RECOMMENDATION REPORT

CULTURAL HERITAGE COMMISSION

CASE NO.: CHC-2020-5220-HCM
ENV-2020-5221-CE

HEARING DATE: October 1, 2020
TIME: 10:00 AM
PLACE: Teleconference (see agenda for login information)

Location: 7000 West Romaine Street;
931-953 North Orange Drive;
930-956 North Sycamore Avenue
Council District: 4 - Ryu
Community Plan Area: Hollywood
Area Planning Commission: Central
Neighborhood Council: Central Hollywood
Legal Description: Tract 9677, Lots 35-46

EXPIRATION DATE: The original 30-day expiration date of October 3, 2020 per Los Angeles Administrative Code Section 22.171.10(e)1 is tolled, and a revised date will be determined pursuant to *the Mayor's March 21, 2020 Public Order Under City of Los Angeles Emergency Authority re: Tolling of Deadlines Prescribed in the Municipal Code and April 17, 2020 Public Order Under City of Los Angeles Emergency Authority re: Tolling HCIDLA Deadlines and Revising Expiration of Emergency Orders*

PROJECT: Historic-Cultural Monument Application for the HOWARD HUGHES HEADQUARTERS

REQUEST: Declare the property an Historic-Cultural Monument

OWNERS: 7000 Romaine Holdings LLC 7000 Romaine Holdings LLC

Attachment: Historic-Cultural Monument Application

SUMMARY

The Howard Hughes Headquarters Building is a two-story industrial building located on Romaine Street, between Orange Drive to the east, Sycamore Avenue to the west and Willoughby Avenue to the south in Hollywood. Designed in the Art Deco architectural style, the subject property was constructed between 1930 and 1931 by Myers Brothers, a large Los Angeles contracting firm specializing in structures for motion picture companies. The building was occupied by Multicolor, Ltd. as a color film manufacturing plant until the company went out of business in 1932. Over the years, a majority of the building was leased to multiple tenants, including a brewery, an ammunitions plant during World War II, and a candy factory. However, the Romaine Street-fronting spaces served as the headquarters for Howard Hughes' (1905-1976) business empire from 1930 to 1976, with a brief cessation during the 1950s.

The building has a predominantly rectangular plan with an irregularly shaped addition on the south façade. The building rises two stories along the primary, north-facing elevation and is one story at the rear, south-facing elevation. It sits on a concrete foundation and is constructed of brick and concrete. It is capped by a flat roof with a flat parapet that is slightly recessed at the roofline and stepped towards the top. The building features painted concrete exterior walls with a smooth finish. Ornamental detailing includes vertically oriented decorative elements drawing from Egyptian imagery such as pyramids and ziggurats, as well as zig-zag, chevron, and floral patterns, and other geometric motifs. The majority of the east- and west-facing facades, and the entirety of the south-facing façade, are utilitarian in character. There are multiple utilitarian additions off the south-facing elevation. Fenestration throughout the property comprises single, paired, and grouped multi-lite, steel-sash single-hung, casement windows with transoms, awning windows, and fixed windows of varying sizes. A small, one-story commercial building constructed in 1952 is located at western edge of the site.

Film production began in Hollywood in 1911, and quickly grew into a significant economic force. As the popularity of motion pictures grew, more physical facilities related to motion picture production were constructed in Hollywood. In 1919, the City established a series of industrial zones specifically designated for motion picture use. The largest and most significant of these, containing over 750 entertainment-related industrial and commercial properties, was oriented around the intersection of Santa Monica Boulevard and Highland Avenue near major studios including Paramount Pictures, Warner Brothers, RKO, Columbia, and United Artists. This industrial area was developed from multiple tracts and provided studio support services dating to the 1920s such as prop houses, costume houses, laundry plants, production offices, film laboratories and processing plants, film vaults, warehouses, and vendors for equipment. It remains a significant collection of these resources, many of which are still in operation.

Born in Texas in 1905, Howard Hughes withdrew from Rice University after his father died in 1924 and he moved to Los Angeles to pursue filmmaking. He funded several films, including *Hell's Angels* (1930), and continued to work as a producer in the film industry through the 1950s, at which point his primary interest shifted toward aviation. Hughes established the Hughes Aircraft Company in 1932 and focused on building prototype aircraft. He flew these and other aircraft himself, setting a number of records for air speed, completing an around-the-world flight, and surviving at least two serious crashes. Hughes Aircraft became a major defense contractor during and after World War II and expanded its scope to eventually include technologies from spacecraft to missile systems. Throughout the 1950s and 1960s, Hughes continued to be a widely known celebrity, though he was very rarely seen in public. He passed away of kidney failure in 1976.

The subject property appears to have undergone multiple alterations over the years. Exterior alterations include the addition of a wood frame structure at the rear of the property in 1951, storefront alterations and the construction of a one-story commercial building in 1952, repair of fire

damage in 1954, modifications to the parapet in 1956 and 1961, the addition of a carport in 1957, alterations to the storefront on Orange Drive in 1966, plastering of exterior windows in 1979, sandblast of stucco walls in 1984, and the replacement of window glazing and modifications to the east façade at unknown dates. Interior alterations from 1933 to 2013 largely consist of tenant improvements.

SurveyLA, the citywide historic resources survey, identified the subject property as individually eligible for listing under national, state, and local designation programs as an excellent example of Art Deco industrial architecture in Hollywood and as an excellent and rare example of a 1930s industrial building in the entertainment industry support services area of Hollywood.

CRITERIA

The criterion is the Cultural Heritage Ordinance which defines a historical or cultural monument as any site (including significant trees or other plant life located thereon), building or structure of particular historic or cultural significance to the City of Los Angeles if it meets at least one of the following criteria:

1. Is identified with important events of national, state, or local history, or exemplifies significant contributions to the broad cultural, economic or social history of the nation, state, city or community;
2. Is associated with the lives of historic personages important to national, state, city, or local history; or
3. Embodies the distinctive characteristics of a style, type, period, or method of construction; or represents a notable work of a master designer, builder, or architect whose individual genius influenced his or her age.

FINDINGS

Based on the facts set forth in the summary and application, the Commission determines that the application is complete and that the property may be significant enough to warrant further investigation as a potential Historic-Cultural Monument.

BACKGROUND

A previous Historic-Cultural Monument nomination was deemed complete on June 21, 2018 under case number CHC-2018-3614-HCM. The initial hearing for the nomination, scheduled for July 19, 2018, was continued to September 6, 2018, at which time the nomination was withdrawn by the applicant prior to the Cultural Heritage Commission acting.

On September 3, 2020, the Director of Planning determined that the application for the proposed designation of the subject property as an Historic-Cultural Monument was complete. The original 30-day expiration date of October 3, 2020 per Los Angeles Administrative Code Section 22.171.10(e)1 is tolled, and a revised date will be determined pursuant to *the Mayor's March 21, 2020 Public Order Under City of Los Angeles Emergency Authority re: Tolling of Deadlines Prescribed in the Municipal Code and April 17, 2020 Public Order Under City of Los Angeles Emergency Authority re: Tolling HCIDLA Deadlines and Revising Expiration of Emergency Orders*.

HISTORIC-CULTURAL MONUMENT NOMINATION FORM

1. PROPERTY IDENTIFICATION

Proposed Monument Name:					
Other Associated Names:					
Street Address:			Zip:	Council District:	
Range of Addresses on Property:			Community Name:		
Assessor Parcel Number:	Tract:		Block:	Lot:	
Identification cont'd:					
Proposed Monument Property Type:	Building	Structure	Object	Site/Open Space	Natural Feature
Describe any additional resources located on the property to be included in the nomination, here:					

2. CONSTRUCTION HISTORY & CURRENT STATUS

Year built:	Factual	Estimated	Threatened?		
Architect/Designer:			Contractor:		
Original Use:			Present Use:		
Is the Proposed Monument on its Original Site?		Yes	No (explain in section 7)	Unknown (explain in section 7)	

3. STYLE & MATERIALS

Architectural Style:		Stories:	Plan Shape:
<i>FEATURE</i>	<i>PRIMARY</i>	<i>SECONDARY</i>	
CONSTRUCTION	Type:	Type:	
CLADDING	Material:	Material:	
ROOF	Type:	Type:	
	Material:	Material:	
WINDOWS	Type:	Type:	
	Material:	Material:	
ENTRY	Style:	Style:	
DOOR	Type:	Type:	

HISTORIC-CULTURAL MONUMENT NOMINATION FORM

4. ALTERATION HISTORY

List date and write a brief description of any major alterations or additions. This section may also be completed on a separate document. Include copies of permits in the nomination packet. Make sure to list any major alterations for which there are no permits, as well.

5. EXISTING HISTORIC RESOURCE IDENTIFICATION (if known)

Listed in the National Register of Historic Places	
Listed in the California Register of Historical Resources	
Formally determined eligible for the National and/or California Registers	
Located in an Historic Preservation Overlay Zone (HPOZ)	Contributing feature Non-contributing feature
Determined eligible for national, state, or local landmark status by an historic resources survey(s)	Survey Name(s):
Other historical or cultural resource designations:	

6. APPLICABLE HISTORIC-CULTURAL MONUMENT CRITERIA

The proposed monument exemplifies the following Cultural Heritage Ordinance Criteria (Section 22.171.7):

1. Is identified with important events of national, state, or local history, or exemplifies significant contributions to the broad cultural, economic or social history of the nation, state, city or community.
2. Is associated with the lives of historic personages important to national, state, city, or local history.
3. Embodies the distinctive characteristics of a style, type, period, or method of construction; or represents a notable work of a master designer, builder, or architect whose individual genius influenced his or her age.

HISTORIC-CULTURAL MONUMENT NOMINATION FORM

7. WRITTEN STATEMENTS

This section allows you to discuss at length the significance of the proposed monument and why it should be designated an Historic-Cultural Monument. Type your response on separate documents and attach them to this form.

A. Proposed Monument Description - Describe the proposed monument's physical characteristics and relationship to its surrounding environment. Expand on sections 2 and 3 with a more detailed description of the site. Expand on section 4 and discuss the construction/alteration history in detail if that is necessary to explain the proposed monument's current form. Identify and describe any character-defining elements, structures, interior spaces, or landscape features.

B. Statement of Significance - Address the proposed monument's historic, cultural, and/or architectural significance by discussing how it satisfies the HCM criteria you selected in Section 6. You must support your argument with substantial evidence and analysis. The Statement of Significance is your main argument for designation so it is important to substantiate any claims you make with supporting documentation and research.

8. CONTACT INFORMATION

Applicant

HISTORIC-CULTURAL MONUMENT NOMINATION FORM

9. SUBMITTAL

When you have completed preparing your nomination, compile all materials in the order specified below. Although the entire packet must not exceed 100 pages, you may send additional material on a CD or flash drive.

APPLICATION CHECKLIST

- | | |
|--|--|
| 1. Nomination Form | 5. Copies of Primary/Secondary Documentation |
| 2. Written Statements A and B | 6. Copies of Building Permits for Major Alterations (include first construction permits) |
| 3. Bibliography | 7. Additional, Contemporary Photos |
| 4. Two Primary Photos of Exterior/Main Facade (8x10, the main photo of the proposed monument. Also email a digital copy of the main photo to: planning.ohr@lacity.org) | 8. Historical Photos |
| | 9. Zimas Parcel Report for all Nominated Parcels (including map) |

10. RELEASE

Please read each statement and check the corresponding boxes to indicate that you agree with the statement, then sign below in the provided space. Either the applicant or preparer may sign.	
<input type="checkbox"/>	I acknowledge that all documents submitted will become public records under the California Public Records Act, and understand that the documents will be made available upon request to members of the public for inspection and copying.
<input type="checkbox"/>	I acknowledge that all photographs and images submitted as part of this application will become the property of the City of Los Angeles, and understand that permission is granted for use of the photographs and images by the City without any expectation of compensation.
<input type="checkbox"/>	I acknowledge that I have the right to submit or have obtained the appropriate permission to submit all information contained in this application.

Howard Hughes Headquarters

Historic-Cultural Monument Nomination Continuation Sheet

A. Property Description

Site

The Howard Hughes Headquarters building (subject property) is located at 7000 Romaine Street and includes the following additional addresses: 931, 937, 941, 945, 949, and 953 N. Orange Drive and 930, 936, 940, 942, 948, 952, and 956 N. Sycamore Avenue. The property is located in the southwest section of Hollywood, near the eastern border of West Hollywood. The topography of the area is flat, and the streets adhere to a rectilinear grid pattern oriented towards the cardinal directions. This section of Hollywood is industrial in character; the area in the immediate vicinity of the subject property contains industrial and commercial buildings, many of which are related to the entertainment industry and date to the 1920s and 1930s.

The subject property comprises the northern portion of the block bounded by Romaine Street on the north, Orange Drive on the east, Willoughby Avenue on the south, and N. Sycamore Avenue on the west. It occupies twelve uniformly sized parcels totaling approximately two acres. It contains an industrial building that is located in the northern part of the site and is flush with the sidewalk on the north, east, and west. The building's south façade fronts a surface parking lot comprising the southern half of the site; the lot is not considered a character-defining feature of the property and does not contribute to the building's significance. A small commercial building is located near the east edge of the parking lot. Metal perimeter fences enclose the parking lot on the east and west.

Exterior

The building at 7000 Romaine Street was constructed between 1930 and 1931 by the Myers Bros. builders. Designed in the Art Deco style, the building has a predominantly rectangular plan with an irregularly shaped addition on the south façade. The building rises two stories along the primary (north) façade and is one story at the rear (south) façade. It sits on a concrete foundation, and is constructed of brick and concrete. It is capped by a flat roof with a flat parapet that is slightly recessed at the roofline and stepped towards the top. The building features painted concrete exterior walls with a smooth finish. Decorative detailing is mostly limited to the two-story portion of the building that spans the primary façade and a small portion of the east and west facades; this volume is ornamented with vertically oriented decorative elements drawing from Egyptian imagery such as pyramids and ziggurats, and displaying zigzag, chevron, and floral patterns, and other geometric motifs. The majority of the east and west facades, and the entirety of the south façade, are utilitarian in character.

The building's original windows, all steel, include single, paired, and grouped multi-light, single-hung; casement windows with transoms; awning type; and fixed multi-light windows of varying sizes. Most of the windows have tall narrow openings that lack surrounds and appear to be punched into the walls,

though some windows located on the two-story volume of the building along Romaine Street are articulated by highly ornamented surrounds. Glazing has been replaced in some windows.

The primary, north-facing façade is symmetrically arranged along Romaine Street. It is mostly two stories in height, with the exception of one-story volumes at the northeast and northwest corners of the building. The center of the façade is deeply recessed to accommodate a small entry courtyard. On either side of the courtyard are wide bays that extend almost the length of the block and contain irregularly spaced fenestration. The one-story volumes at either corner step back to two stories along N. Sycamore Avenue and N. Orange Drive; they have rounded corners and serve as second floor patios.

The courtyard at the center of the façade is bordered on the north by stepped piers inset with rounded hedges. Between the middle two piers are wrought iron gates with a sunburst and floral pattern. The building's primary entrance is set within the courtyard and faces west. A projecting concrete stoop with an elaborate decorative surround and shallow stepped wing walls fronts metal, fully glazed double doors with historic hardware and zig-zag details at the glazed panels. The north-facing wall of the courtyard features three equally spaced bays, delineated by vertical piers that rise past the roofline and have a stepped configuration. Stacked steel windows with colored glazing are positioned within each bay; they are capped by reeded spandrel panels with decorative molding. At the base of this arrangement is a brightly colored, glazed tile planter which may have originally been a water feature. Flanking the planter are metal window grilles with a chevron detail. The façades facing the courtyard are shrouded with creeping vines that obscure most of the aforementioned architectural features. These vines have also grown onto portions of the north façade immediately adjacent to the courtyard.

The façades flanking the courtyard each contain a single, narrow bay of fenestration in a similar arrangement to that seen within the courtyard. These bays have a stepped parapet at the roofline. Reeded spandrel panels with decorative molding are positioned above and below the first floor windows. The upper part of the bays have a stepped vertical element that projects past the parapet, which is mostly covered by creeping vines from the courtyard.

Towards the center of the wall on either side of the courtyard is a full-height decorative panel of windows. This panel is symmetrically arranged into four equally spaced bays, delineated by vertical piers that are stepped at the peaks. Steel windows are positioned within each bay at the first and second floors. Reeded spandrel panels are set within the bays in the spaces below, above and between the windows; the panels between the first and second floor windows also contain a chevron detail. Positioned between the tops of the piers are squared plates with a decorative molding. The paired second floor windows near the outer edges of the façade are articulated by a cross-shaped surround with raked molding, stepped elements, and geometric motifs.

Centered on the one-story volumes at either end of the primary façade are slightly recessed decorative vertical panels capped with stepped parapets. The panel contains zigzag and chevron patterns and vertical geometric motifs. The curved portions of the one-story volumes are slightly shorter than the rest of the volume and feature a decorative band near the top. At the center of the curves are recessed

panels with raked surfaces and scrolled and chevron details; these panels are stepped towards the top and rise past the height of the curved wall.

The west portion of the primary façade contains two recessed entrances that are capped with a decorative panel and comprise original, partially glazed metal doors accessed by shallow steps. An additional entrance is found in the east portion of the façade and consists of a single wood door capped with a decorative panel. Additional bays with this same panel are infilled.

The west façade is dominated by the two-story volume positioned near the corner of Romaine Street and N. Sycamore Avenue. This volume features two bays that are highly ornamented with zigzag patterns and other geometric motifs. The bays are bisected by a stepped tower that projects past the height of the building and is flanked by squared decorative plates. At the base of each bay are recessed entrances capped by a metal grate with a zigzag pattern. Single windows with a decorative surround are located at the second floor.

The remainder of this façade is one-story in height and contains single, multi-light steel windows with tall narrow openings. Most of the windows are painted over but some are boarded and contain metal security bars. This portion of the façade lacks decorative architectural details, but the parapet is slightly stepped back as seen on the primary façade. Near the southern portion of this façade is an additional entrance with paired metal doors and a canopy and two raised loading docks with roll-up metal garage doors.

The east façade is generally one-story in height with the exception of the two-story volume near the northern edge and a three-story volume near the southern edge. Set slightly behind the three-story volume is a tall exhaust tower with a stepped concrete surface and a fluted cap. The northern portion of the façade features multiple storefronts, which have been modified from their original design. Original steel windows are located along the southern portion of the façade at the first floor and at each floor of the tower, but the window glazing has been painted over. The façade contains two recessed entrances, one with paired metal doors located at the base of the three-story volume, and one with a single metal door with a transom, located at the base of the two-story volume. A recessed, raised loading dock with a metal roll-up garage door is located at the southern edge of the façade.

On the east façade, Art Deco detailing is confined to the two-story volume at the northeast corner of the building. Here, the parapet is slightly recessed, as seen on the primary facade. Paired steel casement windows with a transom, all with their glazing replaced, are located at the second floor of the volume. A vertical projection with a stepped peak flanked by scrolled molding bisects the windows and rises past the height of the roof parapet. This portion of the façade also contains a metal fire escape with a chevron-patterned balustrade.

The south façade features painted board-formed concrete exterior walls and lacks architectural detailing; it also has multiple utilitarian additions. At the center of the façade is a one-story, pent-roofed addition with a false front. It contains two single metal doors and single and paired windows of an unknown material, some with metal security bars. Affixed to the east end of the addition is a garage or loading dock constructed of ribbed metal panels and a wide canopy of an unknown material. A roll-up

metal garage door is located at the west end of the addition. West of the addition, and spanning the remainder of the façade, is a wide, pent-roofed metal canopy with exposed beams and metal post supports.

Located south of the main building, at the eastern edge of the site, is a small, one-story commercial building constructed in 1952.¹ This building has a rectangular plan and is constructed of concrete block and glass. It is capped with a flat roof with wide, overhanging eaves and composition roofing; the roof has chamfered corners at the primary, east-facing façade. The building features wide expanses of aluminum-framed, floor-to-ceiling glazing.

Alterations

Historic and recent photos of the building and alteration permits obtained from the Los Angeles Department of Building and Safety (LADBS) indicate that the exterior of the building has endured only minor alterations. Interior alterations, beginning in 1933 and continuing through 2013, largely consisted of tenant improvements, as well as systems upgrades and disabled access accommodations. Due to the substantial number of interior alterations, only a partial list (of the more substantial modifications) is included below:

- | | |
|-----------|--|
| 1933-2013 | Interior tenant improvements including remodeling; removal/addition of non-loadbearing partitions; alteration and repair of incinerator; repairs to fire sprinklers; and systems/ADA upgrades |
| 1934 | Construct beer cooler room (City of Los Angeles, Permit No. 2269) |
| 1945 | Convert car storage area into employee's cafeteria – enclose existing lean-to car shelter and plaster ceiling; cut off overhang and install fire wall and plaster exterior (City of Los Angeles, Permit No. 2684 and 1655) |
| 1951 | Add wood frame building at rear (City of Los Angeles, Permit No. 14220) |
| 1952 | Add new concrete block partitions, acoustical ceiling tile, and wood counters; storefront alterations including new plate glass (City of Los Angeles, Permit No. 32978) |
| | Remove existing wood dock and replace with reinforced concrete (City of Los Angeles, Permit No. 35383) |
| | Construction of one-story commercial building at 941 N. Orange Drive (City of Los Angeles, Permit No. 36186) |

¹ This building has an address of 941 Orange Drive.

1954	Repair fire damage (City of Los Angeles, Permit No. 92336)
1956	Parapet correction adjacent to N. Sycamore Avenue and Romaine Street (City of Los Angeles, Permit No. 50406)
1957	Add carport (City of Los Angeles, Permit No. 62627)
1961	Parapet correction adjacent to Romaine Street, N. Orange Drive, and N. Sycamore Avenue (City of Los Angeles, Permit No. 1262)
1966	Alter portion of storefront at 949 N. Orange Drive; add office space and renovate (clean and paint) (City of Los Angeles, Permit No. 26858)
1973	Add executive car parking area (City of Los Angeles, Permit No. 66980)
1979	Close and plaster exterior windows and plaster; patch interior ceiling (City of Los Angeles, Permit No. 78409)
1984	Sandblast stucco walls on west side of building (at 948 N. Sycamore Avenue) (City of Los Angeles, Permit No. 04900200037)
2002	Re-roof building (City of Los Angeles, Permit No. 0216-20000-21385)
2010	Remodel warehouse area to create a check-in area; add loading dock with exterior roll-up doorway (City of Los Angeles, Permit No. 10016-1000-22036)

ARG's site visit found that the building has experienced some unpermitted cosmetic alterations including the replacement of glazing in some windows; the painting over of some windows; and additional modifications of the east façade (N. Orange Drive) storefronts (between 2009 and 2011).

Character-defining features

Site

- Prominent location of the building, comprising the width of the block between N. Orange Drive and N. Sycamore Avenue
- Large volume of the building, flush with the sidewalk on the north, east, and west facades

Exterior

- Rectangular footprint, which fills the northern half of the parcel

- Concrete construction
- Painted concrete exterior walls
- Flat roof with a flat parapet
- Stepped parapets near the center of the primary (north) façade
- Complex, stepped massing of one, two and three story volumes, which emphasize the verticality of the building
- Utilitarian character of the east, west, and south facades, with decoration mostly limited to the two-story volume of the building spanning Romaine Street
- Exhaust tower with stepped, geometric pattern
- Courtyard on primary façade, bounded by stepped piers and a wrought-iron gate with sunburst and floral patterns
- Glazed tile planter in courtyard
- Primary entrance with stoop, decorative surround, and double metal glazed doors
- Fenestration including steel-sash, multi-light fixed, awning, single-hung, and casement windows
- Tall narrow window openings that appear to be punched into the façade
- Decorative window surrounds
- Bays of decorative panels and fenestration on the primary and west facades
- Recessed entrances, with decorative panels above
- Partially glazed metal doors on the primary façade
- Art Deco style cast decorative elements, including reeded panels, stepped parapets, and vertical projections, and all chevron, zigzag, floral, scrolled, and geometric details
- Art Deco style fire escape on east façade

B. Statement of Significance

Summary

The Howard Hughes Headquarters meets the following criteria for designation as a Los Angeles Historic-Cultural Monument (HCM):

It is identified with important events of national, state, or local history, or exemplifies significant contributions to the broad cultural, economic or social history of the nation, state, city or community;

It is associated with the lives of historic personages important to national, state, city, or local history;

It embodies the distinctive characteristics of a style, type, period, or method of construction.

Built in 1930-1931, the property at 7000 Romaine Street is significant as an early entertainment industry support service facility (color film manufacturing plant) in Hollywood. It is also significant as the longtime headquarters of the Howard Hughes business empire, which occupied the building between 1930 and 1976, and is closely associated with iconic entrepreneur Howard Hughes during the most productive period of his career. The building also embodies the distinctive characteristics of the Art Deco architectural style, making it inherently valuable for a study of 1930s architecture in Los Angeles.

In 2015, the SurveyLA citywide historic resources inventory identified the subject property as individually eligible for listing in the National Register of Historic Places, the California Register of Historical Resources, and as a Los Angeles Historic-Cultural Monument; it was evaluated as an excellent example of Art Deco industrial architecture, and as an excellent and rare example of a 1930s industrial building in the entertainment industry support services area of Hollywood. The property was also included in the SurveyLA-identified Entertainment Industry Support Services Planning District, a large (750+ buildings) area containing “the most significant collection of entertainment industry-related support services buildings in Hollywood.”²

Development of Entertainment Industry Support Services in Hollywood

Established on land that was originally part of the Spanish land grants Rancho La Brea and Rancho Los Feliz, Hollywood began as a small agricultural community in the late 19th century. Its agricultural character quickly changed in the early 20th century as the establishment of electric railway lines and the

² Historic Resources Group, “SurveyLA Historic Resources Survey Report: Hollywood Community Plan Area, Appendix: Historic Districts and Planning Districts” (prepared for the City of Los Angeles Department of City Planning, Office of Historic Resources, 2015).

development of large real estate tracts transformed the community into a bustling suburb of Los Angeles. In 1903, the City of Hollywood was officially incorporated, and in 1910, it became part of the City of Los Angeles. Shortly thereafter, Hollywood saw the beginnings of a film production industry, which quickly proved to be the primary driver of its economy and identity. New Jersey-based Nestor Films began leasing Blondeau Tavern in Hollywood for use as Los Angeles' first motion picture studio in 1912. A number of East Coast film companies followed, hoping to take advantage of Hollywood's benign climate, picturesque scenery, and abundance of relatively cheap land.³ In 1920, Warner Brothers acquired a lot at Sunset Boulevard and Bronson Avenue, and in 1924, Columbia established itself on Gower Street, a block south of Sunset. Buster Keaton, Pickford Fairbanks, and Reliable studios soon followed.⁴ By 1926, the film business had become a \$1.5 billion-a-year industry, and U.S. film production accounted for 90 percent of the world's films, most of which were developed out of Hollywood.⁵

The rapid expansion of motion picture-related physical facilities during the 1910s and 1920s alarmed many Hollywood residents, who saw the new industrial buildings as a drag on property values and a draw for undesirable, lower-class employees and new residents.⁶ The construction of Charlie Chaplin's studio in the residential area of Sunset and La Brea between 1917 and 1919 spurred particular protest, despite his use of a residentially-scaled Tudor Revival design. The City responded by establishing several industrial zones specifically designated for entertainment industry and motion picture use. The largest of these, containing over 750 entertainment-related industrial and commercial properties (and a small number of residences), was oriented around the intersection of Santa Monica Boulevard and Highland Avenue near major studios including Paramount Pictures, Warner Brothers, RKO, Columbia, and United Artists.⁷

Roughly bounded by Formosa Avenue, Lexington Avenue, Lillian Way, and Melrose Avenue, this industrial area was developed from multiple tracts and provided studio support services like prop houses, costume houses, laundry plants, production offices, film laboratories and processing plants, film vaults, warehouses, and vendors for equipment like cameras and lighting.⁸ It remains a significant collection of these resources, many of which are still in operation, and includes individually significant entertainment industry support service properties like the Brunswick Radio Corporation's record pressing plant (7070 W. Romaine Street, 1933), the Hollywood Laundry Company (900 N. Highland Avenue, 1927), Technicolor Laboratory (6311 W. Romaine Street, 1930), and the Toberman Storage building (1025 N. Highland Avenue, 1925).⁹

7000 Romaine Street: Multicolor, Ltd. and Howard Hughes Headquarters

Among the many notable properties in Hollywood's main entertainment industry support services district is 7000 Romaine Street, constructed by Multicolor, Ltd. in 1930-1931 as a film manufacturing plant. Established in the mid-1920s, Multicolor was an innovator in the color film process and used what is known as a subtractive color process, pioneered by Prizma Color in the late 1910s.¹⁰ In 1930, wealthy entrepreneur and filmmaker Howard Hughes purchased a controlling share of the company's stock, foreseeing a day when all motion pictures would be filmed in color. As the *Los Angeles Times* opined, "Entrance into the color field will signal the first real bid of the young Texas millionaire for definite recognition as a motion-picture producer."¹¹ Hughes filmed a sequence for his film *Hell's Angels* in Multicolor, but it had to be printed by rival Technicolor since Multicolor was not up to the printing task.¹² Multicolor saw only limited success in a number of motion pictures produced between 1929 and 1932, despite grand ambitions; a *Los Angeles Times* article on the progress of its Romaine Street facility noted it was designed to "supply not only the studio demand, but also to serve the amateur, commercial and educational fields...The company at present is establishing branch sales offices in Chicago."¹³

At the time of its construction, the Multicolor facility's 50,000 square foot building was touted as featuring state of the art laboratory facilities and executive offices as well as a film manufacturing plant; including land, building, and equipment, the new facility was said to cost \$2,000,000.¹⁴ It was built by Myers Brothers, a large Los Angeles contracting firm specializing in structures for motion picture companies (including large sound stages) and oil companies (constructing 900 service stations nationwide).¹⁵ No architect is listed on the construction permit for 7000 Romaine Street, so the building is presumed to have been designed by someone on staff at Myers Brothers.¹⁶ During construction or shortly after its completion, Hughes had Myers Brothers construct additional film storage vaults and a cutting room.¹⁷

Hughes invested a great deal of money in researching color film development, but his company was unable to improve on its technique enough to be profitable. Multicolor was not alone in its struggles—color film did not become the standard in motion pictures until the late 1940s, when Kodak's Eastman

¹⁰ Wikipedia, "Color Motion Picture Film," https://en.wikipedia.org/wiki/Color_motion_picture_film, accessed 31 August 2017.

¹⁵ *Los Angeles Times*, "Largest Sound Stage Finished for Film Unit," 28 September 1930; Myers Bros. Display Ad, 2 January 1931; "Interesting Personalities Around Los Angeles," 26 July 1938.

¹⁶ There is a 1930 construction permit and a 1929 *Los Angeles Times* reference to plans in progress for a Good Humor Ice Cream factory at this location, designed by Hamm, Grant & Bruner (LADBS Permit 3884, 24 February 1930; "Ice Cream Company Will Erect Factory," 29 December 1929). However, the permit specifies a 60 x 101 ft. building fronting on N. Sycamore Avenue, and there is no confirmation it was ever built. Based on other permits for a 297 x 111 ft. Multicolor building (e.g., LADBS Permit 18839, 11 August 1930) it is presumed that the current building was new construction in 1930 rather than an addition/alteration to an existing building. It is unknown whether Hamm, Grant & Bruner were involved in its design.

¹⁷ *Los Angeles Times*, "Building Activities Listed," 21 June 1931; LADBS Permits 26040 (27 October 1930), 11453 (3 June 1931).

film finally provided an affordable, easily developable, readily replicable alternative to expensive film processes like Technicolor and Kodachrome.¹⁸ Multicolor went out of business in 1932, and all of its equipment was liquidated in 1933.¹⁹ Hughes leased space in its large Romaine Street facility to a brewery but retained the Romaine Street-fronting spaces as offices and vaults and used the building as his primary base of operations. During World War II, he converted the building to an ammunition plant producing “jamless bullet belts” for quick feeding into machine guns, under the auspices of his Hughes Aircraft Company’s armament division.²⁰ After the war, additional tenants included a candy factory and other film production companies.

The 7000 Romaine Street building remained the control center of Hughes’ sprawling, multidisciplinary business empire for decades, despite a brief change in ownership. In 1945, Hughes sold the building to a group of investors, who then sold it to the Eastman Kodak Company (who made some alterations including the first Orange Street storefront modifications).²¹ The Hughes company maintained continuous residence in the building, and then bought it back from Eastman Kodak in 1957.²² After the re-acquisition, “Romaine,” as it was known to Hughes employees, became the company’s official headquarters. Though the notoriously eccentric Hughes himself usually worked from one of many houses and hotels, “Romaine” contained the offices for his chief of staff, executives, aides, talent scouts, bookkeepers, and other staff. As Hughes’ biographers Donald L. Barlett and James B. Steele described,

When the [Multicolor] effort failed, the building remained as the site of his motion-picture operations and became a kind of catch-all West Coast headquarters. By the mid-1950s, Romaine had become central to his life in every way. It was the conduit through which he transmitted orders to each branch of his empire, and those who worked there also leased his houses and hotel suites, provided him with drivers and guards, hired his cooks and servants, paid his bills, and answered his personal letters. Centering as it did almost exclusively on Hughes, Romaine Street was tightly controlled, and access to it limited.²³

Security was paramount at the building because its vaults stored negative of prints of Hughes’ films, as well as his personal possessions, memorabilia, and archives. In a 1974 break-in, burglars stole thousands of confidential files (including a sensitive memo regarding a purported CIA-Hughes plan to build a ship to retrieve a sunken Soviet submarine), along with \$60,000 in cash.²⁴ The Romaine Street facility gained a measure of notoriety due to this incident, as a “stone fortress” which had been breached despite the

Hughes Company's infamous secrecy and security.²⁵ After Hughes died in 1976, the building was sold to producer Knight Harris.²⁶

Howard Hughes

Born into wealth in Texas in 1905, Howard Hughes was orphaned when he was a teenager and used his Hughes Tool Company inheritance to create a multimillion-dollar empire spanning the worlds of aviation, filmmaking, real estate, and biomedical research. He withdrew from Rice University after his father died in 1924 and moved to Los Angeles to pursue filmmaking. Hughes quickly established himself with the release of financial successes *Everybody's Acting* (1927), *Two Arabian Knights* (1928), and *The Racket* (1928), then threw himself (and a great deal of money) into making *Hell's Angels* (1930), a World War I aviation epic noted for its innovative cinematography. Later films, including *Scarface* and *The Outlaw*, cemented Hughes' status as an ambitious motion picture producer. Hughes continued to pursue his film interests through the 1950s by acquiring controlling shares of companies like Multicolor Ltd. and RKO Studios, and producing a number of additional film projects. During this time, however, his primary interest shifted toward aviation.

A lifelong flying enthusiast, Hughes established the Hughes Aircraft Company in 1932 and focused on building prototype aircraft like the Hughes H-1 racer and the enormous Hughes H-4 Hercules, known as the "Spruce Goose." He flew these and other aircraft himself, setting a number of records for air speed, completing an around-the-world flight, and surviving at least two serious crashes. These feats, along with his highly publicized relationships with Katharine Hepburn and other actresses, made Hughes a celebrity. Hughes Aircraft became a major defense contractor during and after World War II and expanded its scope to eventually include technologies from spacecraft to missile systems. Hughes had a stake in commercial aviation as well, using his majority share of Trans World Airlines (TWA) stock to develop new civilian aircraft and expand the existing network of commercial flights. He later owned several other small airlines.

In the post-World War II period, Hughes expanded his investments to include vast real estate holdings, much of which was in the Las Vegas area; these holdings were developed starting in the 1960s and represent a sizable piece of that city's residential areas today. He also purchased a number of Las Vegas hotels, living in a succession of them to avoid paying California taxes. In the early 1950s, Hughes established the Howard Hughes Medical Institute in Miami to fund innovative biomedical research.

Throughout the 1950s and 1960s, Hughes continued to be a widely known celebrity, though he was very rarely seen in public. One of his plane crashes, in 1946, caused him severe pain for the rest of his life and led him to become addicted to painkillers; it also appears to have triggered or accelerated mental illness which made him progressively more reclusive and unstable. In 1958, Hughes spent four months in a studio screening room watching movies. In 1963, he refused to appear in court or be deposed for an antitrust lawsuit based on his TWA stake; this led to a default ruling against him, and he was forced to

²⁵ *Los Angeles Times*, "Southland," 3 July 1977.

²⁶ *Ibid.*

sell his stock in the company.²⁷ Hughes' mysterious behavior led to ever-greater public interest in him, but by the late 1960s it had also resulted in his complete detachment from his business empire. It was run by company executives while he moved from property to property, spending time in the Bahamas, Nicaragua, Canada, England, and Mexico.²⁸ He died of kidney failure in 1976, without a will.

Art Deco Architecture

The Art Deco style emerged in the United States in the 1920s, inspired primarily by Eliel Saarinen's 1922 unrealized design for the *Chicago Tribune* building and the 1925 *Exposition Internationale des Arts Décoratifs et Industriels Modernes* in Paris. Considered the first major style to consciously reject historical precedents (unlike its Period Revival counterparts), Art Deco drew on the industry of the Machine Age for designs applicable to anything from jewelry to skyscrapers. Art Deco architecture enjoyed a brief but influential reign as Los Angeles' signature style, its sense of exuberance and glamour reflecting the city's 1920s boom resulting from its success in the oil, real estate and film industries.²⁹ It was applied largely to public and commercial buildings like theaters, department stores, and large hotels, with rarer use in single-family residential architecture. Hollywood's film industry played an indispensable role in the regional adaptation of Art Deco architecture, catering to popular interest in exotic worlds by romanticizing the style and bringing it to the masses through the architecture of its theaters and studio buildings as well as its stage sets.

Art Deco is characterized by its vertical emphasis (enhanced by elements like fluted pilasters, stepped towers, piers, and spires), flat roofs with parapets, steel fixed or casement windows, and smooth wall surfaces (typically stucco). Despite Modern tendencies, the style also embraced ornamentation that was uninhibited and extravagant. Decoration included highly stylized, geometric motifs such as zigzags, chevrons, spirals, steps, ziggurats, and pyramids. These appeared both as molded features and as part of ornate metalwork. Ornamentation also depicted motifs found in ancient mythology and indigenous cultures, as well as local flora, fauna and natural features; the latter is commonly seen in Southern California-inspired imagery such as sunbursts, seashells, foliation, and scenes of paradise.³⁰ Experimentation with materials offered new potential for applied decoration; metals could be treated in a variety of different ways, while terra cotta could be used to apply color to a building's exterior but was inexpensive and easy to maintain.³¹ The vibrant, exhilarating images that resulted reflected a society that was very much living in the moment.

A growing dependency on the automobile had a significant influence on Los Angeles' pre-World War II architectural design, as architects designed to accommodate the automobile. With its vertical emphasis and exuberant ornamentation, Art Deco proved the ideal style to attract the attention of driving

passersby. As a result, a number of prominent Art Deco buildings were constructed along rapidly developing commercial corridors in the Wilshire district and Hollywood, such as Wilshire Boulevard, Santa Monica Boulevard, Melrose Avenue, and W. 3rd Street. Wilshire's Miracle Mile boasted the grandest examples, including the Wilshire Tower (HCM #332), the Wiltern Theatre/Pellisier Building (HCM #118), the E. Clem Wilson Building, and the former Bullocks Wilshire Department Store (now Southwestern Law School, HCM #56). Downtown Los Angeles also had a notable collection of Art Deco buildings, including the Garfield Building (HCM #121), the Oviatt Building (HCM #195), the Eastern Columbia Building (HCM #294) and the Los Angeles Central Library (HCM #46). However, the fact that it was already well established by the 1920s and '30s "precipitated less new building...than the other two 'rival' downtowns'" of Hollywood and Miracle Mile.³²

As the United States hit the height of the Great Depression, Art Deco came to be seen as too lavish and exorbitant. The American public turned to simpler, forward-thinking Moderne styles like the Streamline Moderne, PWA Moderne, and Hollywood Regency/Regency Moderne, all of which transparently "evoked an idea of the future."³³ By the mid-1930s, Art Deco had largely fallen out of fashion, but it had left a significant mark on the architecture of Los Angeles.

The subject building was developed at the height of the Art Deco movement in Los Angeles and is exemplary of the style, with a flat roof with stepped and flat parapets; vertical elements including piers and towers; vertically oriented fenestration patterns; and abundant geometric and floral decorative elements.

Period of Significance

The period of significance for 7000 Romaine Street is defined as 1930-1931 for its Art Deco architecture, reflecting its period of construction. The period of significance for use as an entertainment industry support service building and for its association with Howard Hughes is 1930-1976, reflecting the period of its occupation by the Hughes Company; this period ends with Hughes' death in 1976 and the subsequent sale of the property.

³³ Gebhard and Winter, *An Architectural Guidebook*, 22.

Integrity

In addition to meeting multiple eligibility criteria, 7000 Romaine Street retains a high degree of integrity. Historic integrity is the ability of a property to convey its significance and is defined as the “authenticity of a property’s historic identity, evidenced by the survival of physical characteristics that existed during the property’s prehistoric or historic period.”³⁴ The aspects of integrity, as defined by the National Park Service, are location, design, setting, materials, workmanship, feeling and association.

- **Location:** The subject property is in its original location and therefore retains this aspect of integrity.
- **Design:** The subject property retains most of its character-defining features from its period of construction, and therefore is able to convey its historic significance as an Art Deco industrial building. Exterior alterations have taken place, including storefront modifications on the east façade; addition and alteration of rear (south) carports and docks; replacement and painting of some glazing; and minor parapet corrections. However, the primary façade remains intact and the other alterations have only minimal impact on the large building. The property continues to exhibit characteristics of the Art Deco style including a flat roof with stepped and flat parapets; vertical elements including piers and towers; vertically oriented fenestration patterns; and geometric and floral decorative elements. As such, the property retains integrity of design.
- **Setting:** The property is located in the Hollywood neighborhood of Los Angeles, amongst a number of entertainment industry support services buildings. While many of the buildings have experienced alterations and some recent infill development has occurred, this industrially zoned area retains many original properties and planning features. It is readily recognizable as a unified grouping of entertainment industry support buildings. As such, this element of integrity remains intact.
- **Materials:** The subject property has experienced some minor alterations that have affected its integrity of materials, primarily the east façade storefront alterations (including window and door opening modifications and window and door replacements) as noted above. However, all other materials dating to the building’s period of significance remain intact, including stucco cladding, steel windows, decorative molding, metal grilles, and tile accents. Because the property retains the majority of its materials from the time of its construction, this element of integrity remains intact.
- **Workmanship:** The subject property’s original workmanship is still evident through its overall construction method and materials; minor alterations as noted above have not obscured details

³⁴ U.S. Department of the Interior, *National Register Bulletin 16A: How to Complete the National Register Registration Form* (Washington D.C.: National Park Service, 1997), 4.

like stepped vertical elements, decorative molding, metal grilles, and tilework. Because the property retains the physical characteristics from the time it was constructed, it continues to reflect the workmanship of its builders and therefore retains its integrity of workmanship.

- **Feeling:** The property retains its essential character-defining features and appearance from its historical period. There have been no major alterations, and the existing alterations have affected a side façade rather than the primary façade. Further, the surrounding industrial district still reflects its original development. As such, the building retains integrity of feeling.
- **Association:** The subject property has retained its industrial and commercial uses since its construction in 1930-1931. As it retains its original appearance, it is clearly recognizable as a 1930s Art Deco building, and is directly linked with this period of development in the city. Therefore, it retains integrity of association.

134-15

IN THE CITY OF LOS ANGELES

Being a Subdivision of a portion of Lot 1, Tract No 215, as recorded
in Map Book 14, Pages 42 and 43, Records of Los Angeles County, California.
November, 1926. C.N. Wright, Sur.
Scale 1 in. = 100 ft.

J. Matschke
500 Deputy

Basis of Bearings taken from the bearing of
Romaine Street, as per T.F. 112 4685, H.B. 51-13.

I, C.N. Wright, hereby certify that I am a Licensed Surveyor of the State
of California, and that this map, consisting of two sheets, correctly
represents a survey made under my supervision, in November, 1926, and
that all of the monuments, shown hereon, actually exist and their positions
are correctly shown.

C.N. Wright

I hereby certify that I am the owner of, or interested in, the land included
within the subdivision shown on the annexed map, and that I am the only person
whose consent is necessary to pass a clear title to said land, and I consent to the
making of said map and subdivision, as shown within the colored border line,
and hereby dedicate to the public use all the Avenues, Drives and Alleys,
shown on said map within said subdivision.

STATE OF CALIFORNIA } S.S.
COUNTY OF LOS ANGELES }

On this 26 day of December in the year A.D. 1926,
before me James M. Simpson, a Notary Public, in and for said
County of Los Angeles, State of California, residing therein, duly Commissioned
and sworn, personally appeared G. Allan Hancock, known to me to
be the person whose name is subscribed to the within instrument, and
acknowledged to me that he executed the same.
In witness whereof I have hereunto set my hand and official seal
the day and year in this certificate first above written.

James M. Simpson
Notary Public in and for the County of Los Angeles, State of California.

Application for the Erection of Buildings

CLASS "A" - ~~REINFORCED CONCRETE~~ *Reinf. Concr.*

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

- First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof.
- Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.
- Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

REMARKS

The permit herein described is issued to the undersigned owner with the understanding that said owner assumes all responsibility for the construction of the foundation and that the plans are neither checked nor approved as to construction or as to the loads presumed to be carried on same or as to super-structure to be erected thereon.

Before the foundation is used, or a permit issued for the construction of any structure on the foundation, the same must be made to conform in every manner with the then existing ordinance or law governing the construction of foundations for buildings.

THIS PLAN IS NEITHER CHECKED NOR PROVED FOR LOADS OR SUPERSTRUCTURE. PLAN MUST BE KEPT ON JOB.

CITY OF LOS ANGELES DEPARTMENT OF BUILDING AND SAFETY BUILDING DIVISION

Application to Alter, Repair or Demolish

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

- First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof.
Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.
Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

TO ADD-ALTER-REPAIR-DEMOLISH AND FOR CERTIFICATE OF OCCUPANCY

INSTRUCTIONS: 1. Applicant to Complete Numbered Items Only.

Form with fields 1-15: LEGAL DESCR., PRESENT USE OF BUILDING, JOB ADDRESS, BETWEEN CROSS STREETS, OWNER'S NAME, OWNER'S ADDRESS, ENGINEER, ARCHITECT OR DESIGNER, ARCHITECT OR ENGINEER'S ADDRESS, CONTRACTOR, SIZE OF EXISTING BLDG., CONST. MATERIAL, JOB ADDRESS, VALUATION TO INCLUDE ALL FIXED EQUIPMENT, NEW WORK (sandblasting 2 walls (partial only) (wet)).

Form with fields 16-21: NEW USE OF BUILDING, TYPE, DWELL UNITS, GUEST ROOMS, P.C., S.P.C., B.P., I.F., D/S, DIST. OFFICE, P.C. NO., PLAN CHECK EXPIRES ONE YEAR AFTER FEE IS PAID, DECLARATIONS AND CERTIFICATIONS, LICENSED CONTRACTORS DECLARATION, OWNER-BUILDER DECLARATION, WORKERS' COMPENSATION DECLARATION, CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE, CONSTRUCTION LENDING AGENCY.

DECLARATIONS AND CERTIFICATIONS LICENSED CONTRACTORS DECLARATION

16. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect. Date 2/28/84 Lic. Class C-61 Lic. Number 293735 Contractor Dean James Safeway Sandblast

OWNER-BUILDER DECLARATION

17. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).) I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.) I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.) I am exempt under Sec. B. & P. C. for this reason Date Owner's Signature

WORKERS' COMPENSATION DECLARATION

18. I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Worker's Compensation Insurance, or a certified copy thereof (Sec. 3400, Lab. C.). Policy No. 335 unit 3 Insurance Company State Fund Certified copy is hereby furnished. Certified copy is filed with the Los Angeles City Dept. of Bldg. & Safety. Date 2/28/84 Applicant's Signature Applicant's Mailing Address 9450 W. Jefferson Blvd, Culver City 90230

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

19. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California. Date Applicant's Signature

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

20. I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.). Lender's Name Lender's Address

21. I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection, that it does not approve or authorize the work specified herein, that it does not authorize or permit any violation or failure to comply with any applicable law, that neither the city of Los Angeles nor any board, department, officer or employee thereof make any warranty or shall be responsible for the performance or results of any work described herein or the condition of the property or soil upon which such work is performed. PERMIT EXPIRATION

This permit expires two years after the date of the permit issuance. This permit will also expire if no construction work is performed for a continuous period of 180 days (Sec. 98.0602 LAMC). Claims for refund of fees paid must be filed within one year from the date of expiration for permits granted by the Dept. of Building & Safety (Sec. 22.12 & 22.13 LAMC).

17. LICENSED CONTRACTOR'S DECLARATION

I hereby affirm under penalty of perjury that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect. If doing work on a residential property, I certify that I hold a valid certification as a Home Improvement contractor per Business and Professions Code, Section 7150.2c. The following applies to B contractors only: I understand the limitations of Section 7057 of the Business and Professional Code related to my ability to take prime contracts or subcontracts involving specialty trades.

License Class: C-39 Lic. No.: 723225 Contractor: R. Loh

18. WORKERS' COMPENSATION DECLARATION

I hereby affirm, under penalty of perjury, one of the following declarations:

I have and will maintain a certificate of consent to self insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: State Fund Policy Number: 1454231-02

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS (\$100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

19. ASBESTOS REMOVAL DECLARATION

I certify that notification of asbestos removal is either not applicable or was sent to the AQMD or EPA as per section 19827.5 of the Health and Safety Code.

20. CONSTRUCTION LENDING AGENCY DECLARATION

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

Lender's name (if any): _____ Lender's address: _____

21. FINAL DECLARATION

I certify that I have read this application INCLUDING THE ABOVE DECLARATIONS and state that the above information INCLUDING THE ABOVE DECLARATIONS is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein, and it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed. I further affirm under penalty of perjury, that the proposed work will not destroy or unreasonably interfere with any access or utility easement belonging to others and located on my property, but in the event such work does destroy or unreasonably interfere with such easement, a substitute easement(s) satisfactory to the holder(s) of the easement will be provided (Sec. 91.0106.4.3.4 LAMC).

By signing below, I certify that:

- (1) I accept all the declarations above namely the Licensed Contractor's Declaration, Workers' Compensation Declaration, Asbestos Removal Declaration, Construction Lending Agency Declaration and Final Declaration; and
- (2) This permit is being obtained with the consent of the legal owner of the property.

COLOR FILM COMPANY PURCHASED BY HUGHES

Los Angeles Times (1923-Current File); Jun 24, 1930;

ProQuest Historical Newspapers: Los Angeles Times

pg. A20

COLOR FILM COMPANY PURCHASED BY HUGHES

Howard Hughes, 25 years of age, and possessor of a fortune estimated at \$75,000,000, announced last night the latest venture of his spectacular motion-picture career, the purchase of Multicolor Films, Inc.

That the purchase of this concern, marking the entrance of the young millionaire into the field of color photography in motion pictures, was contemplated by him, was the subject of reports circulated several days ago.

The price paid, including plans for the construction soon to be undertaken by Mr. Hughes of a laboratory in Hollywood, was said to encompass an expenditure in excess of \$1,000,000. The exact price paid for Multicolor was not revealed, however.

Mr. Hughes, who is president of the Caddo Company, producer of "Hell's Angels," the film now hav-

ing a showing in Hollywood, negotiated for the purchase of Multicolor Films, Inc., through Rowland V. Lee, W. R. Fraser, W. T. Worthington and their associates, the owners.

Hughes is not ready to say in what part of Hollywood he expects to erect his laboratory, which is to cost \$500,000, it is said. The laboratory will not only be used in the development of Mr. Hughes's own productions, but will be thrown open to the use of other picture companies desiring to make use of the color process in the making of films.

Mr. Hughes began his career in motion pictures three and a half years ago. His company has produced five pictures, all successes. He inherited his money from his father, the late Howard Hughes, Sr., president of the Hughes Tool Company of Texas, one of the largest oil-tool concerns in the country.

LABORATORY STRUCTURE ANNOUNCED

Film Manufacturing Plant to be Erected Immediately in Hollywood

Announcement is made by H. B. Lewis, general manager of Multicolor, Ltd., of the immediate erection of a Class-A structure to be located between Orange, Romaine and Sycamore streets in Hollywood.

The building will be two stories in height, contain approximately 50,000 square feet of floor space and will have a completely equipped laboratory for the manufacture of Multicolor film. General and executive offices of the company will also be located in the building.

The Multicolor structure is being erected by Myer Brothers, contractors, and is scheduled to be completed and ready for occupancy within ninety days. It is stated that the laboratory plant will have a capacity adequate for future requirements. According to Lewis, the plant, when completed, will represent an expenditure of approximately \$500,000 for land, building and equipment.

Mausoleum Construction to Be Started Shortly

Additions to Hollywood Project Pictured

Bids are to be called for soon for the construction of a \$100,000 addition to the corridor units of Hollywood Mausoleum, according to Frank Heron, president and manager of the Hollywood Cemetery Association. The structure, to be erected by Chester M. Williams, Hollywood contractor, is to rise on the west property line of the cemetery, near Gower street and Santa Monica Boulevard. It will contain 638 crypts. The site for the addition is 48x144 feet. Construction work is scheduled to be completed by December.

BUILDING ACTIVITIES LISTED

EXPANSION OF PLANTS REPORTED

Numerous Recent Leases Held Indication of Gain in Businesses

Expansion of many Los Angeles concerns is seen in a statement of the J. W. Lewis Company, wholesale and manufacturing property brokers, who report the following leases at total rentals aggregating \$61,000.

Patek & Co. of San Francisco have more than doubled the facilities of their local branch through the leasing of the one-story brick building at 622 South Anderson street. They are manufacturers of laundry and dry-cleaning supplies.

Stewart Truck Corporation of California leased larger quarters at the northwest corner of San Pedro and Twenty-second streets. The one-story brick building at 613 Santa Fe avenue was leased by Joseph O. Scott for the manufacture of chemicals. Zeller Lacquer Manufacturing Company, Inc., obtained a lease on the storeroom at 1431 Santa Fe avenue.

General Distributing Company manufacturer of cosmetics, leased the one-story building at 2127 Santee street. Southern California Brokerage Company, wholesaler of paper products, leased the one-story brick building at 605-607 Imperia street. The storeroom at 415 Wal street was leased by William W. Kirk, manufacturers' agent for electrical merchandise and appliances. Pacific Coast Talc Company leased the one-story brick building at 2123 Bay street to provide additional warehouse space.

Six months after the completion of the \$1,500,000 Multicolor, Ltd., structure at 7000 Romaine street, Howard Hughes, owner, has awarded a contract to Myer Brothers for an addition to the plant. Increased business is declared to have created a need for additional storage vaults and these are being built at a cost of \$18,000. The company is said to be producing 1,000,000 feet of colored film every forty-eight hours. The storage vaults will be completed about July 15.

Completion of the Samuel Goldwyn residence on the beach at Santa Monica is scheduled for early in July, Myers states. The home represents an outlay of \$35,000.

R.-K.-O. studios at Culver City are erecting a scene dock and plaster shop costing \$35,000, which will be finished in about thirty days, by Myers Brothers. The concern just recently completed the \$90,000 St. Paul's Presbyterian Church at Third and Jefferson and will complete by July 15 a \$75,000 apartment-house for the late Charles Crawford at 335 Oakhurst, Beverly Hills.

Residence of Soap in Exhibit

A house made of soap, declared to be the first one constructed of this material, is now on display in the Architects' Building Material Exhibit at Fifth and Figueroa streets. It is a model of the Ralph B. Lloyd residence, John De Lario, architect, and was made by McKown & Kuehl, landscape architects of Beverly Hills.

Twelve cakes of soap were used in the construction of the house and gardens, and the plant material was made of green bath sponge. The Lloyd estate occupies four and one-half acres of ground and the architectural and landscape design are also presented in the soap and sponge model. The model will be displayed for two weeks in the Architects' Building.

Improvement of Acreage to Begin at Once

WOODLAKE, June 20. (Exclusive)

Work of converting the famous Robla Lomas 11,000-acre tract into a modern guest ranch was started the 8th inst., when J. J. Bierer of Woodlake started boring the first of a series of wells to supply the ranch with water.

Capt. John S. Dickerson, former range rider, world-traveler, adventurer and more recently banker and sportsman of New York, purchased the property May 1.

A village will be located about a mile from the Millwood road entrance to the property and will consist of the owner's home, twenty-five guest cabins, dining hall and stables, all of the early California adobe architecture. Work on construction of the buildings is expected to start as soon as water is available on the building site.

Ramps Replace Stairs in Home to Be Erected

An innovation in home building will be inaugurated soon in a West Los Angeles residential district when a two-story house without a stairway is erected. Ramps, heretofore used almost exclusively in theaters and department stores will be used to replace stairways.

The idea is that of Herbert M. Harwood, receiver for a building and loan company. He declares that the ramp idea will permit occupants of the home to move more easily and with greater safety from one floor to another. He asserts that but little more space is used by the ramps than by hallways and that the easy grade of the ramps will make them popular with the entire family, especially the aged and the children.

Committee of Brothers Named

Appointment of a vice-chairman and members of the business-property-management committee of the California Real Estate Association was announced yesterday by Cecil B. Barker, general manager for the C. O. C. Tatum Realtors, who heads the committee.

Albert Leonard of Santa Monica has been named vice-chairman and the personnel of the committee is composed of Bert G. Feist of San Francisco; Roscoe Porter of San Diego; Chris R. Jones of Sacramento and Aaron Snodgrass of Santa Barbara. Arrangements have been completed for a survey of business-property-management problems throughout the State to be conducted by the committee members, according to Barker.

HOME REPAIRS BEGUN

REDLANDS, June 20. (Exclusive) F. H. Lyon of Alvarado and Clark streets, has been given a permit for the rebuilding of his home there which was partially destroyed by fire. It will cost about \$2000 to make repairs.

FLEXIBLE DEATH—Tony Kutch, chief inspector at Hughes Aircraft Co. armament division, makes a final checkup on flexible feed chute of cartridge rolls for plane gunners. The chute races the ammunition to a .50-caliber machine gun in high speed test.

Times photos

FAST WORK—Miss Lucille Rhodes makes load test on electric booster. It pushes or pulls shell belts through the chute at a speed of 840 rounds each minute.

Jamless Bullet Belt Turned Out in Hollywood

Dreams of trigger-happy gunners on America's racing fighter planes and droning bombers are coming true at Howard Hughes' former color film plant in Hollywood.

The gunners wanted rugged chutes which would lift and feed ammunition to their machine guns and light cannon hot and fast. The steel had to pour out without snags or hitches—and in quantity. Nothing's worse than running out of ammunition during a red-hot dog fight.

Cartridge Corsets

Today miles and miles of stainless steel "cartridge corsets" and tens of thousands of electric boosters which hold them are coming off the lines at 7000 Romaine St. The Hughes Aircraft Co.'s armament division, managed by Claude C. Slate, converted the color film building for war duty and Hughes engineers designed the first flexible ammunition feed chute.

This was developed so it can be twisted into almost any position without binding the ammunition. There are no pile-ups or jams, even though the ammunition really flies through the chutes as fast as 840 rounds a minute. A booster, little larger than a hand grenade, uses electric power to keep it humming for the bursts of fire.

Hundreds of Shots

Hughes, Slate and the 550 employees are happy to know they're helping almost everyone from a light fighter ship to the B-29 Superfortress in spewing bullets.

Ammunition boxes no longer have to be replaced every time 30 to 50 rounds have been fired. Instead the feed chutes guide hundreds of shots to the gun and the line of steel may stretch from a tail stinger far down into a bomb bay.

Cafe Opposite Police Headquarters Robbed

A burglar entered a cafe at 170 N. Main St., just across the street from police headquarters in the City Hall between midnight Saturday and noon yesterday, picked open a safe, and took \$145 in cash.

Hughes: Code word is 'Romaine'

LOS ANGELES (UPI) — A two-story building at 7020 Romaine St. in Hollywood has become the focus of another cloak-and-dagger chapter in the saga of Howard Hughes.

The building is the "communications center" of Hughes' operations. Known as "Romaine" throughout the billionaire's empire, it has a 24-hour switchboard for relay of messages to and from subordinates around the world.

It has been a nerve center going back more than 25 years to the time when Hughes was making movies and designing aircraft. The headquarters of the parent Hughes Tool Co. was — and is — in Houston, Tex. It is now known as Summa Corp.

Equipped with sophisticated electronic security devices, "Romaine" is also believed the repository of personal files of the eccentric recluse who in recent years has flitted from Boston to Las Vegas to the Bahamas to Nicaragua to London to Vancouver, B.C.

He is now reported holed up in a luxury hotel on an island in the bay off Nassau, the Bahamas.

Around dawn last June 5, the Los Angeles Police Department received a call from the center reporting a burglary.

The police investigation reported that a gunman disarmed a security guard outside the building. The guard was forced to admit the burglars. Then he was trussed, gagged and blindfolded.

The intruders apparently spent four hours in the building. They burned open two safes with acetylene torches, ransacked files and desks without alerting others on duty.

The original report said the burglars took \$50,000 in cash and some art objects. The break-in was a one-day item in the local news.

But time has proved that

Hughes' communications center at 7020 Romaine St.

nothing involving Howard Hughes is likely to be insignificant.

About two weeks ago, authorities acknowledged that documents also had been stolen. They were said to detail Hughes' contributions to major political figures and dealings with the Central Intelligence Agency and Atomic Energy Commission.

One sensational report was that some documents related to a Hughes contract with the CIA to raise a sunken Russian nuclear submarine from the floor of the Atlantic.

Law enforcement officers were acknowledging such ru-

mors, but suddenly inquiries in that direction met with silence until the affair now has become labbed in some circles "The case of the Incredible Shrinking Submarine."

Global Marine, Inc., a Los Angeles firm which operates the *Glomar Explorer*, the world's most advanced marine mining vessel, denied any attempt had been made to raise a sunken sub.

Last week the district attorney's office revealed it was presenting evidence to a grand jury on the burglary. Such proceedings are secret but so extreme was the hushup in this case that witnesses were led in

through back corridors so even their identity could not be established.

At the same time, press reports appearing saying that an intermediary had approached the Hughes organization offering to return the stolen files for a ransom of \$500,000.

The Summa Corp. was said to have rejected the demand, principally on the reasoning there was no reason to believe extortionists would not keep photostatic copies.

Those reports have not had official acknowledgement. But it is known that the CIA and the FBI contacted the Los

Angeles police and the district attorney's office about the case and the grand jury proceedings.

The grand jury met for only one day — Thursday — this past week. Whether it had returned an indictment or would hear further evidence could not be determined.

A source at the district attorney's office said that, in any event, the investigation was being limited so that an indictment would refer only to a simple burglary and/or extortion and would not touch on matters of national security.

Howard Hughes, as always, was not available for comment.
