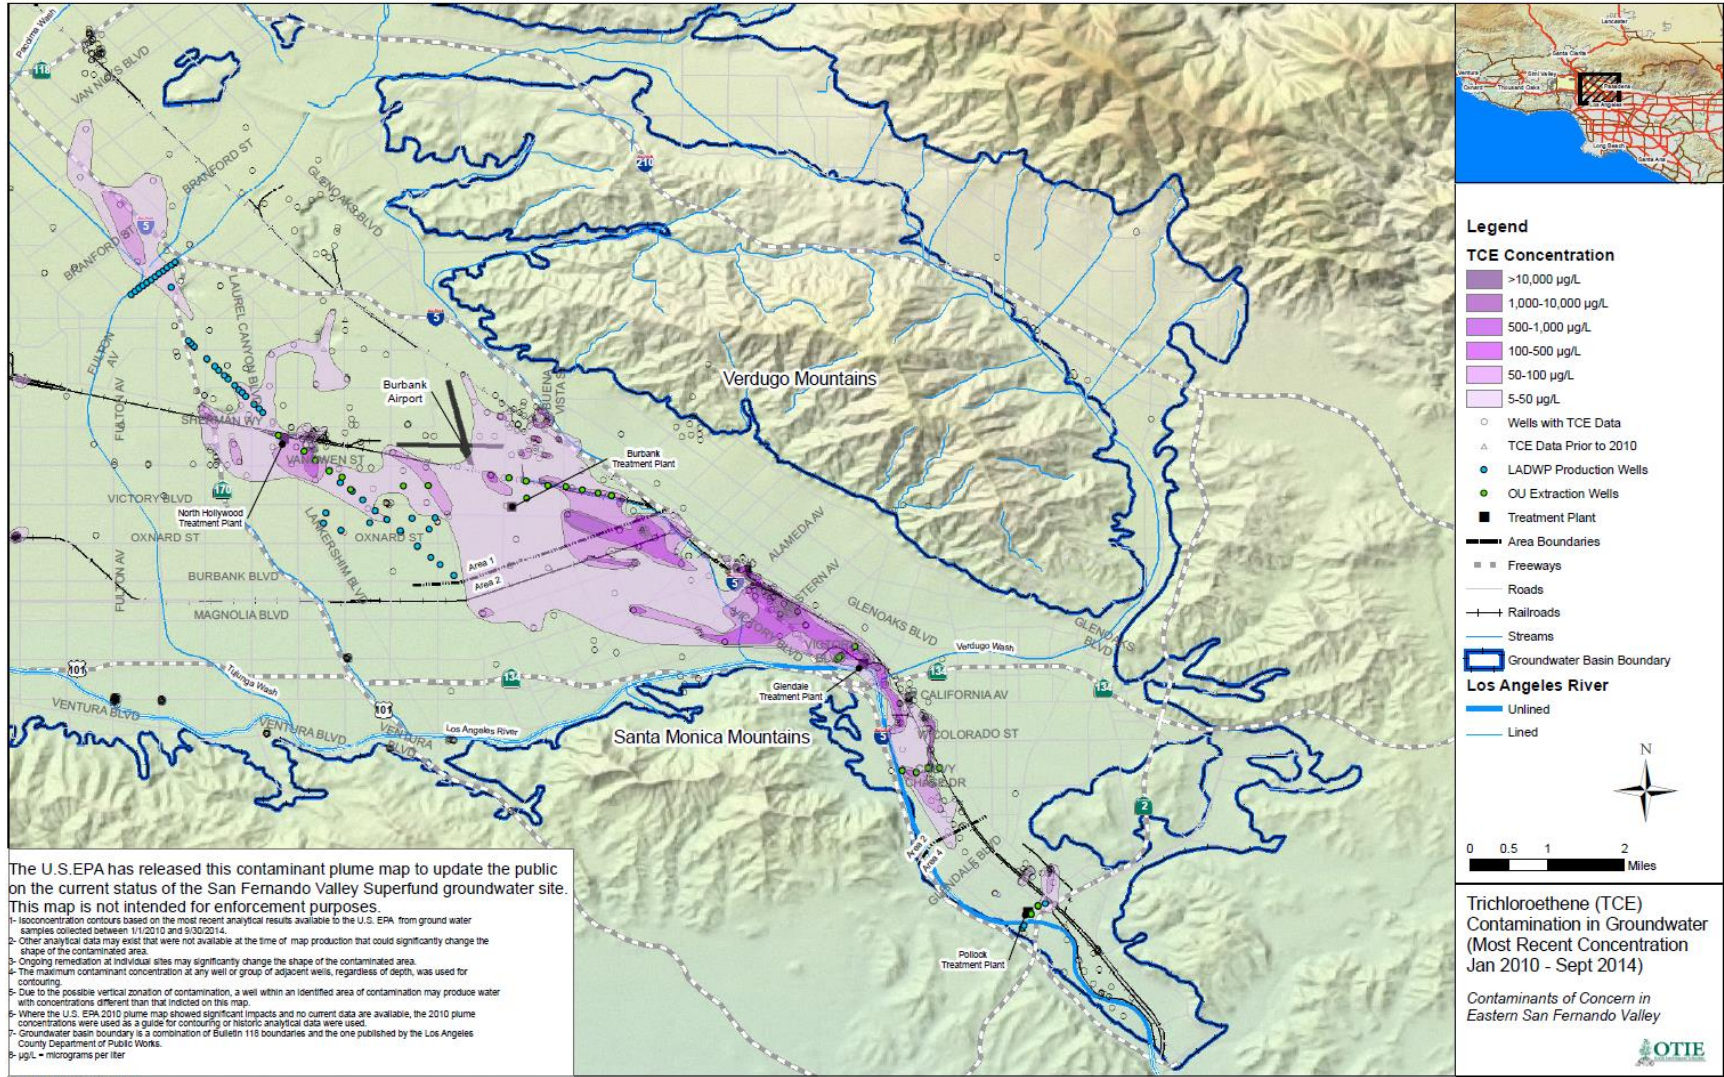

Figure 13. 2014 TCE Concentrations

Figure 14. 2017 TCE Concentrations

4.2.6. BOU Contaminant Mass Removal

The remedy continues to contribute to aquifer restoration, a key RAO for the remedy, by removing mass from the aquifer. The Burbank Treatment Plant has removed 17,901 pounds of VOCs from January 2013 to April 2017, which demonstrates that contaminant mass is continuing to be removed from groundwater. Table 5 presents the contaminant mass removed and volume of water treated for each of the past five years. The rate of contaminant mass removal has declined over the past five years, which is typical of an aging groundwater extraction system.

Table 6. Burbank Treatment Plant Contaminant Mass Removal

Year	Total Flow Treated (gallons)	Cumulative Flow Treated (gallons)	Total VOC Mass Removed (pounds)	Cumulative VOC Mass Removed (pounds)
2013	3,637,576,057	54,002,901,370	5,164	246,686
2014	3,114,113,237	57,117,014,607	3,707	250,393
2015	3,365,140,780	60,482,155,387	4,368	254,761
2016	3,133,756,552	63,615,911,939	3,789	285,550
2017 (Jan-April)	771,530,941	64,387,442,880	873	255,634

4.3. Site Inspection for Both OUs

Site inspections of the North Hollywood treatment plant and the Burbank treatment plant were completed on January 24, 2018. The purpose of the inspections was to assess the protectiveness of the remedy. Kelly Manheimer, Gary Riley and Rusty Harris-Bishop from EPA, and Jeffrey Weiss from USACE attended the site inspections. Hector Santiago, Matt Qassis, Mark Hazschuh, Gonzolo Reyes, and Vahe Dabbaghian of LADWP were at the North Hollywood treatment plant inspection. Charles Grace, Richard Salazar, and Jennifer Wehner of Terranear PMC were at the Burbank treatment plant. The interviews were completed as a group at the site visit, and pertinent information from the interviews is included in the site inspection and trip report.

The North Hollywood treatment plant was not operating. The Burbank treatment plant was operating as intended.

5. Technical Assessment

5.1. Question A: Is the remedy functioning as intended by the decision documents?

For NHOU, the remedy was not functioning as intended when it was in operation before the fall of 2017, and did not contain the plume, prevent further degradation of water quality at the Rinaldi-Toluca and North Hollywood West production wells, nor inhibit migration in groundwater to the vicinity of the Erwin and Whitnall production well fields. EPA has updated the remedy to address shortcomings, and the responsible parties are in the process of designing and implementing the updated remedy.

For BOU, the treatment system continued to operate below the interim ROD specified extraction rate of 9,000 gpm. However, the results of the data review and the 2015 capture analysis indicate the remedy is achieving its objectives of partially controlling the movement and spread of groundwater contaminants in the Burbank OU area, and removing mass, even at the reduced flowrate. An interconnect with LADWP is under construction, which will provide enough capacity to discharge up to 9,000 gpm, the current capacity of the treatment system. A Focused Feasibility Study is currently underway to address emerging contaminants and to optimize the remedy.

For both OUs, the governmental controls in place at the site are effective in preventing exposure to contaminated groundwater.

5.2. Question B: Are the exposure assumptions, toxicity data, cleanup levels, and Remedial Action Objectives (RAOs) used at the time of remedy selection still valid?

Yes, exposure assumptions, toxicity data, and RAOs used at the time of remedy selection are still valid. Applicable or relevant and appropriate requirements (ARARs) identified in the RODs, as amended, have not changed since the last FYR. Although the toxicity data for some VOCs have changed, the remedy remains protective because VOC levels in treated water are non-detect. Cleanup levels for groundwater were not established at the time of remedy selection.

Vapor intrusion is not a significant pathway because the depth to groundwater exceeds 120 feet. There are no changes in exposure pathways. The combined RAOs are still valid.

5.3. Question C: Has any other information come to light that could call into question the protectiveness of the remedy?

No other information has come to light that calls into question the protectiveness of the remedy.

6. Issues/Recommendation

There are no issues that affect protectiveness at the North Hollywood or the Burbank Operable Units. The remedy for North Hollywood OU has recently been modified to increase pumping rates and add new wells. The North Hollywood remedy is not operating at this time while the upgrades are constructed.

7. Protectiveness Statement

Table 7. Protectiveness Statement NHOU

Protectiveness Statement(s)	
<i>Operable Unit: NHOU</i>	<i>Protectiveness Determination:</i> Protective
<i>Protectiveness Statement:</i> The remedy at the North Hollywood Operable Unit is currently protective of human health and the environment because there is no exposure to untreated groundwater. Despite the fact that the extraction and treatment system is not currently operating, the public is not exposed to untreated groundwater because LADWP is not currently extracting groundwater from the areas of high contaminant concentrations and governmental controls prevent other extraction of the groundwater. The remedy for North Hollywood OU has recently been modified to increase pumping rates and add new wells. Once these improvements have been implemented, EPA expects that all Remedial Action Objectives will be achieved.	

Table 8. Protectiveness Statement BOU

Protectiveness Statement(s)	
<i>Operable Unit: BOU</i>	<i>Protectiveness Determination:</i> Protective
<i>Protectiveness Statement:</i> The remedy at the Burbank Operable Unit is currently protective of human health and the environment. The treatment system effluent contaminant concentrations are less than their regulatory cleanup goals and there are governmental controls in place that prevent exposure to untreated groundwater.	

8. Next Review

The next FYR report for the Site is required five years from the completion date of this review.

Appendix B: Data Review

Appendix B includes figures used for the data review. The results from the data review are in section 4.2.

Figures B-1 through B-4 are Mann-Kendall results for PCE and TCE in the BOU monitoring wells. The Mann-Kendall results indicate contaminant concentrations are generally decreasing or stable in the BOU. Figures B-5 and B-6 are results from Triangular Irregular Network analysis used to calculate the groundwater gradients within the BOU. The gradients indicate groundwater is primarily flowing towards the extraction wells. Figures B-7 and B-8 are results of a numeric model used to calculate the radial influence of the extraction wells. The results of the model indicate extraction wells are preventing migration of contaminants beyond the BOU.

Appendix C: ARAR Assessment

ARAR Analysis Appendix

The Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Section 121(d)(1)(A) requires that remedial actions at CERCLA sites attain (or justify the waiver of) any federal or state environmental standards, requirements, criteria, or limitations that are determined to be legally applicable or relevant and appropriate requirements (ARARs). federal ARARs may include requirements promulgated under any federal environmental laws. State ARARs may only include promulgated, enforceable environmental or facility-siting laws of general application that are more stringent or broader in scope than federal requirements and that are identified by the state in a timely manner. ARARs are identified on a Site-specific basis from information about the chemicals at the Site, the remedial actions contemplated, the physical characteristics of the Site, and other appropriate factors. ARARs include only substantive, not administrative, requirements and pertain only to onsite activities. There are three general categories of ARARs: chemical-specific, location-specific, and action-specific.

Because these were interim actions for containment of groundwater contamination, EPA has not established chemical-specific ARARs for restoration of groundwater remaining onsite. EPA is waiving this ARAR pursuant to CERCLA Section 121(d) (4) (A), 42 U.S.C. § 9621(d) (4) (A), and 40 CFR § 300.430(f) (1) (ii) (C), which allows EPA to select a remedy that does not achieve an ARAR when the remedial alternative selected is an interim measure that will become part of a final remedial action that will attain ARARs. EPA's waiver of the aquifer cleanup standard does not apply to water extracted from the aquifer and delivered to municipalities for use as drinking water. All extracted and treated water complies with maximum contaminant level (MCL) ARARs.

The current regulatory standards for trichloroethene (TCE), tetrachloroethene (PCE), and the other volatile organic compound (VOC) contaminants of concern are the state and federal MCLs. No revisions to these MCLs occurred during the five-year review period.

Hexavalent chromium is not regulated, but currently addressed by both federal and state MCLs for total chromium. In October 2014, the California Office of Administrative Law approved a regulation enacting an MCL for hexavalent chromium. However, due to a judgment issued by the California State Superior Court, the CA MCL for hexavalent chromium is no longer in effect.

federal and state laws and regulations, other than the chemical-specific ARARs that have been promulgated or changed over the past five years, are described in Table C-1. The table does not include those ARARs identified that are no longer pertinent. For example, ARARs related to remedial design and construction are not included in the table if they do not continue into long-term O&M. There have been no revisions to laws or regulations that affect the protectiveness of the remedy.

The following ARARs have not changed since the last Five-Year Review; and therefore, do not affect protectiveness:

- Clean Air Act SCAQMD, Rule 1401
- California Water Code and State Water Resources Control Board Model Well Standards Ordinance (1989), Division 7, Chapter 10, Section 13700 et seq.
- California Hazardous Waste Regulations, Generator Requirements, 22 CCR 66262.10, 22 CCR 66262.11, 22 CCR 66262.34(a)(1)(A), 22 CCR 66265.170 et seq. (Article 9), 22 CCR 66265.190 et seq. (Article 10)
- California Land Disposal Restrictions, Requirements for Generators, 22 CCR 66268.3, 22 CCR 66268.7, 22 CCR 66268.9, 22 CCR 66268.50
- California Land Disposal Restrictions, Requirements for Generators, 22 CCR 66268.1 et seq. (Article 1)
- Spent Carbon Disposal, 40 CFR 268.40
- Groundwater ReInjection, State Water Resources Control Board Resolution 68-16
- Groundwater ReInjection, RCRA Section 3020

Table C-1. Applicable or Relevant and Appropriate Requirements Evaluation

Original ARAR	Document	Original ARAR requirement	Revised requirement	Revision Date (between Sept. 2013-present)	Effect on Protectiveness
Clean Air Act SCAQMD, Regulation XIII		Regulation XIII requires that stationary sources of air emissions meet best available technology standards.	Rule 1309 Rule 1325	February 5, 2013 November 4, 2016	Rules 1309 (Emission Reduction Credits and Short-Term Credits), 1315 (federal New Source Tracking System), and 1325 (federal PM2.5 New Source Review Program) of Regulation XIII have been amended or adopted since the previous FYR, but none of the changes affect protectiveness.

CALIFORNIA

High court rules against crisis pregnancy center law

By Maria Sherman
 and Jessica Gordon

WASHINGTON — The Supreme Court on Tuesday effectively put an end to a California law that forces anti-abortion crisis pregnancy centers to provide information about abortion.

The 5-4 ruling was similar to one on a similar law in Illinois and Texas.

The California law took effect in 2010. It requires centers that are licensed by the state to provide information about the availability of abortion, abortion counseling, and other services, at little or no cost. Centers that do not are not required to post a sign that said so. The court struck down that portion of the law.

The justices said they were split 5-4 on whether to deliver a message with which they disagreed. California said the law was needed to let poor women know all their options.

Justice Clarence Thomas, in his majority opinion, said the centers "are unlikely to succeed" in their constitutional challenge to the portion of the law involving licensed centers. That means that while the law is currently on the books, its challengers can go back to court to get an order halting its enforcement. An attorney for the challenger said Tuesday that they expect to be able to do that quickly. California had not been enforcing the law, however.

"California cannot require the licensed facilities to deliver its message for it," Thomas wrote for himself, Chief Justice John Roberts and Justice Anthony Kennedy. Samuel Alito and Neil Gorsuch also joined the majority for an issue not before the justices and jointly dissented.

Justice Stephen Breyer said among the reasons the law could be upheld is that the high court has previously upheld state laws requiring doctors to tell women seeking abortions about abortion services. "If that's all, the law must be upheld," Breyer said in a dissenting opinion, joined by his liberal colleagues, Justice Sotomayor, Chief Justice John Roberts and Justice Elena Kagan.

Visitors depart the Supreme Court on Monday in Washington, D.C. The Supreme Court on Tuesday effectively put an end to a California law that forces anti-abortion crisis pregnancy centers to provide information about abortion. Anti-abortion groups cheered the decision.

California's law required crisis pregnancy centers to provide information about their health care options with a certain tone. The Trump administration had argued that California law violated their right of licensed centers to have no objection to the requirement for the centers to provide a message with which they disagreed, and provide pregnancy centers in California should not be forced to advertise about one and condemn the very reason they exist," Justice said in a dissent. "The day California Attorney General Xavier Becerra, a Democrat, called the decision "unfortunate" but said "our work is not over."

California's law required crisis pregnancy centers to provide information about their health care options with a certain tone. The Trump administration had argued that California law violated their right of licensed centers to have no objection to the requirement for the centers to provide a message with which they disagreed, and provide pregnancy centers in California should not be forced to advertise about one and condemn the very reason they exist," Justice said in a dissent. An attorney for the challenger said Tuesday that they expect to be able to do that quickly. California had not been enforcing the law, however.

Public Notice

U.S. Environmental Protection Agency (EPA) Conducts Third Five-Year Review of Cleanup at the San Fernando Valley, Area 1, Superfund Site in Los Angeles, CA

The U.S. Environmental Protection Agency (EPA) is conducting the 2018 Five-Year Review of the cleanup at the San Fernando Valley (SFV) Area 1 Superfund site in Los Angeles and Burbank, CA. The Five-Year Review is being conducted to determine whether the groundwater pump and treat systems are adequately protecting human health and the environment. The systems are designed to capture and contain the contaminated groundwater and prevent it from moving into clean groundwater areas. The primary contaminants of concern in the groundwater are volatile organic compounds (VOCs), including trichloroethylene (TCE) and perchloroethylene (PCE).

SFV area 1 also includes approximately 20 active sites, some of which are not yet fully remediated. EPA will be reviewing the status of these sites and the effectiveness of the cleanup. EPA will be reviewing the status of these sites and the effectiveness of the cleanup.

The 2018 Five-Year Review report will be completed by September 30, 2018 and available shortly after this date at the following locations and website. The next review will be in 2023.

	<input type="checkbox"/> federal Facility in-house	<input type="checkbox"/> Contractor for federal Facility		
	<input checked="" type="checkbox"/> Other <u>Los Angeles Department of Water and Power (LADWP)</u>			
2.	Unanticipated or Unusually High O&M Costs During Review Period			
	Describe costs and reasons: <u>Issues with the heater for the air stripper and power supply to the plant has been a big problem that has caused shut downs, LADWP looking at improving power supply when plant is upgraded.</u>			

V. ACCESS AND INSTITUTIONAL CONTROLS <input checked="" type="checkbox"/> Applicable <input type="checkbox"/> N/A			
A. Fencing			
1.	Fencing damaged	<input type="checkbox"/> Location shown on site map	<input checked="" type="checkbox"/> Gates secured <input type="checkbox"/> N/A
Remarks: <u>No Fencing Damage; treatment system is double fenced and fairly isolated.</u>			
B. Other Access Restrictions			
1.	Signs and other security measures	<input type="checkbox"/> Location shown on site map	<input type="checkbox"/> N/A
Remarks: <u>Security cameras on both sides of air stripper, alarms on doors that notify LADWP when door is opened.</u>			
C. Institutional Controls (ICs)			
1.	Implementation and enforcement		
	Site conditions imply ICs not properly implemented	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input type="checkbox"/> N/A
	Site conditions imply ICs not being fully enforced	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input type="checkbox"/> N/A
	Type of monitoring (e.g., self-reporting, drive by)	<u>N/A</u>	
	Frequency	<u>N/A</u>	
	Responsible party/agency	<u>N/A</u>	
	Reporting is up-to-date	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> N/A
	Reports are verified by the lead agency	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> N/A
	Specific requirements in deed or decision documents have been met	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> N/A
	Violations have been reported	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input checked="" type="checkbox"/> N/A
	Other problems or suggestions:	<input type="checkbox"/> Report attached	
<u>An IC is not necessary since the basin has a moratorium on installation of new wells.</u>			
2.	Adequacy	<input checked="" type="checkbox"/> ICs are adequate	<input type="checkbox"/> ICs are inadequate <input type="checkbox"/> N/A
Remarks: <u>None</u>			
D. General			
1.	Vandalism/trespassing	<input type="checkbox"/> Location shown on site map	<input checked="" type="checkbox"/> No vandalism evident
Remarks:			
2.	Land use changes on site	<input checked="" type="checkbox"/> N/A	
Remarks: <u>None</u>			
3.	Land use changes off site	<input checked="" type="checkbox"/> N/A	
Remarks: <u>None</u>			
VI. GENERAL SITE CONDITIONS			
A. Roads <input checked="" type="checkbox"/> Applicable <input type="checkbox"/> N/A			
1.	Roads damaged	<input type="checkbox"/> Location shown on site map	<input checked="" type="checkbox"/> Roads adequate <input type="checkbox"/> N/A
Remarks: <u>None</u>			
B. Other Site Conditions			
Remarks: <u>None</u>			
VII. LANDFILL COVERS <input type="checkbox"/> Applicable <input checked="" type="checkbox"/> N/A			
VIII. VERTICAL BARRIER WALLS <input type="checkbox"/> Applicable <input checked="" type="checkbox"/> N/A			

IX. GROUNDWATER/SURFACE WATER REMEDIES <input checked="" type="checkbox"/> Applicable <input type="checkbox"/> N/A	
A. Groundwater Extraction Wells, Pumps, and Pipelines <input checked="" type="checkbox"/> Applicable <input type="checkbox"/> N/A	
1.	Pumps, Wellhead Plumbing, and Electrical <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> All required wells properly operating <input type="checkbox"/> Needs Maintenance <input type="checkbox"/> N/A Remarks <u>Only visited one extraction well that was not operating due to plant shut down.</u>
2.	Extraction System Pipelines, Valves, Valve Boxes, and Other Appurtenances <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Needs Maintenance Remarks <u>None</u>
3.	Spare Parts and Equipment <input checked="" type="checkbox"/> Readily available <input type="checkbox"/> Good condition <input type="checkbox"/> Requires upgrade <input type="checkbox"/> Needs to be provided Remarks <u>Parts are stored offsite in a nearby warehouse, which was not visited during the site inspection.</u>
B. Surface Water Collection Structures, Pumps, and Pipelines <input type="checkbox"/> Applicable <input checked="" type="checkbox"/> N/A	
C. Treatment System <input checked="" type="checkbox"/> Applicable <input type="checkbox"/> N/A	
1.	Treatment Train (Check components that apply) <input type="checkbox"/> Metals removal <input type="checkbox"/> Oil/water separation <input type="checkbox"/> Bioremediation <input checked="" type="checkbox"/> Air stripping <input checked="" type="checkbox"/> Carbon adsorbers <input type="checkbox"/> Filters _____ <input checked="" type="checkbox"/> Additive (e.g., chelation agent, flocculent) <u>Hexametaphosphate descalant</u> <input type="checkbox"/> Others _____ <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Needs Maintenance <input checked="" type="checkbox"/> Sampling ports properly marked and functional <input checked="" type="checkbox"/> Sampling/maintenance log displayed and up to date <input checked="" type="checkbox"/> Equipment properly identified <input type="checkbox"/> Quantity of groundwater treated annually _____ <input type="checkbox"/> Quantity of surface water treated annually <u>None</u> Remarks <u>None</u>
2.	Electrical Enclosures and Panels (properly rated and functional) <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Needs Maintenance Remarks <u>The electrical system is antiquated and often requires the attention of technicians.</u>
3.	Tanks, Vaults, Storage Vessels <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Proper secondary containment <input type="checkbox"/> Needs Maintenance Remarks <u>None</u>
4.	Discharge Structure and Appurtenances <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Needs Maintenance Remarks _____
5.	Treatment Building(s) <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Good condition (esp. roof and doorways) <input type="checkbox"/> Needs repair <input type="checkbox"/> Chemicals and equipment properly stored Remarks _____
6.	Monitoring Wells (pump and treatment remedy) <input type="checkbox"/> Properly secured/locked <input type="checkbox"/> Functioning <input checked="" type="checkbox"/> Routinely sampled <input type="checkbox"/> Good condition <input type="checkbox"/> All required wells located <input type="checkbox"/> Needs Maintenance <input type="checkbox"/> N/A Remarks <u>Monitoring Wells were not visited on the site inspection.</u>

D. Monitoring Data	
1.	Monitoring Data <input checked="" type="checkbox"/> Is routinely submitted on time <input checked="" type="checkbox"/> Is of acceptable quality
2.	Monitoring data suggests: <input type="checkbox"/> Groundwater plume is effectively contained <input type="checkbox"/> Contaminant concentrations are declining
E. Monitored Natural Attenuation	
1.	Monitoring Wells (natural attenuation remedy) <input type="checkbox"/> Properly secured/locked <input type="checkbox"/> Functioning <input type="checkbox"/> Routinely sampled <input type="checkbox"/> Good condition <input type="checkbox"/> All required wells located <input type="checkbox"/> Needs Maintenance <input type="checkbox"/> N/A Remarks <u>This is not an MNA remedy, it is a containment remedy.</u>
3.X. OTHER REMEDIES	
N/A	
XI. OVERALL OBSERVATIONS	
A.	Implementation of the Remedy
Describe issues and observations relating to whether the remedy is effective and functioning as designed. Begin with a brief statement of what the remedy is to accomplish (i.e., to contain contaminant plume, minimize infiltration and gas emission, etc.). <u>The extraction wells and treatment system need to be updated to prevent further migration of the contamination. The treatment system has not been operating since November 2017 due to issues with the wells. A new treatment system and new wells will be installed to improve the remedy. .</u>	
B.	Adequacy of O&M
Describe issues and observations related to the implementation and scope of O&M procedures. In particular, discuss their relationship to the current and long-term protectiveness of the remedy. <u>The treatment system is scheduled to be update.</u>	
C.	Early Indicators of Potential Remedy Problems
Describe issues and observations such as unexpected changes in the cost or scope of O&M or a high frequency of unscheduled repairs that suggest that the protectiveness of the remedy may be compromised in the future. .	
4.D.	Opportunities for Optimization
Describe possible opportunities for optimization in monitoring tasks or the operation of the remedy. <u>The new remedial design will optimize the system. The existing extraction wells could be deepened or new extraction wells could be drilled.</u>	

Burbank Operable Unit (BOU)

I. SITE INFORMATION

3.	Unanticipated or Unusually High O&M Costs During Review Period Describe costs and reasons: <u>None. High cost to re-build/rehab wells, but this is anticipated.</u>
V. ACCESS AND INSTITUTIONAL CONTROLS <input checked="" type="checkbox"/> Applicable <input type="checkbox"/> N/A	
A. Fencing	
1.	Fencing damaged <input type="checkbox"/> Location shown on site map <input checked="" type="checkbox"/> Gates secured <input type="checkbox"/> N/A Remarks <u>No damage. Fencing and gates look good.</u>
B. Other Access Restrictions	
1.	Signs and other security measures <input type="checkbox"/> Location shown on site map <input type="checkbox"/> N/A Remarks: <u>New security cameras were installed near the office.</u>
C. Institutional Controls (ICs)	
1.	Implementation and enforcement Site conditions imply ICs not properly implemented <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A Site conditions imply ICs not being fully enforced <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A Type of monitoring (e.g., self-reporting, drive by) <u>N/A</u> Frequency <u>N/A</u> Responsible party/agency <u>N/A</u> Reporting is up-to-date <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> N/A Reports are verified by the lead agency <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> N/A Specific requirements in deed or decision documents have been met <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> N/A Violations have been reported <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A Other problems or suggestions: <input type="checkbox"/> Report attached <u>There is no specific institutional control for the site however there is a decent decree that prevents new wells from being installed in the basin.</u>
2.	Adequacy <input checked="" type="checkbox"/> ICs are adequate <input type="checkbox"/> ICs are inadequate <input type="checkbox"/> N/A Remarks <u>None</u>
D. General	
1.	Vandalism/trespassing <input type="checkbox"/> Location shown on site map <input checked="" type="checkbox"/> No vandalism evident Remarks <u>An updated conference building and storage buildings have provided secure locations for storage.</u>
2.	Land use changes on site <input checked="" type="checkbox"/> N/A Remarks <u>None</u>
3.	Land use changes off site <input checked="" type="checkbox"/> N/A Remarks <u>None</u>
VI. GENERAL SITE CONDITIONS	
A. Roads <input checked="" type="checkbox"/> Applicable <input type="checkbox"/> N/A	
1.	Roads damaged <input type="checkbox"/> Location shown on site map <input checked="" type="checkbox"/> Roads adequate <input type="checkbox"/> N/A Remarks <u>None</u>
B. Other Site Conditions	
Remarks <u>Site looks clean and well organized. High pitch noise had been heard off site by at least one resident; sound dampening blankets have been placed over blowers and considering building a sound reduction wall near the blowers.</u>	

VII. LANDFILL COVERS <input type="checkbox"/> Applicable <input checked="" type="checkbox"/> N/A	
VIII. VERTICAL BARRIER WALLS <input type="checkbox"/> Applicable <input checked="" type="checkbox"/> N/A	
IX. GROUNDWATER/SURFACE WATER REMEDIES <input checked="" type="checkbox"/> Applicable <input type="checkbox"/> N/A	
A. Groundwater Extraction Wells, Pumps, and Pipelines <input checked="" type="checkbox"/> Applicable <input type="checkbox"/> N/A	
1.	Pumps, Wellhead Plumbing, and Electrical <input checked="" type="checkbox"/> Good condition <input checked="" type="checkbox"/> All required wells properly operating G Needs Maintenance G N/A Remarks: Only visited one extraction well, did not inspect all the off-site infrastructure. Currently waiting on new motor for one of the pumps and should be installed within the next couple of weeks.
2.	Extraction System Pipelines, Valves, Valve Boxes, and Other Appurtenances <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Needs Maintenance Remarks <u>None</u>
3.	Spare Parts and Equipment <input checked="" type="checkbox"/> Readily available <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Requires upgrade <input type="checkbox"/> Needs to be provided Remarks <u>None</u>
B. Surface Water Collection Structures, Pumps, and Pipelines <input type="checkbox"/> Applicable <input checked="" type="checkbox"/> N/A	
C. Treatment System <input checked="" type="checkbox"/> Applicable <input type="checkbox"/> N/A	
1.	Treatment Train (Check components that apply) <input type="checkbox"/> Metals removal <input type="checkbox"/> Oil/water separation <input type="checkbox"/> Bioremediation <input checked="" type="checkbox"/> Air stripping <input checked="" type="checkbox"/> Carbon adsorbers <input type="checkbox"/> Filters _____ <input checked="" type="checkbox"/> Additive (e.g., chelation agent, flocculent) <u>C150 proprietary antiscalant (NALCO)</u> <input type="checkbox"/> Others _____ <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Needs Maintenance <input checked="" type="checkbox"/> Sampling ports properly marked and functional <input checked="" type="checkbox"/> Sampling/maintenance log displayed and up to date <input checked="" type="checkbox"/> Equipment properly identified <input type="checkbox"/> Quantity of groundwater treated annually _____ <input type="checkbox"/> Quantity of surface water treated annually <u>N/A</u> Remarks <u>Treatment system looks clean and well maintained</u>
2.	Electrical Enclosures and Panels (properly rated and functional) <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Needs Maintenance Remarks <u>None</u>
3.	Tanks, Vaults, Storage Vessels <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Proper secondary containment <input type="checkbox"/> Needs Maintenance Remarks: Consider lining pipes that transfer waste to prevent pin holes.
4.	Discharge Structure and Appurtenances <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Good condition <input type="checkbox"/> Needs Maintenance Remarks <u>None</u>
5.	Treatment Building(s) <input type="checkbox"/> N/A <input checked="" type="checkbox"/> Good condition (esp. roof and doorways) <input type="checkbox"/> Needs repair <input checked="" type="checkbox"/> Chemicals and equipment properly stored Remarks <u>None</u>
6.	Monitoring Wells (pump and treatment remedy) <input type="checkbox"/> Properly secured/locked <input type="checkbox"/> Functioning <input checked="" type="checkbox"/> Routinely sampled <input type="checkbox"/> Good condition <input type="checkbox"/> All required wells located <input type="checkbox"/> Needs Maintenance <input type="checkbox"/> N/A Remarks <u>Monitoring Wells were not visited on the Site Inspection</u>

D. Monitoring Data	
5.	Monitoring Data <input type="checkbox"/> Is routinely submitted on time <input checked="" type="checkbox"/> Is of acceptable quality
6.	Monitoring data suggests: <input type="checkbox"/> Groundwater plume is effectively contained <input type="checkbox"/> Contaminant concentrations are declining
D. Monitored Natural Attenuation	
1.	Monitoring Wells (natural attenuation remedy) <input type="checkbox"/> Properly secured/locked <input type="checkbox"/> Functioning <input type="checkbox"/> Routinely sampled <input type="checkbox"/> Good condition <input type="checkbox"/> All required wells located <input type="checkbox"/> Needs Maintenance <input checked="" type="checkbox"/> N/A Remarks <u>This is a containment remedy, not an MNA remedy.</u>
7.X. OTHER REMEDIES	
N/A	
XI. OVERALL OBSERVATIONS	
A. Implementation of the Remedy	
Describe issues and observations relating to whether the remedy is effective and functioning as designed. Begin with a brief statement of what the remedy is to accomplish (i.e., to contain contaminant plume, minimize infiltration and gas emission, etc.). <u>The remedy functions very well. Contaminants are being removed from the aquifer, but levels appear to be consistent.</u>	
B. Adequacy of O&M	
Describe issues and observations related to the implementation and scope of O&M procedures. In particular, discuss their relationship to the current and long-term protectiveness of the remedy. <u>None</u>	
C. Early Indicators of Potential Remedy Problems	
Describe issues and observations such as unexpected changes in the cost or scope of O&M or a high frequency of unscheduled repairs, that suggest that the protectiveness of the remedy may be compromised in the future. <u>None</u>	
8.D. Opportunities for Optimization	
Describe possible opportunities for optimization in monitoring tasks or the operation of the remedy. 1) <u>A new interconnect will be built between LADWP to allow for more water to be blended and increase the efficiency of the plant. Currently the production wells that supply water to the plant have packers installed to reduce the production rate due to not having enough water to blend with.</u> 2) <u>Variable frequency drive pump may help increase energy efficiency.</u> 3) <u>Allow the use of recirculated water for the vapor phase carbon bed regeneration which would reduce the amount of water discharged to the sewer.</u>

Jeffrey Weiss		USACE

2. SUMMARY

Site visits were completed at the North Hollywood Treatment Plant (North Hollywood Treatment Plant – North Hollywood Operable Unit [NHOU]) and Burbank Treatment Plant (BTP – Burbank Operable Unit [BOU]) on January 24, 2018 as part of the San Fernando Valley Area 1 Superfund Site (Site) Five-Year Review. The participants listed attended the Site listed next to their name. EPA and USACE personnel attended both site visits. The weather was sunny and in the 60s. The site visit at North Hollywood Treatment Plant lasted from approximately 8:00 to 9:30 a.m., and the BTP from

approximately 10:00 to 11:30 a.m. That afternoon, EPA and USACE also visited three of the extraction well locations to observe the condition of the well heads. The sections below describe the conditions at each Site and Appendix F of the Five-Year Review includes a Site Inspection Checklist completed by Jeffrey Weiss for each of the Sites.

3. DISCUSSION

North Hollywood Treatment Plant/North Hollywood Operable Unit

The North Hollywood Treatment Plant is not currently operating and has been shut down since November 13, 2107, due to declining water levels and maintenance issues. When the extraction wells and treatment system were operating, the treatment system had maintenance issues primarily related to an inadequate power supply to the Site, as well as inadequate spare parts supply. The treatment plant was in good condition with no obvious signs of damage or issues. The operator of the Site noted they have had problems with the inlet valve to the system not closing all the way when the system shuts down, causing a pressure buildup in the treatment system. Overall, the treatment system and extraction wells need to be updated to meet the requirements of the remedy.

Burbank Treatment Plant/Burbank Operable Unit

The BTP is operating as intended by the current remedy. The conference building and storage buildings have been updated in the last 5 years, and the method for storing contaminants removed from the treatment system has changed. They are still configuring the final method for storing the contaminants until they are picked up. The site currently blends the water from the treatment plant to meet the requirements for 1,4 dioxane and hexavalent chromium. The distribution system does not have enough capacity to accept all the water from the plant, so they are limited to 6,000 gallons per minute discharge rate. However, an interconnect with LADWP is under construction, which will provide enough capacity to discharge up to 9,000 gallons per minute, the current capacity of the treatment system. There were no signs of damage or issues with the treatment plant.

Well Heads

EPA and USACE visited three extraction wells locations within the SFV Area 1; one of the Sites was for the BTP, and the other two were for the North Hollywood Treatment Plant. The BTP well head was in good condition with no signs of damage. The two North Hollywood Treatment Plant well heads were not operational, because the treatment system was not operating. There were no signs of damage at the North Hollywood Treatment Plant well heads.

4. ACTIONS

USACE will incorporate information obtained from the site visit into the Five-Year Review report.

Jeffrey Weiss
Geologist, Seattle District

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 03/11/2019 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
SAN FERNANDO VALLEY Cerclis ID:: 902251 EPA Id: CAD980894893	NORTH HOLLYWOOD WELL	0 - 1/8 (0.000 mi.)	0	9

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 03/11/2019 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
SAN FERNANDO VALLEY Site ID: 0902251 EPA Id: CAD980894893	NORTH HOLLYWOOD WELL	0 - 1/8 (0.000 mi.)	0	9

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/11/2019 has revealed that there

EXECUTIVE SUMMARY

are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 12 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/28/2019 has revealed that there are 17 ENVIROSTOR sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/25/2019 has revealed that there are 9 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected

EXECUTIVE SUMMARY

listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Summary Details:

Conditions at proposal October 15, 1984): San Fernando Valley Area I) is an area of contaminated ground water in the vicinity of the North Hollywood section of the City of Los Angeles, Los Angeles County, California. This area is part of the San Fernando Valley Basin, a natural underground reservoir that represents an important source of drinking water for at least 3 million people in the Los Angeles metropolitan area. The contaminated ground water, which underlies an area of approximately 5,156 acres, contains trichloroethylene (TCE) and perchloroethylene (PCE), and to a lesser extent,

carbon tetrachloride and chloroform, according to analyses conducted by the California Department of Health Services, as well as numerous local government agencies. The State s recommended drinking water guideline for TCE and PCE 5 and 4 parts per billion respectively) are exceeded in a number of public wells in this area. To alleviate this contamination, wells are either taken out of service or blended with water from clean sources to ensure that the public receives water with TCE/PCE concentrations below the State s guidelines. Status June 10, 1986); EPA and the Los Angeles Department of Water and Power are entering into a cooperative agreement for a remedial investigation of the San Fernando Valley Basin and a feasibility study targeted at Area 1, the most contaminated area. The RI is scheduled to begin in early 1986.

Comments: A second 5-year review of remedial activities is conducted at the North Hollywood OU (NHOU) and covers operations from 1993 thru 1997. The purpose was to evaluate whether the NH Interim Remedy achieved the objectives specified in the ROD. The findings of the 5-year review are that the objectives of the ROD have been met.

Background Info: The San Fernando Valley Ground Water Basin (SFVGWB) is located within the Upper Los Angeles River Area, and consists of the eastern portion of the San Fernando Valley and the entire Verdugo Basin. The SFVGWB encompasses approximately 112,000 acres of alluvial valley fill deposits and provides enough water to serve approximately 600,000 residents. The Basin is bounded on the north and the northwest by the Santa Susana Mountains, on the northeast by the San Gabriel Mountains, on the west by the Simi Hills and on the south by the Santa Monica Mountains. The San Fernando Valley Study area includes four National Priorities List (NPL) sites. They are:
Area #1 - North Hollywood NPL Site covers 9336 acres in the eastern part of the San Fernando Valley. The site has been divided into the North Hollywood Operable Unit(OU) and the Burbank OU.
Area #2 - Crystal Springs NPL Site covers 3975 acres located southeast of the North Hollywood NPL site and is in the cities of Glendale and Los Angeles.

MAP FINDINGS

SAN FERNANDO VALLEY (AREA 1) (Continued)

1000709322

Area #3 - Verdugo NPL Site covers 2673 acres in the eastern part of the SF Valley and is located in and adjacent to La Crescenta in the Verdugo Mountains.

Area #4 - the Pollock NPL Site covers 1635 acres in the south-eastern part of the San Fernando Valley and is located in and adjacent to the cities of Los Angeles and Glendale.

Groundwater contamination in the SFVGWB is linked to prewar, postwar, and current industrialization in the San Fernando Valley.

The primary contaminants of concern are the volatile organic compounds (VOCs) trichloroethylene (TCE) and tetrachloroethylene (PCE). These compounds have been and/or are being used in many San Fernando Valley industries, such as aeronautical, automotive dry cleaning, and metal plating. These solvents have found their way to the groundwater basin as a result of both past and improper use, storage and disposal practices. The SFVGWB Superfund sites, added to the NPL in 1986, are areas where groundwater from wells have been found to contain VOCs above the state and federal drinking water standards. Groundwater contamination in numerous wells have been so severe with TCE and PCE that these wells have essentially been put out of commission. Exposure of receptors to contaminants can possibly occur through ingestion of contaminated drinking water, inhalation of VOC vapors released from the contaminated water as in taking showers, and dermal exposure as in washing or bathing. However, with the strict regulatory control over water quality by the State's Department of Health, Office of Drinking Water (ODW), the RWQCB, and other agencies, residents are assured that the water they consume is safe and that no one is drinking water which contains concentrations of contaminants above regulatory standards. Federal, state, and local agencies have been conducting investigations and cleanup of contaminated groundwater in the San Fernando Valley since contamination was discovered in 1979. These activities involve measuring the extent of contamination, developing and implementing cleanup remedies, and identifying responsible parties. EPA provided oversight of the basinwide Remedial Investigation (RI) of groundwater contamination conducted by the Los Angeles Department of Water and Power (LADWP). The RI objectives were to collect lithological and water quality data and information regarding basin operations for the eastern SF and Verdugo basins; develop a regional characterization of geology, hydrology, hydrogeology and the nature and extent of groundwater contamination within the eastern and Verdugo basins; study fate and transport of compounds in the environment; identify Applicable or Relevant and Appropriate Requirements; (ARAR's) and evaluate the potential risk to human health and the environment. The Remedial Investigation of the SFVGWB was divided into two phases.

Phase I activities have included vertical profile borings and installation of monitoring wells to obtain preliminary contamination information. Monitoring wells have been installed as follows: 34 in North Hollywood (Area #1); 29 in Crystal Springs (Area #2); 7 in Verdugo (Area #3); and 17 in Pollock (Area #4).

Information obtained from Phase I investigation activities identified the need for several operable units. Operable Unit is

1000709322

a federal term which is similar to the State's definition of a removal action.

Phase II activities consist of a basinwide remedial investigation conducted by the LADWP.

Remedial Actions (RAs):

North Hollywood (Area #1) -- Two RAs were identified for Area #1, the North Hollywood OU and the Burbank OU.

A Record of Decision (ROD) for the North Hollywood RA was signed in September 1987, selecting groundwater extraction and treatment (air stripping) of 2,000 gallons per minute (gpm) of contaminated water as an interim remedy. This RA was constructed with funding from EPA and the State and has been treating contaminated groundwater since March 1989. This facility is located at 11845 Vose Street in the N. Hollywood section of Los Angeles.

A ROD for the Burbank OU was signed in June 1989, again selecting groundwater extraction and treatment of about 12,000 gpm of contaminated water. Phase I of the Burbank OU began operations in January 1996 treating groundwater at a rate of 6,000 gpm. Phase II began operations in May 1998 adding an additional 3,000 gpm to the Burbank OU's treatment capacity.

Crystal Springs (Area #2) -- LADWP has completed a focused RI/FS for this proposed RA. The Glendale OU has been separated into a North OU and a South OU based on the amount of contamination and the facilities contributing to the GW contamination. A ROD for each OU was signed on June 18, 1993 designating groundwater extraction and treatment as the interim remeday. The PRPs have formed a group and combined the RA efforts for each OU into one document. The selected alternative is GW extraction and treatment. The Glendale OU began operations in September 2000.

Verdugo and Pollock (Areas #3 and #4) --

Currently no RAs have been identified for Area #3 or for Area #4. In October 2003 US EPA proposed No Remedial Action for Verdugo Basin (Area #3).

Another contaminant of concern, hexavalent chromium, has been identified in the San Fernando Valley Groundwater Basin.

EPA and the RWQCB are currently identifying potential sources of contamination and pursuing PRPs that may be responsible for contaminating groundwater. As these PRPs are identified, individual site investigations and mitigation activities will be pursued. Enforceable agreements and orders will be implemented at numerous specific potential source sites within the Basin by RWQCB and DTSC

Environmental Interest/Information System

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

SUPERFUND NPL

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Primary Waste Type: Not reported
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Site ID: 374879
 CERS ID: 10687267
 CERS Description: Hazardous Waste Generator

Violations:
 Site ID: 374879
 Site Name: First impact collision center
 Violation Date: 09-30-2015
 Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
 Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 07/14/2016. OBSERVATION: Observed two, unlabeled, waste 5 gallon paint/thinner containers. All hazardous waste containers shall be marked with the following information: 1) the words Hazardous Waste ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Immediately label these containers and ensure that all hazardous waste containers are marked with all the required information.

Violation Division: Los Angeles County Fire Department
 Violation Program: HW
 Violation Source: CERS

Site ID: 374879
 Site Name: First impact collision center
 Violation Date: 09-30-2015
 Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12

Violation Description: Failure to obtain and/or maintain an Active EPA ID.
 Violation Notes: Returned to compliance on 07/14/2016. OBSERVATION: This facility does not have a valid EPA ID number to manage hazardous waste. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without an EPA ID number. CORRECTIVE ACTION: Immediately obtain an EPA ID number through DTSC to manage hazardous waste and submit evidence to the CUPA.

Violation Division: Los Angeles County Fire Department
 Violation Program: HW
 Violation Source: CERS

Site ID: 374879
 Site Name: First impact collision center
 Violation Date: 09-30-2015
 Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31

Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment.
 Violation Notes: Returned to compliance on 07/14/2016. OBSERVATION: 5 gallon waste

Classification: Large Quantity Generator
Description: Handler: generates 1,000 kg or more of hazardous waste during any calendar month; or generates more than 1 kg of acutely hazardous waste during any calendar month; or generates more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month; or generates 1 kg or less of acutely hazardous waste during any calendar month, and accumulates more than 1 kg of acutely hazardous waste at any time; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates more than 100 kg of that material at any time

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Classification: Large Quantity Generator
Description: Handler: generates 1,000 kg or more of hazardous waste during any calendar month; or generates more than 1 kg of acutely hazardous waste during any calendar month; or generates more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month; or generates 1 kg or less of acutely hazardous waste during any calendar month, and accumulates more than 1 kg of acutely hazardous waste at any time; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates more than 100 kg of that material at any time

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
Used oil refiner: No
Used oil fuel marketer to burner: No

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Case Worker: Not reported
Local Agency: Not reported
RB Case Number: 111.0701
File Location: Not reported
Potential Media Affected: Aquifer used for drinking water supply
Potential Contaminants of Concern: Not reported
Site History:

Marfred Industries operated at the Site from 1982 to 2001, manufacturing and printing cardboard, paperboard, and plastic containers. These activities involved the use of solvents, including 1,1,1-trichloroethane (1,1,1-TCA). In 1991, the Regional Board ordered a subsurface soil investigation at the Site. None of the soil matrix samples contained detectable levels of any of the VOCs for which they were tested. Soil gas sampling and analysis were not required as part of that investigation. Based on the available information, the Regional Board issued a letter to Marfred in 1994, stating that no further subsurface investigation was required at that time. The Regional Board is currently investigating chemicals of emerging concern that have been detected in the San Fernando Valley groundwater basin, including in the vicinity of the former Marfred Industries facility. One of these chemicals is 1,4-dioxane, which is commonly used as a stabilizer for 1,1,1-TCA. The 1991 subsurface soil investigation at the Site did not include analysis for 1,4-dioxane. The Regional Board has reviewed the case file for the Site and local groundwater data and has determined that further subsurface investigation at the Site is required to assess the potential impact of Marfreds chemical use. The bases for this determination are that

the soil has not been analyzed for 1,4-dioxane and that soil gas analysis has not been conducted.

Case Worker: CH
Local Agency: Not reported
RB Case Number: 1318
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply, Other Groundwater (uses other than drinking water), Soil, Soil Vapor, Under Investigation
Potential Contaminants of Concern: 1,1,1-Trichloroethane (TCA), 1,4-Dioxane, Dichloroethane (DCA), Dichloroethene (DCE), Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Vinyl chloride, Freon, NDMA - N-Nitrosodimethylamine, Perchlorate, Chromium VI
Site History: The Hewitt Pit Landfill is a closed municipal solid waste landfill that operated between 1962 and 1975. It is within a flat lying urbanized alluvial plain with approximate site elevations of 750770 feet (ft) above mean sea level (amsl). It is approximately 58 acres in size, with an L shape, and is located at 7145 Laurel Canyon Boulevard in North Hollywood, California. The property is bound by Satcoy Street to the north, Laurel Canyon Boulevard to the east, Raymer Street to the south, and 170 Freeway to the west. Residential properties are located to the north and east of the Site in the area formed by the L. Numerous commercial and industrial properties are located to the east, west and south of the Site. The Landfill was capped and closed in 1975, and there have not been any manufacturing

or industrial processes conducted on the property since closure of the Landfill. The Landfill is not equipped with a liner or leachate collection and removal system. A landfill gas control system consisting of extraction wells and a flare was installed at the Site in 1977. Over the years the system has been replaced or rebuilt to control landfill gas migration.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/11/2019	Source: EPA
Date Data Arrived at EDR: 03/14/2019	Telephone: N/A
Date Made Active in Reports: 04/01/2019	Last EDR Contact: 04/18/2019
Number of Days to Update: 18	Next Scheduled EDR Contact: 07/15/2019
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/11/2019

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 03/11/2019

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 03/11/2019	Source: EPA
Date Data Arrived at EDR: 03/14/2019	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2019	Telephone: (415) 495-8895

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2019	Telephone: (415) 495-8895

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 02/24/2019	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 02/26/2019	Telephone: 202-307-1000

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Elevation:	740 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5630789 VAN NUYS, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06037C1310F	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06037C1320F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
VAN NUYS	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam
 clay
 silt loam
 loamy sand
 sandy loam
 fine sand
 clay loam
 gravelly - sandy loam
 coarse sand
 gravelly - sand
 sand

Surficial Soil Types: loam
 clay
 silt loam
 loamy sand
 sandy loam
 fine sand
 clay loam
 gravelly - sandy loam
 coarse sand
 gravelly - sand
 sand

Shallow Soil Types: fine sandy loam
 gravelly - loam
 sand
 silty clay

Deeper Soil Types: stratified
 clay loam
 silty clay loam
 gravelly - sandy loam
 coarse sand
 sand
 weathered bedrock
 very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

APPENDIX D: QUALIFICATIONS

Brant Rotnem
Partner Associate

Education

BA Environmental Politics – University of California, Berkeley

Summary of Professional Experience

Mr. Rotnem has four years of experience in the environmental service industry. He has significant experience in due diligence assessments for a variety of property types and the needs and requirements of varied number of reporting standards, including ASTM standards, EPA's All Appropriate Inquiry (AAI), and customized client formats. Specifically, Mr. Rotnem has performed Phase I Environmental Site Assessments, Environmental Transaction Screens, Environmental Transaction Analyses, Environmental Historical Reviews, Regulatory Database Reviews and Site Surveys.

Mr. Rotnem has performed due diligence work throughout the US and Canada for sites listed on National Priorities List (NPL), Resource Conservation and Recovery Act Corrective Action (RCRA CORRACTS) and Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) databases, as well as state and local hazardous material release inventories. Project experience for Mr. Rotnem includes industrial and manufacturing facilities, processing plants, Brownfield sites, gas stations, dry cleaning facilities, various commercial and residential properties, agricultural land and telecommunication equipment sites.

Finally, Mr. Rotnem's diversity across residential, commercial, industrial and agricultural environments is a major contribution to Partner Engineering and Science's Associate team in the western region of the United States.

Education

M.A. Environmental Studies, Brown University

B.S. Biology, University of California, Los Angeles, Emphasis in Ecology, Behavior and Evolution

Registrations

EPA Accredited Asbestos Inspector

National Registry of Environmental Professionals: Registered Environmental Property Assessor (REPA)

Training

California Underground Storage Tank Inspector

Highlights

15 years in environmental service industry

14 years performing Phase I Environmental Site Assessments (ESAs), Environmental Transaction Screens, radon screening, asbestos inspections, and lead-based paint inspection

13 years of experience with multi-family properties, commercial properties, retail shopping centers, municipal and private airports, oil well properties, oil refineries, gas stations, dry cleaners, aerospace manufacturers, dry cleaning plants, hotels, auto dealership and repair facilities, and various manufacturing operations throughout the US

8 years of project management experience in Environmental Assessments, Property Condition Assessments, Physical Needs Assessments, seismic evaluations, and ALTA Surveys, compliance reports

5 years of project management experience in ESAs and PCAs for properties located in Mexico, Canada, the Caribbean, Southeast Asia and South Pacific

Experience Summary

Ms. Churchill has served as an environmental scientist, project manager, senior author, or client manager for projects associated with thousands of real estate transactions. Ms. Churchill is familiar with the due diligence requirements of a varied number of reporting standards, including ASTM, EPA's All Appropriate Inquiry (AAI), Freddie Mac, Fannie Mae DUS, and U.S. Small Business Administration's (SBA) SOP 50 10. She also has experience with fulfilling numerous customized client scopes of work. Furthermore, Ms. Churchill has working experience in performing biological and noise assessments, and in preparing and reviewing environmental documentation in support of CEPA and NEPA.

While in graduate school, Ms. Churchill's Masters Thesis research focused on evaluating the potential of Japanese Knotweed (an invasive plant species) as an effective phytoremediator of heavy metal contaminated soils along a historically polluted river in Rhode Island. Phytoremediation refers to the natural ability of certain plants called hyperaccumulators to bioaccumulate contaminants in soil. Hyperaccumulators can be grown and harvested economically, leaving the soil with a greatly reduced level of toxic contamination. This cost-effective approach to remediation has gained increasing popularity in both academic and practical circles.

Ms. Churchill previously worked for the City of El Segundo, where she regularly collaborated with other local CUPAs to ensure compliance with State and Federal regulations. Ms. Churchill's responsibilities included implementing and enforcing elements of the CUPA program including the following: hazardous waste generator program; underground storage tank program; Hazardous Material Release Response Plan

(Business Plan) Program and the California Accidental Release Response Plan (CalARP) Programs. Ms. Churchill also worked on enforcing city specific environmental programs such as Stormwater Pollution Prevention and Industrial Wastewater Discharge. As the Principal Environmental Specialist for the City, Ms. Churchill worked with large industries such as Chevron, Northrop Grumman, Boeing and International Rectifier to ensure regulatory compliance pertaining to business operations and remedial activities.

Project Experience

International Airport Portfolio. Project Manager and Senior Reviewer for Phase I ESAs and PCAs of a confidential acquisition of airport facilities throughout the South Pacific and Southeast Asia. The project involved working with many foreign agencies and coordinating dual scope site visits at all facilities within a 2-week time frame.

West Coast Gas Station Portfolio. Project Manager for limited PCAs of an acquisition of gas station/car wash facilities throughout California, Oregon and Washington.

Mexico Industrial Site Portfolio. Project Manager and Senior Reviewer for Phase I ESAs of an acquisition of industrial/warehouse facilities throughout Northern Mexico. The project involved coordinating site inspections of multiple industrial facilities with private security in high risk danger areas.

Office Tower Portfolio, Los Angeles. Project Manager and Senior Reviewer for Phase I ESAs of a \$1.34 Billion acquisition of Class A office buildings in Los Angeles.

Freddie Mac Multi-Scope Portfolio. Project Manager and Senior Reviewer for Phase I ESAs, PCAs and PMLs of an acquisition of multifamily apartment complexes throughout Southern California. The project involved coordinating three different scopes of specially qualified assessors to conduct site visits with radon and ACM sampling.
